## COLORADO RIVER BOARD OF CALIFORNIA

The principal objective of the Colorado River Board is to protect California's rights and interests in the water and power resources of the Colorado River system. This is accomplished through investigations, through negotiations with the other basin states and federal agencies to obtain favorable administrative actions, and, if necessary, through litigation. Activities include analyses of the engineering, legal and economic matters concerning the Colorado River resources of the seven basin states (Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming) and all factors involved in the 1944 Mexican Water Treaty obligation to deliver Colorado River water to Mexico. The Board develops a single position among the agencies having established water and power rights in the Colorado River. The Board also collaborates with other California agencies, primarily the Department of Water Resources, State Water Resources Control Board, and Department of Fish and Game and works closely with the Attorney General, the Board's counsel.

By statute, the Board consists of eleven members that are appointed by the Governor: one from each of the six major public agencies having rights to the use of water or power from the Colorado River, three from the general public, and the Directors of the Departments of Water Resources and Fish and Game. The agencies are: Palo Verde Irrigation District, Imperial Irrigation District, Coachella Valley County Water District, the Metropolitan Water District of Southern California, San Diego County Water Authority, and City of Los Angeles, Department of Water and Power.

## PROTECTION OF CALIFORNIA'S COLORADO RIVER RIGHTS AND INTERESTS

### Program Objectives and Description

California's rights and interests in the Colorado River Basin must be preserved in order to continue the successful irrigation of about 650,000 acres in the Palo Verde, Yuma, Imperial, and Coachella Valleys of California and the furnishing of municipal, industrial, and agricultural water supplies and hydroelectric energy to portions of the six counties comprising the coastal area of southern California. The area served by Colorado River water and power has a population of about eleven million—more than half the state's population—and represents more than half the state's assessed valuation. The public agencies having the rights to use Colorado River water and power have invested about \$800 million in facilities for diversion and beneficial use of nearly five million acre-feet of water per year and for the generation and transmission of three and a half billion kilowatt-hours of hydroelectric energy annually.

Protection of California's Colorado River rights, including water quantity, water quality, and hydroelectric power, requires a continuous effort because plans for use of water by the seven states plus Mexico's deliveries exceed the available supply. California's present uses are approximately equal to the combined uses of the other six basin states. As the other states increasingly utilize their apportionments of Colorado River water, the river's problems become more severe. It is expected that California's use of river water will be cut to 4.4 million acre-feet annually in the 1980's when deliveries are expected to commence from the Central Arizona Project. Currently, the Colorado River supplies approximately 65 percent of the water used in Southern California.

Fulfillment of the Board's functions and obligations is a continuing program, requiring analysis and action on dynamically changing factors affecting Colorado River water and power supplies.

The major objectives of the program are as follows:

1. Achieve salinity levels in the Lower Colorado River at or below 1972 levels through (a) implementation of Title II of the federal 1974 Colorado River Basin Salinity Control Act, and (b) implementation of the salinity control plan to meet the numerical criteria approved by the seven-state Colorado River Basin Salinity Control Forum and adopted by the seven basin states as salinity standards, and (c) continual review and improvement of the control plan.

2. Work with the federal government and other states on Mexican Water Treaty problems. During 1979, relatively low reservoir releases from United States reservoirs in excess of delivery requirements, combined with flood flows from two summer storms, caused extensive flooding in Mexico. This indicated the poor shape of the Colorado River channel and levees in Mexico. Future high flood control releases that have a high probability of occurring during the next several years could cause major levee failures in Mexico that would not only cause damages, but would also result in flooding in California's Imperial Valley.

3. In January 1979, the U.S. Supreme Court appointed a Special Master to hear additional pleadings, including the U.S. Motion for Modification of the Supreme Court's Decree in *Arizona v. California*. Activities required by the Supreme Court's action include studies of claims for additional irrigable lands and associated water rights, technical assistance to the California Attorney General's office, and attendance at Court hearings.

4. Work with the Metropolitan Water District, other California agencies, the Colorado River Basin states, and the federal government to obtain the necessary approvals, and changes in Colorado River documents necessary for implementing the storage of water in Lake Mead during periods when Colorado River use will be reduced due to use of surplus water in the State Water Project and the withdrawals of the stored Colorado River water during periods of shortage in the State Water Project. This activity is an outgrowth of studies of this storage and withdrawal plan conducted during the 1978-79 and 1979-80 fiscal years by the Metropolitan Water District, Department of Water Resources, and the Colorado River Board, with the Board acting as lead agency.

5. Work with Arizona, Nevada, water users, and the federal government to determine acceptable methods for measuring subsurface return flows to the lower Colorado River. These measurements would allow establishment of credits for return flows under Article V(B) of the Decree in *Arizona v. California* for each diverter from the mainstream.

6. Work with the federal government and the Colorado River Basin states on reanalysis required to be performed in 1980, as part of the five-year cycle of analysis of federal criteria for operation of Colorado River Reservoirs.

7. Analyze alternative operating plans for handling the excess Colorado River flows expected during the next several years so as to balance power generation, the retention of water in storage, and to minimize flooding possibilities along the river and in Mexico.

8. Participate in studies conducted by the federal government of sources of water for municipal and recreational uses along the Colorado River that presently have no rights to Colorado River water.

9. Work towards amicable settlement of the basic disagreements between the four Upper Colorado River Basin states and the three Lower Basin states over interpretation of the Colorado River Compact. The major disagreement concerns the magnitude of the obligation of the Upper Basin states relative to the U.S.-Mexico Treaty guarantee of a delivery of 1,500,000 acre-feet/year to Mexico.

10. Analyze growth in demands for Colorado River water within the Basin, especially monitoring growth in the Upper Basin's energy development industries, to assure that developments as they proceed will not be adverse to California's interests.

11. Support federal studies of weather modification and vegetation management in the Colorado River Basin that would augment the river's flow.

12. Implement the California policy on the Bureau of Reclamation's Lower Colorado River Management Program and associated environmental aspects.

COLORADO RIVER BOARD OF CALIFORNIA—*Continued*

## DEPARTMENT OF CONSERVATION

The principal objectives of the Department of Conservation are:

1. To protect, conserve and encourage informed development of the State's soil, mineral, geothermal and petroleum resources; and to promote the conservation of agricultural and open space lands.
2. To identify geologic and seismic hazards and their underlying causative mechanisms, in order to provide information for prudent land use decisions.
3. To prevent, lessen or repair damage to the environment and other natural resources that may result from soil, mineral, geothermal and petroleum resource development.

### I. GEOLOGIC HAZARDS AND MINERAL RESOURCES CONSERVATION

#### Program Objectives and Description

The Division of Mines and Geology develops initial information and makes interpretive judgments about the geology and seismology of California. This information provides a critical perspective for governmental organizations and private enterprise in planning for and making decisions about the most appropriate use of the earth's surface and mineral resources. Emphasis is placed on prudent land use decision making; responsible development of mineral resources; safety of persons and property from geologic hazards; and effective reclamation of mined lands.

The work of the division is accomplished through three major Program Elements: Land Use Geology and Seismology; Mineral Resources Conservation; and Geologic Information and Publications.

The net increase of 3.2 personnel years in 1980-81 in continuing program costs is a result of the restoration of the Section 27.2 salary savings (4.6 personnel years) and a reallocation of salary savings and indirect cost (-1.4 personnel years).

In 1980-81, \$100,000 and one position is added from the Energy and Resources Fund to acquire additional geologic data in areas of the state that are unmapped or inadequately mapped. Field work will be done by qualified graduate students and others. Priority will be given to mapping areas where there is an immediate need for modern, precise geologic information as input to land use decisions.

Three positions are redirected in 1979-80 and 1980-81 from other hazards evaluation work to continue development of an EDP capability to process records obtained from strong-motion instrumentation. Two positions are redirected and one new position is added in 1980-81 to establish a Critical Design Review Unit. This capability will be used to render opinions on the adequacy of seismic parameters selected in the design of major public structures such as dams, powerplants and LNG facilities. One position is redirected in 1980-81 to maintain Strong-Motion Program seismic monitoring instruments. Federal funding is reduced in 1980-81 because several U.S. Geological Survey Grants established in previous years are completed and new grants are for lesser amounts.

In 1980-81, three positions previously added to investigate and inventory potential uranium deposits in the northern Mojave Desert will be redirected to Hazards Reduction because this study is essentially complete.

<sup>1</sup> Redirected positions from within existing authorization

For the list of Standard (lettered) footnotes, see the end of the Governor's Budget.

## a. Land Use Geology and Seismology

Through this element, the division provides comprehensive geotechnical information and interpretive judgments about the basic geologic and seismic conditions affecting all California land uses, both onshore and offshore. In this highly cooperative work effort, the division works with local government, Federal and State agencies, university researchers and scientists in the private sector.

## a.1. Basic Investigations

This component focuses on the basic geologic and seismologic framework of California. The objective is to establish and make available a baseline source of geotechnical information for a wide range of land-use applications. Pursuing this objective, division scientists conduct original field research and condense and integrate related data produced by State, Federal, university, and scientists from the private sector.

Investigations are also conducted of the geology of the coastline on behalf of the California Coastal Commission.

## Output

This work effort produces information which is compiled into regional geologic maps, additions to The Fault Map of California, supportive data for the State Geologic Map, the State Bouguer Gravity Map, the State Aeromagnetic Map, state and regional epicenter maps, and the California Earthquake Catalog.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	17.4	18.3	19.7	\$648,426	\$748,347	\$886,534

## a.2. Hazards Reduction

This component includes identification, interpretation and evaluation of specific geologic and seismologic hazards which must be considered for informed land-use decisions. Maps and reports produced through these efforts focus on particular geotechnical problems and potential problems that threaten specific localities. Priorities are placed on high-risk projects, where major seismic events could have the most catastrophic consequences.

## Output

The projects undertaken through this component result in maps, reports, and other products which are used by public agencies and the private sector in zoning decisions, facility site selections, and permitting and licensing processes. They also provide critical background information for further interpretation in design and construction decisions. Many work activities are funded through other governmental entities.

**Fault zoning studies**—Seismic monitoring of faults, evaluations of fault activity, Special Studies Zone maps (Alquist-Priolo Act requirements) and Policy and Guidelines assistance to local government.

**Site evaluation and review**—Review and comment on: Geologic and seismic reports on proposed sites for critical facilities such as dams, nuclear reactors, LNG facilities, and hospitals; environmental impact reports and statements; Seismic Safety and Safety elements of Local Government General Plans.

**Strong-motion studies**—Installation of strong-motion instruments, both free field and in structures; the maintenance, servicing and updating of installed instruments; the collection, processing, interpretation, and publication of all records obtained.

## DEPARTMENT OF CONSERVATION—Continued

*Crustal strain studies*—Reports on earth crustal conditions developed through application of geodimeter networks for transfault strain; precise-level surveys; tellurometer studies; microacoustics, tiltmeter, and telluric current studies.

*Seismological investigations*—Studies of earthquake mechanisms and precursors; evaluation of earthquake predictions, and preparation of damage and ground response maps (both predictive and post-event).

*Fault mechanism studies*—Maps and interpretive studies of fault zones consisting of USGS funded studies of Verdugo-Eagle Rock and San Andreas faults.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	58.5	58.4	63.6	\$2,180,052	\$2,382,208	\$2,694,982

## b. Mineral Resources Conservation

Activities in this element include the inventory and study of known mineral deposits, and the compilation of resource data as to type, grade, and extent; assistance to local Governments in planning for surface mining and reclamation of mined lands; the classification of urbanizing lands according to their mineral content; and the encouragement of sound conservation practices in the development and recovery of the State's mineral resources.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures:						
Deposit Inventory .....	11.1	15.1	12.4	\$413,650	\$619,100	\$494,727
Land Classification .....	9.5	10.2	10.4	354,026	415,748	437,431
Mined Land Reclamation .....	1	1	1	37,266	39,595	42,061
Totals .....	21.6	26.3	23.8	\$804,942	\$1,074,443	\$974,219
General Fund .....				623,745	704,844	744,219
Federal funds .....				181,197	369,599	230,000

## b.1. Mineral Deposit Inventory

The objective of this component is to identify, evaluate, and describe known deposits of potentially useful minerals in California. Emphasis is placed on determining generic relationships (and mineralization processes) as exploration tools, and discerning any regional structure trends among known mineral occurrences.

Such investigations identify potential reserves and permit projections of depletion rates for developed deposits. Priority is given to studies of mineral commodities of critical national importance. The department is currently surveying and mapping the low and moderate temperature geothermal resources in California under a Federal grant.

## Output

Current studies of uranium deposits in the northern Mojave Desert will be completed in 1980-81. The low and moderate temperatures geothermal investigation will be continued in 1979-80 and 1980-81.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	11.1	15.1	12.4	\$413,650	\$619,100	\$494,727

## b.2. Land Classification

The objective of this component is to carry out the mandate of the Surface Mining and Reclamation Act of 1975 and subsequent policies established by the State Mining and Geology Board. The purpose is to classify those lands in California threatened with urbanization or other irreversible uses that would make impossible the future recovery of needed mineral resources. Such lands are classified as to "significant mineral present", "no significant mineral present", or "mineral present, but significance not determined", so that appropriate planning steps can be taken by the State Mining and Geology Board and local lead agencies to prevent irrevocable mineral loss due to other land uses. Information developed in this component is used in close conjunction with that developed in the Mineral Deposit Inventory component.

## Output

Land classification zoning is to be completed for 1300 square miles of urban and urbanizing land in California. The significance of the lands classified as containing mineral deposits will be documented in written reports.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	9.5	10.2	10.4	\$354,026	\$415,748	\$437,431

## b.3. Mined Land Reclamation

The objective of this component is to provide policy guidance and technical assistance as requested to local governments responsible under the Surface Mining and Reclamation Act of 1975 (SMARA) for reclamation of mined lands under their jurisdictions to useable condition.

## Output

Approximately 50 reclamation plans will be reviewed and commented upon by the Division staff.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	1	1	1	\$37,266	\$39,595	\$42,061

## c. Geologic Information and Publications

The objective of this element is to facilitate the preparation and distribution of geologic information. This element has two separate functional components: disseminating technical information and processing maps and publications.

## DEPARTMENT OF CONSERVATION—Continued

## Output

The information staff prepares technical presentations and news releases, answers technical letters and inquiries and produces the monthly magazine "California Geology", as well as technical information pamphlets and bulletins. Distribution of "California Geology" exceeds 15,000 copies. It provides a vehicle for disseminating technical geologic information of current interest to a wide spectrum of readers from layman to scientist.

The publications staff drafts maps and prepares reports and maps for publication and ensures appropriate distribution. These are used by all levels of government and the public in land use planning, geologic evaluations, construction siting, and other resource evaluation planning functions. Information and publications sales desks are located at all Division offices, and an extensive technical geologic library and mineral exhibit is located at the Division's San Francisco Office.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures:						
Information.....	8.9	9.4	9.6	\$331,666	\$384,072	\$403,782
Publications .....	12.6	13.4	13.7	469,550	546,412	576,231

## II. OIL, GAS, AND GEOTHERMAL PROTECTION

## Program Objectives and Description

The Division of Oil and Gas regulates the oil, gas, and geothermal resources operations within the state. This program is concerned with administration of State laws for the conservation of oil, gas, and geothermal resources, to prevent damage to life, health, property and natural resources. Activities include supervision of drilling, operation, maintenance and abandonment of oil and gas wells, and geothermal wells, both onshore and offshore; of enhanced oil recovery, gas storage, and wastewater disposal projects; and of operations for the abatement of subsidence of lands overlying oil fields. The State is fully reimbursed for these activities by annual assessments and fees from the respective industries.

The program's main objectives are to prevent damage to the hydrocarbon or geothermal reservoirs, to the environment, and to other natural resources; to prevent contamination of freshwater deposits penetrated by wells; to prevent conditions that may be hazardous to life or health; and to encourage the wise development of oil, gas, and geothermal resources.

The net increase of 2.7 personnel years in 1980-81 in continuing program costs is a result of the restoration of the Section 27.2 salary savings (3.8 personnel years) and a reallocation of salary savings and indirect cost (-1.1 personnel years).

In 1980-81 four positions are added to assist in the additional regulation workload as a result of decontrol of heavy crude oil.

During 1979-80, features of the geothermal resources in The Geysers geothermal field will be assessed under a \$50,000 grant from the U.S. Department of Energy. Temporary help totaling 0.8 personnel years for this purpose is eliminated in 1980-81.

In 1979-80 and 1980-81, \$1.5 million is reduced from anticipated reimbursements for preparation of environmental documents. Regulations have been executed which require the applicant to furnish necessary environmental data, rather than to have the state contract for the implementation, as originally planned.

## Authority

Division 3, Public Resources Code.

## a. Regulation of Oil and Gas Operations

The purpose of this element is to prevent damage to and waste from underground oil and gas deposits; prevent loss of oil and gas reservoir energy; prevent damage to underground and surface waters suitable for irrigation or domestic use; prevent other surface environmental damage, including subsidence; prevent conditions that may be hazardous to life or health; encourage the wise development of oil and gas resources through good conservation and engineering practices; and protect correlative rights so that landowners, royalty owners, producers, and the general public realize and enjoy the greatest possible benefits from these vital resources.

Reimbursements .....				12,738	48,852	48,852

## b. Regulation of Geothermal Operations

Geothermal energy is indigenous to California and has the potential to lessen—when developed—California's dependence on imported fuels. It can be developed within acceptable environmental standards, even in critical areas such as The Geysers, when due consideration is given to proper mitigating measures. At The Geysers, where development is taking place on unstable terrain, a field office was established in the area to provide close surveillance.

The purpose of this element is to prevent damage to and waste of underground geothermal deposits; prevent loss of geothermal reservoir energy; prevent damage to underground and surface waters suitable for irrigation or domestic use; prevent other surface environmental damage, including subsidence; prevent conditions that may be hazardous to life or health; encourage the wise development of geothermal resources through good conservation and engineering practices; and protect correlative rights so that landowners, royalty owners, producers, and the general public realize and enjoy the greatest possible benefits from this important resource. Chapter 1271, Statutes of 1978 assigned lead agency responsibility to the Department under the California Environmental Quality Act for all exploratory geothermal well projects. More than 30 applications were processed during the first six months of operation of the Act under the new expedited procedures.

	1978-79	1979-80	1980-81
Output			
Well proposals .....	384	400	450

Publications .....	13	10	10

<sup>1</sup> Sec. 3402 of the Public Resources Code requires the Department to assess annually operators of oil or gas wells in California a sufficient amount to finance the regulation of oil and gas operations. Geothermal operations are partially supported through drilling fees. Sec. 3110 requires that all revenues be deposited in the General Fund.

<sup>2</sup> Sec. 3410 allows the Department, when establishing the revenue required, to take into account any adjustments for savings or increased expenditures in the current and prior fiscal years.

<sup>3</sup> Includes workload associated with decontrol of heavy crude oil (16<sup>1</sup> API Gravity or less).

## DEPARTMENT OF CONSERVATION—Continued

## III. SPECIAL SERVICES FOR RESOURCE PROTECTION

There is a need to protect the state's non-renewable soils resource and promote the conservation of agricultural and open space lands. Elements within this program which address those needs on an ongoing basis are Soils Resource Protection, and Open-Space Subvention and Environmental Impact Analysis. Geothermal coordination addresses institutional, technological, and economic barriers to geothermal development.

A decrease from 1979-80 to 1980-81 of 1.2 personnel years in continuing program costs is a result of a reduction of 1.4 personnel years due to termination of a federal grant; and an increase of 0.2 personnel years as a result of a reallocation of salary savings and indirect cost.

In 1980-81, \$400,000 and 3 positions are added to begin an effort to consolidate the data on California soils that now exists in many locations and in many governmental agencies. This information will be available to be used in future years to design effective soil conservation programs.

Also in 1980-81, \$310,637 and 4.1 personnel years are added from the California Environmental License Plate Fund to invest in digitized map technology, and to digitize and make available in a data bank, digitized information on prime agricultural lands and other land parameters.

Additionally, \$500,000 and 2 positions are added from the Energy Resources Fund to invest in inventorying and subsequently digitizing graphic resources information such as timber production areas, cultivated lands, designated energy systems, areas of endangered plant and animal species, etc. Once digitized graphics can be generated depicting relationships between any of the selected variables.

d. Administration	1.3	1	1	36,260	22,744	20,111

## a. Soils Resource Protection

This element focuses on a major goal of the Department which is to protect the State's interests in the conservation and enhancement of its nonrenewable soils resource.

Work activities within this element focus on: (a) ensuring long-term stability and productivity of soil for the production of food and fiber; (b) supporting, and complementing whenever possible, local and Federal soil conservation programs and activities; and (c) providing a mechanism to incorporate soils resource values into governmental land use policies and decisions.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures	4.5	1.9	4.9	\$150,344	\$60,520	\$463,355

Energy and Resources Fund				—	—	400,000
Reimbursements				2,131	—	—

## b. Open-Space Subvention and Environmental Impact Analysis

Agricultural lands and open space lands of statewide significance must be preserved for the continued economic and social well being of the people of the State of California. Local government is encouraged to preserve these lands by the open space subvention program which is administered by the Department of Conservation for the Secretary of Resources. Under this program cities and counties are reimbursed, in part, for tax revenue losses resulting from reduced assessments of lands restricted to agricultural and open space uses under the provisions of the Williamson Act and other open space legislation. These lands are assessed on the basis of income produced rather than market value.

To meet statutory requirements, environmental documents must be prepared for many of the projects under the jurisdiction of the divisions within the Department. Environmental documents prepared by others and submitted to the Department must be processed and reviewed. Leadership is provided in the application of CEQA to the programs of the units within the Department in the formulation of policy to achieve optimum environmental protection.

## DEPARTMENT OF CONSERVATION—Continued

## Output

Outputs include review and where applicable, comment on environmental documents; review of open-space plans; evaluation of requests for cancellation of Williamson Act contracts when waiver of the penalties is included; and processing applications and apportionment of the subvention funds.

## c. Geothermal Coordination

There remain significant impediments to the development of California's geothermal resource. Some of the impediments are regulatory and administrative in nature, while others are technological and economic. The Geothermal Resources Board and its Technical Advisory Committee, composed of representatives from state agencies having jurisdiction over various facets of geothermal development, and members of the public is the body that is working to reduce the regulatory and administrative impediments. The Board and the Technical Advisory Committee are sponsoring a series of workshops and follow-up seminars for state, local, federal, and private sector participants. Through this effort, specific problems will be identified, and appropriate action taken.

*The Federal Grant that funded this work expires in 1979-80 and will not be renewed.*

## IV. ADMINISTRATION

## Program Objectives and Description

The objective of this program is to provide executive leadership, policy direction, and administrative services required to meet the Department's program objectives. Activities include the provision of uniform departmentwide staff services, policy coordination and program negotiation with other State, Federal, and local government agencies, and specialized staff services to management.

Administrative activities are performed at several organizational levels within the department. Departmental headquarters provides leadership from the directorate and central services in accounting, budgeting, management analysis, personnel, office services, training, safety and EDP management. More specialized management leadership and staff services are provided through two division headquarters. Division field units provide localized general support for program operations throughout the State.

*The net increase in General Support in 1980-81 is a result of the restoration of the Section 27.2 salary savings reductions. (The effect of this change is displayed in elements of Programs I-III).*

## DEPARTMENT OF FORESTRY

The Department of Forestry, under the policy direction of the State Board of Forestry, is responsible for providing fire protection and watershed management services for private and State-owned watershed lands.

The primary objectives of the Department are to:

- 1) Maintain a fire prevention program that minimizes fire losses due to human causes.
- 2) Provide an efficient fire control system that holds damages from wildfire to a level that will not seriously impair the use or benefits received from Forestry protected lands.
- 3) Maintain and improve the quality of land and vegetative resources in order to maximize the economic and social benefits that are derived from these resources now and in future generations.

In addition, the Department of Forestry provides fire protection services for some local governments on a cost reimbursement basis. Forestry employees and equipment are used for other emergencies such as floods and earthquakes.

## DEPARTMENT OF FORESTRY—Continued

## I. WATERSHED AND FIRE PROTECTION

## Program Objectives and Description

California's forest, brush, and grass covered wildlands provide a rich but limited abundance of natural resources which require protection from potential damages resulting from fires, diseases, insects, and misuse by man. The Watershed and Fire Protection Program is managed by the Department of Forestry for the purposes of providing the required protection on private and State-owned watershed lands of statewide interest and of enhancing the quality and usefulness of the resources.

For 1980-81, the Department of Forestry proposes to implement two new programs aimed at providing both additional fire fighting support and increasing fuel management activities. The first program would utilize a medium helicopter (acquired from military excess), and 12 corpsmembers supervised by Forestry staff for both initial fire attack response and resource protection projects. The budget includes \$109,688 General Fund for the helitack program. The second program would implement a pilot Fire-Fighter Trainee Program for 240 California Conservation Corpsmembers. These trainees would be assigned to 40 selected two-engine fire stations and trained for fire engine crew support, fire prevention assistance, and, fuel management activities. Estimated costs include \$330,400 General Fund for fire mission pay, safety clothing, and operating and vehicle expenses.

Five demonstration vegetation management projects are proposed that will allow various land management techniques to be tested and evaluated. This will be the first step toward a new statewide vegetation management program that has as its objective the providing of private landowners with demonstrated experimental results for increasing resource productivity while lessening high fire hazard fuels. To support this effort, an additional two medium, military excess helicopters will be acquired, equipped with helitack units, and staffed with 24 California Conservation Corps members. These helicopter units will also be used for firefighting during fire season in lieu of existing light helicopters. \$600,000 from the proposed Energy and Resources Fund and six new positions will implement these projects.

## Authority

Constitution, Public Resources Code (principally), Health and Safety Code, Penal Code, Welfare and Institutions Code, Military and Veterans Code, Governor's executive orders, administrative orders, Board of Forestry policy, Administrative Code, federal law, contracts and agreements.

d. Civil defense and other emergencies.....	4	3.5	3.5	116,500	173,284	176,545

## a. Fire Protection, State Responsibility

The objective of fire protection is to protect natural resources and exposed life and property from damage by forest fires in all State Responsibility Areas and in those wildland areas which the Department of Forestry protects under contract with other agencies. This also provides for the prevention and suppression of any uncontrolled fire which threatens to become a forest fire.

During 1979-80, Chapter 1104, Statutes of 1979 (SB 201) added \$649,929 and 17.6 personnel years for fire protection services. The full year costs for these services includes 53.7 personnel years and \$1,757,515 General Fund in 1980-81. Restored funding includes the Columbia helitack, nine bulldozer units, five fire engines, four lookouts, seven fire prevention captains, 34 seasonal fire prevention assistants, and related contract county and U.S. Forest Service protection costs on State responsibility lands.

Pursuant to language contained in Item 205, Budget Act of 1979, the Orange County local government fire protection contract will be terminated on June 30, 1980 (see Fire Protection, Local Government Contract). It is proposed that State responsibility lands will be protected by Orange County through a contract for \$786,933 General Fund. As a result of the contract termination, 46.4 personnel years and \$1,277,284 General Fund is reduced from wildland fire protection for 1980-81.

In the current year, the Department's contribution per Section 27.2, Budget Act of 1979, was a reduction of 25.6 personnel years and \$559,583 General Fund. These reductions were applied throughout the program elements as salary savings.

During 1979-80, 28.6 personnel years and \$627,401 were added for services to various State agencies, of which 2.5 personnel years and \$36,469 carry forward into the budget year. In addition, approximately 51 personnel years and \$1,534,567 in Title II and other special federal funds established during fiscal years 1978-79 and 1979-80 will not carry forward into the budget year.

## DEPARTMENT OF FORESTRY—Continued

## a.1. Fire Prevention, State Responsibility

The Legislature has defined fire prevention as "the employment of the most effective methods, material, and procedures in the dissemination of information, the preparation of land and vegetation, and the enforcement of pertinent laws for the reduction of fire incidence. The term "fire prevention" shall connote an action program designed to reduce the occurrence of human caused fires.

This charge is carried out by influencing people to act in a fire-safe manner and to minimize physical hazards or risks. Fire cause investigations show that 75 percent of California's human-caused wildfires are preventable. This component provides fire prevention personnel to educate the public in the safe use of fire and to regulate the use of fire or potential ignition sources in such a way that "uncontrolled fires", as defined in Section 4104 Public Resources Code, are restricted to an acceptable level.

In response to increased population and person-caused wildfires in the State's wildlands, the Department proposes to implement a new two-part fire prevention effort. The first part includes \$270,000 General Fund for volunteer fire prevention activities for CB radio communication networks, fire lookout patrols, dissemination of fire prevention materials and fire prevention programs in schools. The second part includes \$360,000 General Fund for a radio, television, and newspaper fire prevention campaign using a public affairs media agency.

Output	1978-79	1979-80	1980-81			
Prevention contacts .....	4,497,301	4,000,000	4,250,000

## a.2. Fire Control Operations

The objective of fire control is to rapidly detect and attack fires and to continue aggressive suppression operations until the fire is controlled. The fire control system includes 226 forest fire stations, 74 lookouts, seven helitack units, 13 primary air attack bases and back-up crews located at 30 conservation camps and eight California Conservation Corps centers. This system is designed to meet the objective of holding all fire damages to a level at which the flow of economic and social benefits from the wildlands will not be seriously impaired.

## DEPARTMENT OF FORESTRY—Continued

## a.3. Conservation Camps

The Department of Forestry operates 19 adult conservation camps and one adult training center in cooperation with the Department of Corrections, seven youth conservation camps in cooperation with the Department of the Youth Authority, two camps in cooperation with San Diego County and one camp in cooperation with Shasta County. Inmate populations are being increased at twelve camps and a new camp is being added by Youth Authority. With these increases, camp population by the end of 1979-80 will be budgeted for 1,390 for adult camps, 580 for youth camps and 200 for county camps. This is an increase of 340 for the camp program. Additionally the Department operates eight Fire Centers in cooperation with the California Conservation Corps.

This element provides the primary hand crew labor force for firefighting and other emergency assignments. When not engaged in firefighting, other emergency assignments and training, camp inmates and wards, under the Department's supervision, work on in-camp projects and fire defense improvements for the Department and conservation projects for State and federal agencies.

Output	1978-79	1979-80	1980-81
Projects for other agencies (personnel days) .....	47,047	51,000	55,000
In-camp and other projects (personnel days) .....	165,127	187,000	198,000

## b. Fire Protection, Local Government Contract

The Department of Forestry administers 37 contracts in 29 counties for local responsibility fire protection service. In some areas local fire stations and county equipment are used with the State reimbursed for manning the facilities. In other areas, existing department fire stations are supplemented by the counties for the additional costs of fire protection to lands and structures inside and outside the departments State responsibility area.

*The Orange County local government fire protection contract will be terminated by June 30, 1980. As a result, \$12,638,109 in reimbursements and 467.5 structural fire fighter personnel years are eliminated from the 1980-81 budget.*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures:

Reimbursements .....				28,873,855	31,868,202	20,219,222

## c. Resource Management

The purpose of this element is to protect State and private watershed (forest, brush and range) lands from pests, deterioration and misuse.

Activities include control of forest pest epidemics; production of tree seedlings at three nurseries for reforestation and erosion control; revegetation of burned watershed; regulation of controlled burning of brush lands; regulation of private timber harvesting operations; advisory assistance to small owners on forest management, to timber operators and wood processing plants on improved utilization, and to urban forest owners and communities on urban forest management; management of seven state forests; assistance to State Board of Equalization in timber yield tax matters; and various investigations in reforestation methods, forest practices, brush control and soil erosion related to timber harvesting.

*The Forest Improvement Program is a new State program which authorizes the Director of Forestry to bring about improvement and reforestation of understocked forest lands, as originally authorized by Chapter 1181, Statutes of 1978 (California Forest Improvement Act of 1978). The basic elements of the program include reforestation, urban forestry, and wood energy projects. Originally, the statutes which created the Forest Resources Improvement Fund, limited expenditures to funding from sources other than the General Fund. This General Fund limitation was recently deleted by Chapter 812, Statutes of 1979, which also authorized (effective January 1, 1980) transfer of receipts from the sale of forest products derived from State-owned forests to the Forest Resources Improvement Fund, and thereby provided a permanent funding source to the Forest Improvement Program.*

*Opportunities presently exist for improvement of approximately 5.3 million acres of private and public forest land out of California's 16 million acres of commercial forest lands. During 1979-80, the program includes 16 personnel years funded from Title II funds which expire June 30, 1980. For 1980-81, the continuation of those 16 staff and the addition of 16.5 personnel years and \$9,661,376 from the Forest Resources Improvement Fund is included for the first of a five-year plan which anticipates that 40,000 acres of commercial timberland will be reforested in the first year, or improved through practices of precommercial thinning, fish and wildlife habitat improvement and land conservation measures.*

*The North Coast of California has a large number of unique soil erosion problems stemming from forestland uses on unstable soils. This is causing adverse effects on soil productivity, downstream water quality and anadromous fish habitat. To combat these problems, an expanded effort is proposed which will provide \$360,000 in contracted projects for the installation and replacement of culverts, fords, waterbars, side ditches, subdrains, check dams and traffic barriers. One Forester II and \$40,000 is proposed to provide for project implementation and supervision. Funding will be from the Energy and Resources Fund.*

## DEPARTMENT OF FORESTRY—Continued

Chapter 1104, Statutes of 1979 (SB 201), appropriated \$523,700 to the Department of Forestry from the Renewable Resources Investment Fund for the purpose of developing a wood energy demonstration project. During 1979-80, 2.2 personnel years and \$273,436 are proposed to establish the project which will perform fire hazard reduction through firebreak construction using a transportable wood densification unit to be developed by the Department of Forestry. This process would, in effect, convert hazardous fuel into a useable energy form. For example, the densifier would be fed wood chips, and through application of heat and pressure, the wood chips would be converted to strands of densified wood, or energy pellets. The budget year includes 2.4 personnel years and \$133,273 for the wood energy project. The project would be carried out on the Laguna-Morena Fuel Management Area by the San Diego Ranger Unit.

One and a half positions are being added in both 1979-80 and 1980-81 to continue work on the Wildland Soil-Vegetation Mapping Survey. The survey will utilize, under contract, the services of the University of California and federal agencies for various laboratory and field work.

During 1979-80, approximately 9.2 personnel years and \$432,307 were added for one-time Title II/federal projects and services to various State and federal agencies. These adjustments will not carry forward into the budget year.

## d. Civil Defense and Other Emergencies

Because of its statewide depth in manpower and equipment and its communication system, the Department of Forestry has been assigned civil defense responsibilities in the areas of fire, rescue and radiological monitoring. In addition, agreements with the Department of Water Resources provide for assistance to that organization in meeting their responsibilities for the maintenance and patrol of levee systems in the Sacramento, San Joaquin and delta areas during periods of high water. As a fire protection organization, the Department of Forestry is frequently requested to respond to a variety of rescue calls, accidents and other types of local emergencies requiring public assistance.

## DEPARTMENT OF FORESTRY—Continued

## II. ADMINISTRATION

## Program Objectives and Description

The objective of this activity is to provide executive leadership, policy direction, and administrative services required for the successful completion of the many program objectives; to provide uniform departmentwide staff services; to assure coordination at the policy level with other state, federal, and local government agencies; and to provide specialized staff services to management. A uniform departmentwide application of policy and procedure is essential to maintain effective program operations.

Administrative activities are performed at several organizational levels within the department. Departmental headquarters provides executive leadership from the directorate and central services in accounting, budgeting, management analysis, personnel, technical services, training and safety. Department field units provide localized general support services throughout a variety of locations in the State.

The 1979-80 support budget includes approximately 20.5 personnel years and \$443,032 in reimbursements for one time services to various state and federal agencies and from Title II funds which expire June 30, 1980. These adjustments are not continued in 1980-81.

To provide for additional program performance evaluation and policy analysis, the director has added a new Policy, Planning and Program Development Unit. Staffing for this unit was obtained by redirection of personnel at headquarters and the proposed addition of \$49,654 general fund for one operations research program specialist and one clerical staff.

Forestry is committed to improving the physical well-being of its work force, minimizing on-the-job injuries, and reducing high compensation costs. One physical fitness and medical standards coordination position is proposed to be funded from within existing resources to provide leadership and accountability for this program.

Forestry operates its own aircraft parts supply center. A thirty million dollar parts inventory is maintained, most of which is acquired at nominal cost through the federal excess property program. Two positions (one aircraft mechanic, one account clerk II) and \$122,000 for an inventory control system are proposed in order to protect and maintain an economical aircraft parts support program.

To improve upon the department's ability to pursue and make timely collections of recoverable fire suppression costs, the budget includes \$47,205 General Fund for an additional Forest Ranger II and stenographer. It is expected that general fund revenues will increase \$250,000 as a result.

With the proposed elimination of Orange County Ranger Unit and the establishment of contracted protection with the County of Orange, three support positions and \$89,127 are reduced from the proposed budget. A net General Fund increase (\$383,493) is required to offset the net loss of administrative overhead derived from the Orange County local fire protection contract. Additionally, \$1,000,000 General Fund is included in the 1980-81 budget for potential staff relocation costs associated with the elimination of the Orange County contract.

## STATE LANDS COMMISSION

The State Lands Commission administers policies established by the Legislature and the State Lands Commission in the management and supervision of all statutory lands which the State has received from the federal government. Statutory lands include the beds of all naturally navigable waterways such as major rivers, streams and lakes; tide and submerged lands in the Pacific Ocean which extend from the mean high tide line seaward to the three-mile limit; swamp and overflow lands; vacant school lands; and granted lands.

The primary objectives established by the Legislature and implemented by the State Lands Commission are:

- a. Comprehensive land use planning which encourages compatible multiuse development of State lands while conserving, preserving and protecting irreplaceable resources.
- b. Location of the precise boundaries of tide, submerged and other land areas which are increasingly critical to protection of the State's interest.
- c. The effective development of oil, gas, geothermal and other mineral resources through the administration of policies and programs designed to assure protection of the environment and which will also facilitate the generation of vitally needed revenues.
- d. Surveillance necessary for effective management and title protection of these lands, and if necessary, litigation in the courts, to protect the State's sovereign interests.
- e. Maintenance of records on the acquisition and disposition of the lands and on uses of the lands, and maintenance of an environmental inventory of the lands.

The State Lands Commission land management program is accomplished through the efforts of three basic program elements: extractive development, State leases; extractive development, Long Beach operations; and land management and conservation. The Commission also has a program which provides executive, administrative and technical services.

*In 1979-80 only, two positions were administratively established to complete a Title II project for watershed and forest rehabilitation, and 3.1 person-years in temporary help are added for work to be reimbursed by other agencies and oil companies. A reduction of 8.8 person-years and \$117,969 to meet Section 27.2 salary savings requirements in the current year is restored in 1980-81. The salary savings factor is adjusted which results in a decrease of 4.9 person-years in 1980-81.*

*In 1980-81, two positions and \$71,938 are added to expand the State's timber management program on school lands. An additional \$550,000 is included to continue the reforestation project on State School lands. The 1980-81 budget also includes \$175,000 to conduct a study of the Lake Tahoe Shorezone.*

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81

I.C.	Lake Tahoe Shorezone study .....	-	175,000

### I. LAND MANAGEMENT

#### Program Objectives and Description

California's growing population continues to make increasing demands upon the State's land resources. The State Lands Commission is responsible for comprehensive land management activities involving more than 4,000,000 acres of State lands. To meet the demonstrable need for land, the State Lands Commission authorizes the use of land subject to reasonable rules and regulations and the determination of fair and adequate compensation. Their decisions are reached at public hearings and are based upon environmental and public benefit considerations.

The specific objectives of the Land Management Program of the State Lands Commission are to:

- Plan for and control the use of State lands in order to increase and protect the State's interest.
- Maintain a program of land use to meet orderly land planning requirements and to provide for adequate compensation for use of the State's lands.
- Maximize the public benefit, environmental protection, and economic use of these lands.
- Minimize the commercial and recreational trespasses on State lands.
- Perfect title to the lands which the State owns.
- Provide control over the development and operation of the Long Beach tidelands.
- Plan for and implement the extractive development of mineral resources located on State lands.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

c. Land management and conservation .....	128	127.2	128.5	4,426,931	4,559,968	5,316,972

## a. Extractive Development—State Leases

The management of extractive development operations involves leasing of land for mineral extraction purposes, and royalty and operational surveillance to assure that the lessee adheres to the terms and conditions of the lease and the rules and regulations of the Commission. The primary management objective is to provide an orderly and controlled system for exploration and development of oil, gas, geothermal and other mineral resources on State-owned lands, to assure maximum revenue to the State consistent with multiple land-use concepts, good engineering and conservation practices, with consideration for public safety and protection of the environment. Protection of the coastal tidelands and inland waters from oil-related mishaps is promoted by regulatory petroleum production operations, inspections of marine shipping terminals and design review of underwater piping systems. As required by the Public Resources Code, appropriate environmental impact documents are prepared on all extractive projects and are made available to interested federal, State and local governmental agencies and the public for review and comment. For the 1979-80 fiscal year State revenue from Extractive Development-State Leases (oil, gas, geothermal and other minerals) is estimated to be \$49,654,100.

## Oil and Gas Leasing and Development

During the productive life of a mineral property it is necessary to perform continuing engineering and geological studies. This ensures that the lessee develops the resource to the maximum benefit of the State. In the case of oil and gas properties, the required studies include geological evaluation of known or potential productive areas, reserve determination, unit equities calculations and monitoring of secondary recovery operations. Operational surveillance of ongoing operations provides control of and accounting for oil and gas revenues, engineering data for management decisions and strict compliance with environmental protection requirements including investigations of all reported pollution incidents. The commission also has an interest in Federal regulation of the outer continental shelf and has assumed an active part in urging the adoption of regulations containing adequate safety and pollution controls consistent with those of the State.

## Geothermal Leasing and Development

Geothermal resources are recognized as an important clean energy source. These resources are necessary to help meet California's energy requirements. The State Lands Commission issues permits to prospect for geothermal resources and negotiates geothermal leases on all lands owned by the State. A 1977 superior court decision in favor of the State established the State's ownership of geothermal resources from lands in which the State has sold the surface, but reserved the mineral rights. This decision will add large amounts of energy producing lands to the State's inventory and increase the commission's management responsibilities of this valuable energy resource. Currently the only commercial electrical generating complex in the nation using geothermal steam is located at The Geysers in Sonoma County. That complex is now the largest in the world and more than half of the steam production is coming from State-owned mineral resource lands. Field inspections during drilling, testing, and subsequent production operations are necessary to ensure that such operations are conducted consistent with public safety and environmental concern. Evaluation studies include the analysis of geological and geothermal reservoir parameters for determination of bid sufficiency in competitive geothermal lease sales and in the projection of future revenues from geothermal production.

STATE LANDS COMMISSION—*Continued*

## Mineral Leasing and Development

Mineral leasing and development covers processing and issuance of mineral extraction leases, mineral prospecting permits, and dredging permits by private interests and public entities. Leasing lands for mineral extraction requires determination of ownership and physical boundaries, preparation of proposal to offer and lease agreement, and engineering and geological determination of economic feasibility prior to offering for lease and economic sufficiency of subsequent offers. Additional detailed operating requirements for the proposed extraction operations must be prepared including restoration and reclamation plans for the lands. Field investigations covering extractive operations, permits, and mineral trespasses are integral features of the resource management program.

Revenue data for the extractive development State leases are shown in Table I.

Revenue .....	\$33,487,721	\$49,654,100	\$77,895,800

## b. Extractive Development—Long Beach Operations

The tidelands along the Long Beach shoreline are granted in trust to the City of Long Beach. Chapter 29, Statutes of 1956 (1st E.S.), originally defined the role of the State in the development of oil and gas from these tidelands. The passage of Chapter 138, Statutes of 1964 (1st E.S.), gave the State a more active and prominent role in such development and increased the State's revenue. Under Chapter 138, the State was given control over the plan and budget of the field contractor who develops and operates the tidelands oilfield.

The operations of the tideland portions of the Long Beach unit and the previously developed productive areas of the Long Beach tidelands are conducted under individual net profits agreements. For the 1979-80 fiscal year the state oil and gas revenue attributable to Long Beach tidelands is estimated to be \$145,661,900.

Of primary importance in such operations is the prevention of land subsidence from causes other than natural phenomena and the application of proper measures to protect the environment.

## Workload Information

The Long Beach operations staff has the responsibility of maintaining economic control, as charged under Chapter 138, over the Long Beach unit plan of operations and development and budget which is \$82,778,000 for 1979-80. Average daily production of the Long Beach unit is 65,000 barrels of oil and 15 million cubic feet of gas. The staff also reviews and evaluates programs for the conduct of production and water injection operations in the prior tidelands development. Average daily production in the prior tidelands development is currently 17,000 barrels per day.

## Output

A major responsibility of Long Beach operations is performing economic analysis of the development and operation activities of the Long Beach tidelands. Output includes economic control of intended expenditures through the plan and budget of the Long Beach unit. This control is exercised by itemizing and monitoring the use of budget funds and by the implementing of approvals for new wells and redrills, budget-fund transfers and augmentations. The plan and budget is prepared jointly by the City of Long Beach and the staff of the State Lands Commission and is subject to the approval of the State Lands Commission.

Another important activity is the determination of equity (area assignments) for the Long Beach Unit. Area assignments determine the actual allocation of profits from the field among the participants. Other functions are to monitor surface elevations to detect any evidence of subsidence, and to monitor seismic activity.

Emphasis is placed on analysis of existing and proposed Federal and State legislation and regulations to determine the economic and operational impact on present operations and future development of State mineral interests. For example, sales prices of crude oil are regulated by the Federal Department of Energy under a complex two-tier price control system and projections of the price of crude oil are a major factor in drilling and production decisions.

Revenue data for the extractive development Long Beach operations element are shown on Table II.

## c. Land Management and Conservation

The basic nonmineral management program has two fundamental areas; (1) ownership determination (including exchanges, boundary line agreements and litigation) and (2) land management (including appraisals, leasing, indemnity selections, sales, inventory and classification, and title information).

Chapter 706, Statutes of 1975, authorized the commission to undertake an inventory and boundary mapping program for the ungranted tidelands. This study is currently funded at \$325,000 per year, with the first phase of the inventory to be completed by 1981. A significant portion of the total boundary determination program involves the application of accurate tidal datum measurements along the State's tidal shoreline. A joint federal State cost-sharing program of making accurate tidal measurements is currently underway. The State's share in this venture is \$210,000 per year until the study is completed.

As of June 30, 1980, two positions are being eliminated because of the completion of Public Works Employment Act (Title II) project for watershed and forest rehabilitation of State lands.

As indicated above, the 1980-81 budget includes two Forester positions and \$71,938, reimbursed by the Department of Forestry, to expand the timber management program on State school lands. The expanded program will provide increased annual revenues of \$200,000 to \$400,000 through accelerating the sale and harvest of merchantable timber, provide more efficient and beneficial use of natural resources and provide more public accessibility to State-owned forest lands. In addition, \$550,000, from the Energy and Resources Fund, is included in the budget for the reforestation and forestation of State-owned property for the purposes of timber stand improvement; erosion control; and related vegetative manipulation work on selected parcels to obtain maximum utilization and protection of State lands.

The 1980-81 budget also includes \$175,000, from the California Environmental License Plate Fund, to conduct a study for the preservation of natural resources of the Lake Tahoe Shorezone. The scientific study will provide data to determine the limit of tolerance of the shorezone for development (e.g., private piers and other similar structures), beyond which significant adverse environmental effects will occur.

## Ownership Determination

Effective management of State-owned tide and submerged lands requires that real property be identified and located. Accordingly, ownership determination is essential. This usually involves extensive engineering, title and legal research studies. In general, boundary claim lines are identified and located by surveying and mapping, and settled by land exchange, boundary line agreement, or litigation.

1. Exchange. An exchange requires an identification of the title conditions of both the parcel currently owned by the State and the parcel to be received in the exchange. An appraisal of both parcels is required to determine that the value to be received is as great or greater than the value relinquished.

2. Boundary Line Agreement. When the location of the common boundary between the State and a private owner cannot be determined, the State, acting by and through the State Lands Commission, is empowered to enter into a negotiated settlement of the boundary.

3. Litigation. Case preparations includes the search for, identification of, and analyses of facts for the consideration of and presentation into evidence by the Attorney General. Court appearances by staff members to present testimony are occasionally required.

4. Title Settlements in Lieu of Litigation. Where the nature and extent of the State's sovereign ownership in real property resulting from its tidelands or submerged lands character is in dispute by other parties claiming title, the titles may be established by title settlement agreements in lieu of the costs, uncertainties, and delays of proceeding to final judgment by the courts.

STATE LANDS COMMISSION—*Continued*

## Land Management

The land management operations include:

1. Appraisal. Appraisals are essential in settlements of litigation of title and boundary agreements in which exchanges are involved. Lands being received must be at least of equal value to the interest being given up. Sales and leases also require appraisal to determine the consideration to be received.
2. Leases. State lands are leased for commercial, industrial and recreational purposes and rights-of-way to accommodate public utility and various types of pipelines which utilize tide and submerged lands. Following an appraisal and an investigation to determine if an existing use of the land to be leased is compatible with the proposed use, the Commission derives a rental rate for the property. All leases must be reviewed on each fifth anniversary to determine if changes in market value indicate that a new rental should be set.
3. Indemnity Selections. The State is indemnified for loss to the school land grant by selection of desirable federal land. This activity will increase after completion of the inventory and classification of school lands, and as the Commission land management program develops.
4. Sales. A land sale requires an identification of the title conditions and an appraisal of the land authorized to be sold. Whether a parcel of land is susceptible to sale depends upon the policies adopted as a result of a completed environmental inventory. Only those lands unsuitable for public retention are considered for potential sale.
5. Inventory, Classifications and Management Plan. In April 1970, the Commission directed its staff to inventory, classify and plan prudent management for its 600,000 acres of school land. In that year the Legislature required an inventory of all lands under commission jurisdiction and an identification of those lands having significant environmental values of statewide interest. More than 3 million acres of this is coastal tide and submerged land. The Commission is participating with the California Coastal Commission in planning uses of this land.
6. Land Title Information. This program provides all information required by law to be kept by the Commission, as well as the working data necessary to properly administer, manage and protect the lands under its jurisdiction.

## II. ADMINISTRATION

The administrative staff of the State Lands Commission operates under the general direction of the Executive Officer of the State Lands Commission. The program is composed of two major elements: executive and administrative and technical services. The executive element includes the executive staff, the commission's legal staff, and a comprehensive planning and environmental section. The administrative and technical services element is comprised of six program sections, four of which, budgeting, personnel and training, accounting and business services, and data processing and records, provide direct staff support to the line programs, and two of which, auditing and program analysis, emphasize improving the State's fiscal position and ascertaining that the individual commission programs are operating effectively and efficiently.

In 1980-81 an adjustment in administrative overhead results in a reduction of one person-year.

## SEISMIC SAFETY COMMISSION

## Program Objectives and Description

The purpose of the Seismic Safety Commission is to strengthen earthquake safety in California by improving public policy, especially that related to reducing hazards and mitigating the effects of potentially damaging earthquakes.

The Commission is responsible for setting goals and priorities; requesting State agencies to devise criteria to promote seismic safety; recommending program changes to State agencies, local agencies, and the private sector where such changes would reduce the earthquake hazards; reviewing reconstruction efforts after damaging earthquakes; gathering, analyzing, and disseminating information; encouraging research; sponsoring training; and coordinating the seismic safety activities of government.

The Commission performs policy studies, reviews programs, and conducts hearings on subjects important to earthquake safety. It issues special reports and findings, and it reports annually to the Governor and the Legislature on its findings, progress, and recommendations. The Commission advises the Governor and executive agencies on actions needed to improve programs, advises the Legislature on legislation affecting seismic safety, and negotiates with the responsible agencies regarding necessary changes in programs and standards. The Commission also advises various federal agencies on the scope, impacts, and priorities of national earthquake research and hazard reduction programs. The Commission provides technical assistance to State and local agencies and program advice to the Division of Mines and Geology, Department of Conservation, in regard to the Special Studies Zones Act and the Strong Motion Instrumentation Program.

Fiscal Year 1979-80 activities and accomplishments include publication of a report for use by local government on the rehabilitation of hazardous buildings and the sponsorship of successful companion legislation to allow the use of special reconstruction standards; completion of a study of local and State leadership attitudes toward earthquake disaster preparedness; preparation of guidelines for federal, State and local agencies and key private organizations on criteria for independent reviews of critical facilities; the sponsorship of successful legislation to: (1) amend the Special Studies Zones Act, (2) clarify the liability of the State and local governments for earthquake predictions and warnings and (3) extend the Commission's life until 1986. Additional activities included completion of a report on earthquake damage to mobile homes resulting from the Santa Barbara earthquake; sponsorship of a joint California-Mexico conference to review the status of research and hazards in the International Border Region; completion of a report on statewide goals and policies for seismic safety; field investigations of the Hollister earthquake; initiation of work on the earthquake prediction and hazard reduction study noted below; and provided assistance and information to State and local agencies, individuals and groups.

In 1979-80, two positions and \$118,000 were added to complete the earthquake prediction and hazard reduction feasibility study, as required by Chapter 154, Statutes of 1978, which will result in a report to the Legislature of findings and recommendations. In 1980-81 these two positions are eliminated. Also, in 1979-80 an additional 0.8 person-year in salary savings is reflected due to Section 27.2 of the Budget Act. This does not carry forward into 1980-81.

Planned Fiscal Year 1980-81 objectives include submission of the above study, additional work on an earthquake education program for schools, a meeting with representatives of other western states about interstate problems of seismic safety, further work on mobile home standards, and continuing to provide advice, information and assistance.

## DEPARTMENT OF FISH AND GAME

The program objectives of the Department of Fish and Game are to insure that fish and wildlife are preserved to be used and enjoyed by the people in the State, now and in the future.

More specifically, the objectives of the Department are:

1. To maintain all species of fish and wildlife for their natural and ecological values as well as for their direct benefits to man. The objective, "to maintain," is a basic necessity if any species is to be used in the future, and this includes the principle that fish and wildlife should be preserved as a human environmental necessity. The present generation must assume the obligation to pass on to future generations all of the species that now exist, whether or not they are now used and enjoyed. The present contribution that each species makes to the ecological balance is not always known and may well change in the future. We should not tamper with this balance without understanding fully the eventual result. The restoration of native species that no longer exist in California but still exist in other areas; the introduction of desirable new species compatible with existing species; and the exclusion of undesirable species are part of this objective.

2. To provide for varied recreational use of fish and wildlife. The objective, "recreational use," embraces all the ways that people may enjoy fish and wildlife. This variety of recreational opportunity will enable each individual to select the type of recreation most rewarding to himself. Single uses will not predominate merely because they might attract the greatest number of users. This objective is to maintain populations at levels that will insure the survival of all species for the benefit of the general public and provide a harvestable surplus of game species so that hunting and fishing will continue to be enjoyed as two of California's traditional and leading forms of recreation.

3. To provide for an economic contribution of fish and wildlife in the best interests of the people of the State. The third objective, "economic contribution," covers several distinct interests concerned with the utilization of fish and wildlife resources. These include the commercial harvesters of these resources, and the people who provide goods and services to all. The objective is to provide the maximum economic benefits to the people of the State within the limits of the resources and other objectives.

4. To provide for scientific and educational use of fish and wildlife. The fourth objective, "scientific and educational use," proposes to insure the availability of fish and wildlife for study and research by both scientists and students.

All of the programs of the Department are directed toward the accomplishment of these objectives through the protection, conservation, enhancement, and restoration of fish and wildlife resources and habitats and regulation of resources use.

In recent years, the Department has faced the major problem of revenues from the sale of fishing, hunting, and other licenses not being sufficient to fund program requirements. Funding full-year costs required using Fish and Game Preservation Fund surplus funds each year. Inflation, new requirements, and the drought have adversely impacted the Department's financial viability. During fiscal year 1978-79, the Administration studied alternatives to rectify this perennial problem. The Department of Finance and the Department of Fish and Game jointly developed, in consultation with various interested nongovernmental organizations, criteria for identifying game and nongame programs. In accordance with Chapter 855, Statutes of 1978, the General Fund is used exclusively for agreed upon nongame programs, and the Fish and Game Preservation Fund exclusively for game programs beginning in Fiscal Year 1979-80. These actions, and other legislation that increased license fees, indexed fees to inflation and required the General Fund to pay the value of free fishing licenses, placed the Department on solid financial grounds.

### SUMMARY OF PROGRAM REQUIREMENTS

## DEPARTMENT OF FISH AND GAME—Continued

## I. ENFORCEMENT OF LAWS AND REGULATIONS

## Program Objectives and Description

The two primary objectives of this program are (1) to insure that the provisions of the Fish and Game Code and regulations made pursuant thereto are enforced within an acceptable degree of compliance, and (2) to insure that the wildlife resources are managed for optimum, sustained yield, utilization, and enjoyment by all people appropriate to the general public welfare.

In order to accomplish the objectives of this program, the following must be accomplished:

1. Insure that consumptive use of the wildlife resources is properly licensed;
2. Protect game and nongame wildlife resources and their habitat from willful or negligent destruction and otherwise enforce and administer the laws and regulations relating to game and nongame wildlife species;
3. Promote hunting and fishing access for the public;
4. Disseminate knowledge and information about fish and wildlife resources and their regulation and management to increase public understanding and cooperation in the sound utilization and conservation of these resources through our conservation education program;
5. Recognize the interest of those who derive their livelihood, pleasure or recreation from the wildlife resources;
6. Cooperate with and encourage cooperation among agencies, groups, and individuals concerned with laws protecting the wildlife resources;
7. Conduct a hunter safety program to provide instructions for safe handling of firearms and in the principles of conservation and sportsmanship for all hunting license applicants regardless of age;
8. Regulate the importation, transportation, and possession of exotic animals to insure the welfare of wild animal pets, to protect native wildlife habitat from the inadvertent introduction of competitive species, and to protect the agricultural interests and public health of this State.

The increase of 18 positions in workload adjustments reflects the implementation of Chapter 543, Statutes of 1979, which restored this program to the 1978-79 authorized level. Also reflected are increases of 85,000 for airplane engine overhaul and \$414,844 for portable/mobile radio units. The increase in continuing program costs for 1980-81 reflects the adjustment in salary savings for Section 27.2, Budget Act of 1979.

## Authority

Constitution of California, Fish and Game Code, Fish and Game Commission.

d. Non Game Protection .....	60	65.9	66.3	2,094,836	2,412,388	2,524,385

## a. Protection and Use Regulation of Game Fish and Wildlife

Enforcement is accomplished by a staff of fish and game wardens whose activities include patrolling to prevent infractions of game wildlife bag limits, seasons, closed areas, and license requirements by individual hunters and fishermen as well as the commercial fishing industry. Violators are apprehended and prosecuted through court processes. Also, administration of the licensed pheasant and other hunting club programs is a warden function accomplished by license application approval and regulation enforcement through club inspections at regular intervals. Additional protection of wildlife and habitat is accomplished by the issuance of permits for special purposes such as scientific collections, research, suction dredges, and the related follow-up inspection to assure compliance of permit terms. Preventive enforcement is accomplished through personal appearances before civic sportsmen organizations and in field talks to sportsmen and potential sportsmen.

## DEPARTMENT OF FISH AND GAME—Continued

## b. Licensing

Those who wish to take advantage of the recreational, educational, and economical benefits provided by California's fish and wildlife resources are required to contribute to the conservation and management of these resources through the purchase of licenses. The licensing program makes nearly 60 different types of fish and game licenses available to applicants. The license fees provide the major support of California's fish and wildlife conservation programs.

Between six and seven million licenses, tags, and permits will be sold through approximately 3,600 private firms functioning as fish and game license agents.

This program also provides the mechanics for determining which of the applicants will receive special big game permits and reservation of State-operated waterfowl areas.

Output	1978-79	1979-80	1980-81
Number of fishing licenses, stamps, and permits sold .....	6,042,577	6,525,983	6,721,763

<i>Fish and Game Preservation Fund</i> .....	1,258,910	1,498,977	1,549,412

## c. Hunter Safety

Approximately 1,700 volunteer instructors are used by the Department annually in teaching firearms safety to an estimated 40,000 California residents. Since the inception of the program on July 1, 1954, a total of 1,025,000 California residents have been trained. The estimated total casualties reduced since the program became effective is 1,695. All resident hunting license applicants who cannot document their possession of a hunting license in a previous year are now required to participate in this program.

Output	1978-79	1979-80	1980-81
New instructors certified .....	350	300	250
Residents trained in firearms safety .....	46,000	44,000	40,000

<i>Reimbursements</i> .....	28,822	29,840	34,529

## d. Nongame Protection

This element of the enforcement program includes the enforcement of laws relating to nongame species such as raptors and tule elk. Program goals are to prevent native species from declining to a population level that will cause a specie to be listed as rare, threatened, or endangered, and to protect those species that are listed as rare, threatened or endangered by assisting in their maintenance and recovery. An integral part of the program is to protect the habitat from environmental degradation, through enforcement of restrictions on pollution and stream or lake alterations.

Output	1978-79	1979-80	1980-81
Resource user days (Game and nongame) .....	34,805,900	38,305,900	40,012,000

## II. WILDLIFE MANAGEMENT

## Program Objective and Description

The program objectives are: (1) to maintain all species of wildlife in the state, and (2) to provide wildlife oriented recreational and educational opportunities.

Population growth with associated commercial, agriculture and industrial activities continue to place inroads on wildlife and their habitats. Wildlife programs are designed to inventory, study, plan, develop and manage wildlife resources. These programs include studies aimed at management needs related to big game, upland game, nongame wildlife waterfowl, disease and pesticides; habitat development and management on state-owned wildlife areas and other public lands; coastal wetland preservation, and developing public hunting opportunity.

The increase of 18.5 positions in workload adjustments for 1979-80 reflects 13.7 positions for Chapter 543, Statutes of 1979 which restored this program to the 1978-79 authorized level and 4.8 positions for reimbursable projects. The 1980-81 workload adjustment reflects the 13.7 positions for Chapter 543, 5.5 positions for reimbursable projects, \$546,042 for Duck Stamp Waterfowl Projects and \$225,000 for the San Elijo Lagoon Protection Project. The increase in continuing program costs for 1980-81 reflects the adjustment in salary savings for Section 27.2, Budget Act of 1979.

## DEPARTMENT OF FISH AND GAME—Continued

## Authority

Constitution, Fish and Game Code and Commission regulations.

a. Species improvement and preservation—game .....	170.8	184.5	186.1	\$5,511,136	\$6,435,240	\$7,307,119
b. Species improvement and preservation—non game .....	65.3	70.5	71.1	2,041,714	2,951,069	2,987,150

## a. Species Improvement and Preservation—Game

Population growth, with associated commercial, agricultural and industrial activities, continue to impact wildlife and their habitats. Wildlife management programs are designed and conducted to maintain and improve all game species of wildlife for associated recreational use. Efforts are made to maintain and enhance all species of waterfowl, upland game and big game, with emphasis on: (1) species life history information; (2) habitat inventory, preservation and enhancement; (3) species surveys, inventories and hunter use data; (4) disease and pesticide investigations and development of public hunting opportunities.

Assistance is provided to private landowners and various governmental agencies for managing the wildlife resource and protecting wildlife habitat on their respective lands. Wildlife forensics investigations are conducted to aid law enforcement activities relating to wildlife.

## b. Species Improvement and Preservation—Nongame

The Department will conduct surveys and develop management programs for California's endangered and rare wildlife in compliance with the California Species Preservation and Endangered Species Acts of 1970 and the Federal Endangered Species Act of 1973. In addition, it will be responsible for research and development of management programs for nongame wildlife including their habitat. Program emphasis will be directed toward determining the current status of selected species. These investigations will include: (1) continued assessment of the problems and needs of nongame wildlife, (2) surveys of California's threatened wildlife declared to be endangered and rare by the Fish and Game Commission and Secretary of the Interior, (3) raptor populations, and (4) preparation and updating of knowledge and management plans for selected species of nongame wildlife, including the coyote, and tule elk.

Basic investigation of pesticide contamination, pollution, disease, and food habitats of nongame wildlife will be made. Particular attention will be directed to the food chain effects of environmental contaminants on the reproduction of raptors and water-associated wildlife, particularly marine birds and mammals. The nongame program also includes work related to endangered plants, depredation and environmental degradation.

## DEPARTMENT OF FISH AND GAME—Continued

## III. INLAND FISHERIES

## Program Objectives and Description

The objectives of this program are to provide diversified and satisfactory fishing for California anglers while insuring the perpetuation of the State's native fish fauna.

To meet these objectives, the department operates 16 fish hatcheries which will produce 24.5 million fish in 1979-80, including 4 million catchable-sized trout for planting in State Water Project reservoirs. Program objectives also include management of the nongame, rare and endangered fish, amphibians, and reptiles, and the protection of their environment. Other management activities include fish population and habitat inventories, habitat acquisition and improvement, utilization measurement, fish population manipulation to increase yield, fish salvage and disease control.

The increase of 42.5 personnel years in workload adjustments reflects the implementation of Chapter 543, Statutes of 1979 which restored this program to the 1978-79 authorized level (42.3 positions) and 0.2 position for a reimbursable project. The increase to continuing program costs for 1980-81 reflects the adjustment in salary savings for Section 27.2, Budget Act of 1979.

## Authority

Constitution, Fish and Game Code, and Fish and Game Commission.

## a. Trout

Trout angling is highly popular in California. Natural production of trout is large, but insufficient to meet demand. Accordingly, the Department will propagate and stock 12.5 million catchable-sized trout, 1.1 million subcatchables, and 9.4 million fingerlings in suitable lakes and streams. Several species, subspecies, and strains are produced to provide diversity and to utilize different habitat niches. Wild trout management consists primarily of resources monitoring activities to protect and improve habitat. Certain native trout species, such as Piute, Kern River golden, and Lahontan cutthroat are threatened by hybridization with more common trout varieties. Special efforts are underway with partial Federal funding to maintain and expand the range of these unique fishes.

Output	1978-79	1979-80	1980-81
Angler days.....	12,521,000	13,011,000	13,621,000

## b. Warmwater Game Fish

Warmwater game species include black bass, crappie, sunfish, catfish, crayfish and bullfrogs. The habitat for most of these fishes has increased greatly due to reservoir construction and angler demand has also grown, especially for black bass. Fortunately, management of these species is relatively inexpensive. Common management activities include population and utilization inventories, habitat protection and improvement, and angling regulations. Hatchery production is limited to channel catfish for planting in Southern California and other suitable waters, 1.5 million fish will be produced. Experimental work with black bass and striped bass will also be conducted to improve reservoir angling.

Output	1978-79	1979-80	1980-81
Angler days.....	8,710,000	9,051,000	9,322,000

## c. Nongame, Rare and Endangered

A number of native fishes, amphibians, reptiles, and invertebrates are in danger of extinction. Efforts to prevent their disappearance include population and habitat surveys, life history studies, land acquisition, and recommendations to avoid adverse impacts of land and water development projects on critical habitat.

## IV. ANADROMOUS FISHERIES

## Program Objectives and Description

The objectives of the anadromous fisheries program are to (1) maintain, restore, and improve anadromous fish populations, (2) obtain an optimum harvest of these resources, and (3) provide for their scientific and educational use. To meet these objectives, the Department operates 8 fish hatcheries constructed for mitigation purposes by Federal, State and private organizations. These hatcheries are expected to produce 31.9 million fish in 1980-81 including 25 million fingerlings and 6.9 subcatchables.

Anadromous fisheries is responsible for programs involving salmon, steelhead, striped bass, shad, and sturgeon. These species are under one program because these resources have many of the same environmental requirements and they have many common problems. These species all live as native in the ocean and run into fresh water streams to reproduce.

Anadromous fisheries resources support an estimated 3 million angler days of recreational fishing annually in marine and inland waters. In addition, the salmon resource provides a commercial catch averaging 8 million pounds annually with a current net worth of over \$18 million. The contribution of these resources to the economy of the State and the well-being of its citizens justifies research and management activities to maintain and improve the existing populations.

The increase of 15.7 positions in workload adjustments is the result of 9.2 positions for Chapter 543, Statutes of 1979, which restored this program to the 1978-79 authorized level, two positions for Chapter 1104, Statutes of 1979, and 4.5 positions for reimbursable projects. The increase in continuing program costs in 1980-81 reflects the adjustment in salary savings for Section 27.2, Budget Act of 1979.

## Authority

Constitution of California, Fish and Game Code, and Fish and Game Commission.

## V. MARINE RESOURCES

## Program Objectives and Description

The objectives of the Marine Resources Program are to perpetuate and enhance the marine fish, plant and animal resources, and to develop an optimum harvest of these resources by sport and commercial fisherpersons, and to develop life histories of the various species.

The increase of 35.5 positions in 1979-80 workload adjustments reflects 12 positions for Chapter 543, Statutes of 1979, which restored this program to the 1978-79 authorized level, and 23.5 positions for reimbursable projects. These increases continue into the 1980-81 fiscal year. In addition, a reduction of 8.7 positions in the Market Crab Research Program is reflected in the 1980-81 adjustments of. The increase in continuing program costs for 1980-81 reflects the adjustment in salary savings for Section 27.2, Budget Act of 1979.

## Authority

## a. Management and Research—Game (Sport/Commercial)

Management and research activities are conducted, relating to: shell fisheries, bottom fisheries, pelagic fisheries, tuna, big game fisheries, marine plants and various other research and evaluation projects.

Management activities include the monitoring of sport and commercial catches, including: market sampling, interviews, logbooks, and sampling at sea. Sport and commercial landings are sampled for size and age data, from which meaningful management recommendations and evaluation of previous management action can be made. Logbook data are collected and analyzed to determine total catches, fishing effort, and catch localities. Sea surveys are conducted to identify fish schools and determine the relative abundance of those species for which population estimates are required by legislation for management. Administration of mariculture and oyster leases on state lands and technical assistance to growth will be provided.

Research activities include studies of the behavior and life history of various species of fish and plants, and their relation to each other, their environment and the effect of man upon these organisms and their environment. Additional research and evaluation projects concern kelp bed development and leases, construction of artificial reefs, introduction of native and nonnative species, and mariculture research and development programs.

## b. Management and Research—Nongame

Management and research activities are conducted to benefit marine mammals and birds. Current activities are focused on marine mammals in general and sea otter research in particular. Activities include monitoring of their migration patterns, study of their life history and their effects on other marine life and habitat. The objectives are to insure the survival of the species and the return of their management to the State.

## VI. ENVIRONMENTAL SERVICES

## Program Objectives and Description

The purpose of the environmental services program is to prevent adverse impacts on fish and wildlife from projects affecting the land, waters, and water quality of California.

The Federal Fish and Wildlife Coordination Act, Water Projects Recreation Act, and National Environmental Policy Act require review by this Department of projects proposed by or permitted by Federal agencies. The California Environmental Quality Act requires review by the Department of many local and State projects. The review of all these projects and the protection of water quality mandated by the Fish and Game Code is accomplished by the environmental services unit.

Both the 1979-80 and 1980-81 fiscal years reflect an additional 18.9 positions in workload adjustments which include 8.8 positions due to the implementation of Chapter 543, Statutes of 1979, which restored this program to the 1978-79 authorized level, two positions for the natural areas program and 8.1 positions for reimbursable projects. The additional increase of 5.2 positions in workload adjustments over 1979-80 is the result of an increase of 0.2 positions for a reimbursable project and five positions for the Instream Flow Analysis Team. The increase in continuing program costs for 1980-81 reflects the adjustment in salary savings for Section 27.2, Budget Act of 1979.

## Authority

State level: Fish and Game Code, State Water Code, Government Code, Forest Practices Act of 1973, and the Environmental Quality Act of 1970. Federal level: Fish and Wildlife Coordination Act, the Water Projects Recreation Act, the Federal Power Act (and associated rules, adopted by the Federal Power Commission), the National Environmental Policy Act of 1969, and the intergovernmental Cooperative Act 1968.

DEPARTMENT OF FISH AND GAME—*Continued*

## a. Land and Water Development

Existing, planned, and proposed Federal, State, and locally permitted or constructed projects, having an effect upon primarily game species, are reviewed to provide maximum protection to fish and wildlife.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Totals, Expenditures .....	3.2	4.2	4.2	\$144,105	\$165,742	\$178,852
<i>Fish and Game Preservation Fund</i> .....				84,012	103,495	106,825
<i>Reimbursements</i> .....				60,093	62,247	72,027

## b. Water Quality

In order to maintain water quality suitable for fish and wildlife and their utilization, the Department will investigate pollution problems, enforce pollution control laws which are within the Fish and Game Code, gather basic water quality data including applied research on specific problems, and provide technical assistance to the regional and State water quality control agencies, California Coastal Zone Conservation Commission, and State Energy Resources Conservation and Development Commission.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Totals, Expenditures .....	13.4	17.2	17.2	\$602,214	\$819,976	\$910,256

<i>Federal funds</i> .....				3,947	5,208	5,306
<i>Reimbursements</i> .....				211,414	218,942	287,363

## c. Environmental Review and Evaluation

Existing, planned and proposed Federal, State and locally permitted or constructed projects are reviewed to provide maximum protection to fish and wildlife habitat. Each project review results in recommendations to maintain or restore terrestrial and aquatic fish and wildlife habitat and prevent environmental degradation.

Output	1978-79	1979-80	1980-81
Projects Reviewed .....	7,000	7,500	7,500

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Program Components:						
Environmental Services .....	22.7	25.4	26	\$1,017,408	\$957,479	\$992,332

## d. Nongame

Existing, planned and proposed projects, primarily having an effect upon nongame and rare, threatened, or endangered species, are reviewed to provide maximum protection to fish and wildlife. This program also includes that portion of water quality activities that are attributable to nongame or rare, threatened, or endangered species.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Program Components:

## DEPARTMENT OF FISH AND GAME—Continued

## VII. ADMINISTRATION

## Program Objectives and Description

General policy direction is provided by the Fish and Game Commission, who also regulate the taking of fish and game by promulgation of regulations establishing open and closed seasons, bag and possession limits, and areas for the taking of fish and game. The Director, with the assistance of regional managers, provides executive direction to both game and nongame programs which implement the policies of the Legislature and the Fish and Game Commission.

The administrative services staff provides centralized administrative support necessary to management, program managers, and their staff. The planning staff provides planning and data processing services for all departmental functions.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

## VIII. FREE LICENSES

## Program Objectives and Description

This program was added in response to Chapter 855, Statutes of 1978, and Chapter 1259, Statutes of 1978. These Chapters provide that any person receiving aid to the aged and any person over 62 years of age who meets certain residential and financial requirements shall be eligible for a free sportfishing license and that disabled veterans shall be eligible for free hunting licenses and deer tags (Sections 3036 and 7049, Fish and Game Code). Those Chapters also required that the General Fund reimburse the Fish and Game Preservation Fund for the amount of fees that would otherwise have been collected for licenses issued free of charge. This program reflects the transfer of amounts between those two funds.

## Authority

Fish and Game Code.

## WILDLIFE CONSERVATION BOARD

### Program Objectives and Description

The Wildlife Conservation Board is involved in acquiring, conserving, developing, improving, and providing access to our natural resources to accommodate the needs of sportsmen and others who utilize outdoor recreation resources.

The Board is composed of the Director of Finance, the Director of the Department of Fish and Game, and the President of the Fish and Game Commission. The Board is advised by a joint interim investigating committee consisting of three Members of the Senate and three Members of the Assembly. Annually \$750,000 is transferred to the Wildlife Restoration Fund from license fees collected for conducting horseraces. The Board is charged with the administration of this fund.

Through its staff, the Board conducts necessary investigations and studies to determine the areas within the State most essential and suitable for wildlife production and preservation and which will provide recreational advantages.

As a result of such studies, the Board determines which lands or rights in lands or waters should be acquired by the State to effectuate the wildlife conservation and recreation program. The Wildlife Conservation Board constructs fishing piers and develops fishing access sites at lakes, on the ocean and along the State's waterways and aqueducts. Development includes, as necessary, features such as boat ramps, parking areas, water supply, and sanitary facilities.

Through purchase of key land parcels and development of roads, the Board is trying to meet the demand for hunting access to public lands. Protection and improvement of the resource is accomplished by saving marsh areas, building fish screens, fish ladders, fish hatcheries, and preservation of wildlife or ecological areas.

In June of 1974, the voters approved Proposition 1, the State Beach, Park, Recreational and Historical Facilities Bond Act of 1974 providing \$10,000,000 to the Wildlife Conservation Board for expenditures in accordance with the Wildlife Conservation Law. The State Urban, and Coastal Park Bond Act approved by the voters in November, 1976, made an additional \$15,000,000 available to the Board for acquisition and development. The funds available under these Bond Acts are continuously appropriated and estimated expenditures are shown in the Capital Outlay section.

## Wildlife Restoration Fund

Continuation of the acquisition and improvement of wildlife conservation projects is planned. The revenue of \$750,000 each fiscal year as provided by the Business and Professions Code, Section 19632(a), has been or will be allocated to projects by the Wildlife Conservation Board. Fish and Game Code Section 1352 authorizes continuous expenditures for the Wildlife Restoration Fund. The schedule reflects the estimated expenditures, based on anticipated allocations by the Wildlife Conservation Board.

In addition to the Wildlife Conservation Board's regular funding, it is expected that federal funds will become available on a reimbursable basis for qualifying projects, and such funds will be reported annually as received. In Fiscal Year 1978-79 \$247,541 was received as project reimbursement.

## MAJOR PROJECTS

Fish hatchery and stocking projects .....	-\$169	\$50,000	\$350,000
For construction and equipment of facilities for hatching and stocking.			
Fish habitat development and improvement projects .....	80,228	300,000	300,000
For acquisition and development of warmwater lakes; for reservoir construction and improvement; for stream improvement; for fish screen construction; for making habitat improvements.			
Public Access .....	-47,313	2,200,000	1,275,000
For the acquisition and development of coastal access; river, stream and bay access; lake and reservoir access, pier construction.			
Wildlife habitat .....	107,646	150,000	150,000
For the acquisition and development of wildlife areas.			
Special projects .....	145,000	7,500	7,500
For project evaluation, preliminary land acquisition costs; engineering studies of potential projects.			
Miscellaneous projects .....	3,112	211,000	-
<b>TOTALS, EXPENDITURES</b> .....	<b>\$288,504</b>	<b>\$2,918,500</b>	<b>\$2,082,500</b>

-------------------	----------------------	---------------------

## Recreation and Fish and Wildlife Enhancement Bond Fund

This bond act, passed by the voters at the November 1970 election provided \$6,000,000 to the Department of Fish and Game and the Wildlife Conservation Board for fish and wildlife enhancement and fishing access sites in connection with State water projects. With the construction of broodstock facilities at Mt. Whitney Hatchery in 1979-80, this Bond Act Program will be completed.

## Hatchery Expansion Projects:

## KLAMATH RIVER COMPACT COMMISSION

### Program Objectives and Description

The purpose of the Klamath River Compact Commission is to ensure compliance with the terms of the Compact. Essentially, the Compact allocates water to both the State of Oregon and the State of California for irrigation purposes.

The Commission has no staff of its own and relies on contracts with public agencies and private entities for required services. In compliance with Compact provisions, the work program anticipated for the budget year includes continuance of a land use survey designed to determine irrigated acreage in the Klamath Basin area. The last land use survey was completed in fiscal year 1959-60.

The Commission is jointly funded by both the State of Oregon and the State of California. No appropriations have been made to the Commission for the past four fiscal years. Funds available from prior year appropriations will be used to perform anticipated work in the budget year. Resources available at the beginning of Fiscal Year 1979-80 amounted to \$57,000. During Fiscal Year 1980-81 available resources are estimated to be \$52,000.

## DEPARTMENT OF BOATING AND WATERWAYS

The program objectives and responsibilities of the Department are: to develop and improve boating facilities throughout the State, to promote safety of persons and property connected with the operation of vessels on State waters and promote uniformity of law relating thereto, and to conduct a beach erosion program in cooperation with the federal government and local governmental agencies.

The Department makes loans for recreational harbor development and grants for boat launching facilities, plans and provides funding for capital outlay projects, licenses yacht and ship brokers and for-hire vessel operators, and conducts a program of boating safety and regulation. It participates with the Corps of Engineers and local agencies in the construction of beach erosion control projects and assists local jurisdictions in obtaining the greatest benefits available from federal beach erosion programs.

The Department has a seven-person commission appointed by the Governor.

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
I. Boating Facilities .....	\$9,528,201	\$10,784,633	\$13,263,077

I.	Loan program—private recreational marinas (Chapter 1062, Statutes of 1979) .....	-	50,000	-	1,000,000
III.	Beach erosion control .....	-	-	-	1,700,000

## I. BOATING FACILITIES DIVISION

### Program Objectives and Description

The objective of this program is to continue to plan, develop, and construct environmentally sound boating facilities in areas of demonstrated need so that California's boating and navigational needs might be satisfied.

To accomplish this objective, the Department functions as a central source of boating information by conducting special studies, assembling and compiling existing data, and disseminating the information to both public and private groups; contacts and meets with local governmental planning agencies to plan local boating facilities development; provides technical assistance for new boating facilities projects; provides financial assistance to local governments in the form of loans for small craft harbors and grants for boat launching facilities; and ensures that proper environmental safeguards are met in developing all boating facility projects.

The Department also plans, designs, and constructs boating facilities throughout the State Park System and state water project reservoirs and on other state lands. These projects are planned and coordinated in order to ensure proper recreational and environmental utilization. In addition, as marina-related concessions contribute to the financial feasibility of department-financed projects, the Department of Boating and Waterways reviews and approves concession proposals to ensure compatibility with departmental policies and objectives.

Finally, coordination with federal, state, and local governmental agencies and private concerns is maintained on all matters affecting navigation, boating, and boating's relationship with the environment in the State.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

e. Concession review.....	1	1	1	36,975	48,585	49,083

## a. Grant Program

The grant program provides grants to local governments and funds for joint state/federal projects in an effort to alleviate the shortage of safe and convenient boat launching facilities. Studies indicate that by 1980 there will be a need for 246 additional launching lanes in California.

Grant expenditures are used to fund various ancillary boating facilities including restrooms, lighting, car-trailer parking, ramp extensions, drinking fountains, utilities, boarding floats, safety signs, erosion protection, environmental enhancement and landscaping. In addition, the Department may grant funds to governmental agencies for the construction of floating restrooms on water bodies where conventional restrooms cannot meet the needs of boaters and when the presence of floating restrooms may lessen environmental degradation.

The effectiveness of this program can be measured by a number of factors, specifically: expenditures for completed projects, the number of completed projects, and the number of boat launching lanes constructed.

Grant program expenditures indicate the level of funding to local governmental jurisdictions. The number of projects includes the construction of boat launching lanes, ancillary boating facilities and floating restrooms. The number of boat launching lanes constructed is the clearest indication of grant output. As new launching lanes become available to the boating public, there is a corresponding reduction in waiting time for launching and retrieving of boats, plus the dispersment of boaters from overcrowded waters.

## Output

	1978-79	1979-80	1980-81
Expenditures for completed projects.....	\$1,295,000	\$2,094,000	\$1,917,000
Number of completed projects.....	10	13	13
Number of launching lanes constructed.....	8	12	11

## Input

Expenditures.....	\$1,881,285	\$2,119,416	\$2,212,020
Personnel years.....	8	8	8

## b. Loan Program—Local Government

The loan program provides loans to local governments in an effort to alleviate the shortage of safe and convenient small craft harbor facilities. California continues to experience increases in the boating population with its attendant demand for berthing spaces in small craft harbors throughout the State, especially in the south coastal area. Studies indicate that a minimum of 12,000 berths are required to meet demand by 1980.

In addition to developing new small craft harbors, the Department places a high priority on the expansion of existing berthing facilities. The expansion of existing small craft harbors assures both the optimal use of boating resources and the environmental protection of the coast.

The effectiveness of this program can be measured by a number of factors, specifically: expenditures for completed projects, the number of completed projects, and the number of berths constructed.

Loan program expenditures indicate the level of funding to local governmental jurisdictions. A harbor development project may include dredging, excavation, erosion control, environmental enhancement, landscaping and irrigation, plus the construction of breakwaters, harbor master offices, rest rooms, boarding floats, fuel docks, sewage pump-out stations, mooring buoys, berths, public access areas, and utilities. The following table indicates the Department's output over the last few years.

## Output

	1978-79	1979-80	1980-81
Expenditures for completed projects.....	\$6,250,000	\$6,000,000	\$5,250,000
Number of completed projects.....	5	6	6
Number of berths constructed.....	450	200	423

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## DEPARTMENT OF BOATING AND WATERWAYS—Continued

Input	1978-79	1979-80	1980-81
Expenditures .....	\$7,452,790	\$8,347,999	\$9,781,101
Personnel years .....	8.5	9	9

## c. Loan Program—Private Recreational Marinas

Chapter 1062, Statutes of 1979, provides for subordinated loans to be made to private recreational marina owners for the construction, improvement, or expansion of recreational marina facilities. The legislation also created the State Recreational Marina Revolving Account into which funds appropriated for this program are deposited. Administrative procedures and legislations are now being developed by the department to initiate this loan program commencing in the 1980-81 fiscal year.

Input	1978-79	1979-80	1980-81
Expenditures .....	—	\$50,000	\$1,000,000

## d. Capital Outlay Administration

The capital outlay program consists of boating facilities development in the State Park System, on State water project reservoirs, and on other State lands. The Department is responsible for the project location, scope, planning, and design of environmentally sound boating facilities within units of the State Park System and at State water project reservoirs.

Surveys of boating facility needs throughout the State Park System and the State water project reservoirs are conducted and priorities established by the Department in cooperation with the Departments of Parks and Recreation and Water Resources. The Department schedules the construction of boating facilities to meet the needs of the boating population in the various areas of the State.

The effectiveness of this program can be measured by a number of factors, specifically: expenditures for completed projects, the number of completed projects, the number of boat launching lanes constructed, and the number of moorings, berths, and boat-in sites constructed.

Capital outlay program expenditures indicate the level of spending on state projects. The number of projects includes the construction or improvement of boat launching lanes, moorings, berths, boat-in sites, and ancillary boating facilities.

The number of boat launching lanes, moorings, berths, and boat-in sites constructed is the clearest indication of capital outlay output. As these new boating facilities become available to the boating public, there is a corresponding reduction in waiting time for launching and retrieving of boats, plus the dispersment of boaters from overcrowded waters. The following table indicates the Department's output over the last few years:

Output	1978-79	1979-80	1980-81
Expenditures for completed projects .....	\$323,000	\$2,408,000	\$3,062,000
Number of completed projects .....	12	15	15
Number of launching lanes constructed .....	7	7	12
Number of moorings, berths, and boat-in sites constructed .....	—	185	210

Input	1978-79	1979-80	1980-81
Expenditures .....	\$157,151	\$218,633	\$220,873
Personnel years .....	3.5	4	4

## e. Concession Review

The repayment of State loans made to local governments under Section 71.4 of the Harbors and Navigation Code depends, to a large extent, on the proper development of concessions within the project area and the payment of a reasonable annual rent to the lessor, which, in turn, is used to repay the State.

Therefore, there is a continuing need to review the terms and conditions of new lease proposals. Concession revenues are a major collateral for loans and a high degree of expertise in this area of activity is vital to the state's interest. Sections 72 and 72.2 of the Harbors and Navigation Code require that the Department of Boating and Waterways approve the terms and conditions of all leases. By virtue of the fact that the Department has been and is involved in concessions work throughout the State, it has the expertise which is invaluable to local government in the negotiation and execution of lease contracts.

Input	1978-79	1979-80	1980-81

## II. BOATING OPERATIONS

## Program Objectives and Descriptions

The primary objective of the boating operations program is to reduce the incidence of loss of life, personal injury, and property damage resulting from boating accidents.

Activity in this program involves correlative efforts in uniform boating law enforcement, boater education, and boating safety. It requires the continual alignment of safety programs to meet new problems, e.g., whitewater fatalities, and to meet the wide variety of needs of an increasing number of boats and boaters. Associated problems of increased boating activity necessitate study and recommendations in river use and management practices. Aspects of the program involve gathering of statistical information concerning boating accidents to enable the department to monitor accident trends, problem areas and research causal factors in such mishaps. Additionally, the Department develops and implements programs for the eliminating of boating hazards. Boating safety literature is published and distributed to prevent problems before they occur. Coordination of educational programs in boating is of major importance in reducing accidents. Continuous coordination with over 700 municipal and justice courts and over 100 enforcing agencies ensures an acceptable level of uniformity in boating law enforcement. Although it is not known how many boaters were saved or accidents prevented, improving the boaters' knowledge of safety practices, prudent recreational area use practices, and boating regulations through education and uniform enforcement will help to achieve the desired objective.

d. Yacht and ship brokers licensing .....	3.5	3.5	3.5	110,890	129,465	129,990

## a. Boating Safety

Work in the boating safety element includes analysis and investigation of boating accidents, recommending changes in law and regulations marking or removing boating hazards, helping local agencies warn boaters of hazardous conditions, and recommending improvement in boating equipment. Presentations on boating safety are given to boating clubs, public service organizations, and others interested in boating. Surveys of existing pump-out facilities to accommodate waste discharge from vessels are conducted, in addition to a study of the requirements for installation of pump-out facilities at new state-sponsored projects. Boat shows are attended to answer questions regarding boating safety, operation, and equipment. Safety literature is disseminated statewide. New projects are inspected for compliance with state laws, and local entities are assisted in proper zoning and marking of waterways. Although changes in national accident reporting procedures have caused an overall increase in raw statistics, California has experienced a decrease in boat-related deaths.

## Output

	1978-79	1979-80	1980-81
1. Total number of boating accidents .....	963	1,063	1,163
2. Fatalities .....	85	90	90
3. Injuries .....	322	330	330
4. Property damage .....	\$3,054,418	\$3,100,000	\$3,100,000
5. 1 accident per number of boat-use days <sup>2</sup> .....	17,500	17,500	17,500

7. 1 injury per number of boat-use days <sup>2</sup> .....	72,000	72,000	72,000

## Input

Expenditures .....	\$398,160	\$630,443	\$571,691
Personnel years .....	10	10.8	10.8

## b. Boating Regulation

This element administers the state and federal aid programs which provide funds to qualifying local agencies involved in boating safety and enforcement. Additionally, it monitors local programs for effectiveness. To ensure uniform law enforcement statewide, annual training is provided for enforcement officers. Local boating ordinances are reviewed to ensure conformity with state law. This element maintains liaison with appropriate federal agencies as it relates to regulation and enforcement of boating statutes. Additionally, the for-hire vessel operator licensing program is administered by this element.

## Output

	1978-79	1979-80	1980-81
Increase number of patrol boats (estimated) .....	290	300	315
Number of citations .....	2,193	2,300	2,450
Number of boats per citation .....	225	225	225
Total number of peace officers trained and in service .....	500	525	550

<sup>1</sup> Includes all boats, registered, nonregistered, powered, and nonpowered.

<sup>2</sup> Boat-use days are based on figures compiled by Arthur Young and Company in their 1972 Boat Gasoline Tax Study. These figures only include registered boats.

DEPARTMENT OF BOATING AND WATERWAYS—*Continued*

## c. Boating Education

Work in the boating education element includes developing safety leaflets, posters, and education element also produces and issues press releases, radio and television spot announcements, and also coordinates with the State Department of Education, United States Coast Guard Auxiliary, United States Power Squadrons, and other boating organizations to promote better boating safety education through publicity of free boating instruction. The element is expanding the "Adventures Afloat" program (similar to drivers' training) on the high school level and is moving ahead with a new "Boating Centers" concept on the college level. Boating centers will provide instructor certification and equipment that can be used in all phases of "Adventures Afloat." Additionally, boating safety education will become available to the community through these centers.

Output	1978-79	1979-80	1980-81
Press releases.....	51	65	70
Public service announcements.....	7	10	10
Safety leaflets distributed.....	1,005,000	1,100,000	1,200,000
Films loaned to boating organizations.....	483	490	520
Students educated by State course.....	7,950	12,100	15,800
Input	1978-79	1979-80	1980-81
Expenditures.....	\$97,510	\$170,744	\$154,832
Personnel years.....	2.5	3	3

## d. Yacht and Ship Brokers Licensing

The objectives of this program are to protect the public from fraudulent acts by persons engaged in the sale or resale of used vessels, and to provide a minimum level of competence among such brokers and their salesmen. These objectives were set forth as a continuing program reflective of the intent of the Legislature by passage of the Yacht and Ship Brokers Act. Activity in the examination level includes licensing of yacht brokers and salesmen to assure uniform competency throughout the State. The activity at the investigative level handles complaints through arbitration or legal action.

Expenditures.....	\$110,890	\$129,465	\$129,990
Personnel years.....	3.5	3.5	3.5

## III. BEACH EROSION CONTROL

## Program Objectives and Description

Eighty-six percent of California's marine shoreline is undergoing erosion. Twenty-one miles are so critical that erosion is likely to endanger life and public safety within the next few years. Corrective measures to preserve recreational beaches and protect existing shoreline developments will require the cooperative participation of federal, State, local, and private agencies.

The objective of the beach erosion control program is to mitigate coastal erosion and develop shoreline protection measures to preserve and enhance the beach and shoreline developments of the State. The Department is responsible for advising local, State, and federal governments on the need to protect critical areas of erosion and cooperate with all levels of government in programs to provide protection.

The program involves cooperative efforts with the federal government, the California Coastal Commission, and local agencies to study and report on problems of beach erosion. Major beach erosion projects are constructed by the U.S. Corps of Engineers in cooperation with state and local agencies. Small beach erosion projects are constructed by local agencies with State cooperation.

Through cooperative research programs with government agencies, colleges and universities and independent state investigations, the Department is working toward a long-term plan for the preservation of California's valuable shoreline. The Department is directing its major effort in developing regional solutions for those sections of the coastline with serious erosion problems. The coastal environment under investigation includes the systematic measurement of the coastal wave climate and the natural sediment supplies to the beaches, the inventory of suitable offshore supplies of beach sand, and a better understanding of how sand is moved by waves and currents. These major studies will provide the necessary information to formulate an environmentally compatible means of shoreline preservation and protection with minimal use of massive coastal shore protection structures. In addition, the Department is continuing to work with the Corps of Engineers in obtaining actual wave data along critical reaches of the California Coast through a system of wave gauges.

For fiscal year 1980-81, \$1,700,000 in Energy and Resources Fund monies is proposed for beach erosion control projects at Sunset Cliffs, City of San Diego (\$1,100,000), and City of Santa Barbara (\$600,000).

## IV. GENERAL MANAGEMENT

## Program Objectives and Descriptions

The general management activity consists of executive direction and administrative services essential to the operation of the line programs.

The executive direction provides policy formulation, administrative direction, and guidance in policy implementation; overall planning and program management; coordination of line programs; and evaluations of program results.

The administrative services provide accounting, budgeting, personnel, business management services to the line programs, and financial audits of expenditures for small craft harbor planning and construction loans, launching facility grants, and boating law enforcement subventions.

## CALIFORNIA COASTAL COMMISSION

The California Coastal Act of 1976 continues the State's coastal management program started in 1972 by the passage of Proposition 20. The 1976 Act established policies on which coastal conservation and development decisions are to be made. These policies deal with public access to the coast, coastal recreation, the California marine environment, coastal land resources, and coastal development of various types, including power plant and other installations.

The "coastal zone" is defined on maps incorporated into the 1976 Coastal Act. The coastal zone extends three miles seaward and inland generally 1,000 yards, but in particularly important areas, generally undeveloped, and where there can be a considerable impact from development, the boundary can extend inland up to five miles. In developed urban areas, the boundary line may be less than 1,000 yards inland. The area under the jurisdiction of the San Francisco Bay Conservation and Development Commission is excluded from the coastal zone.

The Coastal Act of 1976 created a 15-person State Coastal Commission that consists of: three ex officio nonvoting members (the Secretaries of the Resources Agency and Business and Transportation Agency, and the Chairperson of the State Lands Commission); six public members appointed by the Governor and Legislature; and six members of the Regional Commissions appointed by Regional Commissions from their membership.

In 1977, the State Coastal Commission activated all six of the Regional Coastal Commissions after finding that the workload being faced required their assistance. The Regional Commissions consist of 12-16 members in each of the six regions, half of which are public members appointed by the Governor and Legislature and the other half of which are locally elected officials. There is a total of 78 Regional Commissioners. Under the provisions of the Coastal Act of 1976, as amended, Regional Commissions are to go out of existence not later July 1, 1981.

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
I. Coastal Management Program Implementation.....	\$6,435,408	\$12,081,482	\$9,251,084
II. Determination of Liquefied Natural Gas Terminal Sites .....	385,474	-	-
III. Coastal Energy Impact Program .....	565,803	3,275,847	2,438,225
IV. Administration and Support Activities:			
Distributed to other programs .....	(872,807)	(942,908)	(1,020,996)
Undistributed administrative costs .....	52,431	54,000	54,000
V. Legislative Mandates .....	400,000	400,000	400,000
TOTALS, PROGRAMS .....	\$7,839,116	\$15,811,329	\$12,143,309
Reimbursements .....	-70,016	-64,000	-54,000
NET TOTALS, PROGRAMS .....	\$7,769,100	\$15,747,329	\$12,089,309
General Fund .....	5,862,713	6,260,106	6,523,629
California Environmental License Plate Fund .....	-	12,000	173,100
Federal funds .....	1,906,387	9,475,223	5,392,580
Personnel years.....	198.8	207.6	210.3

### SIGNIFICANT PROGRAM CHANGES

Program	Description	Personnel years	Dollars
Ia-c.	Redirect staff emphasis from generalized planning to direct involvement in local coastal program development .....	-5.4	-\$180,339
Ic.	Improve the Commission's research, data collection and program evaluation capabilities .....	3	141,648
Id.	Display the San Francisco Bay Conservation and Development Commission's federal grants from the Coastal Zone Management Funds .....	-	310,000
Ie.	Implement a comprehensive system of public accessways to and along the coast as mandated by Chapters 840 and 868, Statutes of 1979 .....	3	173,100
IIIa.	Reduce CEIP Planning grants available to the State .....	-	-282,420
IIIb.	Continue positions administratively established in 1978-79 and increase CEIP Formula grant awards to State agencies and local governments .....	4.4	1,160,000
IIIc.	Eliminate CEIP Environmental grants .....	-	-180,000
IVa.	Develop and coordinate staff reduction programs and continue positions administratively established in 1979-80 for the administration of LCP grants to be funded by savings from contract agreement with the Governor's Office of Planning and Research .....	3	28,920
I-IV.	27.2 reduction in the 1979-80 fiscal year only .....	-3.2	-113,906

## CALIFORNIA COASTAL COMMISSION—Continued

## I. COASTAL MANAGEMENT PROGRAM IMPLEMENTATION

## Program Objectives and Description

The three elements of this program implement the California Coastal Act of 1976 and the California Coastal Management Program under the Federal Coastal Zone Management Act. The objectives of this program are to bring local general plans into conformity with the standards of the California Coastal Act, to continue the State's involvement in planning for coastal issues that cannot be adequately addressed by local governments, to regulate development along the coast while the local planning is being carried out, and to monitor and handle appeals of local regulatory decisions to ensure that State and national interests are protected.

## Authority

Public Resources Code, Division 20, Sections 30000 et seq.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

e. Coastal access program .....	—	1.6	3	—	75,000	173,100

## a. Regulation of Development in the Coastal Zone

The Coastal Act of 1976 gave the Coastal Commission regulatory control over development in the coastal zone (except for power plants, electric transmission lines, and uses or areas excluded under the Coastal Act). Prior to certification of local coastal programs (LCPs), the Coastal Commission may issue permits only if a proposed development would be in conformity with the provisions for the Coastal Act and would not prejudice the ability of the local government to prepare a local coastal program that is in conformity with the Act. A local government may elect to take over this permit review authority prior to the certification of its LCP, except for development generally between the ocean and the first public road, or 300 feet inland. Only one local government has exercised this option. In any area where a local government does not choose to assume the permit responsibility, the Commission retains permit authority. This authority is exercised by six regional coastal commissions. All local permits and regional commission permits are subject to appeal to the State Commission.

After certification of a local program, coastal development permits will be issued by local governments (except on tidelands, submerged land, or public trust lands), subject to a limited appeals procedure to the State Commission.

In the 1980-81 fiscal year the Commission has redirected staff resources and identified potential operating efficiencies that will permit elimination of 12.6 positions and a savings of \$308,508. An additional 0.5 of a position and \$10,000 for the preparation of a local coastal program for the City of Capitola completed in the current year is eliminated in 1980-81. 2.2 person-years are reduced in the current year due to Section 27.2 salary savings and one additional person-year of administrative overhead is distributed back to this element in 1980-81.

## Output

	1978-79	1979-80	1980-81
Permit applications filed .....	5,836	5,646	5,030
Regional commission actions:

<sup>1</sup> Budgeted as federal funds in the SFBCDC budget in 1978-79.

## CALIFORNIA COASTAL COMMISSION—Continued

## b. Local Coastal Program Preparation and Implementation

Local governments within the coastal zone are required to prepare a local coastal program (LCP) for that part of their jurisdiction which is within the coastal zone, and to submit the LCP to the Coastal Commission for certification by January 1, 1981. In general, these programs will include relevant portions of the local general plan, and maps necessary to implement the Coastal Act at the local level. Zoning ordinances, zoning district maps and other implementing actions may be submitted at the same time as the land use plan. The policies specified in the Coastal Act are the standards by which the local coastal programs will be judged for their adequacy. Financing of local government costs in preparing LCPs is provided entirely by the Coastal Commission, using Federal Coastal Zone Management funds and State matching funds provided by the Budget Act appropriation.

Local coastal programs are reviewed primarily by the Regional Commissions but are subject to review by the State Commission on its own motion or on appeal. If the local coastal programs are not certified and implemented by July 1, 1981, the Commission may:

1. Prohibit or restrict the affected local government from issuing a permit; or
2. Require a permit from the Commission for any development within all or part of the coastal zone of the affected jurisdiction.

Regional Commissions are dissolved within 30 days after the last local program is certified or on July 1, 1981, whichever is earlier.

As a result of redirections and efficiencies, 8.1 positions and \$162,169 General Fund monies has been added to this element to assist in the timely completion of the LCP's. In addition, the current year reflects the reduction of one person-year due to Section 27.2 salary savings requirements.

Output	1978-79	1979-80	1980-81
Issue identification/work programs approved (segments) .....	32	12	—
Land use plans approved (segments) .....	3	40	32

Expenditures .....	67	72.4	81.5	\$2,757,374	\$7,537,136	\$4,671,150
General Fund .....				2,188,339	2,486,105	2,795,140
Federal funds .....				551,450	5,041,031	1,876,010
Reimbursements .....				17,585	10,000	—

## c. Statewide Planning and Support Studies

To assist in the development of local coastal programs, to provide information for use in the interim regulation of coastal development, to address new problems, and to refine policies regarding current planning issues, the Commission requires information in areas such as soil management, seismic engineering, air quality, wildlife habitats, coastal transportation systems, coastal park planning, and groundwater systems. Most of this information is derived from studies performed under contract by other State agencies, Federal agencies, and private consulting firms. The Commission also is studying sites for designation as estuarine sanctuaries and acquisition using State and Federal funds. Additionally, the Commission was assigned specific responsibilities by the Coastal Act:

**Port Planning** Special port planning procedures are to be applied to the four major commercial ports located in the coastal zone. The Commission must review and certify such plans in a manner similar to local coastal programs and, after certification may hear appeals to certain classes of development permits and must certify amendments to approved port plans. Two port plans were certified during 1978-79 and the remaining two are expected to be approved in 1979-80.

**Public Works and State University Plans** The Commission may, prior to or after certification of local coastal plans, revise and certify long-range development plans for major public works and State university or college campuses.

**Energy Facilities Planning** If a new power plant is proposed in the coastal zone or expansion of an existing plant requested, the Commission must make a detailed review and recommendations on the adequacy of the proposed site to the Energy Commission, which must incorporate these findings into its analysis. The Coastal Commission also utilizes the regulatory process and special studies to develop standards for tanker terminals, oil and gas development, refineries, and petrochemical facilities.

The Commission has redirected 0.9 position and \$34,000 to the local coastal program preparation and implementation.

One research program specialist II, one conservation and development analyst I, one office assistant II, and \$76,000 are requested in 1980-81 to improve the Commission's research, data collection, and program evaluation capabilities.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	20.9	18.1	20.2	\$1,041,496	\$1,098,379	\$1,227,266
General Fund .....				859,656	916,539	1,055,426
Federal funds .....				181,840	181,840	171,840

## d. San Francisco Bay Segment of Federal Coastal Management Program

The federally-approved California Coastal Management Program includes a San Francisco Bay segment, which is administered by the San Francisco Bay Conservation and Development Commission (SFBCDC). Because the Coastal Commission is the agency designated by the Coastal Act of 1976 to be recipient of all federal Coastal Management Funds for California, the SFBCDC portion of California's grant must be passed-through by the Coastal Commission. In previous years, these funds were budgeted as federal funds by SFBCDC and were not displayed in the Coastal Commission's budget. With the creation of the Federal Trust Fund on July 1, 1979, however, the Coastal Commission must now include this funding within its own budget.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures (federal funds) .....	—	—	—	(\$485,573) <sup>1</sup>	\$380,000	\$310,000

<sup>1</sup> Budgeted as federal funds in the SFBCDC budget in 1978-79.

## CALIFORNIA COASTAL COMMISSION—Continued

## e. Coastal Access Program

Section 30001.5(c) of the Coastal Act of 1976 states that the intent of the Legislature is to promote maximum public access to California's scenic coastal areas. This goal is further emphasized by legislation passed in 1979 (Chapters 840 and 868, Statutes of 1979) prescribing major public access responsibilities for the Commission. Under the legislation, the Commission must inventory existing, dedicated, proposed and pending coastal accessways, develop standards for locating and developing accessways, identify public agencies appropriate for maintaining and accepting liability for accessways, and report to the Legislature and Governor on the cost and proposed financing methods for maintaining such accessways. The Commission will also prepare a coastal atlas for distribution to the public and serve as lead agency in an ongoing coastal access program.

In 1979-80, 1.6 personnel-years are added to begin implementation of the program. Three personnel-years are proposed in 1980-81 to continue the full year staffing requirements for the program.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	-	1.6	3	-	\$75,000	\$173,100
General Fund .....	-	-	-	-	63,000	-
California Environmental License Plate Fund .....	-	-	-	-	12,000	173,100

## II. DETERMINATION OF LIQUEFIED NATURAL GAS TERMINAL SITES

## Program Objectives and Description

The Liquefied Natural Gas (LNG) Terminal Act of 1977 requires the Coastal Commission to study potential onshore and offshore sites for LNG terminals and to make reports and recommendations on its findings. This work was completed in 1978-79.

## Authority

Public Resources Code, Section 30261 and Public Utilities Code, Chapter 10, commencing with Section 5550 (Chapter 855, Statutes of 1977).

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs.....	1.8	-	-	\$385,474	-	-
Totals, LNG Terminal Siting (General Fund) .....	1.8	-	-	\$385,474	-	-

## Program Elements

a. Designation of offshore LNG terminal sites	1.8	-	-	\$385,474	-	-
---	-----	---	---	-----------	---	---

## a. Designation of Offshore LNG Terminal Sites

The LNG Terminal Act of 1977 required the Coastal Commission to complete a study of potential offshore LNG terminal sites and types of terminals for such sites, in addition to the study of potential onshore LNG terminal sites that was completed and transmitted to the Public Utilities Commission on May 31, 1978. The results of this offshore study were transmitted to the Public Utilities Commission, the Energy Commission, the Governor, and to each house of the Legislature on September 16, 1978.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures (General Fund) .....	1.8	-	-	\$385,474	-	-

## III. COASTAL ENERGY IMPACT PROGRAM

## Program Objectives and Description

The Coastal Energy Impact Program (CEIP) is a federally funded program to provide funds for mitigating and preventing the adverse effects of coastal energy development. The Coastal Commission administers the program in California, with most of the grant funds being used to award grants to state agencies, local governments, special districts, and councils of government for projects that will benefit the grantees' jurisdiction. The CEIP provides five basic types of assistance: planning grants; environmental grants; formula grants; credit assistance; and repayment assistance.

## Authority

Public Resources Code, Division 20, Sections 30000 et. seq. and Section 308, Federal Coastal Zone Management Act of 1972, as amended.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs.....	7.2	8.7	8.7	\$565,803	\$1,740,645	\$1,740,645

c. Preventing or reducing damage to environmental resources .....	-	-	-	90,078	180,000	-

## CALIFORNIA COASTAL COMMISSION—Continued

## a. Coastal Energy Impact Planning

Section 308(c) of the federal Coastal Zone Management Act (1976 amendments) provides funding on an 80% Federal, 20% State/local match basis for grants to plan for the adverse impacts of coastal-dependent energy development activities. The Coastal Commission administers this program in California, funding its administrative costs from the grant, and makes sub-grant awards to State and local government agencies and councils of government for projects which qualify under the Federal guidelines and the Intrastate Allocation Process developed by the Coastal Commission, with assistance from the Governor's Office of Planning and Research.

*In 1979-80 federal funds for coastal energy impact planning are increased by \$233,226. These funds are reduced by \$515,646 in 1980-81.*

Output				1978-79	1979-80	1980-81
Grants awarded by Commission .....				6	6	-
<b>Input</b>	<b>78-79</b>	<b>79-80</b>	<b>80-81</b>	<b>1978-79</b>	<b>1979-80</b>	<b>1980-81</b>
Expenditures.....	4.4	5.8	5.8	\$173,473	\$693,871	\$178,225
<i>General Fund</i> .....				24,856	35,645	35,645
<i>Federal funds</i> .....				148,617	658,226	142,580

## b. Monitoring Coastal Dependent Energy Development

Section 308(b), 308(c) (1), and 308(c) (2) of the Federal Coastal Zone Management Act provide funding for grants to plan for the onshore and offshore effects of outer continental shelf (OCS) oil and gas exploration activities and other coastal-dependent energy development. Most of the funds available will be awarded to State and local agencies and the Coastal Commission is using a grant to fund a comprehensive energy program and to coordinate and develop the State's position on OCS lease sales and OCS exploration and development generally.

*The Commission proposes to continue the 4.4 positions administratively established in 1979-80 through 1980-81 and expects to award grants totaling \$1,010,000 to other State agencies and local governments.*

Output				1978-79	1979-80	1980-81
Grants awarded by Commission .....				20	20	25
<b>Input</b>	<b>78-79</b>	<b>79-80</b>	<b>80-81</b>	<b>1978-79</b>	<b>1979-80</b>	<b>1980-81</b>
Expenditures (Federal funds) .....	2.8	7.3	7.3	\$302,252	\$2,401,976	\$2,260,000

## c. Preventing or Reducing Damage to Environmental or Recreational Resources

Section 308(d) (4) of the Federal Coastal Zone Management Act provides 100% funding from the Federal government for grants which prevent, reduce, or repair damage to, or loss of, valuable environmental or recreational resources caused by coastal energy activities.

*No federal funds will be available in 1980-81 for this element.*

<b>Output</b>				<b>1978-79</b>	<b>1979-80</b>	<b>1980-81</b>
Grants awarded by Commission .....				2	3	-

## IV. ADMINISTRATION AND SUPPORT ACTIVITIES

## Program Objectives and Description

Under the direction of the Executive Director of the State Coastal Commission, this program supports all Coastal Commission programs and offices with general policy direction and personnel, accounting, budgeting, and business services support. It also provides management of Federal grants, contracts, and service agreements with other State agencies.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs .....	23.6	25.8	25.8	\$925,238	\$996,908	\$1,046,076

Totals, Administration and Support Activities	23.6	27.8	28.8	\$925,238	\$996,908	\$1,074,996
Less: Amounts charged to other programs .....	-21.7	-24.8	-25.8	-872,807	-942,908	-1,020,996
Net Totals, Administration and Support Activities .....	1.9	3	3	\$52,431	\$54,000	\$54,000

## CALIFORNIA COASTAL COMMISSION—Continued

## a. General Administration

This element provides basic administrative services to all Coastal Commission programs and its costs are, accordingly, included in the totals of the other programs.

One staff services analyst is proposed for the 1980-81 fiscal year to meet increased personnel administration workload.

One management services technician and one office assistant II were established in 1979-80 and are proposed to continue in 1980-81 to strengthen contracts and grants management functions funded through rebudgeting of contractual services with OPR.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	(21.7)	(24.8)	(25.8)	(\$872,807)	(\$942,908)	(\$1,020,996)

## b. Administrative Support to Other State Agencies

The Coastal Commission provides administrative support services to the San Francisco Bay Conservation and Development Commission and the State Coastal Conservancy under separate Interagency Agreements. This support includes personnel and accounting services and advice and assistance in general administrative, budget, and Federal grant activities.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures (Reimbursements) .....	1.9	3	3	\$52,431	\$54,000	\$54,000

## V. LEGISLATIVE MANDATES

In accordance with Section 2231 of the Revenue and Taxation Code, Section 16 of the Coastal Act allows local governments to be reimbursed for any costs they necessarily incur in achieving compliance with the Coastal Act for which Federal funds are not available.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures (General Fund) .....	-	-	-	\$400,000	\$400,000	\$400,000

## STATE COASTAL CONSERVANCY

### Program Objectives and Description

Chapter 1441, Statutes of 1976 established the State Coastal Conservancy within the Resources Agency. The State Coastal Conservancy was created in order to develop and implement programs that are needed to protect, restore, and enhance natural, scenic, and man-made resources in the Coastal Zone within policies and guidelines established pursuant to the California Coastal Act of 1976 (Chapter 1330).

Specifically, the State Coastal Conservancy is empowered to: a) acquire agricultural lands in order to prevent the loss of such lands to other uses and to assemble such lands into parcels of adequate size so as to permit continued agricultural production; b) provide grants to local agencies for, or undertake itself, projects designed to restore areas which are adversely affecting the coastal environment or impeding orderly development due to poor lot layout, scattered ownerships, incompatible land uses, or other conditions; c) award grants to local or State public agencies for, or undertake itself, projects designed to enhance natural and scenic values threatened by indiscriminate dredging or filling, improper location of improvements, and other conditions; d) undertake projects in the preservation of significant coastal resource areas until other public agencies are willing or able to acquire such sites; and e) award grants to the Department of Parks and Recreation or to local public agencies for the purpose of acquiring and developing public accessways to the coast.

As of December 1, 1979, the State Coastal Conservancy has authorized the preparation of plans and/or the implementation of one proposal under its agricultural preservation program (Morro Valley); three lot consolidation proposals (at Whiskey Shoals in Mendocino County, Furlong Gulch in Sonoma County, and El Nido in the Santa Monica Mountains in Los Angeles County) and four waterfront restoration proposals (in Eureka, Fort Bragg, Santa Barbara, and Seal Beach) under its coastal restoration program; two wetland enhancement proposals (at Arcata, and in the San Dieguito Lagoon in San Diego County) and one greenbelt preparation proposal (in southern Orange County) under its coastal enhancement program; two site reservation projects (in Trinidad, and at Garrapata Beach in Monterey County) and has awarded coastal accessway development grants to 12 local governments along the coast. In addition, the State Coastal Conservancy has accepted six donated or dedicated interests in land, providing further coastal access, marsh and open space protection or housing opportunities for low-income residents.

In 1979-80, one personnel-year of temporary help and \$45,000 (PWEA Title II) is carried over from the past year to assist with program definition and to provide coordination with other agencies.

In 1980-81, \$265,350 from the Environmental License Plate Fund is added to the budget for wetland enhancement projects in the San Dieguito Lagoon and for the Aliso Greenbelt Trail System, and \$500,000 from the Energy and Resources Fund is added for a coastal access acquisition project.

## DEPARTMENT OF PARKS AND RECREATION

The Department of Parks and Recreation acquires, designs, develops, operates and maintains units of the State Park System. The Department also has the responsibility to administer both federal and State local assistance programs. These activities are directed toward the accomplishment of seven principal objectives:

1. To secure and preserve elements of the State's outstanding landscape, cultural, and historical features.
2. To provide the facilities and resources which are required to fulfill the recreational demands of the people of California.
3. To provide a meaningful environment in which the people of California are given the opportunity to understand and appreciate the State's cultural, historical, and natural heritage.
4. To maintain and improve the quality of California's environment.
5. To prepare and maintain a statewide recreational plan that includes an analysis of the continuing need for recreational areas and facilities, and a determination of the levels of public and private responsibility required to meet those needs.
6. To encourage all levels of government and private enterprise throughout the State to participate in the planning, development, and operation of recreational facilities.
7. To meet the recreational demands of a highly accelerated, urban-centered population growth, through the acquisition, development, and operation of urban parks.

An ever-increasing population in California has resulted in accelerated urbanization which necessitates the establishment of park units and recreation areas accessible to the major population centers of the State. Technological advances have created a more affluent society with additional leisure time increasingly spent in pursuit of various forms of recreation. It is necessary to provide for the wise and constructive use of the State's natural resources for recreational uses and to preserve the State's cultural, historical, and natural heritage for future generations to enjoy.

## I. STATEWIDE PARKS AND RECREATION PLANNING

## Program Objectives and Description

The objective of this program is to provide the basic planning framework for the maximum use of state resources devoted to recreation. Its goal is to establish needs and priorities on a statewide basis to facilitate distribution of resources into areas of maximum benefit. Primary responsibility for this program is vested in the Department's Planning Division.

In 1979-80, \$65,000 was appropriated to the department via special legislation to undertake feasibility studies for the acquisition of Verdugo Hills and Lake Cunningham and for planning and development of an interpretive guide for the Great Overland Road Heritage Corridor. The current year also reflects a one-time salary savings reduction equivalent to 1.6 person years pursuant to Section 27.2 Budget Act of 1979.

A Needs Analysis Study is currently underway to determine the recreational needs of Californians. The Needs Analysis Study, will provide the Legislature and the Administration with better information on which to base dollar allocations for recreation. The study includes four elements: Household Recreation Pattern Surveys, Urban Case Studies, Recreation Standards, and Parks Update.

A contract for the Household Recreation Pattern Surveys portion will be completed in the current year. Work on the Urban Case Studies element will be completed in October of 1980. Both the Recreation Patterns and Parks Update elements will be completed by December of 1980. It is anticipated that the entire study will be completed and delivered to the Legislature by January of 1981.

## DEPARTMENT OF PARKS AND RECREATION—Continued

## II. DEVELOPMENT OF THE STATE PARK SYSTEM

## Program Objectives and Description

The objective of this program is to meet the demand for additional State lands and facilities through its efforts in acquisition of lands and development of facilities. It is also the goal of this program to develop effective interpretive programs for all State Park System units. This program also provides the technical assistance for accomplishing maintenance of State Park System facilities. The program is the joint responsibility of the Acquisition and Development Division and the Interpretive Services Section of the Resource Preservation and Interpretation Division.

c. Interpretive development .....	104.7	141.6	93.3	2,072,791	4,557,525	3,072,468

## a. Acquisition

This element involves the preparation of budget requests, negotiations, condemnation and liaison necessary to acquire lands for the State Park System. It requires the administration of the Department's acquisition program including funded acquisition projects, gifts, exchanges, transfers and leases. Continuous liaison is maintained with the Real Estate Services Division of the Department of General Services as well as various State and federal agencies to insure a well coordinated acquisition program.

The Governor's Task Force on Parks and Recreation Acquisitions was formed in July 1979, to expedite the completion of acquisition projects for the State Park System. The goal of the Task Force is to condemn, drop, or settle approximately 800 funded parcels prior to June 30, 1980. As of December 1, 1979, the 268 parcels scheduled for action by this date have been completed.

A reduction of 22 positions is being proposed in the budget year to reflect the completion of workload associated with the 1974 and 1976 Bond Acts. Sixteen personnel years are proposed for continuing acquisition workload including ownership records, future acquisition planning and budgeting. An additional 2.2 positions are also included in the budget year as a result of reinstatement of a one-time Section 27.2 Budget Act of 1979 reduction.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	41.4	41.5	37.7	\$1,072,427	\$2,129,047	\$1,911,252

Federal Funds.....				3,670	5,871	—
Reimbursements .....				530,670	1,565,084	789,607

## b. Facilities Development

This element includes all efforts culminating in a completed recreational facility or major modifications or repair to an existing facility. Such efforts include refining plans as required to support reliable cost estimating, budget preparation for approved projects, production of general development plans for control of design in working drawing development, production of working drawings and specifications, coordinating project bid and contracting program, construction inspection and necessary liaison with State, federal and private agencies.

## DEPARTMENT OF PARKS AND RECREATION—Continued

In 1979-80 only, revisions to the budget have added 3.7 personnel years for development of immediate public use facilities at Candlestick Park and 14 personnel years for various statewide day labor projects. The increase in salary savings associated with Section 27.2 decreased personnel years by 4.2.

In the budget year, ten positions are proposed for deletion to reflect the completion of workload associated with the 1974 and 1976 Bond Acts. Five positions are proposed for deletion to reflect the completion of the federally funded recreation facility planning effort for the Auburn-Folsom project. Nine personnel years are proposed for continued general planning for future development within the State Park System. An additional 23.3 personnel years are proposed for day labor construction projects which will be undertaken in 1980-81. Two personnel years have been added to provide architecture and engineering capability to accomplish the initial phase of a Solar Retrofitting program for units of the State Park System funded from the Energy and Resources fund.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	142.4	118.4	124.2	\$4,721,953	\$4,393,749	\$4,352,801

Reimbursements .....				1,325,689	2,118,021	1,840,904

## c. Interpretive Development

This element combines all activities necessary to conduct research necessary for effective interpretation of the natural, historical and recreational resources. It is responsible for designing and developing exhibits, museums, programs, tours, and publications needed to enhance the State Park System interpretive experience.

In 1979-80 only, 9.3 personnel years were added for interpretive development workload on the State Capitol Restoration project. In addition, 14.7 personnel years were added for the completion of railroad restoration work pursuant to a PWEA-Title II grant, and 62.4 personnel years were added to accomplish workload interpretive workload on capital outlay projects. A one-time reduction in salary savings equivalent to 4 personnel years is included pursuant to Section 27.2, Budget Act of 1979.

A reduction of 12.5 positions is proposed in 1980-81 to reflect completion of the interpretive work on the California Railroad History Museum. One personnel year has been reduced to reflect completion of 1974 Bond fund interpretive activity. One personnel year is proposed for interpretive planning on future State Park capital outlay projects. An additional 46.6 personnel years are proposed to accomplish interpretive workload on currently funded capital outlay projects.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81

## III. STATE PARK SYSTEM OPERATIONS

## Program Objectives and Description

It is the responsibility of this program to provide services such as protection, interpretation, and public information to the users of the State Park System. It is also the responsibility of this program to preserve and maintain all features of the State park. Its primary goal is to insure a significant recreational experience at each park unit. The activities of this program can be grouped into three major elements — park unit services, public information and concession services.

State Park System Operations Data			
	1978-79	Estimated 1979-80	Projected 1980-81
Visitor days (millions) .....	56.4	60	62.5
Acreage (thousands) .....	1,020	1,038	1,093
Campsites .....	14,472	14,844	15,145
Picnic sites .....	9,050	9,518	9,763

c. Concessions services .....	8.2	3	3.1	209,432	108,664	111,124

## a. Park Unit Services

It is the purpose of this element to maintain park unit facilities for public use and insure a significant recreational experience at each park unit within the State Park System. This is accomplished by providing a wide range of visitor services such as law enforcement, interpretation of the various resources within the system, and other visitor services. Also contributing to the accomplishment of this goal, this element provides a wide range of maintenance services including resource management, housekeeping, and maintenance to preserve the facilities and resources of the system.

In 1979-80 only, revisions to the budget added 2.7 personnel years for security at Mt. Tamalpais State Park in conjunction with the US Air Force, 43.1 personnel years for contract services with the Division of Real Estate Services, Department of General Services and other agencies, 19.2 personnel years for maintenance projects, and 36.4 personnel years for the expansion of the 1979 Youth Conservation Corp Summer program.

In 1980-81, 35.8 personnel years are proposed for various contractual agreements and maintenance projects including services to Division of Real Estate Services, Department of General Services, Motion Picture Development Council, and services funded from donations to the State Park Contingent Fund.

An additional 110 positions are also included in 1980-81 as a result of reinstatement of a one-time Section 27.2 Budget Act of 1979 reduction.

An increase of 49.9 positions is proposed to operate the California State Railroad History Museum. An increase of 56.1 positions is being proposed to operate new facilities and land which will be added to the State Park System prior to or during 1980-81. As salary savings for the above two increases to staff amounts to 4 positions, the net increase to personnel years associated with newly acquired or developed facilities is 102. An increase of 1.4 personnel years is proposed for increased visitor services at the Auburn-Folsom project funded by the federal government. An increase of 2.2 person years is proposed to provide ingress and egress at the radar station at Mt. Tamalpais State Park funded by contract with the US Air Force.

A reduction of 26 personnel years is proposed as a saving measure realized from operational economies which will be implemented in 1980-81. An augmentation of \$99,666 is proposed for inclusion in 1980-81 to enable the Department to contract with a consultant to complete a system design for a reservation system which could be operated by the Department.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	2,162.8	2,188.7	2,312.7	\$50,753,826	\$58,234,065	\$63,705,351
General Fund .....				45,325,668	53,510,815	58,258,275
Bagley Conservation Fund — State Park Highway Account.....				699,560	933,860	—
Collier Park Preservation Fund .....				83,300	65,957	—
State Parks and Recreation Fund .....				—	—	1,480,993

Harbors and Watercraft Revolving Fund .....				240,080	272,463	281,029
Federal funds .....				1,710,422	1,285,048	899,481
Reimbursements .....				2,238,514	1,298,583	1,519,414

## b. Public Information

This element includes all efforts necessary to communicate to the public and departmental personnel meaningful information on the Department's program and on the environmental, historical, archeological, natural, recreational and scientific resources of the State Park System. It also includes the efforts needed to coordinate the Department's publication program and to provide assistance on public relations and public information matters.

The program also encompasses the production of park publications, brochures and folders as well as maintenance of contacts with the various news media.

During the 1980-81 fiscal year, a reduction of one personnel year is proposed to reflect the completion of activities associated with the 1974 Bond Act. An increase of four personnel years is proposed to establish a self-supporting park folder production program. An increase of 0.8 positions is associated with the reinstatement of one-time Section 27.2 Budget Act of 1979 reduction.

## DEPARTMENT OF PARKS AND RECREATION—Continued

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	21.8	16.6	20.4	\$996,415	\$658,495	\$870,402
General Fund .....				867,264	504,070	567,871
Collier Park Preservation Fund .....				31,964	-	-
Reimbursements .....				97,187	154,425	302,531

## c. Concessions Services

It is the responsibility of this element to coordinate and direct the work of the Department relating to concessions, special use permits, and certain agreements issued to and received from federal and local agencies. This element encompasses the administration of concession contracts including analysis of bid contracts and the planning and supervising of concession operations. It is the goal of this element to provide adequate concession services which are reasonable, clean, and add to the citizen enjoyment of the State Park System.

*In 1980-81, this staff is increased by 0.1 position with the reinstatement of the one-time Section 27.2 Budget Act of 1979 reduction.*

The following are concessions proposals planned for 1980-81 which involve either private investments or concessionaire gross receipts in excess of \$100,000 on an annual basis.

Contract Extensions:

1. Pismo State Beach—Golf course, club house, and restaurant.
2. McArthur-Burney Falls Memorial State Park—Grocery store, snack bar, and boat rental.
3. Hearst San Simeon State Historical Monument—Snack bar, and souvenir shop.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures (General Fund) .....	8.2	3	3.1	\$209,432	\$108,664	\$111,124

## IV. RESOURCE PRESERVATION

## Program Objectives and Descriptions

This program provides protection for the natural, cultural and historic resources of the State Park System. Preservation efforts are directed toward two major types of resources — natural and environmental resources and cultural resources which includes archeological and historical resources.

## Authority

Division 5, Chapter 1, Article 1 of the Public Resources Code  
National Historic Preservation Act of 1966 (Public Law 89-665)

## Program Elements

a. Cultural resources .....	62.3	39	46.8	\$1,410,715	\$1,360,424	\$1,527,015
b. Natural resources .....	25.4	24.9	22.9	627,989	777,728	1,874,240

## a. Cultural Resources

This program is directly responsible for the Department's participation in the preservation of the State's cultural resources. These include archeological and historical features over which the State has jurisdiction and all of the State's historic resources as outlined by the Department's participation in the National Historic Preservation Act of 1966. Responsibility for this program rests with the Cultural Heritage, Archeological and Historical Services, and Office of Historic Preservation units in the Resource Preservation and Interpretation Division.

Preservation responsibility for State Park System cultural resources includes providing professional expertise concerning cultural resources and monitoring the status of cultural resources. The collection of basic resource data in the form of park unit inventories of cultural resources provides the data required to complete the resource management element. These are the principal resource documents for all Department lands and are key components to the General Development Planning. This program includes the mitigation of archeological and historical resources which is the logical step following the identification and protection of cultural resources.

*Current year only workload adjustments will add 5.5 personnel years for the PWEA—Title II—Old Sacramento Archeology project and 1.9 personnel years for resource planning and studies of new off-highway vehicle use areas.*

## DEPARTMENT OF PARKS AND RECREATION—Continued

In 1980-81, 10.3 personnel years are proposed for workload associated with cultural resource identification and mitigation associated with the Department's capital outlay program. In addition, four personnel years are being added to reflect a reallocation of professional and consulting funds to staff in the Office of Historic Preservation to accomplish the objectives of the National Historic Preservation Act. Finally, 0.9 position are added as a result of the reinstatement of the one-time Section 27.2 Budget Act of 1979 reduction.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures	62.3	39	46.8	\$1,410,715	\$1,360,424	\$1,527,015
General Fund				712,051	479,389	379,332
Collier Park Preservation Fund				18,986	7,136	—
State Parks and Recreation Fund				—	—	7,580
Off-Highway Vehicle Fund				8,440	—	—
Federal funds				241,059	553,224	570,186
Reimbursements				430,179	320,675	569,917

## b. Natural Resources

This element concentrates its preservation and protection efforts in areas of environmental importance within the State Park System. Field reconnaissance, studies, and consultations related to identification, analysis and formulation of management and protection programs for vegetative, wildlife and scenic resources are major activities included within this program. Review of Environmental Impact Reports and the maintenance of hazard review programs are included as major components toward this effort.

Current year workload adjustments will add 5.8 personnel years for the natural resources planning and studies of new off-highway vehicle use areas. In 1980-81, two personnel years are proposed for workload associated and funded from the Department's capital outlay program. Another 1.8 positions are added as reinstatement of the one-time Section 27.2 Budget Act of 1979 reduction. In addition \$1,096,421 is proposed to begin a major resource management program in the State Park System. \$500,000 of this program is being funded from the Energy and Resources Fund. An augmentation of \$40,000 in professional and consulting funds is proposed to accomplish soil erosion studies in State Park units impacted by off road vehicles use.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures	25.4	24.9	22.9	\$627,989	\$777,728	\$1,874,240
General Fund				337,398	335,271	998,060
Park and Recreation Revolving Account				5,576	—	—

Off-Highway Vehicle Fund				—	—	63,568
Energy and Resources Fund				—	—	500,000
Reimbursements				68,030	225,199	70,620

## V. ASSISTANCE TO PUBLIC AND PRIVATE RECREATIONAL AGENCIES

This program is the sole responsibility of the Grants and Local Assistance Office. Its main objective is to administer State and federal programs for financial assistance to local jurisdictions and State agencies for outdoor recreation. It also seeks federal, State, and private funds, gifts, lands and other donations for use in the Department's park and recreation related programs. A second main objective of this program is meeting statewide recreational deficiencies by qualifying the State of California as a recipient of grants from the Federal Land and Water Conservation Fund. The costs of providing additional recreational facilities often exceed the financial capability of local government agencies, and the federally sponsored Land and Water Conservation Fund along with the 1974 State Beach, Park, Recreational and Historical Facilities Bond Fund help to alleviate this deficiency.

In 1979-80, one time reduction in salary savings equivalent to 1.9 personnel years is being taken pursuant to Section 27.2, Budget Act of 1979. In 1980-81, one personnel year is proposed for deletion to reflect decreased workload in the State Beach Park Recreational and Historical Facilities Fund of 1974. In addition, Chapter 1166, Statutes of 1979, appropriated an additional \$10 million to the California Urban Open Space and Recreation Local Grant program for 1980-81.

## Authority

## a. Grants Administration

This element includes those efforts needed in administering the requirements of federal and State grant programs which provide financial assistance to local agencies for recreational development, developing and coordinating the means by which individuals, organizations and federal agencies can contribute money and gifts to enhance the State Park System. It also provides planning and technical-informational services to local governmental agencies, nongovernmental entities and individuals as needed to maximize their involvement in helping to meet public recreational needs.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81

Federal funds .....				251,977	368,282	374,360
Reimbursements .....				17,443	19,351	152,818

## b. Grants to Local Agencies

This element consists of the estimated State and federal grant allocations to be administered by the Department of Parks and Recreation to local recreational agencies throughout California from all sources not including the California Urban Open Space and Recreation Local Grants Program.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	—	—	—	\$51,519,908	\$44,977,233	\$30,509,216
Off-Highway Vehicle Fund .....				333,750	8,658,057	—
State Beach, Park, Recreational and Historical Facilities Fund of 1974 .....				6,295,583	5,845,532	3,285,505
Nejedly-Hart State Urban and Coastal Bond Fund of 1976 .....				23,096,815	21,464,044	4,283,864
California Environmental Protection Program Fund .....				—	360,000	—
Federal funds .....				21,793,760	8,649,600	22,939,847

## c. California Urban Open Space and Recreation Local Grants Program

This element consists of the amount of grant allocations to be administered by this Department to local recreational agencies pursuant to the goals of the California Urban Open Space and Recreation Program which provide assistance to cities, counties, and other local jurisdictions in the acquisition and development of parks and other public recreation areas in or near the urban areas of California.

This element is designed to meet the demand for more outdoor recreation opportunities in the urban areas of the State where 90 percent of the population resides but where a 30 percent deficiency in open space and recreation areas exists. A total allocation of \$65 million has been authorized for grants for this program during the period from 1976-77 through 1978-79.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures (General Fund, Local Assistance) .....	—	—	—	\$26,942,956	\$15,985,870	\$10,000,000

## VI. MANAGEMENT AND ADMINISTRATION

## Program Objectives and Description

This program provides the necessary leadership, regulation, and policy determination to ensure the Department's goals and objectives are satisfactorily met. This program is also responsible for providing the necessary administrative services and guidance for the proper functioning of all departmental programs.

It is the purpose of this element to consider recommendations and guidance from the State Park and Recreation Commission, the California Recreational Trails Committee, the California Historical Landmarks Advisory Committee, and the Advisory Board on Underwater Parks and Reserves and to formulate departmental policy, establish departmental organization, direct operating organizational units, review and draft legislation, and represent the Department in all operational functions.

To use Department resources efficiently toward the accomplishment of the Department's principal objectives, this element sees that policy is constantly analyzed, formulated, and reviewed. Use of Department resources toward common goals is also monitored within this element to ensure the setting of project and program schedules and priorities to realistically reflect the Department's policies.

The administration element provides the necessary business and administrative functions for the proper operation of all departmental programs. Activities include those involving human resources—personnel, affirmative action, and training; fiscal support—auditing and accounting; and business management including departmentwide clerical, distribution, reproduction and office management services.

## DIVISION OF EXPOSITION AND STATE FAIR

The objective of the Division of Exposition and State Fair, Department of Parks and Recreation, is to provide a medium for the education, commercial interaction, personal interaction, and recreation of the citizens of California by providing a forum for the competitive and non-competitive exhibition of the State's industrial and agricultural accomplishments.

### Program Requirements

## CALIFORNIA EXPOSITION AND STATE FAIR

### Program Objectives and Description

Fairs traditionally provide an arena for the presentation of new ideas and information for the education of the visitor as well as providing a market place for the demonstration, advertisement, and sale of goods and services. Sponsors from the governmental and commercial sectors can present promotional information to the public. Fairs stimulate achievement through awards and prizes for excellence in the fields of agriculture and industry, and create a festive atmosphere with events and attractions for the amusement and recreation of their participants.

The Division, through the operation of the California Exposition and State Fair, provides a showcase for the agricultural, recreational and industrial resources of California for both residents and non-residents. It provides a forum for State Government to present its achievements to its constituency, and establishes programs of public participation to encourage the interchange of information regarding agriculture, industry and government. The State Fair also provides conventional youth programs for Scouting, 4-H, and FFA, and provides a recreational outlet for the citizens of California.

In the current year there is a one-time increase of 8.4 person years in salary savings pursuant to Section 27.2, Budget Act of 1979. Also in the current year there are two Emergency Fund allocations: one for \$52,366 for increased publicity and one for \$72,000 to compensate for a shortfall in anticipated revenue.

The shortfall in anticipated revenue results from the anticipated loss of the spring racing days (harness meet). In 1980-81, the loss of revenue associated with the loss of the harness meet will be partially made up with alternate events that could be held in the facility if no harness meet were being held. As it is estimated that \$132,000 in revenue can be raised through alternate events, \$111,000 is proposed to be appropriated from the General Fund to compensate for the \$243,000 loss in revenue.

Proposed adjustments to the Cal Expo budget in 1980-81 include the transfer of a total of \$59,500 in funding from the Holiday Fair (\$44,500) and Jazz Festival (\$15,000) to the advertising budget. It is intended the Holiday Fair and Jazz Festival be continued, but financed through non-state organizations with the State receiving a percentage of gross income. It is anticipated that the proposed increase in advertising funds would generate the additional revenue to cover initial minor loss of State revenue (previously generated by the Holiday Fair and the Jazz Festival) and eventually result in higher levels of revenue than would be possible if the State were to continue production of these events.

In the past the Division of Exposition and State Fair has participated in various exchange service agreements. The majority of these agreements involve less than a \$5,000 value. For those that exceed \$5,000 and are proposed for continuation in the 1980-81 fiscal year, the following summary is provided:

**Souvenir Program**—Publisher (chosen through bid process) supplies 350,000 souvenir programs. All costs are at the contractors sole expense. All advertising fees are collected by the contractor. Estimated savings to the State is \$20,000.

**Advertising**—Through agreement, originally established in 1968, contractor provides billboard advertising throughout Northern California market area for the State Fair, Indian Days, and Holiday Fair. State provides easement rights to contractor for use of three signboards for the remaining ten months of the year. Estimated savings to the State is \$30,000.

In addition, the Division of Exposition and State Fair participated in various co-promotional efforts. The purpose of these agreements is to allow willing businesses the use of the State Fair in promotional campaigns which, at no cost to the State, provides approximately \$100,000 a year in advertising value. In all cases, besides generating savings, exchange and promotional agreements provide additional revenues through increased attendance.

# SANTA MONICA MOUNTAINS CONSERVANCY

## Program Objectives and Description

The Santa Monica Mountains Conservancy was created by Chapter 1087 (AB 1512), Statutes of 1979 to implement the Santa Monica Mountains Comprehensive Plan by developing programs for full fee or less than fee acquisition, restoration or consolidation of lands in the Santa Monica Mountains Zone for park, recreation, or conservation purposes.

The specific powers of the Conservancy include powers to: (1) acquire real property, including development rights and easements, and lease, rent, sell, or transfer, or exchange these lands; (2) award grants or interest free loans to State and local agencies for purchase or restoration of park, recreation, conservation, or buffer-zone purposes to ensure that the character and intensity of development on these lands is generally compatible and does not adversely impact the Santa Monica National Recreation Area; (3) award grants or interest free loans to State and local agencies for assembly of parcels to improve or correct resource management or for development of public facilities essential to park, recreation, or conservation purposes; (4) acquire and hold for subsequent conveyance, or award grants or interest free loans, to an appropriate public agency for acquisition of park, conservation, or recreation sites, when that agency cannot expedite acquisition of critical sites under immediate development pressure; (5) accept dedication or easements or tax delinquent parcels and have first right of refusal on property being sold as excess land by a public agency.

Development of the Conservancy work program is underway. The agency issues its first annual report to the Governor and Legislature on January 1, 1981.

# SAN FRANCISCO BAY CONSERVATION AND DEVELOPMENT COMMISSION

The San Francisco Bay Conservation and Development Commission, headquartered at San Francisco, was created by the Legislature in 1965 with objectives to provide a regional approach to protecting the public interest in San Francisco Bay; to insure its beneficial use as the most valuable single natural resource of the entire region; and to provide a democratic and politically responsive process by which the bay and its shoreline can be analyzed, planned, and regulated as a single unit.

## I. BAY CONSERVATION AND DEVELOPMENT

### Program Objectives and Description

The San Francisco Bay Conservation and Development Commission is charged with: maintaining the bay plan in an up-to-date manner based on current information and projections in order to serve as a guide for the conservation of San Francisco Bay and the development of its shoreline; carrying out provisions of law by issuing or denying permits for all filling or dredging in the bay; for change in use of salt ponds or other "managed wetlands" adjacent to the bay; and for substantial change in use of property within 100 feet of the bay.

Comprehensive regional planning studies are conducted by staff and consultants to provide the basic information and planning data for granting or denying permits and to strengthen or revise specific parts of the San Francisco Bay Plan. This requires continuing and extensive cooperation and coordination with federal, state, regional, local, and private agencies.

In addition, in 1977 the Legislature gave the Commission responsibility for implementing, in cooperation with local government, the Suisun Marsh Preservation Act of 1977 (Public Resources Code, Sections 29000-29612).

One Conservation and Development Analyst I was administratively approved for the 1979-80 fiscal year to continue Coastal Energy Impact Program efforts. This position is continued on a permanent basis in 1980-81.

In addition, \$14,235 and one personnel year are reduced in the current year as a result of Section 27.2 reductions. This reduction is restored in the budget year.

Finally, a Special Deposit Fund was established in the 1979-80 fiscal year to budget Suisun Marsh Local Protection Program grant funds (pass-through federal funds) received from the California Coastal Commission as reimbursements.

### Authority

Title 7.2, Section 66600 et seq., Government Code (McAteer-Petris Act of 1965 as amended in 1969-1975).

Division 19 (beginning with Section 29000), Public Resources Code (Suisun Marsh Preservation Act of 1977).

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

## II. LEGISLATIVE MANDATES

### Program Objectives and Description

Section 2231(a) of the Revenue and Taxation Code requires the state to pay local governmental units the costs of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973. Within the program area of the San Francisco Bay Conservation and Development Commission, there is one legislative mandate, Chapter 1155/77 (AB 1717) Suisun Marsh Preservation Act of 1977.

The Commission has identified additional State-mandated reimbursable costs for the 1980-81 fiscal year under the Suisun Marsh Preservation Act. Accordingly, an additional \$13,200 is budgeted in 1980-81 for this work.

Program Requirements	1978-79	1979-80	1980-81
Continuing program costs .....	-	\$9,800	\$9,800
Workload adjustments .....	-	-	13,200
<b>Totals, Legislative Mandates (General Fund) .....</b>	<b>-</b>	<b>\$9,800</b>	<b>\$23,000</b>

<sup>1</sup> Budgeted as Federal funds in the California Coastal Commission budget in 1979-80 and 1980-81 and as reimbursements to the San Francisco Bay Conservation and Development Commission.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

SAN FRANCISCO BAY CONSERVATION AND DEVELOPMENT COMMISSION—*Continued*

## III. ADMINISTRATION

## Program Objectives and Description

Commission activities require managerial, fiscal and supervisory functions to provide general administrative services to the commission and staff and to carry out commission policies and directives. Specific activities include interpretation, dissemination, and implementation of commission policies and directives, budgeting, procurement and expenditures control, business services, administrative support of commission meetings, clerical support and public information activities.

## DEPARTMENT OF WATER RESOURCES

The role of the Department of Water Resources is to protect, conserve, develop and manage California's water. This means the Department has a major responsibility for supplying suitable water for personal use, irrigation, industry, recreation, power generation, and fish and wildlife. It also means protecting people from floods and dam failures and working cooperatively with other agencies on water-related matters.

Detailed program descriptions of all activities discussed in this budget are contained in the Program Component Statements, which are published separately. These statements are available upon request from the Department of Water Resources.

## Authority

California Water Code, Division 1, Chapter 2, Article 1.

## SUMMARY OF PROGRAM REQUIREMENTS

## DEPARTMENT OF WATER RESOURCES—Continued

## I. CONTINUING FORMULATION OF THE CALIFORNIA WATER PLAN

## Program Objectives and Description

The basic objective of this program is to provide a framework for sound management of California's water resources by local, State, and Federal agencies. This program keeps in focus the statewide needs for water and explores ways to meet them in an environmentally acceptable manner.

Demands on California's water resources continue to grow. More water is needed to sustain the State's rich agricultural production, industrial demands, and to augment instream flows in some locations for fish, recreation, esthetics, water quality, salinity repulsion, and navigation, especially during the dry summer months and, low water supply years. Since "new" water is difficult if not impossible to obtain, existing water must be used more effectively. This means that such nonstructural considerations as water conservation, water management practices, waste water reclamation, and water pricing policies must be thoroughly investigated. In the last few years the Department has redirected its activities in this program to those nonstructural methods.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs.....	252.9	229.4	243.5	\$12,137,456	\$12,561,000	\$20,687,600

c. Data collection, evaluation, and use .....				\$3,761,716	\$3,273,800	\$3,388,600
Reimbursements .....				336,159	425,100	352,700
Subtotals .....	72.6	60	62.3	\$4,097,875	\$3,698,900	\$3,741,300

## a. Water Management Planning

The California Water Plan serves as a general guide for all water management activities throughout the State. The plan consists of the Phase II water quality basin plans prepared by the State and Regional Water Quality Control Boards together with the water management element prepared by the Department. The basin plans and the water management element are functionally integrated in Bulletin 4. The Department also reviews plans for water development or management proposed by other government agencies and develops the State's position on interstate and Federal-State water resources planning.

California's major water issues are being reevaluated in an attempt to resolve them in line with today's social and environmental needs. Traditional methods of determining water demands continue to be critically examined to determine realistic needs; needs which may be at least partly met through reduced water use, more effective use, or changes in water pricing policies. Attention is also being given to instream water requirements for fish, wildlife, recreation, esthetics and preservation of the riparian habitat. Other major subjects being studied or reviewed are service area allocations and water supplies, improved water management and conservation, water exchanges among systems, reuse of waste water, energy impacts, surface water development, drainage, and conjunctive use of surface and ground water supplies, including storage underground.

Other activities under this program include local investigations that contribute to the California Water Plan, review and development of standards for environmental impact studies and reports, and studies of specific water quality problems conducted in coordination with the State Water Resources Control Board.

Effective in 1980-81, several studies involving measurement, assessment, and action plans for water management will be consolidated into the Northern California Water Management component.

The Power Plant Cooling by Agricultural Waste Water component has been eliminated effective in 1979-80 pending selection of a specific site location. Reduced emphasis is being placed on Delta Levee and Southern California Water Management studies as a result of shifting program priorities.

Within this element, \$538,100 and 4.3 positions have been added to statewide planning for increased studies with local water districts. Also included are ten proposed new positions and \$1,857,900 related to Chapter 1104, Statutes of 1979 for water conservation. These ten positions will be abolished upon completion of the program. In addition, \$2,150,000 has been added from the Energy and Resources Fund to increase agricultural water conservation effort for 1980-81. Also, \$57,000 from the Energy and Resources Fund has been added to fund retrofitting 20,000 low and fixed income family homes with water saving devices.

DEPARTMENT OF WATER RESOURCES—*Continued*

## Output

The output of this program element in 1980-81 will include reports on the impact of non-nuclear energy development; basin erosion problems; the effects of urban and agricultural water conservation programs on the State's water resources; a report on the economic impact of State Water Project irrigated crops; and the continuation of work begun in 1978-79 on Bulletin 160-82, to be published in 1982, which will identify statewide water demands to the year 2005 in relation to availability and costs of developing additional supplies.

## b. New Sources of Water

The average annual water supply of the State is nearly 77 million acre-feet. Of this amount all but about one-third (27 million acre-feet) is consumptively used or dedicated to environmental purposes. Additional development of adequate surface water resources to meet future demands will be difficult because much of the undeveloped water is relatively inaccessible to areas of need. Therefore, nontraditional sources such as waste water reclamation have become increasingly important as new or supplemental supplies of fresh water. Technical information, cost data, the environmental impact, and specific uses for these supply sources are being developed.

Since Fiscal Year 1975-76 the waste water reclamation activities have undergone a substantial redirection. The waste water inventory and the aerial overview studies of waste water reclamation projects have been reduced. Cooperation with local districts to develop specific waste water reclamation projects has been increased to the point where the local districts can apply to the State Water Resources Control Board for clean water grant funds which will help put such supplies to use. Waste water reclamation and saline water conversion activities have been restructured and are being carried out as Reclamation of Water Supplies.

The Weather Modification component has been transferred to Program III. Public Safety and Prevention of Damage.

Included in this element is \$4,100,000 from the Energy and Resources Fund and 4.5 positions, to initiate development of a pilot reverse osmosis and desalting plant.

## Output

Reports are to be prepared for the studies to be conducted on saline water conversion and waste water reclamation.

## Input

DEPARTMENT OF WATER RESOURCES—*Continued*

## c. Data Collection, Evaluation, and Use

Precipitation, the source of all water supplies, varies over a considerable range both in time and location. Projections and estimates of future water supplies from streams and ground water sources must be statistically developed. The reliability of these projections and estimates is dependent upon the number of data sources as well as their distribution and length of record.

Under this program element, data on the quantity and quality of surface and ground water resources are collected, analyzed, and distributed. A limited amount of climatological data is also collected and disseminated. A machine computer retrieval file of historic data has been developed, and is being refined for access to more detailed information covering the full period of record at specific locations. The State Water Resources Control Board, the Department of Health, the Department of Transportation, and the Department of Fish and Game are cooperating with the Department of Water Resources for data input, storage, and the computer retrieval system.

The cooperative snow surveys component coordinates and standardizes the collection of snow survey data by about 40 cooperators and uses the data to provide forecasts of spring snowmelt runoff and general water conditions for project operators and water users throughout the State.

The Land resources and use component provides a continuing surveillance of the nature, location, and rate of change of land use. It produces the only complete land use data file in the State. These data are required for water resources planning and also are used extensively by other agencies.

## Output

A hydrologic index of basic data stations, streamflow, ground water levels, precipitation, and water quality parameters is being published in Bulletin No. 230. Data on snowpack conditions, which are critical to operational planning, are published from February through May each year in the Bulletin No. 120 series. Bulletin No. 201, a new bulletin to be published annually, will present the status, trends and highlights of water resources conditions and management.

## II. IMPLEMENTATION OF THE STATE WATER RESOURCES DEVELOPMENT SYSTEM

## Program Objectives and Description

This program has three objectives. The first is to provide necessary water supplies as contracted for by users of the State Water Project. The second objective is to operate, maintain, and manage facilities of the State Water Project in an efficient, economic, and timely manner. The third objective is to further the development of essential and economically justified local water projects through financial assistance to local public agencies under the Davis-Grunsky Act.

The State Water Project is made up of physical facilities to meet a portion of California's increasing water needs from Plumas County in the north to the Mexican border. By 1973, most features of the State Water Project were in operation. Additional features will be planned, designed, and constructed, as needed, during the ensuing years.

## a. Planning and Investigations for the State Water Resources Development System

Although the construction of the initial stage of the State Water Project is complete, much planning and management work remains to be done. Under this program element, activities include geologic studies, cost estimates, economic analyses, flood control studies, fish and wildlife and recreation resources development studies, water quality studies, environmental studies, and determination of land acquisition requirements. Foremost of these activities is Project Power Development which must produce an adequate power supply by 1983.

Detailed planning studies are conducted to select necessary additional project features to satisfy both local and export water requirements. Protection and enhancement of fish and wildlife and recreation needs must be planned and developed as part of the project where possible.

The State Water Project Future Supply was established in Fiscal Year 1976-77 as a separate activity from the Statewide Planning Program to identify sources of future water supplies for the State Water Project. This program continues to grow as the search for additional water to meet future contractual commitments continues. Other special investigations will continue to contribute to the activity.

Peripheral Canal Ground Water and Agricultural monitoring component continues to provide data on the effect of project operations on agriculture and near-surface ground water levels needed to plan Canal operations and resolve litigation.

Water rights considerations in connection with the State Water Project are investigated, and project effects on present physical and environmental conditions are monitored and evaluated. This component provides funds to the Attorney General's Office for legal services in actions to prevent unauthorized use of State Water Project water. In June 1979, the Department filed a lawsuit seeking damages and a judicial declaration that it is entitled to be paid for State Water Project water used by Delta water users in excess of that which would be available in the absence of the Project.

The Relocation of Contra Costa County Intakes component was initiated in 1979 to recommend intake points to the State Water Project facilities near Byron, to improve water quality and provide for additional access for local water agencies. The study is planned for completion in June 1981.

Specific plans for recreation development at State Water Project facilities are prepared to ensure that water project recreation resources including fish and wildlife and water project public facilities are adequately developed. This component was reduced in 1979-80 and further reduced in 1980-81 due to reduction in total budget.

A cooperative study involving the California Departments of Water Resources and Fish and Game, the U.S. Bureau of Reclamation, and the U.S. Bureau of Sports Fishery and Wildlife is proceeding to develop proper design and joint operating criteria for the State Water Project and Central Valley Project for the protection and enhancement of the Bay-Delta and San Francisco Bay fish and wildlife resources. This activity includes striped bass ecological studies, general water quality studies, and studies concerned with evaluation and development of fish screening facilities.

The Peripheral Canal and related facilities planning and evaluation component comprises the studies required under the Burns-Porter Act. (Title changed from Delta facilities planning and evaluation.)

A power planning and energy development program is being conducted on a major scale to provide electrical energy needs of the State Water Project. Power contracts for the purchase sale and/or exchange of power are being negotiated, reviewed, and updated as necessary to provide a reliable source of power for Project pumping and to provide for the optimum use of SWP power resources.

A major accomplishment in this area in 1979-80 has been the signing of a participation agreement with Nevada Power Co. for development of a fourth unit at its Reid Gardner Coal Fired Power Plant site.

Work on the San Joaquin Valley Interagency Drain and associated technical support has been extended beyond 1978-79 in an attempt to determine a workable program acceptable to local demand and local willingness to pay for construction, operation and maintenance of needed drainage facilities.

An Integrated Pest Management component has been created to study the effectiveness of and promote use of integrated pest management techniques on the State's levee and canal system.

The Delta Outflow measurement study is a multiagency project to test and implement a system to measure outflow from the Sacramento-San Joaquin Delta. The final installation will be made during 1980-81.

Most significant of the increases in this element is the 45.6 positions and \$4.3 million related to the future water supply component for on-site investigations for new storage facilities. Also included in this element is an increase of \$867,000 for Bay Delta environmental activities relating to the Suisun Marsh Mitigation. Also included is \$250,000 for a coordinated photovoltaic demonstration project with \$250,000 in matching funds to be provided from the State Water Project Fund. In addition, \$500,000 and 5.0 positions are included for preliminary soil and geologic exploration at the Thermolito afterbay for a proposed small hydro project and 7.3 positions and \$78,700 for power contract negotiations.

## Output

Output from this element consists of reports on proposed features of the State Water Facilities.

## b. Design, Right-of-Way, and Construction of the State Water Resources Development System

Design, right-of-way, and construction activities will continue until the construction of the State Water Facilities has been completed. The magnitude of the activities, however, has decreased since the peak workload occurred in 1967.

Construction is expected to start on the first of three proposed geothermal power plants in the latter part of 1979-80. Two of the plants are to be completed in 1983-84, with the third plant scheduled for 1984-85. Increased activity is reflected by the \$344,900 and 3.9 positions increase in energy development support and \$805,000 in direct payments.

North Bay Aqueduct which will serve Solano and Napa Counties is currently scheduled to be operational in 1984. Effort related to this earlier operational date is reflected by the \$1,103,700 and 21.4 positions increase for 1980-81.

The increase of \$719,000 for Suisun Marsh reflects a continuation of effort related to mitigation facilities which are expected to be operational in the fall of 1984.

The North San Joaquin facilities increase of \$3,967,600 and 5.8 positions in effort and \$2,780,000 for direct pay results from start of construction for additional units at Delta Pumping Plant, plus increased activity for the John E. Skinner Delta Fish Protective facility.

The direct pay decrease of \$11,940,500 and 20.2 positions in the West Branch facilities results from a peaking of construction on the Peace Valley Pipeline and Quail canal.

Increased effort of \$180,100 and direct pay of \$3,840,000 and 4.3 positions results from reporting this as a separate entity including effort on the Pastoria siphon, second barrel, and construction of three additional units at A. D. Edmonston Pumping Plant.

## Output

Initial water deliveries were made in the Feather River area, in the North Bay area and the San Joaquin area in 1968. Water deliveries were first made to the South Bay area in 1962 and to Southern California in 1972. The flood control benefits of Oroville Dam have been substantial since the first flood operation action in December 1964. The recreation facilities provided throughout the project have received use measured in millions of visitor-days. Electrical energy is now being generated at all project power plants, except Pyramid, Cottonwood, and those being considered under the Long Range Energy Program.

## c. Operation and Maintenance of the State Water Resources Development System

Operations and Maintenance of completed facilities of the State Water Project is provided through two activity groupings: operations development and facilities operations and maintenance.

Operations development activities are concerned with the continued development of an operations plan, integrated with federal and other agencies, which will meet the future contractual water commitments and power needs of the State Water Project.

Facilities operations and maintenance activities are the actual operations of the State Water Project facilities and maintenance of these facilities in accordance with prescribed standards. Water and power is scheduled and dispatched to meet all project commitments. Recreation, flood control, and fish and wildlife mitigation facilities are operated. Routine and extraordinary maintenance is performed to insure capability to deliver water and produce power. Also included in facilities operations and maintenance are activities such as specialized testing and maintenance; specialized technical inspections; surveillance of dams and structures through system instrumentation; coordination of maintenance and repair work; electrical relay testing; corrosion control; water and power operating techniques; training, safety, and management of project real property.

Water operations is transferred, effective in 1980-81 to General Statewide Operation and Maintenance. There is a decrease of \$4.3 million for 1980-81 reflecting one time expenditures in 1979-80 for Natural Disaster Assistance, Chapter 254, Statutes of 1979.

## Output

	1978-79	1979-80	1980-81
Millions of acre-feet of water delivered .....	2	2.7	2.8
Billion kilowatt-hours of power produced .....	2.4	3.6	3.7

## d. State Financial Assistance for Local Projects

This program element provides loans for feasibility studies, reservoir site acquisitions, and the construction costs of local projects. Grants are provided for certain recreation, fish and wildlife enhancement, and initial water supply and sanitary facilities costs. The State may also participate with an applicant as a partner under certain circumstances.

Projects approved for assistance must be found by the Department to be in substantial conformance with the California Water Plan, be engineeringly feasible, economically justified, and, if a loan is proposed, there must be reasonable assurance that the public agency can repay it. Loans may be made only for that portion of the project cost beyond the reasonable ability of the public agency to obtain funds from other sources. The department must impose such terms and conditions as are necessary to protect the State's investment and carry out the objectives of the program. Also included in this element is the program component for loans to local agencies for water distribution systems as authorized by Chapter 1610, Statutes of 1967.

## Output

A report of findings is made to the Legislature on each local agency's formal application evaluating engineering, economic, and financial factors and recommending approval of loans or grants for qualified proposed projects. Following contractual arrangements with eligible applicants, funds are disbursed and projects are inspected for conformance with contract terms.

DEPARTMENT OF WATER RESOURCES—*Continued*

## e. Financial and Contract Management of the State Water Resources Development System

The State Water Resources Development System is financed from a variety of sources: general obligation bonds authorized by the Burns-Porter Act, revenue bonds, Federal funds appropriated for flood control, funds advanced from water contractors, appropriations from the California Water Fund, State-appropriated funds for recreation and fish and wildlife enhancement, and miscellaneous funds including funds earned from investments and sale of property. Public agencies contracting for project water are required to repay the costs with interest of constructing, operating and maintaining the water supply facilities. Payments from sale of project power to utilities and payments by public agencies beginning on April 1, 1983, when the State assumes responsibility for repayment, go to retire the Oroville revenue bonds sold, and pay the costs of operation and maintenance of the Oroville power facilities. The public agencies that contracted for water served down-aqueduct from the Devil Canyon Facilities and the Castaic Facilities make payments to retire the Devil Canyon-Castaic revenue bonds as well as the cost of operation and maintenance of the facilities. The people, through governmental appropriations, repay the costs of constructing, operating and maintaining recreation and fish and wildlife enhancement facilities.

Projections must be made of future financial conditions. The water contractors must be notified of future costs for them to adjust tax and/or water rates. Water contractors and utilities must be billed for water delivered and power generated. Bond counsel, financial institutions and other governmental agencies must be retained to market and administer bonds in the department's behalf. Finally, the principal and interest of the bonds outstanding must be repaid. The above activities devoted to maintaining the financial integrity of the State Water Resources Development System are contained within this program element.

## Output

The output of this program element is the maintenance of the financial integrity of the State Water Resources Development System. Specific qualitative outputs are an annual report of the continuing history and future management plan for the State Water Project, a presentation of the long-term financial analyses, accurate billing records, repayment of bond principal and interest on time, and power and water contractual agreements negotiated to best meet the mutual needs of the Department, water contractors, utilities and the people of California.

## III. PUBLIC SAFETY AND PREVENTION OF DAMAGE

## Program Objectives and Description

The objective of this program is to protect life and property from damage or destruction by floods or dam failures, to make loans for construction improvement or rehabilitation of domestic water systems to bring them up to State standards for safe drinking water and to provide information, guidance, and assistance in water management during dry years.

Experience demonstrates that the people of California are vulnerable to the destructive effects of floods. The Department issues flood warnings in cooperation with the National Weather Service to alert the public when flooding is probable. Based on these forecasts, flood control facilities are operated to prevent or minimize damage. The Department also supervises and coordinates flood fighting activities when necessary and performs annual levee and flood channel maintenance. Other activities include the provision of technical information to local agencies to assist them in the regulation of development on floodplains as required by National Flood Insurance programs. Also included in this program are funds to pay for the cost of lands, easements, and rights-of-way for Federal flood control projects, and pursuant to Chapter XX/78 the Department is responsible for regulating weather modification activities in the State by licensing operators, issuing permits for specific weather resources management projects and requiring reports on project activities. (This component was budgeted in 1978-79 fiscal year in continuing formulation of the California Water Plan) departmental effort related to design review of all proposed new dams and periodical inspection of all existing nonfederal dams for proper construction and maintenance. A limited review of the safety of federal dams is also being undertaken.

## a. Flood Management

This program element assists local agencies in the development of regulations for management of floodplain areas. Such regulations are compliant with the Cobey-Alquist Flood Plain Management Act and the National Flood Insurance Program. This program element also assists local agencies in the performance of flood hazard investigations including continual monitoring of storms and high water conditions during the flood season. A flood center is activated during potentially dangerous periods to coordinate flood emergency operations and collect and disseminate flood data. Also included is the operation and maintenance of Sacramento River flood control projects and the periodic inspection of all flood control works in the Central Valley.

The Reclamation Board's function is to cooperate with the Corps of Engineers and local agencies in constructing and maintaining flood protection projects in the Central Valley; to assist local agencies in estimating flood damages and repairs required; to evaluate accomplishments of past flood control measures; and to identify alternative future policies and programs for flood damage prevention.

## Output

Plans and recommendations are produced for solution of flood problems and safe development of floodplains; information regarding floodflows is collected and disseminated; flood forecasts are prepared and furnished to interested agencies; technical direction and assistance is provided during flood emergencies and the Central Valley is afforded a high degree of flood protection by the maintenance and operation of the Sacramento River Flood Control Project.

## Input

Reimbursements .....				464,206	983,900	872,400
Federal funds .....				350,856	67,000	—

## b. Flood Control Subventions

The primary purpose of this element is to reimburse local agencies for the nonfederal rights-of-way and relocation expenses incidental to flood control projects constructed by the Corps of Engineers outside the Central Valley. This is accomplished through the review and processing of claims submitted by the local agencies. These claims are tested against the provisions of the authorizing legislation and guidelines published by the department and the amounts eligible from the State are determined. Approximately 50 claims in connection with about 25 active projects are processed and paid each fiscal year. Other activities include the review of proposed federal flood control projects to determine potential State costs, analysis of local agency requests for inclusion of project funds in the State budget, continuous review and revision of program policies and procedures, and preparation of final reports on completed projects.

An increase of \$1,856,500 has been proposed for 1980-81 to more closely match funding with program needs.

## DEPARTMENT OF WATER RESOURCES—Continued

## Output

1. Engineering reports and reallocation orders to pay flood control claims, and reports on reimbursement for rights-of-way and relocation costs.
2. Determination of future State costs in connection with proposed projects and determination of adequacy of floodplain regulations.

## Input

	78-79	79-80	80-81	1978-79	1979-80	1980-81

TOTALS .....	0.7	—	—	\$2,698,235	\$3,143,500	\$5,000,000
General Fund (local assistance) .....				2,698,235	3,143,500	5,000,000

## c. Safety of Dams

This program element benefits the people of California through protection of life and property. These benefits result from the prevention of failures similar to those which occurred at St. Francis Dam and Baldwin Hills reservoir and more recently the Teton Dam in Idaho.

The safety of dams program provides for independent analysis of plans and specifications for new dams, and for enlargement or alteration of operational dams prior to approving construction. It also provides inspection and evaluation of operational dams and reservoirs, determination of need for the installation of instrumentation, independent analysis of instrumental surveillance, and the investigation and analysis of dams constructed illegally, together with the activity necessary to terminate these violations by removal, alteration or repair.

The federally funded program for inspection of non-federal dams, initiated in 1978-79 will continue.

## Output

Activities involve the independent analysis and evaluation of about 50 applications for new construction, enlargement, alteration, and repair of dams, and supervision during the resulting construction. About 1,400 systematic examinations and evaluations of nearly 1,100 operational dams will be made and about 450 surveillance and instrumentation reports will be analyzed. Dams allegedly constructed in violation of the code will be investigated and the violations terminated. The structural reevaluation program for seismic stability of critical dams will be performed. Flood hydrology will be reevaluated for spillways suspected to be inadequate. Approximately 100 nonfederal dams will be inspected under the federally funded National Dam Inspection Program. *The increase of 3.0 positions and \$328,400 for 1980-81 relates to the national dam inspection program.*

	78-79	79-80	80-81	1978-79	1979-80	1980-81
Totals, Supervision of Safety of Dams .....	58.9	69.5	72.5	\$2,199,458	\$3,018,880	\$3,347,300
General Fund .....				1,948,564	2,491,080	2,687,100
Reimbursements .....				520	—	—
Federal funds .....				250,374	527,800	660,200

## d. Safe Drinking Water Projects

This element implements the "California Safe Drinking Water Bond Law of 1976" and is a joint effort with the Department of Health. The Department of Health is responsible for the development of a priority list of substandard domestic water systems for which loans to water suppliers could be made. The Department of Water Resources has adopted regulations necessary to carry out the Act, to process applications, and to negotiate contracts for loans with domestic water suppliers.

Legislation enacted in 1978 provides for *grants* of up to \$400,000 each for public agencies to improve water systems up to Safe Drinking Water standards. In 1978-79, the Department will be evaluating applications and preparing reports to the Legislature. In 1979-80, this activity will increase as disbursements are made to those public agencies whose applications have been approved by the Legislature. It is anticipated that grant/loan combinations will be made in many instances.

## Output

In 1979-80 loan and grant disbursements in the amount of \$36,000,000 are anticipated. This level of activity is expected to continue for the 1980-81 fiscal year.

## DEPARTMENT OF WATER RESOURCES—Continued

## IV. SERVICES

## Program Objectives and Description

The objectives of this program are to provide technical support to the Department's activities and to make this expertise, as well as the specialized engineering experience of the department available to other agencies.

The Department has developed a significant capability for providing specialized skills and experience in the field of water resources planning, development and management. Support activities involving laboratories, electronic data processing, mapping and surveying have also been developed over the years. Occasionally, this expertise is found helpful by certain other agencies in assisting them in their missions. The Department's own operations must be supported by certain technical functions that can best be furnished on a centralized as-needed basis.

This program also provides the capital improvements, other than those associated with the State Water Project, necessary to allow the Department to carry out its assigned functions.

## a. Services to Other Agencies

1. The US Geological Survey compiles topographic maps under a cooperative agreement, wherein the State and Federal Government each contributes half the cost. Areas to be mapped, scales of mapping, and priorities are mutually decided upon, with the Department coordinating the needs of State agencies.

2. The Department, as watermaster, measures streamflow and distributes it in accordance with decreed water rights; checks and records ground water extractions in accordance with stipulated agreements; and conducts hydrologic studies of watermaster service areas.

3. The Department conducts engineering investigations requested by other agencies; among these are studies of water supply drainage, flood hazards, sewage disposal, water quality, water rights, engineering feasibility, and project cost estimates.

4. The Department serves as the Electronic Data Processing Center for the Resources Agency and provides services to other departments and agencies as well as laboratory and graphic services on a reimbursable basis.

## DEPARTMENT OF WATER RESOURCES—Continued

## Output

1. About 50 topographic maps, covering 6,000 square miles and showing updated topographical and cultural features, are completed and published annually by the US Geological Survey in cooperation with the Department.

2. Water allocation is provided on about 50 streams in 22 service areas, of which four are ground water basins. This service involves a total of about 1,800 parties. These activities are reported in Bulletin Numbers 177, 178, and 179, which are published annually.

3. Reports are prepared on investigations and services conducted for other agencies as requested.

## Input

## b. Technical Services

Technical services are provided by specialty units to all divisions, branches, and offices, for the programs of the Department. These services are totally reimbursed by charges to the program, except for additional equipment related to data processing, mobile equipment and graphic services which is initially financed from reserve funds.

## Output

The accomplishment of their program purposes by user programs within and outside the Department, in the most efficient and economical manner available.

## c. State Building Program

Major capital outlay projects are formulated as required to support the Department's general activities. Such projects may include new construction or substantial alterations, purchase of equipment related to the projects, and associated land costs.

Projects for Fiscal Year 1980-81 include the second phase of a five-phase snow data telemetry installation, utilizing GOES Satellite Technology and \$140,000 for replacement of Bridge WL-3 on the Sutter Bypass.

## V. ENVIRONMENTAL LEGAL SERVICES

The objective of this program in the Office of the Chief Counsel is to provide legal services to the various environmental and resources-related State departments, boards and commissions. A reorganization in the Department of Justice resulted in the inability of some environmental and resources-related departments to secure the necessary and timely legal services required in the enforcement of laws protecting the environment. The Department of Justice budget, therefore, was reduced by \$1,000,000. An augmentation of \$1,000,000 has been included in this budget to provide assistance in administering, enforcing and defending State environmental laws, and to carry out policies of the Executive Branch. The major areas of increased legal concern are protection of natural resources including fish and wild life; air and water quality; forest practices; general plan law; coastal laws; and the California Environmental Quality Act (CEQA).

## VI. MANAGEMENT AND ADMINISTRATION

## Program Objectives and Description

The objective of this program is to provide sufficient managerial and administrative services to insure that the overall missions and goals of the Department are accomplished.

Without the proper level of executive leadership and its staff support, the Department of Water Resources would not be able to function in an efficient and effective manner. The benefits to be derived from all of the various other programs carried out by the Department as described elsewhere in this budget would not be realized. Therefore, a program of management and administration has been developed as, and continues to be, an integral feature of the total program activity.

## a. General Management

Most of the functions included in the Department's executive and administrative headquarters organization comprise this program element. Included are the Director and his immediate staff, the legal staff, public information, program analysis, internal audits, budgeting and accounting, business and office services, personnel, training, management analysis, and safety. The costs of general management are distributed to all of the Department's directly funded programs through an indirect cost structure on the basis of direct labor costs.

## Output

The accomplishment of the programs of the Department are indicative of the effectiveness of the managerial supervision and administrative services that were provided.

## b. Water Resources Staff Specialists

This indirect cost program element represents staff specialists such as geologists, economists, hydrologists, and program coordinators. These costs are distributed to all programs in which the organization's personnel participate, on the basis of direct labor costs. These costs were previously included in program dollars, but are now being reported separately for internal program control purposes.

Operations and Maintenance (O&M) Statewide Staff were transferred to the line management for O&M beginning in 1979-80 and Design and Construction Statewide Staff were transferred to Design and Construction Line Management beginning in 1979-80.

## Output

Each major organization's staff specialists, program coordinators, and related clerical support are provided through this program element.

## Input

## c. Line Management

This indirect cost program element represents the supervisory, administrative and housekeeping costs of a major organization. Line Management amounts in 1979-80 and 1980-81 for Operations and Maintenance and Design and Construction reflect the transfer of costs from Water Resources Staff Specialists. These costs are distributed to all programs which the organization's personnel participate in on the basis of direct labor costs.

## Output

Each major organization's supervisory and related clerical support are provided through this program element.

<sup>e.1</sup> A nongovernmental cost fund. Receipts are excluded from the overall budget totals. All deficits are due to the accrual method of accounting and the timing of bond sales. There is sufficient cash for immediate disbursement requirements. The Revenue and Expenditures agree in total with the State Controller's Statement of Operations. Any variance in classification is for budgetary purposes only.

## DEPARTMENT OF WATER RESOURCES—Capital Outlay

STATE BUILDING PROGRAM EXPENDITURES		Actual 1978-79	Estimated 1979-80	Proposed 1980-81
<p>The Capital Outlay schedule summarizes expenditures and projections for the implementation of the State Water Resources Development System Program, the Public Safety Program and the State Building Program. A general explanation of the state projects under the California Water Development Program is presented in the support budget with a description of the significant units of each project as well as detailed expenditure information.</p>				
<b>Implementation of the State Water Resources Development System Program</b>				
State Operations (For Detail, See Program Expenditure Section):				
Water management planning .....		\$292,632	\$343,000	\$398,500
New sources of water .....		170,065	147,900	-
Planning and investigations .....		13,944,005	15,874,800	21,386,600
Design .....		5,356,442	8,537,400	8,539,900
Right-of-way acquisition and relocations .....		1,283,409	1,374,900	1,844,100
Construction supervision .....		4,240,651	6,782,800	9,141,200
Operation during construction .....		691,321	558,100	35,400
Operations and maintenance .....		28,876,526	35,212,300	35,691,300
State financial assistance for local projects (administration) .....		269,452	315,000	315,800
Financial and contract administration .....		2,304,262	3,329,600	3,486,400
Technical services .....		-19,672	-	-
Totals, State Operations .....		\$57,409,093	\$72,475,800	\$80,839,200
Direct Payments:				
Right-of-way acquisition and relocations .....		\$1,451,276	\$6,576,000	\$2,339,000
Construction .....		19,320,999	47,714,000	47,352,500
Operation during construction .....		2,056,241	1,499,800	200,000
Operations and maintenance .....		1,072,838	2,361,300	866,700
Financial and contract administration .....		101,383,854	116,795,000	117,800,000
Power purchases .....		22,073,145	20,000,000	21,000,000
State financial assistance for local projects .....		1,698,729	5,000,000	5,000,000
Totals, Direct Payments .....		\$149,057,082	\$199,946,100	\$194,558,200
Totals, Implementation of the State Water Resources Development System .....		\$206,466,175	\$272,421,900	\$275,397,400
<b>Public Safety and Prevention of Damage</b>				
Flood Control:				
Sacramento River and tributaries flood control project .....		\$30,519	\$30,000	\$30,000
Chester, North Fork Feather River flood control project .....		-	50,000	-
San Joaquin River and tributaries flood control project .....		250	15,000	15,000
Sacramento River bank protection project .....		8,765	1,000,000	1,000,000
Totals, Public Safety and Prevention of Damage .....		\$39,534	\$1,095,000	\$1,045,000
<b>State Building Program</b>				
Flood warning telemetry system .....		\$128,078	\$174,758	-
Snow data telemetry system .....		97,518	57,182	\$58,530
Feather River Enhancement .....		37,154	-	-
Sutter Bypass Rehabilitation .....		863,059	2,817,621	1,173,670
Sutter Yard drainage improvements .....		27,287	2,713	-
California Aqueduct Bikeway .....		138,235	350,116	-
Public Works Employment Act, Title I Stream gauge restoration .....		30,512	-	-
Totals, State Building Program .....		\$1,321,843	\$3,402,390	\$1,232,200
Reimbursements .....		-114,117	-	-
Net Totals, State Building Program .....		\$1,207,726	\$3,402,390	\$1,232,200
TOTALS, DEPARTMENT OF WATER RESOURCES, CAPITAL OUTLAY .....		\$207,713,435	\$276,919,290	\$277,674,600

## STATE WATER RESOURCES CONTROL BOARD

The objectives and responsibilities of the State Water Resources Control Board and the nine Regional Water Quality Control Boards are to preserve and enhance the quality of California's water resources and to assure their conservation and effective utilization. These objectives are achieved through two action programs: water quality and water rights.

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
I. Water Quality.....	\$90,161,210	\$121,565,172	\$117,314,480
II. Water Rights .....	3,334,497	3,763,040	4,510,782
III. General Support:			
Distributed .....	(2,635,241)	(3,350,311)	(3,462,229)
TOTALS, PROGRAMS .....	\$93,495,707	\$125,328,212	\$121,825,262
Reimbursements .....	-423,600	-976,519	-1,029,054
NET TOTALS, PROGRAMS .....	\$93,072,107	\$124,351,693	\$120,796,208
General Fund .....	9,852,109	10,451,728	12,806,863
State Clean Water Bond Fund <sup>c</sup> .....	72,837,773	94,800,436	95,469,199
Renewable Resources Investment Fund <sup>e</sup> .....	-	4,500,000	-
State Water Quality Control Fund <sup>e</sup> .....	-134,975	1,700,000	1,689,430
Federal funds <sup>f</sup> .....	10,517,200	12,899,529	10,830,716
Personnel years .....	740.3	715	721.1

### SIGNIFICANT PROGRAM CHANGES

Program	Description	Personnel years	Dollars
I.a.	Increase monitoring and enforcement to reduce toxic pollutants.....	22.5	\$986,171
I.a.	Increase regulatory effort to implement Lake Tahoe Section 208 plan .....	9	526,402
I.a.	Reduce regulatory effort due to reduction in federal funding.....	-7.7	-454,390
I.a.	Reinstatement of 1979-80 Section 27.2 reductions.....	10	214,450
I.b.	Increase basin planning effort .....	4.5	175,687
I.b.	Reduce federal Section 208 planning program .....	-9.5	-496,201
I.c.	Reduce facility development assistance .....	-30.2	-1,394,352
I.d.	Reduce program support element.....	-2	-117,727
II.b.	Increase water management effort in the Bay-Delta Watershed.....	9.5	602,568

## I. WATER QUALITY

### Program Objectives and Description

The broad objective of the Water Quality Program is to achieve and maintain the highest possible quality of the waters of the State consistent with their use. Specific objectives are:

1. To monitor the quality of the waters of the State in order to develop an understanding of the quality, causes and effects of such quality and to support all State pollution control activities.
2. To formulate, adopt and update water quality control plans and policies for guidance in water management decisions.
3. To monitor the quality of the waters of the State in order to determine compliance with control plans, permit terms, conditions and receiving water standards; report such quality, its causes and effects; and assess the effectiveness of the State's water pollution control program.
4. To maintain effective control of toxic wastes through implementation of State/federal pretreatment and toxic standards.
5. To require of waste dischargers those actions necessary to prevent and abate water pollution, inspect dischargers to determine compliance with requirements and carry out enforcement actions to obtain full compliance with waste discharge requirements.
6. To assist local entities in the construction of wastewater treatment facilities needed to comply with discharge requirements and achieve receiving water standards.
7. To ensure that State and federal funds allocated for construction of wastewater treatment facilities are expended in a timely and proper manner.
8. To evaluate new problems, specialized techniques and concepts in water quality control; define and develop solutions to unique water quality problems in the State; conduct a wastewater treatment plant operator training program to provide the skills necessary in operating today's complicated facilities.
9. To ensure that federally licensed projects or facilities requiring Federal permits are constructed and operated in a manner which conforms with all applicable water quality standards. To ensure that private treatment facilities granted tax relief incentives are designated, constructed and operated to achieve compliance with applicable water quality standards.

California faces serious challenges in water management, pollution control, and water quality enhancement. Growth of population and expansion of industry and agriculture demand abundant clean water; at the same time, they threaten its quality and availability. An effective, comprehensive program for managing California's waters is essential to balance these conflicting pressures on one of the State's most precious resources.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

STATE WATER RESOURCES CONTROL BOARD—*Continued*

## Authority

Porter-Cologne Water Quality Control Act, California Water Code Sections 13000 et seq. provide general legislative authority for the State's Water Quality Control Program. This code also authorizes the State Board to exercise those powers delegated to the State by Federal water pollution control legislation such as PL 92-500.

## a. Regulation

The Regional Water Quality Control Boards regulate waste discharges with four closely related activities: adoption of waste discharge orders, certification and licensing, surveillance and monitoring, and enforcement.

The waste discharge orders are the cornerstone of regulation. They specify limits on the quality and quantity of an effluent and may include time schedules for achieving compliance. Regional Boards issue two types of orders depending upon the physical location of the discharge. For discharges to surface waters, discharge requirements are issued in the form of National Pollution Discharge Elimination System (NPDES) permits. The State issues these permits under a delegation agreement with the Environmental Protection Agency. For all other discharges, requirements are issued under the Porter-Cologne Act. Regional Boards also periodically reevaluate and upgrade these requirements to conform to current technology, water quality conditions and treatment levels as specified by changes in State and Federal regulations.

The State Board is also required by law to issue various types of certifications or registrations for other agencies or individuals. These certifications include:

1. Certification of water quality laboratories.
2. Licensing of oil spill cleanup agents.
3. Certification for Federal tax purposes.
4. Certification to the California Pollution Control Financing Authority.
5. Certification of compliance with water quality standards.

Certification and licensing supplements the control of pollution through activities including development and review of local source control ordinances for implementation of State/federal pretreatment and toxic standards.

Waste discharge orders are ineffective without surveillance and monitoring and enforcement to assure compliance. Surveillance and monitoring activities include collection, interpretation, and storage of water quality and quantity data. Regional Boards use these data to measure compliance with discharge requirements and achievement of water quality standards, to identify sources of pollution, and to identify waters requiring special studies. These data are also essential for establishing and reviewing water quality standards, an important activity of the planning element.

Whenever surveillance and monitoring activities uncover a violation of discharge requirements, the Regional Board attempts to gain compliance through voluntary action by the discharger. If this fails, administrative enforcement, cleanup and abatement orders, cease and desist orders and finally, judicial enforcement remedies are sought.

The State Board must consider all appeals by aggrieved persons of any Regional Board action even though an appeal has not been filed. The appeals process provides a final opportunity for administrative review of a Regional Board action and is particularly important when actions may later be subject to judicial scrutiny.

A proposed increase in staffing for 1980-81 of 22.5 positions will permit an expansion of the existing monitoring program to include additional toxic substances (2 p.y.) strengthen the enforcement program to ensure early detection of groundwater contamination due to toxic pollution (17 p.y.) and to develop uniform statewide policies and standards to ensure an adequate regional water quality control program (3.5 p.y.). An increase of nine positions in 1980-81 is proposed to provide for issuance of waste discharge permits and clean-up orders which will require construction of erosion control projects, correction of runoff problems and adherence to restrictions on development to protect the water quality of Lake Tahoe. The increase will provide resources to reduce the amount of sediments and nutrients reaching Lake Tahoe, slow the rate of algae growth and preserve the Lake for future generations. A decrease of 7.7 positions is proposed in the federal Water Quality Control Program Grant due to an estimated decrease in federal funding. The budget year also reflects an increase of ten positions that were one time 1979-80 Section 27.2 reductions.

## b. Planning

Long-range planning for water quality control, including economic and environmental considerations, are essential for effective water quality control and wastewater management. The State and Regional Boards completed California's first major phase of water quality planning in 1975 when Water Quality Control Plans (Basin Plans) were adopted for the State's 16 hydrologic basins. In Fiscal Year 1976-77, the State Board initiated revisions, as necessary, of the Basin Plans and embarked on the second phase of water quality control planning. In subsequent fiscal years, the Board continued the second phase of water quality planning emphasizing the definition of best management practices to control nonpoint sources of pollution and to meet the 1983 goal of the Federal Water Pollution Control Act and identifying and developing solutions to priority nonpoint source water quality problems statewide.

Section 208 of the Federal Water Pollution Control Act requires the development of Areawide Waste Treatment Management Plans to control all point and nonpoint sources of pollution, the establishment of regulatory programs and the designation of management agencies. With Federal funding, the designated agencies are expected to complete plans for their areas in time to be combined with the planning effort of the State for nondesignated areas. The State Board is required to review and certify the completed plans for designated areas and therefore must maintain an overview role throughout the planning period.

An increase in General Funds is proposed to provide State funds for 4.5 positions to place emphasis on maintenance of Regional Water Quality Basin Plans and to reduce the federal Section 208 planning program due to a decrease in federal funds. During the past three years federal Section 208 funds have gradually replaced state funds resulting in increased program effort on specific non-point source water quality problems. This shift of funding will enable the state to place more emphasis on identifying, defining, and developing solutions to water quality problems; maintaining and updating water quality objectives and standards; and establishing policies, practices, and programs to protect beneficial uses through basin plan amendments. In addition to a federal fund reduction of 4.5 positions to provide for maintenance of Regional Water Quality Basin Plans, the federal Section 208 Planning Program will be reduced by five additional positions in 1980-81 to reflect the total shortfall of federal funds.

STATE WATER RESOURCES CONTROL BOARD—*Continued*

## c. Facility Development Assistance

Inadequate wastewater treatment facilities and improper operation of them are principal causes of water pollution in California. To help solve these problems the State Board administers programs for awarding wastewater facilities construction grants to public agencies and for training and certifying facility operators.

Administration of the financial assistance programs includes developing a statewide project needs list and establishing priorities for grant requests; reviewing and evaluating facilities plans, including environmental impact reports; revenue programs and cost effectiveness analyses; reviewing design plans and specifications, certifying projects to the Environmental Protection Agency and executing contracts with grantees (local wastewater management agencies); monitoring construction and approving progress payments; performing final construction inspections and audits; and performing annual inspections for three years following construction. The Board staff works closely with the local agencies and their consultants through all phases of development to ensure compliance with all applicable Federal and State regulations.

By simplifying the process, and through a cooperative effort by local and State agencies working together to achieve a common goal, the final results have been significantly better than originally expected. A total of almost \$2 billion in projects have received grants and almost 48,000 jobs will have been created during the program period. The Federal Government pays 75 percent of project costs while the State and local agencies each pay 12.5 percent. The wastewater facilities construction program is the largest public works program in effect in the State.

The Environmental Protection Agency and the State have determined that the effectiveness of the grant program would increase if the principal program responsibility rested with the State. To implement this policy, 26 separate functional agreements have been signed covering almost all program activities. While this action gives the Board much more control over the program, along with all the accruing benefits, it requires considerably more effort and diligence. To date, many of the projects have been large, complex and sophisticated and required careful, in-depth review. In the future, there will be a greater number of projects, but of smaller size. These projects will require a higher proportional amount of staff time since the grantees will possess less expertise and will require more assistance and attention from the board staff. To assure optimum use of public funds expended on these projects, greater emphasis is being placed on program integrity. The State is now taking a much stronger role in managing the construction phase of the program as another step toward protecting the program integrity. In addition, the Board has established an internal audit program to conduct program audits and to coordinate external project auditing.

The most carefully planned and constructed wastewater treatment plants are ineffective unless operated properly by well trained personnel. Recognizing this, the State Board has established a program required by Chapter 1315, Statutes of 1972, whereby municipal treatment plants are classified according to their complexity and the level of competency needed by their operators. In addition, operators are tested and certified at these different levels according to their experience, education, and examination results.

Training is available to treatment plant operators through community college courses, for which the State Board provides advice on curricula, and through the State Board's San Marcos Training Center, a wastewater treatment plant that allows practical, problem-oriented training. A mobile classroom-laboratory is also utilized and has proven to be highly effective in bringing training to operators at their own facilities.

Chapter 1104, Statutes of 1979, created the Renewable Resources Investment Fund and Program. This legislation also provided \$4,500,000 in local assistance grant funds to be used during the 1979-80 fiscal year for construction of wastewater reclamation plants. In the 1980-81 fiscal year, a decrease of 29.9 positions is proposed in the administration of the Wastewater Facility Construction Program due to a decrease in federal funds. In addition, a reduction of 0.3 positions is proposed due to a reduction in funding for the federal Water Quality Control Program Grant.

## STATE WATER RESOURCES CONTROL BOARD—Continued

## d. Program Support

An ongoing commitment of resources is necessary to develop new information, maintain technical staff capability in evolving and continuing activities, and for support necessary to accomplish the goals and objectives of the Water Quality Program.

Policy decisions which will have profound effects on our environment must be made, and it is imperative that they be based on a foundation of sound data and reliable information. This requires research, coordination, appropriate assimilation, analysis and translation of data for effective water resources program management.

Coupled with the research effort, State Board technical specialists provide assistance to all water quality program activities of the Board in the areas of economics, engineering geology, hydrogeology, aerial surveillance, and wastewater reclamation conservation. This expertise is required for studies in such areas as groundwater hydrology, control of nonpoint sources of pollution and marine water quality.

The State Board is mandated to develop and implement a statewide water quality information storage and retrieval program. The primary emphasis of the data management program is on the Waste Discharger System which provides the data necessary to monitor dischargers throughout the State, the Water Quality Data System which provides the data necessary to monitor the quality of water in the State, and a continuing need to provide in-house capability to meet operational needs.

Also included in the program support element are those efforts necessary in planning, organizing, coordinating, budgeting and directing activities for accomplishment of the goals and objectives of the Water Quality Program and appropriate administrative services.

*A decrease of two positions in the program support element is proposed due to a decrease in funding in the federal Water Quality Control Program Grant.*

## II. WATER RIGHTS

## Program Objectives and Description

The broad objective of the Water Rights Program is to assure that California's water resources are put to beneficial use to the fullest extent of which they are capable while protecting vested rights, water quality, and the environment. Specific objectives are:

1. To allocate the remaining unappropriated waters of the State in accordance with the laws of the State.
2. To maintain a record of title and extent of rights initiated and maintained since 1914, involving over 10,000 projects.
3. To maintain a record of stockpond water rights, diversions and uses throughout the State, groundwater extractions in five southern counties and cessation of or reduction in extraction of groundwater by use of water from a contributory source.
4. To obtain the greatest beneficial use of the waters of the State by enforcement of permit and license terms and conditions, abatement of illegal diversions and prevention of waste or unreasonable use under all rights.
5. To determine existing rights throughout the State through the court reference and statutory adjudication procedures.

## Authority

Division 2 of the California Water Code and Title 23 of the California Administrative Code.

## a. Water Appropriation

In order to obtain the rights to take unappropriated water from surface streams, other surface bodies of water, or defined subterranean streams, an application to appropriate such water must be filed with this Board. In considering the application, the Board must weigh the relative benefits to be derived from all beneficial uses of the water concerned. It may subject such appropriations to terms and conditions that will best develop, conserve, and utilize the water sought for appropriation.

Environmental impact assessments are made for all projects. These lead to the preparation or review of exempt status declarations, negative declarations, or environmental impact reports. In the event an application is protested, the Board must hold hearings and conduct field investigations to determine whether the application should be approved or denied. In many cases, the Board retains continuing jurisdiction over the project when a permit is issued under controversial conditions.

The drought which occurred in 1977 and 1978 imposed unforeseen demands on the normal activities of the Water Rights Program. As a result of the two successive dry years, the competition for available water stimulated an expanded interest in water rights issues. The drought brought into public view the fact that we must be continually concerned with the conservation and effective utilization of the State's water resource.

## b. Water Management/Enforcement

The Board is responsible for the administration of laws which require the collection of water diversion data pertaining specifically to water rights. In Southern California, the Counties of Riverside, San Bernardino, Los Angeles, and Ventura have a severe groundwater shortage. The law requires that reports be filed by anyone within these counties extracting more than 25 acre-feet of water from the ground. Statewide, the law requires that notices be filed for any extractions from sources in lieu of groundwater. Also, any person who diverts water from a surface stream or body of water and does not have a permit or license issued by the Board, is required to file a statement of the diversion and use with the Board. Special studies are performed in such areas as instream uses, Lake Tahoe and the Bay/Delta.

Two years of drought have brought about a revision in the Board's approach to enforcement. An adequate enforcement program requires not only a quick response to public complaints of illegal diversions, but also a determination of the availability of water for various priorities of water rights and notice to these right-holders prior to and after the time when water is no longer available for diversion.

An increase of 9.5 positions is proposed to determine water availability throughout the Bay Delta Watershed by developing and implementing a permanent water management policy which protects the Delta and assures sufficient availability of water for exportation of water to water deficient areas of the State.

## c. Determination of Existing Rights

The Board and its predecessor agencies have been assisting the courts in adjudication of water disputes since passage of the Water Commission Act in 1914. The Board assists the courts either by: (1) court references under which the Board is appointed referee in actions before a court, or (2) statutory adjudications, wherein a determination is initiated through petition to the Board by the affected users. Both procedures culminate in a court decree defining the water rights involved.

## III. GENERAL SUPPORT

## Program Objectives and Description

The objective of this program is to provide essential management program and policy direction, legal and administrative services, public affairs activities, and coordination to the five divisions of the State Board and the nine Regional Water Quality Control Boards.

The five appointed State Board members, each of whom represent specified areas of knowledge required by the Water Code, are responsible for establishing overall policy, providing direction to State Board staff and to the Regional Boards, approving Regional Boards' water quality control plans, considering appeals concerning other actions or inaction of the Regional Boards, and coordinating all water quality and water rights activities in the State.

Specialized staff services are provided to the State Board and Regional Boards in the functional areas of: public affairs, legal advice and assistance, fiscal management, personnel management, training, business services, and administrative analysis.

## Authority

# **HEALTH AND WELFARE**

## STATE COUNCIL ON DEVELOPMENTAL DISABILITIES

## I. ADMINISTRATION

The California State Council on Developmental Disabilities operates pursuant to Division 4.5 of the Welfare and Institutions Code, in keeping with requirements of the Federal Developmental Disabilities Services and Facilities Construction Act of 1970 (PL 91-517), the Developmentally Disabled Assistance and Bill of Rights Act of 1975 (PL 94-103), and the Rehabilitation, Comprehensive Services and Developmental Disabilities Amendments of 1978 (PL 95-602). The State Council is composed of fourteen members. Eight voting members are appointed by the Governor to represent persons with mental retardation, cerebral palsy, epilepsy, autism and other developmental disabilities. One voting member is appointed by the Governor to represent the general public. State agencies are represented on the Council by the Director of the Department of Developmental Services, the Secretary of the Health and Welfare Agency and the Superintendent of Public Instruction, who serve as ex-officio voting members. Additional ex-officio representatives serve without a vote from the County Supervisors Association and the Organization of Area Boards. The State Council plans and coordinates State resources to assure that legal, civil, and service rights for persons with developmental disabilities are fully ensured by public and private, State, and local agencies. The Council is responsible for supervision of the development, implementation, and monitoring of a comprehensive State plan for a network of services for persons with developmental disabilities in California as well as to review, evaluate, and comment on all other state plans and programs that provide services for developmentally disabled citizens.

Expenditures of the Council have, in previous years, appeared in the budgets of the former Department of Health and the Department of Developmental Services. On July 1, 1978, Chapter 432, Statutes of 1978 (SB 1410), attached the Council "for administrative purposes only," to the Health and Welfare Agency.

## II. COMMUNITY PROGRAM DEVELOPMENT

The Community Program Development Fund was established in 1977 in order to provide necessary resources to initiate new programs. In addition to parental contributions, this Fund is augmented by Federal funds through the State Council. Welfare and Institutions Code Section 4540(b) provides that up to 30 percent of PL 94-103 funds received by the State Council may be allotted to the Program Development Fund.

The Program Development Fund is administered by the Community Development Branch of the Department of Developmental Services. Funds are used to expand community programs for the developmentally disabled.

## III. ALLOCATION TO AREA BOARDS

There are 13 Area Boards on Developmental Disabilities throughout California each having monitoring and coordinating responsibilities within their regional boundaries. Funding for these Area Boards is provided by a reimbursement from the State Council on Developmental Disabilities. Welfare and Institutions Code Section 4611 provides that the State Council can allocate to the Area Boards up to 45 percent of the Federal funds it receives under Public Law 94-103.

Annually, each Area Board presents a proposal requesting funding to the State Council for consideration. After review and approval, the amount of funding to be allocated is included in the State Plan. In January of each year, the Area Boards summarize their activities and accomplishments and submit this information to the State Council.

## SUMMARY OF PROGRAM REQUIREMENTS

## AREA BOARDS ON DEVELOPMENTAL DISABILITIES

The Area Boards on Developmental Disabilities are authorized pursuant to Welfare and Institutions Code Sections 4570 et seq. Each Board is given regional monitoring and coordinating responsibilities to protect and advocate the legal, civil, and service rights of persons with developmental disabilities. Voting membership is composed of volunteers appointed by the governing body of each county in the area served and by the Governor. There are thirteen Area Boards geographically dispersed throughout the State, and an Organization of Area Boards in Sacramento to coordinate administrative support activities.

Area Board functions include protection and advocacy of rights of developmentally disabled persons; provision of public information programs; assisting in the establishment of independent citizen advocacy organizations; reviewing the policies and practices of publicly funded agencies; reporting alleged fire, safety, health and other violations of legally established standards; assisting the State Council on Developmental Disabilities in preparation of the State plan; and encouraging the development of needed services.

In recent years, expenditures of the Area Boards have appeared in the Departments of Health, Developmental Services and Social Services. On July 17, 1978, the Area Boards were assigned to the Health and Welfare Agency for administrative support in keeping with legislative intent in Chapter 432, Statutes of 1978 (SB 1410). Positions for the Area Boards were administratively established within the budget for the Department of Social Services in 1978-79.

## HEALTH AND WELFARE AGENCY CONSOLIDATED DATA CENTER

Chapter 787, Statutes of 1972 established four consolidated data centers in State government, including one for Health and Welfare. The primary objectives of the Health and Welfare Agency Data Center are to:

(1) Insure the effective, efficient, and economical use of agency electronic data processing resources by providing EDP services at the most economical cost, by eliminating unnecessary duplication and by insuring optimum utilization.

(2) Insure that the necessary EDP resources are available to meet Agency needs by providing the necessary computer capability and capacity to meet those needs.

(3) Promote the appropriate use of EDP resources to assist in the achievement of Agency goals and objectives by identifying potential EDP related applications and by formulating and recommending policies on the appropriate use of EDP in the Agency.

In order to achieve these broad program objectives, the Data Center was administratively implemented on January 1, 1978.

## SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81

Personnel years .....	123.6	151.1	169.7

## SIGNIFICANT PROGRAM CHANGES

Several major development efforts within the departments will have significant impact on the Data Center's workload when they are implemented. Following is a list of these major changes:

- (1) The implementation of the Medi-Cal Eligibility project will require the installation of a major statewide teleprocessing network.
- (2) The Department of Social Services will be implementing a pilot for the Statewide Public Assistance Network (SPAN) project which will require substantial computer and teleprocessing support.
- (3) The Employment Development Department will be completing the pilot phase of their California Automation of Services Team (CAST) project. The pilot itself involves substantial computer teleprocessing and related support services.
- (4) The Departments of Mental Health and Developmental Services are beginning a project to develop a comprehensive State Hospital Information System. Computer support will be a key element during its development.

## I. FACILITIES OPERATIONS

## Program Objectives and Description

The principal objective of this program is to provide the necessary computer operation services and resources to the departments within the Health and Welfare Agency. The four major elements of the Facilities Operations program are:

- (1) Operations—The functions assigned to this element are related to the operation of the Data Center's central computer processors and attached peripheral equipment. The equipment is operated to meet user schedules. Normal operations are 24 hours-a-day, five days-a-week, and on weekends as needed.
- (2) Software Support—This element is responsible for maintaining the software operating systems for the computers, maintaining software for the telecommunications system and on-line inquiry systems, and installing and implementing proprietary software packages, and monitoring and adjusting the computer systems configuration to achieve optimal performance and efficiency. In addition, they provide advice and consultation to user departments on requests regarding software systems, hardware, workload, and resource utilization data.
- (3) Liaison and Planning—This element's primary function is to provide the interface between the user departments and the Data Center. Most user communications with the Data Center including service requests, problems, and questions are coordinated with designated liaison personnel. In addition, liaison staff periodically provide data processing consultation to user departments when requested. Also, they review all studies and plans which are required to be submitted to the Data Center.
- (4) Capacity Planning and Procurement—To insure that adequate hardware and software related resources are available to meet the current and projected needs of the user departments in the Agency, in a timely manner, the Data Center is projecting requirements and procuring additional computer hardware equipment and related software products in Fiscal Year 79/80.

## OFFICE OF STATEWIDE HEALTH PLANNING AND DEVELOPMENT

The mission of the Office of Statewide Health Planning and Development is to provide the foundation for a State health policy to assure the accessibility of needed and appropriate health services to the people of California at affordable costs. The Office accomplishes this by working with California's 14 Health Systems Agencies to develop a State Health Plan which establishes priorities for delivery and financing of health services in the State. The State Certificate of Need Program of the Office is one tool to implement State policies and to prevent further duplication of costly health facilities and services. The responsibilities of the Office of Statewide Health Planning and Development are: (1) to develop the State Health Plan and the State Medical Facilities and Services Plan; (2) to implement the State Certificate of Need Program; (3) to assure that construction plans and specifications for all major health facilities are in compliance with the State building codes; (4) to assure that available federal and State financial assistance is provided for development of needed health facilities; (5) to conduct health professional staff planning and utilization activities; and (6) to carry out special projects including the development of a master plan for services to children and youth. Through these activities, the Office attempts to ensure the quantity, availability, and quality of appropriate health resources throughout the State of California.

## SUMMARY OF PROGRAM REQUIREMENTS

OFFICE OF STATEWIDE HEALTH PLANNING AND DEVELOPMENT—*Continued*

## SIGNIFICANT PROGRAM CHANGES

The budget includes General Fund support to continue the Health Professions Career Opportunity Program. The program, currently in its third year, conducts a variety of activities designed to result in more minority health professionals being trained and practicing primary care in health manpower shortage areas.

Also included in the budget is General Fund support to continue the current level of training activities authorized under the Song-Brown Family Physician Training Program. The activities conducted are intended to train primary care physician's assistants, primary care nurse practitioners and undergraduate medical students and residents in the specialty of family practice.

## I. HEALTH PLANNING

Health Planning is charged with the overall responsibility for carrying out the health planning activities and development of statewide health policy for the Office of Statewide Health Planning and Development.

The specific functions of the program include:

1. Development of a State Health Plan (pursuant to PL 93-641), and development of a Statewide Health Facilities and Services Plan (pursuant to Chapter 854, Statutes of 1976).
2. Collection and analysis of data on health and health services required by the Office.
3. Undertaking of research projects to support all Office activities.
4. Serving as liaison between the Office and Health Systems Agencies and other governmental and nongovernmental organizations.
5. Provision of technical assistance and publication of guidelines for use by local Health Systems Agencies in the development of their health plans.
6. Provision of information and assistance to members of the public.

The Health Planning program develops State plans for use by the Certificate of Need program. The Legal Office, Certificate of Need, and Health Planning programs all work together in the review of Health Systems Plans and in the development of review criteria for Certificate of Need.

Statewide policy for health personnel is developed jointly between the Health Planning and Health Professions Development programs.

Three positions are being proposed to enable Health Planning to conduct appropriateness of health services reviews pursuant to Public Law 96-79.

## Authority

## II. CERTIFICATE OF NEED

## Program Objectives and Description

This program administers the State's Certificate of Need law. It conducts reviews of projects proposed by any licensed health facility in the State which would create or expand bed capacity or special services, or involve a capital expenditure exceeding \$173,550. The program develops the State's intended position as to the need for these projects and presents its recommendations at public hearings. Final decision to grant or deny a Certificate of Need is made by the Director of the Office of Statewide Health Planning and Development.

Projects to remodel or replace a facility are reviewed for exemption from the process. Follow-up on approved projects is made with the assistance of Facilities Development to assure compliance with the certificate as granted.

The program requires representation by legal counsel in all formal contested certificate of need hearings and appeals. Legal counsel is also provided for daily advice, negotiations and consultations on regulations and legislation. One hearing officer position is being proposed to help expedite the certificate of need public hearing and appeals process.

## III. HEALTH PROFESSIONS DEVELOPMENT

## Program Objectives and Description

This program issues the biennial California Health Manpower Plan, which includes assessments of the present and future supplies of specific categories of health professionals and their mid-level counterparts; establishes standards for determining the adequacy of supplies; assesses the projected impact of changes in the financing and delivery of health care on demands for the services of health personnel; and contains recommendations on personnel policy and programs.

Health Professions Development administers the Health Manpower Pilot Projects program, which encourages experimentation with expanded duties and with other innovations in health personnel utilization. Under this program, trainees in approved projects are exempted from other provisions of law, such as the healing arts practice acts.

Health Professions Development also administers the Song-Brown Family Physician Training Program, through the California Health Manpower Policy Commission, a statutory body whose members are appointed by the Governor and the Legislature. This program utilizes state funds to contract with medical schools, teaching hospitals, and other training programs to increase the number and improve the deployment of family practice physicians, primary care nurse practitioners, and primary care physicians' assistants.

The Health Professions Career Opportunity Program, which was aimed at solving specific health care underservice problems by increasing the number of qualified minority students in the health professions was a limited term project administered by this program in Fiscal Years 1977-78 through 1979-80. The project has been evaluated and is proposed for continued General Fund for 1980-81. In addition, the program conducts other health personnel planning and development activities.

## IV. FACILITIES DEVELOPMENT

## Program Objectives and Description

The program reviews all health facility construction plans and specifications for conformity to State statutes and regulations to assure that facility construction, modification, or alteration follows accepted standards for construction. Further, the program determines whether the health facilities receiving Hill-Burton funds provide uncompensated care, as required by regulations pursuant to federal mandates.

This program is also responsible for the financial analysis and review of health facility project applications for Federal Hill-Burton Grants, Hill-Burton Loans with Interest Subsidy, FHA Loans, Health Facility Construction Loan Insurance, and Fire Protection Loans. The program assures that the available federal and State financial assistance is allocated or approved only to eligible and needed health facilities in California. Projects receiving such assistance are subject to regular on-site construction progress and payment verification inspections to assure conformity with approved plans and specifications, loan agreements, wage and labor standards, affirmative action and equal employment mandates.

All projects subject to the Comprehensive Health Planning Law (Chapter 854, Statutes of 1976) must receive prior approval by the Certificate of Need Division before the Facilities Development Division will review for financial assistance.

## OFFICE OF STATEWIDE HEALTH PLANNING AND DEVELOPMENT—Continued

## V. SPECIAL PROJECTS

## Program Objectives and Description

Under the Office's mandate from Chapter 1252, Statutes of 1977, this program is responsible for the development by July, 1980, of a master plan for services to children and youth. This plan is to include a description of services being provided to this population group by public and private agencies, a listing of potential public and private funding sources, a proposal for establishing and constituting an Advisory Council on Children and Youth, and a study of the feasibility of establishing within the Health and Welfare Agency a State Department of Services to Children and Youth. In addition, the program develops, reviews and recommends health policies within the Office of Statewide Health Planning and Development and assists in the development of a uniform State health policy to be incorporated into the State Health Plan as authorized by PL 93-641 and State statutes.

Additionally, this program is engaged in a Regulations Reduction and Simplification Project. In response to a recommendation of the Governor's Special Committee on Health Care Costs, the project will assess the costs and benefits of health care regulatory programs, identify areas of conflict and duplication, and propose a program to reform the existing structure of health care regulation.

## VI. LEGISLATIVE MANDATES

This program reflects the cost of reimbursing local governments for (1) property tax revenue loss, (2) new programs, and (3) increased level of existing services mandated on local entities by legislation or executive regulations.

## Authority

The State is required to pay the cost of legislative programs mandated on local governmental entities by Chapter 1406, Statutes of 1972 (SB 90), as amended by Chapter 358, Statutes of 1973. These two pieces of legislation apply to mandates effective after January 1, 1973. As added by such legislation, Section 2229 of the Revenue and Taxation Code provides for reimbursement of lost personal property tax revenues, while Section 2231 provided for the reimbursement of costs of legislative mandated programs. Chapter 854, Statutes of 1976, revised existing provisions of law relating to health planning. Each health facility is required to pay a special assessment fee to offset the administrative cost of the program.

## DEPARTMENT OF AGING

The Department of Aging administers federal funds of approximately 65 million dollars for specific grant programs under the Older Americans Act of 1965, as amended. These grant programs have identified service priorities assigned by Congress and the U.S. Administration on Aging. The Department provides the necessary consulting and management services to assist local communities in the development of these priority services for the elderly and in the advocacy for effective use of other existing resources through coordination and planning. The Department also serves the State's elderly population as (1) a clearinghouse and center for information on aging, (2) an advocate for development of new resources for the elderly, and (3) a statewide link between federal, State and local agencies that are responsible for development and management of other programs that serve the elderly.

## SUMMARY OF PROGRAM REQUIREMENTS

Personnel years .....	102.3	119.9	130.3

## SIGNIFICANT PROGRAM CHANGES

The Department of Aging will be required to provide an additional 5% State match for federal funds in the budget year. This increase resulting from federal action will be met through in-kind match from various State funded programs currently providing services to the elderly.

To consolidate State level audits, ten positions have been transferred to the Department from the Department of Finance. These positions will continue to perform the fiscal and compliance audits previously performed by the Department of Finance, related to and required by the federal government.

A \$5 million Nutrition Reserve Fund was established in the current year through Chapter 1189/79 to provide funding for nutrition projects experiencing temporary financial difficulty. The establishment of this fund will help prevent nutrition project closure in the State.

## I. PROGRAM ADMINISTRATION

## Program Objectives and Description

Program Administration is responsible for implementing the Comprehensive Older Americans Act of 1978 and specific State programs that complement the Act, thereby providing a broad array of coordinated services to allow Older Californians to maintain an independent lifestyle. In carrying out the Act, the Department uses various coordination, resource allocation, and program development approaches as provided in the State Plan on Aging.

## DEPARTMENT OF AGING—Continued

The development of a comprehensive and coordinated service delivery system through the establishment of a statewide network of Area Agencies on Aging (AAAs) to benefit older persons is the main thrust of the Act and the Department. The 1978 changes in the Act continued to refine and improve programming for Older Californians through AAAs. To this end, 18 new AAAs, for a total of 33 statewide, are to be established over the coming year. The AAAs, while not direct service providers, are responsible for ensuring that a wide array of services are available to Older Californians. Based upon demonstrated needs these services include transportation, legal aid, information and referral, in-home supportive services, meals in a social setting, home-delivered meals, or hospice centers, counseling services, home repair, employment and development of senior multipurpose centers. The Department operates a statewide long-term care ombudsman program in conjunction with Advocacy Assistance to investigate and resolve complaints of individuals who are residents of long-term care facilities.

The Department has expanded its activities in the area of coordination with other State and federal agencies involved in providing services to Older Californians.

Other objectives of Program Administration include the facilitation of the development of the service system network by assertively providing technical support to program staff and the public through activities such as monitoring, assessment, planning, grants management, policy and program development, training, advocacy assistance, and coordination with State, federal and private agencies.

Outputs include the administration and allocation of resources to implement a three-year State Plan on Aging that is based upon AAA Plans; annual implementation plans; establishment of an efficient network of 33 AAAs; development of multipurpose senior centers as the focus of a community based service system; establishment of working linkages with State, Federal and private agencies to ensure a coordinated array of services; consultation in areas such as employment, health, housing, transportation, education, crime prevention, home winterization, environmental protection, and recreation; development of policy recommendations regarding programs intended to serve the elderly; and analysis and comment on policies pertaining to or affecting Older Californians.

Three new positions have been established within the department in the current and budget years from redirected funds to permit more cost effective training. Previously the Department of Aging contracted with private vendors for training services.

In addition, two positions have been added to Program Administration for 1980-81 to (a) permit monitoring of progress on the State Plan on Aging and (b) provide the necessary expertise to collect and analyze data on services to the elderly as required by the Older Americans Act.

**II. ADMINISTRATION****Program Objectives and Description**

The Department's administration provides overall departmental leadership and issues basic policies related to community grants development and direction for service programs in the State under the Department's jurisdiction.

The director's office provides leadership direction and control for all functions of the programs being carried out by the Department. The director, with assistance from the deputy director, works with the Commission on Aging, confers with representatives of aging organizations throughout the State, and conducts public hearings to develop meaningful objectives for current and planned service programs for the State's elderly.

Administration also develops fiscal and program operational safeguards against misuse or misappropriation of Federal and State funds administered by the Department. Supportive services are provided in personnel, budgeting, accounting, management analysis, business and office services, contract administration, communications, legislation and legal services. In addition, Administration is responsible for the development, implementation and maintenance of the Department's manuals of operating policy and procedure, its management information system (MIS), a combined liability and physical damage insurance program for sites and vehicles operated by aging projects, and an inventory control program for capital and other nonexpendable equipment purchased with program monies.

Ten auditing positions have been transferred from the Department of Finance to the Department of Aging for the current and budget years. The Department of Aging will fund these positions with existing resources. With this transfer, the Department of Aging assumes responsibility for administration and performance of all audits within the Department.

One position has been added to Administration to produce and maintain departmental procedure manuals for use by grantees and departmental staff.

Three positions have been added to Administration to upgrade part-time staffing to full-time office services support. These positions are equivalent to 1.3 personnel years.

# DEPARTMENT OF AGING—Continued

## III. GRANTS

### Program Objectives and Description

The Department has management responsibility for Older Americans Act grant programs administered under Titles III, IV-A and V and specific Federal and State Model Projects.

The Older Americans Act, as amended in 1978, requires (a) a 15% match to federal funds, and (b) that one-third of that match be either cash or in-kind from State sources. Currently, 10% of the match is provided through local assistance and in-kind match. \$1.9 million is needed for the additional match in fiscal year 1980-81. That in-kind match is represented by the following State funded programs serving the elderly, and administered by State departments in cooperation with the Department of Aging:

1) Health and Welfare Agency, Multipurpose Senior Service Centers .....	\$1,259,457
2) Department of Health Services, Preventive Health Care for Aging .....	823,266
3) Department of Social Services, In-Home Supportive Services (70% of those served are over the age of 60) .....	63,975,000
In addition, the following Department of Aging programs may be utilized for match:	
1) The Senior Companion Program .....	62,500
2) The Foster Grandparent Program .....	62,500
3) State Grants Model Projects .....	97,026
4) State Nutrition Reserve .....	1,162,500

### Coordinated Senior Services—Title III-B

The purpose of coordinated senior services grants is to strengthen or develop systems of comprehensive and coordinated supportive services for older persons, utilizing resources from all levels of the community and the economy and avoiding duplication in some service areas at the expense of others. These services are designed to avoid unnecessary institutionalization by enabling older persons to live in their own homes or other places of residence for as long as possible. Emphasis is placed on multipurpose senior centers to serve as community focal points for development and delivery of an array of services.

### Congregate Nutrition Grants—Title III-C1

Congregate Nutrition project grants provide to older Californians, particularly those with low incomes, nutritionally sound and low-cost meals at strategically placed community locations where other social or rehabilitative services can also be obtained. Besides promoting improved health among the older segment of the population through improved nutrition, this program is also aimed at reducing the isolation of old age.

### Home Delivered Nutrition Services—Title III-C2

A separate federal appropriation was made available to fund home delivered nutrition services in 1979. This program is closely coordinated with the congregate nutrition program.

### USDA Entitlement

The Department of Agriculture (USDA) Food and Nutrition Service, provides at least 43 cents per meal served to seniors at the elderly nutrition programs. California elected to receive cash in lieu of commodities to supplement the nutrition program.

### State Nutrition Reserve

The State Nutrition Reserve provides general fund match for funds received under the Congregate Nutrition Grants to local nutrition projects when a local match is not available.

Chapter 1189/79 established a Nutrition Reserve Fund of \$5 million from State General Fund as a means of providing interim funding for nutrition projects experiencing temporary financial difficulties in order to prevent nutrition project closures. It is anticipated that \$900,000 will be expended in the current year and \$1,500,000 will be expended in the budget year from the Nutrition Reserve Fund.

### Training—Title IV-A

These grants provide training programs to persons providing services to the elderly in subject areas where development needs are greatest in order to increase the service potential and cost effectiveness of all resources available in the State to serve the elderly.

### Senior Community Employment Service—Title V

The Senior Community Employment grant provides part-time, subsidized employment in community service activities for low-income persons, 55 years and older.

### State Model Projects

The Department of Aging has been directed by the Legislature to administer the Nutrition and Volunteer Services Program for Senior Citizens (SNVP, under Chapter 6, commencing with Section 9500, Division 8.5 of the Welfare and Institutions Code, as amended).

The major objective of this legislation is to encourage public and private community organizations to utilize senior citizens' skills by providing transportation reimbursement, congregate meals, and a volunteer program consisting of recruitment, training, support and placement of senior volunteers in community agencies for the purpose of serving the needs of children and adolescents.

In order to implement this objective, the Department has established model projects in Sacramento, San Diego and Humboldt Counties. The model projects will operate until September 30, 1980.

## DEPARTMENT OF AGING—Continued

Chapter 1122, Statutes of 1979, appropriated \$250,000, of which \$125,000 is to be used in the current year and the remainder will be used in the budget year. This State funded demonstration component will be contracted to ACTION to allow additional Foster Grandparents to work in specific problem areas. Emphasis includes working with youthful offenders to prevent institutionalization or expedite successful release, and working with handicapped children to aid their adjustment to local settings. California Department of Aging is responsible for contracting and evaluation of this program.

Chapter 1121, Statutes of 1979, appropriated \$250,000, of which \$125,000 is to be used in the current year and the remainder is to be used in the budget year. This State funded demonstration component will be contracted to ACTION to allow additional Senior Companions to work in specific locations. Emphasis includes volunteer staffing at three multipurpose Senior Service Projects and two community senior centers to aid Older Californians in the prevention of institutionalization.

## IV. COMMISSION ON AGING

## Program Objectives and Description

The Commission on Aging is charged with the responsibility of being the principal advocate on behalf of the elderly of California. The objectives are to insure that older persons in California are represented in all areas affecting such persons, and to advise the Director on basic policy priorities with respect to the development, operation, and implementation of programs.

The Commission on Aging ensures representation of California's elderly in governmental matters, stimulates the most effective use of resources and available services for the elderly, and advocates the needs and wants of older consumers to the Department of Aging, the Governor, and the Legislature.

## DEPARTMENT OF ALCOHOL AND DRUG PROGRAMS

The Department of Alcohol and Drug Abuse was changed to the Department of Alcohol and Drug Programs in 1979. Alcohol and Drug Programs carries the same roles and responsibilities as its predecessor.

The principal objective of the Department is to direct and coordinate the State's effort to prevent and minimize the effects of alcohol misuse, narcotic addiction and drug abuse on the State of California and its citizens.

The Department's activity is divided into four major program areas: Alcoholism programs, Drug Abuse programs, State Administration and Drug and Alcohol projects. These programs provide a cost effective network of services for approximately 150,000 Californians each year. In addition, extensive prevention efforts are provided to reduce the incidence of alcohol and drug abuse in the general population and within special target populations.

### Authority

V.	Transfer to Department of Health Services for certification of methadone laboratories .....	—	\$-140,025

### I. ALCOHOLISM PROGRAMS

#### a. County Administration—Indirect Services

##### Program Objectives and Description

The Health and Safety Code requires counties to administer and manage all county alcoholism programs funded by the State. The county is accountable to the State for the effective implementation of these programs. Within standards and regulations established by the State, counties develop program priorities and reflect these in the county alcoholism program budget. Program budgets must be reviewed and evaluated by a county alcoholism advisory board prior to approval by the county board of supervisors and the State.

##### Program Requirements

	1978-79	1979-80	1980-81
Totals, County Administration .....	\$4,109,103	\$4,133,530	\$4,440,505
<i>General Fund</i> .....	<i>3,558,963</i>	<i>3,570,077</i>	<i>3,841,590</i>
<i>Federal funds</i> .....	<i>550,140</i>	<i>563,453</i>	<i>598,915</i>

#### b. Prevention

##### Program Objectives and Description

The long-term goals of the Prevention program are to prevent alcoholism in persons not yet alcoholic, and to deter or control the excessive use of alcohol in situations likely to have a negative social impact. To carry out these goals, prevention activities are designated to increase awareness of the dangers of alcohol abuse and change attitudes to preclude excessive drinking.

The Department of Alcohol and Drug Programs reviews and approves the efforts of county prevention staff in carrying out local community prevention projects involving alcoholism awareness and alcohol education.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## DEPARTMENT OF ALCOHOL AND DRUG PROGRAMS—Continued

## Program Requirements

	1978-79	1979-80	1980-81
Totals, Prevention .....	\$2,054,552	\$2,066,764	\$2,220,253

Federal funds .....	275,070	281,726	299,457

## c. Identification

## Program Objectives and Description

The objective of the Identification program is to inform individuals and communities of services available to assist alcoholics and their families and to encourage the early seeking of such services. The following descriptions indicate those types of activities that are an integral part of this program:

(a) Information and Referral. These activities include crisis intervention and specific contacts which result in dissemination of alcohol-related information and the referral of individuals to appropriate facilities;

(b) Driving While Intoxicated and Drinking Driver programs. Alcohol Pre-sentence Investigations consist of an evaluation of individuals convicted of drunk driving to determine if the person might benefit from alcoholism recovery services. Driving While Intoxicated programs consist of activities designed to alter the drinking/driver behavior of persons arrested for drunk driving. Although Drinking Driver Treatment programs are referral and treatment programs, and DWI programs principally provide educational services, enrollments from both activities are combined to indicate total drunk driving program activity.

(c) Occupational Alcoholism Programs. These programs assist employers to identify those employees with alcoholism problems and refer them to appropriate treatment facilities. Included are county-based efforts and a state-administered contract for the training of alcoholism coordinators in union affiliates; and,

(d) Supplemental Security Income (SSI). These state-administered, county-conducted services screen, refer to treatment, and monitor individuals with serious alcoholism problems who are receiving supplemental payments under Social Security.

## Program Requirements

	1978-79	1979-80	1980-81
Totals, Identification .....	\$3,763,679	\$3,786,052	\$4,067,224
General Fund .....	3,259,786	3,269,965	3,518,656
Federal funds .....	503,893	516,087	548,568

## d. Treatment and Rehabilitation—Direct Services

## Program Objectives and Description

Economic and personal losses resulting from alcoholism are excessive. The U.S. Department of Health, Education, and Welfare estimates that alcoholism costs over 42.7 billion dollars in employment losses, accidents, and medical care per year. California's share in similar national totals usually approximates 10 percent or \$4 billion for alcoholism. Additionally, alcoholism contributes to higher rates of crime, suicides, family dissolutions, job losses, and early deaths. The objective of this program is to provide comprehensive care for the alcoholic or alcohol abuser through programs which emphasize sobriety and abstinence. This care is functionally divided into residential and non-residential services. Care is provided through county or state-operated programs or through subcontracts with private treatment and rehabilitation facilities.

Residential services include: detoxification, which assists individuals to recover from the effects of intoxication and to plan for continued recovery in residential programs, in which food, shelter, professional treatment, and possibly medical services are furnished in a nondrinking, supportive environment; and recovery home services for the longer term provision of food, shelter, and rehabilitation in a peer group-oriented, community-based supportive environment.

Nonresidential services include a wide range of activities including diagnosis, individual, group and family counseling therapy, and social, occupational, and recreation therapy for those alcoholics not requiring the supportive environment of a residential facility. Nonresidential services may be provided through self-help groups, outpatient clinics, or day treatment programs.

State Hospitals programs: In Fiscal Year 1978-79, the Department conducted a study to compare and evaluate Camarillo State Hospital community-based alternative programs. Funding will continue through Fiscal Year 1980-81. Funding beyond 1981 will depend upon the availability of county program.

## Program Requirements

	1978-79	1979-80	1980-81
Totals, Treatment and Rehabilitation .....	\$26,054,303	\$26,209,182	\$28,155,615

Federal funds .....	3,488,231	3,572,644	3,797,496

## II. DRUG ABUSE PROGRAM

The Drug Abuse program was established in 1973 to implement certain provisions of the Campbell-Moretti-Deukmejian Drug Abuse Treatment Act of 1972.

The Drug Abuse program assists counties and local programs in the planning, development, implementation, coordination and funding of local drug prevention, treatment and rehabilitation programs. The program administers State funds through counties via the Short-Doyle System and Federal funds through contracts with the counties or individual programs. The program identifies statewide objectives and priorities and prepares the annual State Drug Abuse Plan pursuant to statute.

DEPARTMENT OF ALCOHOL AND DRUG PROGRAMS—*Continued*

## a. County Administration

## Program Objectives and Description

The Drug Program Coordinator of each county has the responsibility to administer all Drug program funds allocated to the county under the Short/Doyle Act. These responsibilities include preparation of the drug program portion of the County Short/Doyle Plan and general supervision over local drug program services provided under the plan; submission of an annual report to the county board of supervisors, reporting all activities of local drug programs, including a financial accounting of expenditures and a forecast of anticipated needs for the ensuing year; and special studies for the prevention and treatment of drug abuse.

## Program Requirements

	1978-79	1979-80	1980-81
Totals, County Administration .....	\$4,580,496	\$4,826,532	\$5,193,849
General Fund .....	2,690,113	2,762,832	2,965,054
Federal funds .....	1,890,383	2,063,700	2,228,795

## b. Prevention

## Program Objectives and Description

The objective of the Prevention program is to reduce the incidence of drug usage through drug education and prevention programs. The Drug Abuse program is responsible for the development and implementation of mass media drug education and information programs, which increase public awareness and lead to the reduction of drug abuse. Educational institutions are assisted in developing and delivering educational programs for students, parents and offenders. Local drug programs supply schools and community groups with information and speakers. Prevention programs are funded from two sources: State drug abuse funds channelled through the State-County Short-Doyle system and Federal P.L. 92-255 and P.L. 94-237 Section 409 and 410 funds that are administered by the State, either directly, or by State-county agreements.

The use of phencyclidine, commonly referred to as PCP or Angel Dust, is particularly serious in several California urban areas. In the past and current year, \$355,000 was allotted to address this problem. The Department contracted with UCLA to provide training to health care professionals, educators, and law enforcement officials in order to improve their ability to deal with PCP cases.

## Program Requirements

	1978-79	1979-80	1980-81
Totals, Prevention .....	\$3,817,078	\$4,022,109	\$4,328,208
General Fund .....	2,241,760	2,302,360	2,470,878
Federal funds .....	1,575,318	1,719,749	1,857,330

## c. Treatment and Rehabilitation

## Program Objectives and Description

The objective of the Treatment and Rehabilitation program is to increase the personal and social functioning of narcotic addicts and drug abusers. New types of drug abuse programs, research projects, and the majority of State administrative costs are funded using Federal Drug Abuse funds. Programs funded by the State are located in communities throughout California. These programs provide detoxification, methadone maintenance, counseling, housing, family counseling, and aftercare services. Treatment programs are funded from State Short-Doyle drug abuse funds and Federal P.L. 92-255 and P.L. 94-237 Section 409 and 410 funds. The Federal 410 funds are used only for treatment per agreement with the National Institute on Drug Abuse (NIDA). In addition to the agreement with the State, NIDA has direct funding agreements with treatment programs in California.

The federal government, through the National Institute on Drug Abuse (NIDA), has requested that the Department of Alcohol and Drug Programs assume responsibility for administering an additional \$9,610,943 of federal drug abuse treatment dollars.

Federal financial assistance has been provided through two primary funding mechanisms: Services Contracts, and Treatment Rehabilitation Grants. In addition to California's single Statewide Services Contract, NIDA direct-funded projects in California include fourteen contracts and eight grants. The grant mechanism has been generally used to provide financial assistance to private nonprofit organizations. In recent years, NIDA's funding strategy has been to stimulate greater involvement of State government in managing the federally-supported treatment system. This strategy was based on the federal government's desire for more efficient means of administering community-based programs that were responsive to diverse community treatment needs. This has resulted in the national focus shifting to consolidate the drug abuse treatment system and integrate it more into the mainstream of health care.

The Department of Alcohol and Drug Abuse proposes to assume the NIDA direct drug abuse treatment projects effective January 1, 1981. This represents \$9,610,943 federal share for local assistance, \$95,522 federal share for State administration (7.2 positions) and \$63,681 State share for State administration, (4.8 positions). This is a match ratio of 60% federal and 40 percent State for State administrative costs, and are partial year costs.

In 1980-81, \$3,203,130 is transferred from the Department of Mental Health's Short/Doyle funds to the Department of Alcohol and Drug Programs local assistance drug abuse appropriation. Under Mental Health, these funds were used to provide drug abuse treatment by Los Angeles County at Metropolitan State Hospital and will continue to be used for this purpose in the budget year.

## Program Requirements

	1978-79	1979-80	1980-81
Totals, Treatment and Rehabilitation .....	\$29,773,220	\$31,653,266	\$44,411,887

Federal funds .....	12,287,489	13,694,854	21,935,911

## DEPARTMENT OF ALCOHOL AND DRUG PROGRAMS—Continued

## III. STATE ADMINISTRATION

## Program Objectives and Description

The Administration Program provides executive leadership, policy direction, and administrative services necessary to accomplish program goals and objectives. Specific services include: review and approval of community alcoholism program budgets and drug abuse plans; technical assistance to local alcoholism and drug abuse programs; interagency coordination among State, federal, and local entities; information and data services to management; public information and awareness about alcoholism and drug abuse in California; auditing; development of program rules and regulations and a strong emphasis on evaluation.

To consolidate existing State level audit efforts, the Department proposes 24 new positions to the Audit Section. Eleven of these positions will be transferred from the Department of Finance, and will continue to perform fiscal and compliance audits, which were previously performed by the Department of Finance, related to and required by the federal government. The remaining 13 proposed new positions will be responsible for comprehensive program and management audits involving State funded alcohol and drug programs and federal Hughes formula grant funds.

An additional 12 positions are being provided in the 1980-81 F.Y. to administer the proposed augmentation of federal 410 funds for Local Drug Abuse Programs currently funded directly by the National Institute on Drug Abuse. By transferring responsibility of these drug programs to the State, it will assure more accountability by the recipients and greater State involvement in federally funded drug programs within the State. Of the 12 positions being provided, 7.2 will be funded by federal funds with the remaining 4.8 from general fund.

## Program Requirements

## IV. DRUG AND ALCOHOL PROJECTS

## Program Objectives and Description

The following special projects are conducted using both State and federal funding sources:

**Alcohol Research and Prevention:** The Department will complete its alcoholism public education pilot project in 1980-81. The following projects will continue during 1979-80 and 1980-81: Alcoholism Recovery Homes project; Client Outcome follow-up study; special population groups study; California Labor Management Plan for occupational alcoholism programs; and revision of the alcoholism program's Payment and Cost Reporting System.

**Drug Abuse Research and Evaluation:** During 1979-80, the Department will conduct a training project for Poly Drug Abuse prevention, and a training project for planning and program development for rural drug abuse programs.

**Other Projects:** In 1979-80 the Department will conduct a project to assist counties in the areas of volunteerism and program development. Additionally, the Department will contract with the State Personnel Board to study compliance with Federal Merit System requirements in selected counties.

Under the authority of Chapter 925, Statutes of 1975, the Department awarded a contract to the University of California at Los Angeles to establish and maintain a research capability to study the social and behavioral causes of alcoholism and alcohol abuse. The overall mission of the UCLA Center is to study from social and behavioral science and social policy perspectives, the causes and correlates of alcohol-related problems and behavior, and to explore and evaluate approaches which prevent, reduce, or minimize alcohol-related problems. The 1980-81 fiscal year is the fourth of a tentative five year program at approximately \$500,000 per year. The Center will be reevaluated each year for funding with a comprehensive evaluation at the end of five years, fiscal year 1981-82.

The Department of Health Services is required by law to perform certification of methadone laboratories. \$140,025 will be transferred to Health Services for support of this effort.

The Department proposes to increase its budget by \$140,000 in 1980-81 to conduct a two-year research project exploring the effectiveness of acupuncture as a nonchemical alternative to the detoxification and treatment of drug abusers. In an era of concern over spiraling costs and over the social and health implications of chemical maintenance, new information about nondrug alternatives may permit the redirection of limited resources to more cost-beneficial approaches.

# GOVERNOR'S ADVISORY COMMITTEE ON CHILD DEVELOPMENT PROGRAMS

The Governor's Advisory Committee on Child Development Programs was established to provide policy recommendations to the Governor and the Superintendent of Public Instruction concerning child care and development.

The committee has the following additional responsibilities:

1. Reviewing the appropriateness and effectiveness of child development programs;
2. Reviewing needs data relating to young children;
3. Evaluating the effectiveness of child development programs and reporting thereon to the Governor and Legislature.

The committee consists of 25 members and was staffed with an executive secretary and clerical support for the first time in the 1977/78 budget year. The Advisory Committee is composed of representatives from various State agencies, public members (representing private education, health care, child welfare, child care, and community action interests) and parents of children in child care programs.

The Advisory Committee conducted a study in the current year of child development services, utilizing a specially assembled task force. A report on the results of this study was submitted to the Joint Legislative Budget Committee on January 1, 1980.

A half-time position limited to June 30, 1981 is proposed for the budget year to accomplish the ongoing workload of the Executive Secretary's Office.

## CHILDREN AND YOUTH PROGRAMS AND SERVICES

The 1979-80 Governor's Budget included an informational display on programs that provide services to California's disadvantaged children and youth. That display was based upon information provided in the Auditor General's Report 816.2 dated October 3, 1978; and it included a listing of the majority of available programs, the most prevalent types of services offered, and the State entity primarily involved in program administration.

With over 160 individual programs providing a range of 29 types of services, it is difficult to include a complete listing. Therefore, the following display is limited to those programs providing one or more of the major eight categories of service: education, child care, nutrition, physical and/or mental health care, vocational training, delinquency prevention, drug and alcohol abuse/prevention, and recreation. The display also indicates if additional "other" services are provided by these programs. An asterisk (\*) indicates that the particular service is provided. A double asterisk (\*\*) indicates that, of the service(s) provided, this particular service is the first priority of the individual program. When a double asterisk appears in the "Other Services" column, the first-priority service is listed in the footnotes at the end of the chart.

To date, there is no central data collection system that is operational which could be relied upon to provide detailed expenditure or funding source information for each of these particular programs. In this budget display an attempt has been made to identify estimated program expenditures through a cooperative effort with each department. Data for three fiscal years is presented in this display, and represents the best estimate available at this time. Total program expenditures are estimated to be: 1978-79 \$9.06 billion; 1979-80 \$10.87 billion; 1980-81 \$11.97 billion.

By July 1, 1980, a Master Plan for Children and Youth Programs in California will be developed by the Office of Statewide Health Planning and Development in conjunction with the Health and Welfare Agency. This Plan is mandated by SB 363 (Chapter 1252, Statutes of 1977) which states that the Plan shall include a description of services and programs provided, potential public and private funding sources, a proposal for establishing and constituting an Advisory Council on Children and Youth, and a study of the feasibility of establishing a State Department of Services to Children and Youth. The implementation of this Master Plan will provide for better coordination of services and overall program improvement. This budget display indicates that already several consolidations and/or eliminations of programs have occurred since last year. In the future, improved program structure and data regarding services and funding will be more readily available.

## DEPARTMENT OF HEALTH SERVICES

The Department of Health Services is charged with the responsibility for improving and sustaining the quality and quantity of services that affect the health of California citizens. The goals of the Department are to:

1. Promote an environment that will contribute to human health and well-being.
2. Assure the availability of equal access to comprehensive health services, including primary and long-term care, for all Californians, utilizing both public and private resources.
3. Establish and maintain standards and regulations that assure high quality services and programs.
4. Establish ongoing discussion and coordination with the agencies providing and financing health-related services (state and local, public and private) along with medical schools, hospitals, private practitioners and other individuals and agencies providing and advocating for health care services.
5. Emphasize prevention-oriented health care programs.
6. Promote the development of knowledge concerning the causes and cures of illness and the means of delivering health services to the public.
7. Assure economic utilization of public funds to serve those persons with the greatest health care needs.

Currently, this mission is carried out through seven programs within two major groupings, Preventive Health Services and Medical Care Services. The individual programs are: Public and Environmental Health Services, Community Health Services, Licensing and Certification, Rural Health, Medical Care Services, Audits & Investigations, and Administration.

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81

### SIGNIFICANT PROGRAM CHANGES

In August 1979, the United States Ninth Circuit Court of Appeals, in response to *CHA vs. Obledo*, reversed a trial court decision and held that Federal law (PL 92-603) permitted the State to develop reasonable cost limits on inpatient hospital care. In the current year, seven positions were administratively established to develop and implement a hospital cost containment program consistent with the Court of Appeals decision. The Budget proposes continuation of these positions. The 1980-81 Governor's Budget does not yet reflect reduced inpatient hospital expenditures which are the expected result of a reasonable cost containment program. Program progress will continue to be reviewed and 1980-81 anticipated savings will be reflected in the May Revision of the Governor's Budget.

Conversion to the new fiscal intermediary, Computer Science Corporation, continued as scheduled during the current year. CSC is now paying pharmaceutical, long-term care and inpatient and outpatient hospital claims. Physician and other professional claims will be paid by CSC effective March 1, 1980. The Budget proposes six new positions for the Fiscal Intermediary Management Branch to ensure adequate monitoring of the provider payment process. Total staffing proposed is ninety-six positions, including fifteen limited-term positions to continue development and implementation of the Medi-Cal Eligibility Data System (MEDS) and seven limited-term positions to complete the competitive bidding process to procure a Medi-Cal dental fiscal intermediary. Department support and county administration savings resulting from MEDS implementation are not yet reflected in the 1980-81 Budget. Implementation progress will be reviewed in the spring and anticipated savings will be reflected in the May Revision of the Governor's Budget.

The Budget proposes transfer of thirty positions from the Department of Developmental Services to the Department of Health Services' Field Services Section. The positions will remain at the State hospitals and continue to perform utilization review activities. The proposed organizational placement will enable continued partial Federal funding of these positions and preclude potential conflict of interest in the utilization review decision making process.

It is proposed that the Medi-Cal eligibility determination process in county hospital settings be included within the County Administration Cost Control Plan in 1980-81. Increased efficiency is estimated to result in savings of \$3.3 million (\$2.2 million General Fund) which are reflected in the Budget.

The 1980-81 Governor's Budget reflects the Administration's continued firm commitment to the prevention of Medi-Cal program fraud and abuse. Eighteen new investigations positions are proposed. The positions will be assigned to a new headquarters unit responsible for screening public complaints alleging fraud by Medi-Cal providers and beneficiaries. In addition to ensuring prompt response to such complaints, assignment of these responsibilities to headquarters staff will enable field staff to conduct additional investigations. Thirteen new positions are also proposed for the Surveillance and Utilization Review Branch. The positions will be assigned to four new field review teams and be responsible for investigating cases involving unnecessary or dangerous procedures which jeopardize beneficiary's health and cases involving large-scale abuses involving sizable amounts of Medi-Cal funds. Positions were also added to the Department of Justice to strengthen the State's program.

The 1980 federal fiscal year budget reduces the level of federal funding for public health incentive grants (314(d)). The Department proposes to direct California's total share of federal 314(d) funds to local public health agencies with an offsetting reduction of General Fund subvention to such local agencies. Also, redirected from the General Fund subvention program are sufficient funds to support five locally-oriented public health projects in the areas of: technical public health assistance to Contract Counties; training for local health department laboratories; laboratory services for Contract Counties; preventive health services for the aged; and health risk reduction.

The budget contains \$2.4 million to provide for the anticipated eight percent increase in caseload for the California Children's Services Program in the 1980-81 fiscal year.

The budget contains \$141.6 million (\$76.6 million General Fund) for a 9 percent Medi-Cal provider rate increase and \$11.5 million (\$7.9 million General Fund) for Medi-Cal County Administration cost-of-living. In addition, other local assistance public health programs receive a 9 percent provider rate increase.

For the list of standard (lettered) footnotes see the end of the Governor's Budget.

DEPARTMENT OF HEALTH SERVICES—*Continued*

Fifty-nine additional positions are proposed in the toxic materials area to augment hazardous waste enforcement activities and conduct a search to locate abandoned chemical waste dumps with emphasis on industrial and major agricultural areas of the State.

New positions are included in the Radiologic Materials area; for environmental monitoring standards and surveillance to protect the public from uncontrolled releases of radioactivity from nuclear powerplants; implementation of radioactive materials protection standards for the physical protection of radioactive materials from seismic events, fire, theft or malevolent misuse; and the development of a comprehensive system for control of radioactive materials in transit. Also included is funding for the development of facility construction standards to simplify safe decontamination and decommissioning.

The Newborn Screening Program, which requires the testing of all newborns for specific genetic disorders, will become operational in the budget year. This program is funded by a General Fund loan in the current year, but will be a totally fee-supported program starting in the budget year.

Three separate legislative bills were enacted in the current year, all related to perinatal health care. They include Chapter 331, Statutes of 1979—Regionalized Perinatal Health Care, Chapter 207, Statutes of 1979—Infant Medical Dispatch Centers Program and Chapter 1141, Statutes of 1979—Perinatal Access Systems Program. A new perinatal health program will implement these bills and provide an integrated regionalized system for the delivery of perinatal health care services.

The Farmworkers' program is being expanded to include an additional \$1 million dollars for local assistance and four new positions. These funds will be utilized to increase access to health services for farmworkers.

The Office of County Health Services, with an additional 19 positions, will administer the County Health Services portion of local government relief authorized by Chapter 282, Statutes of 1979 (AB 8). This legislation provides \$267 million in 1979–80 and \$306 million in 1980–81 in support of county health services that would have been impacted by Proposition 13 and the resulting reduction in property tax revenue.

A total of 21.5 positions were abolished in the current year as a result of Section 20 of the Budget Act of 1979. As a result of Section 27.2 of the Budget Act, \$1.4 million was reduced from the current year appropriation.

## Preventive Health Services

The general purposes of Preventive Health Services are to: (1) provide a State focal point for public health and prevention activities; (2) coordinate the activities of four divisions—Public and Environmental Health, Community Health Services, Licensing and Certification, and Rural Health; and (3) provide for coordination and strengthening of local health departments through the Office of Local Public Health Assistance.

## I. PUBLIC AND ENVIRONMENTAL HEALTH PROGRAM

## Program Objectives and Description

The general purposes of the Public and Environmental Health Services Program are to: (1) identify unmet public health needs, (2) control and eliminate environmental hazards to health, (3) prevent and control infectious and chronic disease, (4) develop and carry out preventive and curative measures to eliminate or modify the impact of disease and illness, and (5) develop and maintain a statewide system of vital statistics registration and to compile appropriate vital statistics.

## a. Environmental Health

The health of California's citizens is critically dependent on many factors over which the individual has little control, but over which this program has a major regulatory, supportive, or advisory influence. The factors relate to the quality and safety of work, home, and recreational environments, and to the food, water, and other products consumed or contacted. The Environmental Health element's objectives are to: (1) promote and maintain a physical environment which contributes positively to health, and (2) assure protection of the consumer public against unsafe, unwholesome, and ineffective or misrepresented foods, drugs, domestic water supplies, and other products.

## a.1. Food and Drug

The Food and Drug Section implements, directs, and coordinates detection and control activities to protect consumers against adulterated, misbranded, or falsely advertised foods, drugs, and medical devices, hazardous household products, and cosmetics. This Section has available to it a number of legal and administrative remedies in order to gain compliance. Violations are generally adjudicated by courts or according to administrative procedures under California law; however, in certain cases the enforcement program is augmented by education activities directed at consumers and industry. The Food and Drug Laboratory, Southern California public health laboratory, and Microbial Disease Laboratory provide support by analyzing food and drug samples. This element has five components: food control, drugs and medical devices, cannery control, health fraud control, and product safety control.

Food Control—This component enforces the provisions of the California Health and Safety Code pertaining to the manufacture, storage, distribution, sale, labeling, and advertising of foods in California. This component is responsible for the regulatory control of 12,000 manufacturers and 50,000 retailers. This objective is met by: monitoring industry, conducting industry surveys for new technology, industry surveillance, industry education, chemical and microbiological analysis of raw and finished products, and by review and investigation of consumer complaints. Processors of bottled water, olive oil, and shellfish, and frozen food locker plants, and cold storage plants are required to be licensed by this component.

Drugs, Cosmetics and Product Safety Control—This component maintains a program to assure that intrastate manufacturers produce high quality safe and effective drugs for the practitioner and consumer. This is accomplished through annual licensing and inspection to determine whether drug manufacturers are following good manufacturing practices and have an adequate quality assurance program to eliminate human, technological, and mechanical errors. In addition, consumer complaints are investigated and marketed products are routinely monitored via a sampling, testing and label review program. All new drugs and devices are subjected to a preclearance review procedure to eliminate the dangers of marketing untested, unproven drugs and devices. The program works cooperatively with and complements the activities of the Federal Food and Drug Administration.

## DEPARTMENT OF HEALTH SERVICES—Continued

Medical Device Control—This component maintains a program to assure that manufacturers produce high quality safe and effective medical devices for the practitioner and consumer. This is accomplished through annual licensing and inspection of firms to determine whether device manufacturers are following good manufacturing practices and have an adequate quality assurance program to eliminate human, technological, and mechanical errors. In addition, consumer complaints are investigated and medical devices are routinely monitored via a sampling, testing and label review program. All new devices are subjected to a preclearance review procedure to eliminate the dangers of marketing untested, unproven devices. The program works cooperatively with and complements the activities of the Federal Food and Drug Administration.

Cannery Control—This component prevents outbreaks of botulism in commercially canned foods. The program's rigid control is maintained by licensing and daily inspecting the operations and products of 125 canneries with an annual production of 100 million cases of low-acid foods. The program is responsible for the development of official thermal processes, examination with release or restraint of daily production, sampling, supervision of reconditioning and destruction operations of questionable raw materials and finished products, and the review of labels.

Health Fraud Control—Although no one really knows how much is spent on worthless, useless, and dangerous products, it is estimated that Californians spend over \$200 million annually on drugs, devices, foods, and cosmetics that are falsely represented to cure conditions including cancer and arthritis, or to enhance the buyer's appearance or health. Investigation and regulation, as well as health education, to curb this growing health problem is the role of the health fraud control component.

## a.2. Sanitary Engineering

The sanitary engineering element provides essential safeguards for domestic water supplies, waste disposal operations, shellfish production, and harvesting operations and recreation waters sanitation by a continuing program of standard setting, surveillance, evaluation, education, and enforcement.

Domestic Water Supply—Domestic water utilities are required to have a permit from the State Department of Health Services. This component issues certificates to qualified water treatment plant operators. Preventive, corrective, and enforcement actions are taken based on (a) annual surveillance of all systems, (b) comprehensive reviews on a decennial basis, (c) prompt investigation of waterborne illness, (d) failure to meet bacteriological standards, and (e) substantial consumer complaints about water quality.

Domestic Sewage Disposal and Safe Use of Reclaimed Sewage—This component evaluates sewage treatment and disposal and sewage reclamation and reuse projects to assess health protection and takes preventive, corrective and enforcement actions as necessary. The component makes recommendations to the State Water Resources Control Board and the nine Regional Water Quality Control Boards to ensure health considerations are reflected in those water pollution control programs.

Recreational Water Supply—This component develops guidelines, standards, and regulations and provides technical assistance for use by local health departments and industry.

Shellfish Sanitation—This component conducts surveillance, sampling, and testing in shellfish growing areas and takes enforcement actions to assure protection against shellfish toxin. The component issues certificates for growing areas and processing plants.

## a.3. Radiologic Health

The objectives of the Radiologic Health element are to protect the people of California from the dangers of ionizing radiation and to reduce unnecessary radiation exposure to workers and the public from either the use of radioactive materials, including contamination of the environment, or the use of radiation machines.

Radioactive Materials—This component establishes and enforces standards for the use of radioactive materials for any purpose and issues licenses to persons/organizations whose training, facilities, and operating procedures are safe and effective; conducts inspections and surveys of licensees to assure that appropriate protection standards are followed; investigates accidents and incidents involving the use of radioactive materials; identifies, evaluates, and monitors levels of environmental radiation throughout the State from sources such as nuclear power plants; and evaluates and approves contamination surveillance programs of nuclear power plants and other major installations. The component is assisted in its work by the Sanitation and Radiation Laboratory, the Department of Industrial Relations, and through the voluntary cooperation of other public agencies. This component works cooperatively with the Nuclear Regulatory Commission, and is delegated responsibility for licensing and enforcement of standards on radioactive materials users in the State (with a few exceptions, such as nuclear power).

*Six new positions are proposed in the Radiologic Materials area; three positions involved in environmental monitoring standards and surveillance to protect the public from uncontrolled releases of radioactivity from nuclear powerplants; two positions for the implementation of radioactive materials protection standards for the physical protection of radioactive materials from seismic events, fire, theft or malevolent misuse; and one position for the development of a comprehensive system for control of radioactive materials in transit. Also included is funding for the development of facility construction standards to simplify safe decontamination and decommissioning.*

X-Radiation—This component conducts inspections to maintain and enforce standards that assure radiation-producing machines are safely used and maintained in good operating condition; examines workers using radiation machines for medical purposes to assure that standards of competence are met; and establishes and enforces standards for schools and hospitals providing medical X-ray training. The component is assisted in its work by the Department of Industrial Relations and local contract agencies. The Department of Health Services will propose legislation to increase inspection fees to provide additional staff to shorten X-ray machine inspection intervals.

## a.4. Vector Biology and Control

This element, with support from laboratory services, conducts surveillance and coordinates a statewide program to prevent or suppress those vectors, hosts and disease-reservoir animals of greatest public concern. Under guidance of the element, epidemiological, engineering, biological and chemical methods and materials are utilized by governmental agencies and the private sector in disease and vector prevention and control.

1. To assure local agency effectiveness, technical consultation, training, and assistance are provided in developing and conducting program for vector prevention and control, and the use of physical and chemical controls is overseen through cooperative agreement, including certification of pesticide applicators.

2. Surveillance of vectors and vector-borne diseases is accomplished through analyzing populations of major vector species and monitoring environmental conditions responsible for their production.

3. Emergency vector control, conducted to prevent an imminent hazard to the public, includes identifying the area of risk, recommending appropriate action, training personnel involved, overseeing the project, and evaluating control effectiveness.

4. Long range vector prevention, associated with new agricultural, residential, recreational, solid waste management or industrial developments, is accomplished by reviewing the appropriate planning documents and making recommendations for eliminating environmental conditions which would otherwise create situations conducive to vector production.

## a.5. Local Environmental Health Programs

The objective of the local environmental health program element is to assure that local health departments and state institutions achieve and maintain an environment which is free of disease and hazards, is conducive to optimum health and well-being, and is accomplished at a minimum cost to the taxpayer.

This element has four components, local environmental health program development, environmental health surveillance of state institutions, small water system surveillance, and technical environmental health service.

# DEPARTMENT OF HEALTH SERVICES—Continued

## 1. Local Program Development

The element works with 46 local full-time health agencies to direct their environmental health programs toward more effective and efficient operations consistent with state policy and standards. This is accomplished through the conduct of administrative reviews, workload analyses, program evaluations, organizational reviews, delegation and monitoring of programs, and the implementation of statewide evaluation systems. The element administers a sanitarian registration program which assures the public that persons registered meet minimum qualifications of education, training, and experience necessary to address environmental health issues. Activities include working with a statutory advisory committee, approval of college and university curricula, approval of training programs, continuing education, and examination.

## 2. Environmental Health Surveillance of State Institutions

The element provides routine environmental health surveillance of state institutions and training of institution staff to assure that a safe and healthy environment is maintained for inmates, wards, patients, and employees in these institutions.

## 3. Small Water Systems Surveillance

The element, through federal grant funds, provides a manpower pool of sanitarians to augment and assist the small water systems program of local health jurisdictions and contract counties. Program activities include inspection, bringing into compliance, and maintaining an inventory of 8,887 small water systems in the state with the Safe Water Act to protect the public by preventing waterborne disease outbreaks.

## 4. Technical Environmental Health Services

**Housing**—The program provides leadership and assistance to local health departments in the development, planning and implementation of local housing enforcement programs, and coordinates the Department's interest in healthful housing. Program staff provide technical environmental health input to the State Department of Housing and Community Development and model code groups in the development of statewide housing programs and regulations.

**Summer Food Service Program for Children**—The element provides the essential technical environmental health assistance, inspection training, and consultation to the State Department of Education so as to ensure that the food served at 4,000 feeding sites participating in the Summer Food Service Program for Children is pure, safe, and wholesome.

**Interstate Carrier Surveillance**—The element provides a comprehensive inspection program of all interstate carriers and vessel watering points serviced within California as to the handling of food, water, and wastes so as to protect the health and well-being of residents, travelers, and employees using the transit facilities.

## a.6. Hazardous Materials Management

The mission of the Hazardous Materials Management Section is to safeguard public health and protect livestock, wildlife and the environment by regulating the production, transportation, disposal, and reclamation of hazardous wastes. The program conducted by the section provides:

- inspection and permitting of hazardous waste facilities
- surveillance and registration of hazardous waste haulers
- a manifest system to track the movement of wastes
- standards directed at generators, transporters, and facility operators
- penalties for violations
- technical assistance
- resource recovery assistance
- facility needs assessment and planning

In addition to the regulation of hazardous wastes, the program provides the vehicle by which the Department carries out responsibilities for the control of hazardous materials, such as asbestos, in the environment.

The statutory authority for the program and specific activities is provided in Section 25100–25204 of the California Health and Safety Code.

*Thirty-five new permanent positions and ten limited term positions are proposed in the toxic materials area; twenty-two positions involved in enforcement activities to prevent and eliminate hazardous waste handling and disposal hazards, including two positions for laboratory analysis; and twenty-three positions (ten limited term), to conduct a search to locate abandoned chemical waste dumps with emphasis on industrial and major agricultural areas of the State. The number and location of abandoned sites is currently unknown, yet recent findings in California and other states suggest there are substantial dangers to public health and the environment.*

## b. Preventive Medical Services

Although over 95 percent of our health care resources are directed towards acute care services, deficiencies in the curative care system only account for ten percent of overall mortality. Preventive health care, on the other hand, receives only about five percent of the health care resources. Yet it is known that:

- 50% of all heart attacks can be prevented
- 30% of all strokes can be prevented
- 60% of all cancers may be preventable

When the leading causes of mortality in the State are examined, it shows that 50 percent of these cases result from behavioral patterns, 20 percent are due to the environmental factors, 20 percent are due to biological or genetic factors and the remaining 10 percent due to failures in curative medicine.

The prevention of disease, relying less on highly technical personnel and equipment, is the most cost-effective and compassionate approach to health care.

Special high risk groups in the population, such as certain minority groups, and selected disease entities have been singled out for intensive preventive activities. Selected disease entities include heart disease, stroke, cancer, kidney disease, arthritis, dental disease, and other afflictions that cause disability and death.

### b.1. Chronic Disease Control

This element provides technical assistance in planning, developing, and operating local adult health programs; participates in departmental evaluation of local proposals for the use of subvention funds and project monies; ensures that the quality of care provided by health services meets departmental standards and monitors subvention funds and contracts; and promotes the better utilization of medical, paramedical and allied manpower through training, demonstration, and experimentation. In addition, the work of the element includes specific programs in cancer control, cardiovascular disease, and kidney diseases control areas, as well as a program of public health nursing services to the aged through financial and technical assistance to programs in local county health departments.

The kidney disease control program has historically funded seven dialysis renal failure centers. These dialysis regional centers have been required to perform research and development, training of medical and nursing staff in other dialysis facilities, and consultant services to other dialysis facilities. The treatment methodology of the three pediatric centers has emphasized predialysis and post-transplant rehabilitation.

### b.2. Dental Health

The dental health staff evaluates the State's dental health needs; promotes the development of prevention programs in schools and industry and evaluates their cost effectiveness; provides public and professional education directed toward prevention of dental disease and the proper utilization of existing resources; provides direction and guidance for prevention programs in other state departments and agencies; develops and promotes the establishment of new or improved programs of prevention aimed at reducing the cost of the care; administers the State's topical fluoride programs for school children; and provides consultation to other programs and agencies on dental subjects.

*This element includes four new positions to implement a new local assistance program for Dental Disease Prevention pursuant to Chapter 1134, Statutes of 1979. Local assistance expenditures are estimated to be \$1.8 million in 1980–81.*

## DEPARTMENT OF HEALTH SERVICES—Continued

## b.3. Disaster Medical Services

This element is responsible for the medical and health aspects of the State Emergency Plan prepared in conjunction with the State Office of Emergency Services for use in the event of widespread disasters such as earthquakes, nuclear power plant incidents and air pollution emergencies.

This includes developing standards for classifying emergency medical capabilities in hospitals and for developing a central communications system to coordinate and integrate disaster services.

## b.4. Infectious Disease

The objective of the Infectious Disease element is to identify and define the occurrence of infectious diseases in California and to direct and coordinate efforts to prevent or minimize their harmful effects.

This element is responsible for surveillance, investigation, and control of over 75 communicable diseases. Reporting procedures or control measures are stipulated by law for 50 of these diseases. Disease control depends greatly on laboratory support provided by the State's Microbial Disease and Viral and Rickettsial Disease Laboratories and by local health department laboratories.

Infectious disease reports throughout the State are compiled, analyzed, and disseminated to physicians and local health departments. Reports describe epidemiologic trends and aid in developing and directing communicable disease control programs. Special surveillance systems are maintained for diseases such as influenza, malaria, and mosquito-borne viral encephalitis. State epidemiologists are on call to assist local health departments in the investigation and control of infectious disease outbreaks.

Surveillance is maintained to identify illnesses preventable by immunization. A program to assess immunization status among California school entrants was started in September 1974. Local health departments are provided information on immunization levels by school district so that programs to raise immunization levels can be undertaken.

Efforts of this element are also directed toward prevention and reduction of venereal disease. Programs are provided by direct assistance (state staff) and financial assistance to local health agencies. Currently, activities are mainly directed toward prevention and reduction of syphilis and gonorrhea. In addition to detection and treatment of existing cases, training and educational programs are conducted. Training programs are provided to professionals to assist in technical skills and provide ongoing assistance when needed. Also, educational activities are offered to increase general public knowledge about transmission, symptoms, and treatment of venereal diseases. Programs for schools, community, and professional groups educate the public about cases, treatment, and prevention of venereal diseases.

This element assists local health departments in developing and improving their tuberculosis control efforts through consultation and periodic program review. It administers projects designed to ensure the early diagnosis, uninterrupted treatment, and appropriate follow-up of persons with tuberculosis.

This element is also responsible for surveillance, investigation, and control efforts related to human illness acquired from animals (e.g. brucellosis, leptospirosis, psittacosis, rabies and salmonellosis). Activities include administration of animal rabies, wild animal importation, pet bird banding, and pet turtle importation control programs.

## b.5. Resource for Cancer Epidemiology

Cancer Epidemiology carries out studies directed at determining the relationship between the various types of cancer and environmental and cultural influences on the prevalence of that disease. It offers the opportunity for the collection of collateral data from laboratory studies of a viral, genetic, or psychologic nature in the search for clues to the causes of cancer and for relating these clues to the population groups involved.

The objective of cancer epidemiology is to identify points at which cancer control measures may be effectively applied. It includes the California Tumor Registry which collects information concerning cancer in California. It maintains a cancer incidence reporting system based on the five Bay Area counties and measures whether or not the incidence of cancer is increasing or decreasing.

The majority of this element's work is carried out through a grant from the National Cancer Institute as a part of the national effort for cancer control.

## b.6. Occupational Health Research and Development

The occupational health research and development element emphasizes the development and dissemination of new information on the prevalence, cause, and prevention of occupational disease and disability. It monitors, collects, interprets and disseminates statistical data on the occurrence of occupational disease. It develops special investigation protocols and seeks research funds from the National Institute of Occupational Safety & Health (NIOSH) and other sources to carry out the investigations. It advises and informs the California Occupational Safety & Health Administration (Cal/OSHA) enforcement and consultation programs on new information, need for new standards, and other priority subjects for emphasis or attention.

## b.7. Epidemiology Studies Section

This element defines relationships between environmental factors and human health, and recommends strategies to deal with the problems defined. Current efforts are directed toward community noise control, pesticides usage, health effects of air pollution, including recommending ambient air standards, health effects of lead exposure in children, development of a Hazard Alert System, and general environmental epidemiology. This element operates a repository system to collect, evaluate, process, and disseminate information concerning toxic substances and harmful physical agents that are used or may be used in places of employment.

*Fourteen new positions are proposed to establish a response team of epidemiologists and other health experts in the Toxic Chemical Environmental Epidemiology Program for the purposes of investigating chemical contamination in the environment and the effects of these chemicals on human health.*

## c. Laboratory Services

The objectives of this element are to provide laboratory support and services for surveillance, epidemiological investigations, prevention and control of infectious diseases; assuring the quality of biomedical laboratory services in public and private laboratories throughout the state monitoring air pollution; protecting employees against health hazards of their work environments; assuring the safety and quality of foods, medicinal drugs, and other consumer products; controlling water and waste water quality; and averting health hazards from radioactive materials. This is accomplished through the:

- Viral and Rickettsial Disease Laboratory, which deals with viral agents of disease (e.g., rabies, encephalitis, influenza, polio, measles, herpes simplex, virus identification, testing of vaccines and epidemiological investigations);
- Hazardous Materials Laboratory, which provides laboratory analysis of various toxic and hazardous chemicals in support of the department's enforcement program for hazardous materials.
- Microbial Diseases Laboratory, which deals with the identification, surveillance, and control of bacterial, fungal, and parasitic agents of human disease; *The budget includes funding for contractual services to place microbiologists into geographically adjacent county public health laboratories to increase laboratory services for contract counties. In addition, one and a half new positions are proposed to provide technical training to local public health laboratories.*
- Clinical Chemistry Laboratory, relating to genetic screening and forensic alcohol testing; *Two positions are included to fully staff the laboratory portion of the Sickle Cell Program. 6.5 laboratory positions are added for implementation of the Newborn Screening program.*
- Laboratory Field Services, which administers and coordinates regulatory and consultive activities that relate to all biomedical laboratories in the State;

## DEPARTMENT OF HEALTH SERVICES—Continued

- Air and Industrial Hygiene Laboratory, which provides laboratory support and services necessary for the control of community pollution;
- Food and Drug Laboratory, which analyzes samples of foods, drugs, cosmetics and household chemicals;
- Sanitation and Radiation Laboratory, which regulates other water testing laboratories and analysis of environmental samples for radioactive content;
- The Department's Air and Industrial Hygiene Laboratory in Northern California and the Southern California Laboratory assist the Department of Industrial Relations by receiving and analyzing samples of environmental media collected in workplaces; reporting the results of the analyses to identify hazardous concentrations of toxic materials; providing scientific backup to field staff in determining sampling methods and procedures; developing and improving analytical techniques and methods, and otherwise furnishing technical expertise with respect to chemical and biological sampling and analysis.

## d. Vital Statistics

This element functions as the Office of the State Registrar of Vital Statistics and is responsible for maintaining the central files for births, deaths, marriages, divorces, and other records pertaining to California residents.

## e. Local Public Health Assistance

This element provides general consultation and technical assistance to local health departments and agencies in order to assure high quality services and the most effective and beneficial use of state and federal public health funds. Specific responsibilities include ensuring uniform application of health protection measures and procedures statewide and that local public health programs meet state and federal laws and regulations. This element also coordinates with other elements in the Public and Environmental Health Program to assure comprehensive technical assistance and coordinates program relationships with the California Conference of Local Health Officers and various other local governmental groups. *The budget includes four preventive medicine residency positions to train physicians for future assignments in State and local health agencies.*

## II. COMMUNITY HEALTH SERVICES PROGRAM

## Program Objectives and Description

The Community Health Services Program promotes and integrates personal health services programs at the community level, with a focus on services to individuals or populations in need of special programs and on medically underserved populations and geographic areas. The Program also funds, monitors and evaluates the operation of community based personal health services delivery projects. *Two and one-half limited term positions are established to implement a one-time \$1.3 million grant program to primary care clinics mandated by Chapter 1186, Statutes of 1979.*

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Totals, Community Health Services Program ..	184.5	216.4	233	\$76,583,127	\$90,681,843	\$98,056,178
General Fund .....	—	—	—	55,598,094	66,325,938	72,930,917
Federal funds .....	—	—	—	19,449,882	20,537,274	21,041,850
Family Repayments .....	—	—	—	662,917	965,000	1,099,729

b. Maternal and Child Health .....	81.6	99.6	105.1	15,689,947	19,596,395	19,653,333
c. California Children's Services .....	71.8	80.9	83.2	35,994,295	40,184,252	47,296,810
d. Administration .....	(36.9)	(41.3)	(44)	(1,066,197)	(1,393,786)	(2,852,888)

## a. Family Planning

The goal of the family planning element is to make available services relating to contraception, sterilization, infertility, as well as information and education services so as to provide a means by which women and men may determine the number, timing, and spacing of their children. Additional goals of the program are to reduce the incidence of maternal and infant deaths and to improve maternal and infant health by promoting the health and education of potential parents through providing a combination of information, counseling, and preventive services.

Publicly supported family planning services are provided to persons who voluntarily request such services and who meet eligibility requirements. Services provided include information and education, counseling, physical examinations and related laboratory procedures, and the dispensing of birth control methods. In addition, sterilization services are available, as is diagnosis and treatment of infertility. All patients must be provided full information on all methods of birth control, including complications and side effects, so as to make an informed and voluntary choice of method.

Family planning services are provided by more than 120 agencies including local health departments and private nonprofit agencies contracting with the Department of Health Services. Each of these contract agencies must provide services in accordance with standards developed by the Office of Family Planning. These standards specify the content and quality of available services and facility and staffing requirements.

*The budget contains 6.5 positions in recognition of increased data reporting workload and information and education services.*

## b. Maternal and Child Health

The objectives of the maternal and child health element are to reduce and prevent maternal, infant, and childhood morbidity and deaths; to reduce the incidence of heritable diseases and to limit disability resulting from these diseases; to provide maximal nutrition for mothers, infants, and children; and to reduce the disabilities resulting from physical defects and handicaps in persons under the age of 21 years.

A special program was initiated in the 1978-79 fiscal year because statistical information indicated that mothers and infants in Oakland had higher morbidity and mortality than most other areas of the State. Funds have been allocated to public and private agencies to increase services for family planning, adequate spacing of children, early prenatal care, increased nutrition and follow-up of infants. The project will continue only until the end of the budget year.

## b.1. Genetic Disease Prevention

There are two units in the genetic disease prevention element. One conducts diagnostic screening for specified genetic diseases and appropriate treatment. This unit's responsibilities also include surveillance through required reporting. The two main programs are amniocentesis (prenatal diagnosis) and the newborn screening program which presently screens for Phenylketonuria (PKU) and in budget year will also screen for hypothyroidism and galactosemia. The program also requires reporting of Rh (hemolytic) disease of the newborn.

The other unit provides counseling and education for families which may be at risk of having a child with a genetic problem. This unit administers the statewide screening programs for Sickle Cell and Tay-Sachs diseases and a pilot project to determine the effectiveness of paramedical genetic counselors. This unit also is developing educational materials to be given to persons applying for marriage licenses as recently mandated by law.

*The budget contains 13.5 positions (7 in Genetic Disease Section and 6.5 in the Laboratory Branch) to implement the Newborn Screening Program. In addition, 5.2 positions (3.2 in Genetic Disease Section and 2 in the Laboratory Branch) are added for permanent establishment of the Sickle Cell Program.*

DEPARTMENT OF HEALTH SERVICES—*Continued***b.2. Maternal and Infant Health**

The goal of this element is the improvement of pregnancy outcome and the quality of infant care. A multidisciplinary professional perinatal staff is involved in defining perinatal needs, standard setting, providing consultation with perinatal care providers, regionalizing comprehensive perinatal care including the development of high risk perinatal centers and alternative birthing centers, administration of two infant medical dispatch centers for aiding the transport of high risk mothers and infants and a statewide program for sudden infant death syndrome.

*Nine positions are added to continue and permanently establish the Regionalized Perinatal Health Program mandated by Chapter 331, Statutes of 1979.*

*An additional 3 positions are added to implement the Perinatal Access Systems Program mandated by Chapter 207, Statutes of 1979, with \$742,528 in local assistance.*

*Chapter 207, Statutes of 1979, authorizes the department to permanently establish the Infant Dispatch Centers. The budget proposes 2.7 positions to staff this activity.*

*Two positions are added to the Obstetrical Services Pilot Project to enhance nutritional and health education services.*

**b.3. Maternal and Child Health Regional Operations Section**

This program element is concerned with liaison and consultation to county health departments and local health agencies to ensure that the Maternal and Child Health (MCH) program goals are implemented at the local level.

It administers the HEW Title V grant to California which now amounts to almost \$11 million yearly. Project proposals are received, evaluated and funded each year to meet established State goals.

**b.4. Women, Infant and Children (WIC) Supplemental Food Program**

The Special Supplemental Food Program for Women, Infants, and Children is a federally funded nutrition program for low income populations determined to be at risk of developing nutritional deficiencies. Vouchers redeemable for specified nutritious foods are distributed and consumer education is provided as complements to the usual prenatal and pediatric health care services. Contracts are written with local agencies that provide services including physical assessment of pregnant women and children under the age of five years, and/or distribution of food vouchers.

**c. California Children Services**

The California Children Services (CCS) element is a joint state-county effort to assist children with severe physically handicapped conditions by providing high quality comprehensive medical and related services. These services are provided to correct, ameliorate, or eliminate handicaps, and they are made available to children whose parents are not able to pay for all or part of the costs of care. Families which are able to pay are required to share in the cost of care.

Cooperative arrangements have been made to assure full CCS care to physically handicapped children who are enrolled in the Medi-Cal program.

Of the 340,000 children born in California each year, an estimated 19,000 have birth defects which could endanger their lives or cause them permanent disability. In addition to these, CCS also serves several hundred children who are severely burned, paralyzed, or suffer other severe injuries, poisoning, or are disabled by infectious diseases. Medical specialists and qualified treatment centers can correct or modify many of these disabilities, but the cost of such care is greater than some families can afford. The financial burden is particularly heavy for those families with modest resources, but who do not qualify for Medi-Cal.

*An additional \$2,443,495 in General Fund is proposed to fund the anticipated eight percent increase in caseload.*

**c.1. Diagnosis**

Diagnostic services are provided for children believed to have a severe chronic disease or physical handicap. Diagnostic services are available without cost to the family.

**c.2. Treatment**

Treatment services are authorized on an individual basis, using specialists knowledgeable in the care of particular conditions. Supervision of the care and periodic follow-up are an integral part of the child's individual care plan. Treatment services are only provided for those families found to be financially eligible.

**c.3. Therapy**

Therapy services are provided in medical therapy units of special schools and classrooms in conjunction with the State Department of Education. Many children whose handicaps prevent regular school attendance can receive education in special schools if these physical and occupational therapy services are available to them.

Output	1978-79	1979-80	1980-81
New Referrals.....	35,800	38,800	39,500
Number of Children served:.....	73,200	79,500	86,900
CCS Non-Medi-Cal .....	52,200	54,500	58,900
CCS Medi-Cal.....	21,000	25,000	28,000
Condition corrected or no further treatment needed.....	6,100	9,500	10,000
Number of consultation visits to counties and providers .....	450	400	510
Therapy in schools—children served .....	13,600	14,000	14,500

## c.4. Genetically Handicapped Persons

The Genetically Handicapped Persons element established in January, 1977 provides care to Californians with hemophilia, cystic fibrosis, or sickle cell disease. The program was expanded in 1979 to include Huntington. Since timely expert care is essential for preventing death or permanent disability, anyone with one of these conditions is eligible for care management by the program, and, if it is needed, help in paying for the care.

Program services include: preventive care, outpatient and inpatient treatment, surgery, blood and blood derivatives, purchase of equipment, and physical and other rehabilitative therapy. Care is provided through centers that specialize in treating the condition. Because each of these conditions can be catastrophically costly, assistance with medical costs makes it possible for many to remain in the work force and support themselves and their families.

The cost of care is provided through a variety of sources, including General Fund appropriations, Medi-Cal and other federally funded programs, private health insurance, and client repayments. *For fiscal year 1980-81, 2 positions are proposed to implement Chapter 1155, Statutes of 1979, which adds the coverage of Huntington's Disease, Joseph's Disease and Friedreich's Ataxia to the Genetically Handicapped Person's Program.*

## III. LICENSING AND CERTIFICATION PROGRAM

## Program Objectives and Description

The Licensing and Certification Program regulates the licensed public and private health facilities throughout the State. These facilities include approximately 2,500 acute, general, and psychiatric hospitals, clinics, intermediate care facilities, skilled nursing facilities, home health agencies, referral agencies and adult day care centers. To accomplish this activity, the Program develops, implements, and enforces standards to insure quality health care for patients and residents in health facilities and certifies long-term care facilities that desire to participate in the Title XVIII (Medicare) and Title XIX (Medi-Cal) programs. The Licensing and Certification program also maintains a physical inventory of health facilities; evaluates and reports on services and condition of facilities; cites deficiencies; develops plans for correction; issues, denies, or revokes licenses; and controls performance of other public agencies and agents under contract for these activities.

The Program has decentralized its field offices into nine district and subdistrict offices throughout the state, with headquarters in Sacramento. Certain services are delegated to the State Fire Marshal and Los Angeles County Health Services Agency through contractual agreements.

Health care licensing personnel evaluate facilities and services for compliance with state and federal regulations. The evaluations are completed through unannounced visits. The licensing evaluators tour facilities, talk with patients, residents, and facility personnel, and check records to assure medications and services are given according to directions. Any deficiencies are noted and the facility operator must make specific commitments for correction within specified deadlines. Facilities with serious patient care deficiencies may be subject to fines of up to \$5,000 and/or revocation of a license. Follow-up visits are made to assure correction. Additional unannounced and unscheduled visits are made to investigate complaints about conditions or treatment of patients or residents.

Intensive specialty training is also provided to skilled nursing facilities staff to improve the quality of patient care. Physicians, specialized nursing consultants, pharmacists, nutritionists, physical and occupational therapists, and medical record consultants provide direct consultation to the facilities, conduct workshops for groups of health workers, and prepare manuals and pamphlets to educate and train nursing facility staffs in better methods of patient care. These consultants also assist licensing personnel in surveying when expert opinion is needed to complete the survey or to take administrative or legal action against the facility.

*Chapter 1234, Statutes of 1978 establishes a health facility license category of psychiatric health facility. Three positions are proposed to inspect and conduct follow-up and complaint visits to these facilities.*

## IV. RURAL HEALTH PROGRAM

## Program Objectives and Description

The Rural Health Program provides public health services and ambulatory health care services to persons, primarily in rural areas, who would otherwise have little or no access to such services. The program employs public health nurses, sanitarians and various classes of primary care providers, including physicians and nurse practitioners, to provide direct services, and also contracts with local agencies to provide additional services.

Services may be broken down by statutory authority into public health services to small rural counties, and ambulatory health care services to Native American Indians (rural and urban), seasonal agricultural and migratory workers and their families and other rural underserved populations.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

c. Administration .....	(25)	(27.8)	(24.3)	(584,284)	(763,805)	(689,391)

## a. Rural Health

The Rural Health Division manages an integrated program of public health and primary health services.

## 1. Public Health Services (Contract Counties)

Sixteen (16) California counties, each with a population less than 40,000, contract with the state to provide basic public health services. These small counties have many inherent geographic, demographic, and economic barriers, as well as a scarcity of health resources, which hinder the maintenance and operation of a local health department.

Basic preventive health and disease control services are provided by state public health nurses and sanitarians who reside in the contracting counties. Professional supervision and coordination are provided by Department staff. A local health officer (part time), responsible for the day-to-day activities of the local staff and the legal health authority in each county, is appointed by the county board of supervisors. Local health services are provided in close cooperation with county boards of supervisors. Program emphasis varies among counties in accordance with local needs, facilities and interests. This element also operates the Child Health Disability Program (CHDP) and Family Planning Program in these counties.

Three and one-half positions are eliminated with equivalent funding transferred to local assistance to enable five counties to provide their own CHDP Program.

## 2. Primary Health Services (Rural Health Development Services)

Chapter 1331, Statutes of 1978, permanently established a program of health services to underserved rural areas which had been started in 1977 on a two-year pilot basis. Funds are awarded to underserved rural communities through local assistance contracts to non-profit agencies. Funds are utilized to provide a wide range of health services. These funds have resulted in the establishment of a system of primary health care centers in locations where services were previously limited or non-existent. This budget permanently establishes the Health Services Corp by adding four positions funded through a redirection from local assistance. The budget also adds one position to aid the implementation of Chapter 1332, Statutes of 1978 which mandates assistance in waiving licensing and/or regulations for primary health facilities in rural areas.

## 3. Farmworker Health Services

This budget includes four new positions and \$838,718 in local assistance to provide improved access to primary care centers for seasonal and migrant farmworkers and their dependents.

## b. Indian Health

There are about 200,000 Native American Indians in California, 30,000 of whom live in rural areas, 5,000 on reservations, and the remaining 165,000 in urban areas. While services are provided to this group through Medi-Cal and other health systems, a need still exists for Native American Indians to receive health services in a setting where the providers understand their cultural needs. The Indian Health element provides financial assistance to existing urban and rural Indian health programs for use in planning, implementing, and upgrading services to attain a comprehensive health services delivery system for Native American Indians.

In addition, the Indian Health element conducts studies of health and health services for Indians and their families, provides technical assistance to local agencies concerned with the health of Indians and their families, and coordinates with similar programs of the Federal Government, other states and voluntary agencies.

The budget includes two positions to provide additional training and technical assistance to local Indian health programs.

## DEPARTMENT OF HEALTH SERVICES—Continued

## V. MEDICAL CARE SERVICES

## Program Objectives and Description

The Medical Care Services component of the Department of Health Services is responsible for the overall administration of Medi-Cal, California's Medical Assistance Program, operated under Title 19 of the Social Security Act.

The mission of the Medi-Cal program is to promote the health of citizens of the State by making available to the low income population, publicly financed health care, equivalent of that to which the non-poor have access. The Department's goal is to insure that quality medically necessary health services are delivered on an equitable basis to the eligible persons at the lowest cost to government.

Organizationally, Medical Care Services consists of two Divisions, the Medi-Cal Division and the Medical Care Standards Division. The activities of both Divisions support the Medi-Cal program health delivery system through the functions carried out by the following organizational entities:

## MEDICAL CARE STANDARDS DIVISION

Eligibility Branch  
Benefits Branch  
Rate Development Branch  
Child Health and Disability Prevention Program Branch  
Program Information Review and Monitoring Branch

## MEDI-CAL DIVISION

Prepaid Health Plans Branch  
Medi-Cal Operations Branch  
Fiscal Intermediary Management Branch

Additionally, the Office of Alternative Health Systems, reporting directly to the Chief Deputy Director, Medical Care Services, serves as the primary change agent and testing ground for new approaches for financing and providing health care under Medi-Cal. Two information collection and dissemination units also support the two major Divisions.

## a. Eligibility

Persons become Medi-Cal beneficiaries through different eligibility processes. Persons who receive cash grant public assistance through the Aid to Families with Dependent Children Program or the SSI/SSP program are automatically eligible for "no cost" Medi-Cal. Other persons applying for "Medi-Cal only" participate in a different application process to qualify under the Medically Needy or Medically Indigent program. In these programs, persons can have a "share of cost", a "deductible" assessed monthly to those who have additional resources above a fixed "maintenance need" level. In these cases, persons are required to contribute toward the cost of their medical care prior to being granted Medi-Cal eligibility for a given month. AFDC and Medi-Cal eligibility determinations are made by county welfare departments. SSI/SSP eligibility is determined by the Federal Social Security Administration.

The eligibility branch is responsible for assuring Medi-Cal eligibility on an equitable basis within allocated resources to all persons meeting the eligibility criteria as set forth in Federal and State statutes and regulations; assuring that eligibles receive their monthly Medi-Cal identification cards in a timely manner; guaranteeing that only appropriate medical bills are paid; and, assuring that clients who pay a share-of-cost have a correct share. The eligibility process is controlled through the following major activities:

1. Establishing annual county allocations for eligibility determinations and setting performance standards for county workload.
2. Monitoring county eligibility operations and providing training whenever Federal or State regulatory or statutory changes occur.
3. Monitoring, by the Audits and Investigations Division, to assure that the accuracy of eligibility determinations is at a level which is acceptable to the Federal Government.
4. Implementing the Medi-Cal Eligibility Data System, currently will provide undergoing implementation to provide on-line eligibility information and system update capability in conjunction with county welfare departments.

The MEDS systems will be operational in four counties by May 1980. The budget proposes a \$2 million augmentation for increased MEDS operational costs in 1980-81 when the system is scheduled to become operational in approximately 45 counties. When the MEDS system is fully operational, savings of approximately \$6.5 million will occur in county administration and departmental support. Implementation progress will be reviewed in the Spring and 1980-81 savings will be reflected in the May Revision of the Governor's Budget. The budget proposes one new limited-term position for the Eligibility Branch to assist counties in converting existing EDP systems to MEDS.

The budget also proposes to include the county hospital eligibility determination function in the Medi-Cal County Administration Cost Control Plan in 1980-81. Cost control and the resulting increased efficiency will result in savings approximating \$3.3 million, which are reflected in the 1980-81 Governor's Budget.

## DEPARTMENT OF HEALTH SERVICES—Continued

## b. Benefit

Medi-Cal eligibles are informed during the eligibility process about the scope of coverage of medical services. To obtain these services, an eligible must visit the provider of his choice, who agrees to accept Medi-Cal reimbursement for the services delivered. The Medi-Cal program, to be reimbursed 50 percent of its cost by the federal government, is required to provide certain basic benefits. States have the discretion to offer additional services if they so desire.

California offers a scope of comprehensive benefits including many services which are not federally mandated. The program covers: physician services, hospital outpatient services, physical, occupational and speech therapy, podiatry, optometry, chiropractic services, psychological services, prescribed drugs, laboratory, X-ray and radioisotope services, blood and plasma, hemodialysis services, skilled nursing facility services, intermediate care facility services, dental services, home health agency services, medical transportation, artificial eyes, eye appliances, inpatient hospital services, artificial limbs and braces, hearing aids and audiology services, assistive devices and durable medical equipment, eyeglasses, family planning services, and health screening for persons under 21.

The Benefits Branch is responsible for policy development and recommendations regarding the scope, quality and methods of providing Medi-Cal program benefits. As the major policy setting unit of the Medi-Cal program, the Benefits Branch also develops and disseminates new program regulations governing providers, the claims processing contractor, and Medi-Cal field office consultants who must approve services which require prior authorization.

*For 1980-81, a two position augmentation is proposed to assist in development of medical policy and standards and a utilization review policy manual and to provide staff support to the Technical Advisory Committee. The Committee, which consists of representatives of the organized medical community, major providers, and the academic medical community, provides assistance to the Department in the development of technical medical policy.*

## c. Child Health and Disability Prevention (CHDP)

This element was established to provide a program of early and periodic health assessment and referral for diagnosis and treatment of potentially handicapping conditions for California's children and youth. The program provides a separately administered Medi-Cal program benefit which meets the requirements of the Federal Early and Periodic Screening, Diagnosis and Treatment Program (EPSTD), and provides and administers an expanded State program unique to California youth. EPSTD services provided to all Medi-Cal clients under 21 years old are reimbursed 50 percent by the federal government; CHDP services for non-Medi-Cal eligible children are fully reimbursed by the State. Eligibility for State reimbursed services depends upon family income. Dental referral, as mandated by Federal regulations, and lead screening have been added as new benefits to this program. Children covered under the jurisdiction of this program include 1.4 million Medi-Cal eligible children and youth and 1.8 million non-Medi-Cal children.

*The number of health assessments reimbursed under the program is estimated at 385,900, including 91,900 CHDP assessments, in 1979-80 and 432,700, including 92,500 CHDP assessments, in 1980-81.*

*In the current year, the Department has completed partial implementation of an automated CHDP program accounting and data system. This permits the reduction of six temporary help positions in the program's Child Health Information and Claiming Unit and three temporary help positions in the Accounting Section's CHDP Unit. These reductions are reflected in the 1980-81 Governor's Budget.*

## d. Rate Development

The Rate Development Branch establishes the provider payment schedule for services listed under the Benefits element, which are delivered through Medi-Cal. It conducts periodic rate studies in the private sector and recommends provider rate annual adjustments consistent with rate studies, the Department's Medi-Cal program priorities, and General Fund resources and budgetary constraints. This branch is also responsible for developing capitation rates for at-risk pilot projects and special projects.

*As a result of the U.S. Ninth Circuit Court of Appeals' decision on CHA vs. Obledo, the way is now clear for the State to develop reasonable limits on inpatient hospital care costs. In the current year, seven positions were established to develop and implement such a hospital cost containment program. The program developed must be consistent with the Court of Appeals' decision, methodologically sound to withstand possible subsequent litigation, and approved by the Federal Department of Health and Human Services (formerly HEW) prior to implementation. It is anticipated that this effort will continue into the budget year, consequently, the budget proposes continuation of the seven positions. One expected result of a reasonable cost containment program is reduced inpatient hospital expenditures. Such reductions are not yet reflected in the Budget. Program progress will be reviewed in the Spring and 1980-81 savings will be included in the May Revision of the Governor's Budget.*

*Responsibility for prepaid health plan rate development has been shifted from the Audits and Investigations Division's Quality Evaluation element to the Rate Development Branch. The Budget proposed a four-position augmentation for such rate development and for an increased rate development effort for pilot projects and capitation programs.*

## e. Prepaid Health Plan Operations

As an alternative to Medi-Cal fee-for-service, the department contracts with a number of health maintenance organizations referred to as prepaid health plans. These plans provide a scope of services equal to the fee-for-service program, but beneficiaries must arrange for all their health care needs through facilities and providers of the prepaid health plan. Each plan is paid in advance a preestablished rate for providing the care on at-risk basis for each person enrolled. The Prepaid Health Plans Branch is responsible for the administration and monitoring of these contracts and prior pilot project contracts which are now operational, such as Adult Day Health Care and the Redwood Health Foundation. An independent audit of prepaid health plans occurs through the Audits and Investigations Division which monitors for both quality assurance and financial viability.

## f. Utilization Control

Many Medi-Cal services require prior authorization by a Medi-Cal field office consultant while others, such as physician office visits, are not so authorized. Prior authorization is requested by providers, not beneficiaries. Medi-Cal field services section operates field offices in 12 locations of the State, and also negotiates contracts with federally-mandated Professional Standards Review Organizations (PSROs) for utilization review and monitors their performance. Other utilization control activities conducted by this Section, part of the Medi-Cal operations branch, are concurrent reviews of institutional services, annual reviews of Medi-Cal patients in skilled nursing facilities, and the monitoring of Medi-Cal utilization in local mental health programs (the Short-Doyle/Medi-Cal Program) and in State hospitals.

*Consistent with a Federal "Medicaid State Management Report" recommendation regarding the Medi-Cal Program, the Budget proposes transfer of thirty positions from the Department of Developmental Services to the field services section. The positions will remain at the State hospitals and continue to perform utilization review activities. The proposed organizational placement will enable continued partial Federal funding of these positions and preclude potential conflict of interest in the utilization review decision-making process.*

*A redirection of twelve positions from field offices to headquarters is proposed to increase the section's monitoring of the varied utilization review systems (PSROs, prior authorization, Los Angeles County Hospital Waiver, Fresno-Madera Project and Short-Doyle/Medi-Cal) used in the program; to compare the relative effectiveness of the systems and maximize use of the most effective; and, to develop management information regarding utilization review and controls. The Budget also proposes a one position limited-term augmentation for management of the Fresno-Madera Project and a one-time \$20,000, 0.5 temporary help position to provide expert medical consultation to hearing officers in adjudicating a backlog of claims against prepaid health plans for services rendered to their enrollees by other providers.*

## DEPARTMENT OF HEALTH SERVICES—Continued

## g. Health Recovery

The recovery element has the function of collecting money due from insurance companies, third-party payers and other entities as a result of providing services to some Medi-Cal beneficiaries who have other insurance coverage.

Program providers who have been overpaid or whose amounts require adjustment as identified by audits are subject to the above recovery activity. *The Systems Support Section's Buy-In Unit of 12.5 positions is proposed for transfer to the Recovery Section as the unit performs Medi-Cal health insurance functions.*

## h. Fiscal Intermediary Service

Once a client has been treated by a Medi-Cal provider, a bill is submitted by that provider to the fiscal intermediary for payment.

The department currently contracts with Computer Sciences Corporation to process professional provider, inpatient and outpatient hospital, nursing home and prescription drug claims. The fiscal intermediary processes the claims according to policy established by the department and instructs the State Controller's Office to issue a check to the provider. The Fiscal Intermediary Management Branch oversees the claims processing operation. During the claims processing cycle a series of program controls are exercised:

1. Each claim must have affixed to it a current month's Medi-Cal "Proof of Eligibility Label" or, for some limited services, a "Medi-label" before a claim can be processed. These labels come attached to the Medi-Cal identification card which clients receive monthly.

2. Medi-Cal providers are required to "enroll" in the program by signing provider agreements through the Fiscal Intermediary Management Branch. Enrolled providers are issued provider numbers and valid provider numbers are required before claims can be paid.

3. For those services requiring prior authorization, an approved treatment authorization request (TAR) control number must be indicated on the claim. A copy of the TAR is matched to the claim by the fiscal intermediary.

4. Surveillance and Utilization Control, within the Audits and Investigations Division, provides vital automated monitoring during the claims processing cycle.

5. As claims are processed, many computer edits and audits monitor the claims to detect excess charges and improper billing practices.

The Fiscal Intermediary Management Branch also has responsibility for procuring a new at-risk contract for processing dental claims, which, in the past, have undergone separate handling by a Medi-Cal pilot project, operated by the California Dental Services. A contract is expected to be awarded during September, 1980.

*Conversion from the former fiscal intermediary, MIO, to Computer Sciences Corporation will be completed in the current year. Twenty-nine positions previously responsible for system design and testing and MIO contract termination will be redirected to increased system and performance monitoring of the fiscal intermediary; increased monitoring to ensure that Federal and State laws, regulations and policies are correctly applied in the payment and adjudication of claims; and an increased provider community liaison for the reconciliation of provider problems. Six proposed new positions will augment these efforts. Total Branch staffing of ninety-six positions includes twenty-two limited term positions to complete development of MEDS and the competitive bidding process to procure a Medi-Cal dental fiscal intermediary and to convert to a prepaid risk contract for dental services.*

*The budget proposes to continue a contract with the former fiscal intermediary to provide for fiscal intermediary termination expenses and limited continuation services, such as records retention and expert witnesses in cases involving prior claims and payments.*

## i. Alternative Health Systems

The development of alternative systems for the delivery of health care services under the Medi-Cal program is one of the department's highest priorities. The Office of Alternative Health Systems is responsible for developing new pilot projects to test the feasibility of adding new health benefits to the Medi-Cal program or alternative methods of financing or delivering existing medical benefits. It also has responsibility for promoting the development of new at-risk prepaid health plans to the point of signing a contract and for working with county government and the private sector in creating new arrangements for the delivery of health services through organized systems.

One pilot project, the Obstetrical Care Access Project, is underway and others are in the developmental stage—including capitated prescription drugs in long-term care facilities, alternative approaches to long-term care and testing the concept of providing in-home supportive services as a Medi-Cal benefit.

*The budget proposes one new position to augment the Office's efforts in 1980-81.*

## j. Information

Two separate units provide support to program management through their responsibility for the informational elements of the Medi-Cal program. The Program Information Review and Monitoring (PIRM) Unit, within the Medical Care Standards Division, is charged with assuring the availability of Medi-Cal program information necessary to make timely policy decisions on program operations, and monitoring eligibility and service fluctuations in the program to prevent budget overruns.

The Medical Care Relations Unit responds to both written and telephone inquiries regarding the Medi-Cal program from providers, beneficiaries, and the legislative and executive branches. Because it spans program elements in both the Medi-Cal and Medical Care Standards Divisions, it is part of the Medical Care Services office.

The Medi-Cal information program is also supported by the center for health statistics, located elsewhere in the department. The center maintains a full array of statistics on the program. Costs of this program element are included in administration.

## BUDGET ASSUMPTIONS FOR MEDI-CAL PROGRAM

Significant assumptions underlying the 1980-81 fiscal year expenditures for the Medical Assistance Program (Medi-Cal) include the following:

1. Beneficiary Cost-of-Living. The maintenance need and SSI/SSP payment level increases in the budget year will be in accordance with current law. A 14.65 percent increase is budgeted.
2. Hospital Cost-of-Living. Hospital inpatient costs are anticipated to increase at an annual rate of 13.8 percent for community and county hospitals in the budget year.
3. Indochinese Refugees. The budget assumes federal government reimbursement for 100 percent of the State's portion of the cost of Medi-Cal services to Indochinese refugees through September 30, 1981. Thereafter, 100 percent federal funding will be available only during refugees' first two years of eligibility.
4. Simplified Disability Referral System. Staff increases in the Department of Social Services, Disability Evaluation Division, to implement the new Simplified Medi-Cal Disability Referral System are expected to result in a shift of medically indigent adults into the federally-shared medically needy-disabled category.
5. Prepaid Health Plan Marketing Effort. An increased marketing effort is expected to result in a 20 percent increase in enrollment in the budget year. Overall, Prepaid Health Plans' average monthly enrollment will increase from 125,400 in 1979-80 to 154,100 in 1980-81.
6. A 9 percent provider rate increase (excluding hospital inpatient) will be included for 1980-81. The Department of Health Services is developing a variable allocation plan, which will be presented to legislative fiscal subcommittees during budget hearings in the spring.

## VI. AUDITS AND INVESTIGATION PROGRAM

## Program Objectives and Description

The Audits and Investigations Program includes functions that are concerned with Medi-Cal client and provider fraud and abuse, internal and external audits, and quality control. The program reports directly to the department director, providing an immediate responsive capacity to improve the management and accountability of department programs at the State and local levels, to cope with potential abuse of program expenditures or policies, and to detect potential fraud in Medi-Cal and other department programs. This function operates independent of program operations and provides the public with a single focus for investigation of fraud and abuse and expresses the Director's commitment to deal firmly with such problems.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Totals, Audits and Investigations .....	398.3	435.5	486.7	\$12,578,920	\$14,698,226	\$16,130,529
General Fund .....				6,405,331	7,252,108	7,870,443
Federal Funds.....				4,441,293	7,446,118	8,260,086
Reimbursements .....				1,732,296	-	-

<sup>1</sup> Includes average 9 percent provider rate increase in non-statutory categories for display purposes.

<sup>2</sup> Includes lawsuits, audit adjustments, and Board of Control claims.

<sup>3</sup> Includes Medically Needy, Long-Term, and Refused Grant.

## DEPARTMENT OF HEALTH SERVICES—Continued

## Program Elements:

a. Audits.....	203	209	215	\$6,390,091	\$6,876,791	\$7,124,599
b. Investigations.....	63.4	47.4	69.9	2,016,401	1,553,261	2,035,902
c. Surveillance and Utilization Review (SUR)	75.4	119.1	137.8	2,515,779	4,233,374	4,757,141
d. Medi-Cal Quality Control .....	36.9	38.9	40	1,035,250	1,222,528	1,283,521
e. Prepaid Health Plan Quality Evaluation .....	19.6	21.1	24	621,399	812,272	929,366
f. Administration .....	(79.6)	(83.1)	(92)	(1,932,761)	(2,526,602)	(2,775,832)

## a. Audits

This element is responsible for the fiscal, medical and management audits of institutional providers under the Medi-Cal Program and contract providers under Public Health programs. Other special reviews are conducted as requested by the Health and Welfare Agency, the Attorney General, and the Auditor General.

## b. Investigations

This element is responsible for investigating alleged provider and beneficiary fraud in the Medi-Cal program. A full investigation is made of complaints concerning possible commission of a crime, or a violation of a statute or regulation, particularly those violations that have potential for serious harm to a beneficiary, involve a significant amount of Medi-Cal or other funds, or show a repetitive pattern suggesting systematic abuse of the program. Investigations are conducted in full cooperation with law enforcement agencies. If fraud appears to exist, cases are referred to the Medi-Cal Fraud Unit in the Department of Justice for further investigation and possible prosecution.

*Eighteen proposed new positions are included to staff a new unit which will screen public complaints alleging fraud by Medi-Cal providers and beneficiaries. In addition to assuring prompt response to such complaints, assignment of such responsibilities to the screening unit will allow field staff to devote more time to field investigation of potential fraud cases.*

## c. Surveillance and Utilization Review (SUR)

This element performs postpayment reviews of services provided under the Medi-Cal Program to identify unnecessary or inappropriate utilization and excess payments; assess the quality of care; and recommend and initiate program and administrative corrective action. These tasks are accomplished by licensed medical professionals assisted by technical, administrative, and clerical support staff.

*The budget proposes thirteen new positions, expanding the number of on-site review teams from fourteen to eighteen.*

## d. Medi-Cal Quality Control

This element is responsible for conducting the Federally required Medicaid Quality Control Program. A statistical sample of Medi-Cal eligibles is reviewed to test the validity of the eligibility/liability determinations, the claims payment process and third party liability/other health coverage collection activities. The purpose of this review is to provide Department management with valid estimates of misspent Medi-Cal expenditures and analysis of the major problem areas and causes.

## e. Prepaid Health Plan Quality Evaluation

This element audits PHPs to assess the quality of health care provided to PHP members and assesses the financial and administrative capabilities of the contractors.

*Two proposed new positions are included in the Budget to conduct additional on-site program audits resulting from anticipated expansion of the PHP program. Additionally, reassignment of PHP rate development to the Rate Development Branch will permit two existing positions to be assigned to PHP and capitation project fiscal audits.*

## VII. DEPARTMENTAL ADMINISTRATION

## Program Objectives and Description

Departmental administration includes management, support, and control services for efficient operation of the Department's programs. The broad areas of responsibility include financial management, personnel services, program support, data processing and statistical services. Departmental administration is carried out by three organizational entities, the director's office, which includes civil rights, external affairs and public information; policy planning and enforcement, which includes the Office of County Health Services, legal affairs, regulations, legislative liaison and the Center for Health Statistics; as well as the administrative division.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Director's Office.....	(24.2)	(36.4)	(37.7)	(\$931,338)	(\$1,611,836)	(\$1,686,213)
Policy Planning and Enforcement Administration Division.....	(649.1)	(696.6)	(731.9)	(22,494,312)	(27,689,780)	(32,394,061)
Totals .....	(673.3)	(733)	(769.6)	(23,425,650)	(29,301,616)	(34,080,274)
Distributed .....	(591.1)	(619.1)	(653)	(18,028,769)	(23,568,108)	(28,076,211)
Undistributed .....	82.2	113.9	116.6	5,396,881	5,733,508	6,004,063
General Fund .....				2,256,963	3,252,214	3,563,614
Federal funds .....				1,056,804	2,019,652	2,034,613
Reimbursements .....				2,083,114	461,642	405,836

## DIRECTOR'S OFFICE

The Director's office provides the executive leadership for the department. It includes the director and the assistant director, as well as the chief deputy directors of policy planning and enforcement, medical care services, and preventive health services and their immediate staffs.

## a. Civil Rights

This office has responsibility to ensure equity and fairness in all aspects of department personnel management; ensure the health service delivery system is equally accessible to all California citizens; and ensure that department operations do not infringe upon the civil rights of its employees or any of the individuals served by the department.

DEPARTMENT OF HEALTH SERVICES—*Continued*

## b. External Affairs

This office is responsible for the overall design and direction of the department's external relations, and for providing staff support to the Department's advisory groups.

## c. Public Information

This office provides public information, press and media assistance for the entire department. It serves as a conduit for two-way flow of information: from the department to the press and public, and through press and public information inquiries of the department, for feedback from the public to the department.

## POLICY, PLANNING AND ENFORCEMENT

This element is responsible for providing expert analysis of highly technical, complex, and sensitive health issues and for assuring the development of coordinated, effective department policy. This involves four major tasks: (1) coordinating the development of department policy (2) developing and synthesizing information required for sound decisions (3) facilitating participation of the appropriate level of departmental management in major policy decisions, and (4) monitoring the implementation of department policy. These tasks are carried out by the following offices:

## a. County Health Services

The purpose of the Office of County Health Services is to assure that the department effectively implements the mandates of AB 8, Chapter 282 of 1979, to establish and administer the County Health Services Fund. This involves the development of interim mechanisms and requirements as well as long-term policies and procedures. The Office is also responsible for assuring that critical county health services are maintained and that a strong State/County partnership is established. *Nineteen new positions have been included in the budget for this function.*

## b. Center for Health Statistics

The center for health statistics is the central statistical support resource for the Department of Health Services and is responsible for providing and managing the data bases which provide vital information for policy decisions made by the department. The Center develops, monitors and analyzes data, conducts epidemiological studies and research, and provides technical assistance and staff support to operating program staff and managers. As such, it is the principal repository for data on the health status of California citizens and the operation and impact of medical care and preventive health services programs.

*Five (5) positions have been included to carry out the functions of the State Center for Health Statistics. Another three (3) positions have been provided to study the relationship between occupational exposure to toxic substances and cause of death. One (1) position has been included to construct California life tables.*

## c. Legal Affairs

The Office of Legal Affairs provides the primary legal analysis and support services required by the department. This involves providing legal support and assistance to the director and department staff; conducting first level audit appeals; conducting administrative hearing on appeals by Medi-Cal providers; and acting as liaison between the department and the Attorney General's Office and other agencies on legal matters. *Three (3) positions have been included to provide administrative appeal service to the Department of Alcohol and Drug Abuse.*

## d. Legislative Liaison

The Office of Legislative Liaison has responsibility for coordinating the Department's interaction with the Legislature. This includes: coordinating the development of department legislation; analyzing and developing departmental positions for all health-related legislative measures; representing the department on legislation being heard by legislative committees; developing Department testimony for interim legislative hearings; providing consultation to department staff on legislative issues and on the implementation of new statutes; providing legislators and their staff with information regarding constituent problems and the department's programs in general; and reviewing reports to the Legislature.

## e. Planning and Program Analysis

The Office of Planning and Program Analysis provides the department with planning and analytic resources which facilitate the department's policy development process and supplement that process by coordinating policy development activities which cut across program lines and by providing analysis in areas of breadth, urgency, or sensitivity.

Specifically, the office, in consultation with program managers, identifies alternative policies on selected issues and analyzes their impact; develops plans for new program directions; reviews and analyzes program operations; analyzes management, organization, and procedures; and undertakes special projects, as requested by the director. *Four (4) limited term positions have been approved to allow the completion of the Orthomolecular Medicine Demonstration Project.*

## f. Regulations

The primary mission of the Office of Regulations is to ensure the timely development and promulgation of clear, concise regulations which effectively reflect the goals, policies and philosophy of the Department. This mission requires the office to: identify and resolve controversial issues in regulations development; coordinate the appropriate participation of all segments of the department affected by proposed regulations; ensure the development of regulations required by administrative mandates, state legislation, and federal regulations; and ensure that the public is involved in all appropriate phases of regulations development.

## ADMINISTRATION DIVISION

## a. Data Systems

The Data Systems Branch is responsible for assuring that necessary data processing support is available to departmental programs for developing, maintaining, and processing required automated systems and statistical data bases. It also serves as the department's liaison with the State Data Processing Management Office and the Health and Welfare Agency in regard to data and information functions.

As an element of the Data Systems Branch, the Systems Development Section is responsible for the development of automated systems. This includes analysis of service requests, development of cost estimates, preparation of feasibility studies, systems analysis and design, project management and post implementation review. It is also responsible for developing and maintaining the department's long range EDP plan.

As the second element of the Data Systems Branch, the Systems Support Section is responsible for providing support for the ongoing automated production systems. This support is in the form of direct personal services and management of contracted services. The primary sub-functions are programming/analysis, key data entry, data guidance, and Medi-Cal issuance. *The budget includes two new positions for the data guidance function. In addition, the Buy-In Unit, consisting of 12.5 positions, has been transferred to the Recovery Section since the Unit programmatically performs a Medi-Cal health insurance function.*

## DEPARTMENT OF HEALTH SERVICES—Continued

## b. Personnel Management Services Branch

The Personnel Management Services Branch performs basic personnel support activities. The transactions staff process appointments, separations, position changes, and other personnel documents, and process monthly payrolls for all departmental headquarters and field offices which comprise approximately 4,000 employees. The personnel management services analyst staff conduct classification and pay studies, carry out recruitment plans administer delegated testing programs as an element of the Personnel Management Services Branch, the training section is organized to provide training program services throughout the Health Services Department. Specific tasks include the development of departmental training policy and procedures, the provision of internal controls and accountability for training activities, assistance to departmental components in assessing and prioritizing training needs and the developing of a department wide plan to meet those needs with the resources available. The Section also monitors the departmental training plan.

As a second element of the Personnel Management Services Branch, the Manpower Program Services Unit negotiates, implements and monitors contracts with other agencies for on-the-job training in the Department of Health Services for eligible disadvantaged and disabled unemployed persons. Interagency contracts provide for staff salaries, trainee wages and administrative overhead. The current unit has responsibility for contracts totaling over \$5 million. Those contracts provided on-the-job training for about 800 individuals; current transition rate is about 75 percent.

## c. Program Support Branch

The Program Support Branch provides the department with operating and support functions. This branch has department-wide responsibility for:

- Business management services; procurement, traffic warehouse and vehicle management;
- Office management activities; word processing mail service, information services and graphic arts; *The budget includes one new position for records management.*
- Contract management activities; contract/grant consultation services, development of internal contract/grant procedures, contract writing and negotiation training and review and monitoring of individual contracts and grants;
- Facilities management services; maintenance, repair, and plant operations of departmental owned laboratory facilities. *The budget includes two new positions for maintenance and security of the laboratory facilities, and*
- Facilities planning activities; development and implementation of capital outlay and special repairs budgets, enforcement and implementation of Section 504 (Rehabilitation Act) facilities standards and the development of cost saving/energy saving facilities programs. *The budget includes \$139,700 for special repairs.*
- In addition, the branch operates the departmental book and film libraries. *The budget includes four new positions for the provision of book library and warehouse support services to other state departments which will reimburse the department for the cost of the positions.*

## d. Financial Management Branch

The Financial Management Branch has responsibility for administering and reporting of fiscal resources and related activities of the department. The branch's four sub-elements specifically provide services as follows:

The fiscal forecasting section develops systems to better estimate Medi-Cal expenditures, assumes responsibility for all analyses of fiscal impacts on Medi-Cal local assistance expenditures and presents and coordinates three annual Medi-Cal estimates to department and agency management, the Department of Finance, the Legislative Analysts' Office and other agencies. The budget includes one new position for the development and implementation of new estimating methods for CCS, GHPP AND CHDP. This position is funded by a redirection of a temporary help position from the Accounting Section.

The fiscal support section is responsible for the formulation and implementation of new accounting systems and procedures, the review and improvement of existing accounting systems and procedures, providing consultative services to department management regarding fiscal policies, procedures and financial systems, conducting special studies, preparing department cost allocation plans required for millions of dollars of Federal reimbursement, and preparing accounting manuals and written procedures. The fiscal support section has been merged with the Accounting Section to facilitate implementation of the new Accounting System.

The accounting section is responsible for the maintenance of fiscal records regarding the expenditure of funds throughout the department. This includes cash payments through contracts, as well as the general fiscal support for State operations (Travel claims, advances, payment of salaries, etc.) The budget includes one new position to monitor and control the cash flow of funds for the Medi-Cal Program. It is funded by a reclassification of a temporary help position in the Accounting Section. *In addition, the Accounting Section's temporary help is reduced by three positions due to automation of the Child Health Disability Prevention Program's Accounting and Data System.*

The Budget Section develops and maintains the departmental budget including detailed spending plans by organization, analyzes legislation and proposed legislation for fiscal impact to the department's programs, represents the director and the department in meetings with the Department of Finance, Legislative Analyst's Office and at certain times the committee staff, advises the director and executive staff on financial considerations of impending policy changes, and reviews and/or analyzes regulations, contracts, grant requests.

## VIII. LEGISLATIVE MANDATES

This program reflects the cost of reimbursing local governments for (1) property tax revenue loss, (2) new programs and (3) increased level of existing services mandated on local entities by legislation.

## Authority

The State is required to pay the cost of legislative programs mandated on local governmental entities by Chapter 1406, Statutes of 1972 (SB 90), as amended by Chapter 358, Statutes of 1973. These two pieces of legislation apply to mandates effective after January 1, 1973. As added by such legislation, Section 2229 of the Revenue and Taxation Code provides for reimbursement of lost personal property tax revenues, while Section 2231 provided for the reimbursement of costs of legislative mandated programs.

Following is a description of legislative mandates.

## Program Requirements

	1978-79	1979-80	1980-81
Totals, Legislative Mandates.....	\$169,478	\$169,488	\$180,000
General Fund .....	169,478	169,488	180,000

## a. X-Rays

Chapter 954, Statutes of 1973, attempts to ensure that students giving X-rays are closely supervised by a licensed instructor or a licentiate of the healing arts by authorizing the Department of Health Services to give approval to licentiates of healing arts board to provide radiological technology on-the-job training. This statute mandates that a radiation specialist, as defined, be present in the same room when all but defined students in a school for radiological technologists administer diagnostic or therapeutic X-rays on a human being.

DEPARTMENT OF HEALTH SERVICES—*Continued*

## b. Sudden Infant Death Syndrome

Chapter 453, Statutes of 1974, establishes a procedure to collect information about the frequency of infant death through a mandated autopsy. The intention of the bill is to provide counseling and information to parents who have experienced the tragedy of suddenly losing an infant. This statute mandates that the county health officer, upon being informed by the coroner of any case in which sudden infant death syndrome is the provisional cause of death, after consultation with the infant's physician of record, to inform all concerned if a determination is made that sudden infant death syndrome is the probable cause of death.

## c. Cystic Fibrosis

Chapter 835, Statutes of 1975, requires the Department of Health Services to conduct a program of care and treatment for those persons suffering from cystic fibrosis who are 21 years of age or older. The law provides that the county cost of administering the case under the California Children's Program will be paid by the State.

## d. Nursing Assistants

Chapter 1202, Statutes of 1976 requires each long-term health care facility to adopt an approved training program for nurse assistants working in the facility. It also requires persons employed by a long-term health care facility as nurse assistants to be certified or enrolled in precertification programs.

## IX. PROVIDER RATE INCREASES

Program Requirements	1978-79	1979-80	1980-81
Totals, Provider Rate Increases .....	—	—	\$145,365,499
General Fund .....	—	—	80,386,399
Federal funds .....	—	—	64,979,100
Provider rate increase funds for certain Department of Health Services programs are reflected separately for the 1980-81 fiscal year. The funding is to provide an average 9 percent provider rate increase to all medical service providers, with the funds to be allocated among provider groups as needed to ensure the continuity of quality care to program recipients. Inpatient hospital services are excluded from this rate increase item because funding for increases in actual costs is included in the local assistance portion of the Medi-Cal Program. The rate increase funds are to be transferred to their respective programs upon order of the Department of Finance. The following is the estimated allocation of funds by program for Fiscal Year 1980-81:			
1. Medi-Cal .....	—	—	141,223,675
2. California Children's Services .....	—	—	1,274,138
3. Child Health Disability Prevention .....	—	—	359,825
4. Family Planning .....	—	—	2,325,604
5. Genetically Handicapped Person's Program .....	—	—	182,257

## X. INTRADEPARTMENTAL TRANSFERS

Program Requirements	1978-79	1979-80	1980-81
Totals, Intradepartmental Transfers .....	\$1,160,397	\$406,429	—
Reimbursements .....	1,160,397	406,429	—
Various funds budgeted in local assistance are expended via the state operations budget. This has the effect of including these expenditures twice in the Summary by Object. This adjustment reconciles program and traditional expenditures.			

## XI. SPECIAL PROJECT ACTIVITIES

	78-79	79-80	80-81	1978-79	1979-80	1980-81
Services and Demonstration Projects:						
Public and Environmental Health Division:						
Environmental Health Branch:						
Calif. Solid Waste Mgmt. Plan .....	8	16	36	\$226,529	\$1,652,126	\$2,078,863
Hazardous Waste Sampling Analysis and						
Compatability Study .....	6	—	—	174,924	—	—
Urban Rat Control Project .....	1.4	1.8	3	894,085	979,414	1,713,691
Public Water System Supervision Program ..	46	68	83	1,486,114	2,882,500	3,500,000
Design Optimization of the Chlorination						
Process .....	2	0.2	—	94,246	12,678	—

## RESERVE FOR HEALTH AND WELFARE REORGANIZATION EXPENDITURES

Chapter 1252 of the Statutes of 1977 (SB 363) reorganized the Health and Welfare Agency effective July 1, 1978. The reorganization abolished the Department of Health and the Department of Benefit Payments. The employees, funds and property of these departments were distributed to the newly-established Departments of Mental Health, Developmental Services, Social Services, Health Services, Alcohol and Drug Abuse, and the Office of Statewide Health Planning and Development. In addition, the Employment Tax Operation of the Department of Benefit Payments was transferred to the Employment Development Department.

The reorganization resulted in adjustments to federal financial participation in various Health and Welfare programs. The departments involved absorbed reasonable adjustments. However, to the extent that resources were not available within departmental resources, authority through the 1978 Budget Act appropriation (Item 255) allowed the Department of Finance to make necessary adjustments.

Amounts as required were to be reserved for the Departments of Health Services and Social Services by the Department of Finance, based upon a determination of need. Under this provision, the Department of Social Services received one-half of this appropriation. The Department of Health Services did not require an allocation from this appropriation.

## DEPARTMENT OF DEVELOPMENTAL SERVICES

The Department of Developmental Services administers the Lanterman Developmental Disabilities Services Act. The intent of this Act is to assure coordination of services to persons with developmental disabilities; to assure that such services are planned and provided as part of a continuum which is sufficiently complete to meet the needs of those who are developmentally disabled at each stage of their lives, regardless of their ages or the degree of their handicaps; and, to the extent possible, accomplish these objectives without dislocating persons with developmental disabilities from their home communities.

The Department strives to respond to the needs of the developmentally disabled by:

- I. Reducing their degree of dependency.
- II. Maintaining high quality health and welfare.
- III. Increasing their ability to control individual environment.
- IV. Increasing the normalcy of their behavior.
- V. Maximizing their human potential.

Other major objectives of the developmental disabilities program include reducing the incidence of developmental disabilities and assuring that the mandates of the Lanterman Developmental Services Act are implemented uniformly, progressively and on an equitable basis.

During Fiscal Year 1980-81, the Department will continue to strengthen its program activities so that appropriate services may be provided to California residents with special developmental needs that require care, treatment, development, or maintenance. It is estimated that there are approximately 368,000 persons in California with developmental disabilities. Included in this population are approximately 257,900 persons who are primarily mentally retarded, 31,500 who primarily have cerebral palsy, 76,000 who are primarily epileptic, and 2,600 who are primarily autistic.

Services administered by or under the direction of the Department include prevention of developmental disabilities through community education and consultation; early intervention and crisis response; 24-hour community or state hospital placement in care, treatment and developmental facilities; day care; restorative and rehabilitative services; and continuing case management and support.

Emphasis is placed on program outreach services to those persons who, because of geographical isolation, ethnic background, financial restrictions, or other similar causes, have not had ready access to traditional developmental services.

The Department sets broad policy for the delivery of developmental services statewide; establishes priorities, standards, and procedures within which the Developmental Services Program operates; monitors, reviews, and evaluates the actual operation of the services; and oversees the correction of faulty procedures and practices brought to light by the evaluation and review process. Services are delivered directly through nine state hospitals and continuing care support services, and indirectly through a statewide network of 21 private, nonprofit, locally based community agencies.

The Department of Developmental Services provides care, treatment, and development to the developmentally disabled through the following operations:

Regional centers that (1) counsel clients, parents, or guardians and (2) assess, diagnose, refer for services, and place developmentally disabled citizens in appropriate private or public living arrangements.

Continuing care services which provide protective living services to persons at the request of regional centers.

State hospitals that provide state-managed care, treatment, and development at the request of regional centers or by court commitment.

Administrative services which (1) provide centralized management and support for regional centers, state hospitals, and continuing care offices and (2) plan, develop, operate, and evaluate services for the developmentally disabled in compliance with the Lanterman Developmental Services Act and other appropriate codes in California.

The current year budget includes \$1,312,289 reduced pursuant to Section 27.2 of the Budget Act.

### SIGNIFICANT PROGRAM CHANGES

#### Community Services Program

The Department proposes a reorganization of the Community Services Division to respond to: 1) the need for accountability of a regional center budget that has grown 300% in the past five years; 2) the need for additional community resources to meet the needs of clients redirected into the community from state hospitals; and 3) the demands for technical assistance for community programs with the goal of upgrading the quality of services. This reorganization will be accomplished by redirecting currently budgeted resources and reorganizing into four new branches.

For the 1980-81 fiscal year, the Regional Centers program is projected to increase by \$34.2 million over the 1979-80 budget. This includes \$11 million for increased purchase of services and new caseload costs, \$16.5 million for provider rate increases and \$6.7 million for Regional Center Operations cost of living increases. The budget for operations includes an adjustment to regional center staffing as a result of identifying approximately 8,000 cases where contacts for services have not occurred during the last twelve months. This adjustment to account for "inactive" cases resulted in a net caseload increase of 1,200 for Fiscal Year 1980-81 over the 1979-80 budget.

Chapter 1132 of 1979 (AB 1164) mandates the transfer of the administration of all workshop services provided to Regional Center clients to the Department of Rehabilitation via interagency agreement. This budget reflects that transfer, including increased funding in the amount of \$602,707 for 27.5 program and administration positions in the Department of Rehabilitation. Further, the Department of Rehabilitation is currently conducting a study to determine the appropriate rate of payment for providers under the "reasonable rate" concept outlined in Chapter 1132. This study will be completed prior to legislative budget hearings and could influence funding decisions.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

DEPARTMENT OF DEVELOPMENTAL SERVICES—*Continued*

During Fiscal Year 1979–80, the Department reinstated the policy of allowing Regional Centers to discontinue the use of state operated protective social services. Three centers adopted this option in 1979–80 and these changes are reflected in the budget. In Fiscal Year 1979–80, a total of \$762,635 and 62.5 positions is being transferred to the Regional Centers budget. In Fiscal Year 1980–81, the full year cost of this transfer is \$1,625,853.

Other items of note in this budget include: 1) the continuation of funding of new community programs from Program Development Fund grants based upon the assumption that administration sponsored legislation to continue the authority of this fund will be passed during 1980; and 2) the reappropriation of \$1,000,000 in 1980–81 that was appropriated in the 1979–80 budget for community living continuums so that the full amount can be expended for the purposes intended and an evaluation of a full program year can be made.

**Hospital Services Program**

The 1980–81 state hospital budget includes a projected population reduction of 487 developmentally disabled clients and 578 mentally disabled clients in programs managed by the Department of Developmental Services. This reduction in population results in a 453.4 position reduction in level-of-care staff for the developmentally disabled and a 308.4 position reduction in level-of-care for the mentally disabled. In addition, 167.7 positions in non level-of-care areas are proposed for reduction due to the projected decline in the developmentally disabled population. The areas affected are program review, program administration, housekeeping, food service, and health services specialists. Nine of these positions are being proposed for redirection to provide affirmative action coordinators in the state hospitals and two management positions are proposed for redirection to headquarters for use in the Community Services Division reorganization.

In addition, changes to the staffing standards are proposed for clients in Medical/Surgical and Continuing Medical Care Programs pursuant to a departmental study mandated by Assembly Concurrent Resolution No. 103 of 1978. These proposed standards generate 84.2 additional positions for Medical/Surgical Programs and 103.3 additional positions for Continuing Medical Care Programs.

The Department is currently in an active planning effort to determine the feasibility of transferring the projected June 1982 population of 245 developmentally disabled residents of Patton State Hospital to other state hospitals and appropriate community placements by early 1982. This process will give full consideration to the appropriateness of changes in the physical and environmental setting for the Patton residents as well as to the possibilities for the future use of the Patton physical plant. A final decision is targeted for the spring of 1980. If necessary, budgetary changes in capital outlay and state hospital staffing will be proposed at that time.

This budget continues \$1,309,126 for funding the Psychiatric Technician Apprenticeship Program for the 1980–81 Fiscal Year. Two hundred ninety-two thousand six hundred twenty-nine dollars (\$292,629) of this amount will be used to fund a program of thirty apprentices at Camarillo State Hospital through February 1981. The remaining \$1,016,497 is earmarked for use in programs approved under the auspices of SB 132, Chapter 1181 of 1979, the California Worksite Education and Training Act. The Department of Developmental Services is continuing to work with the Departments of Employment Development and Industrial Relations to pinpoint locations either in the state hospitals or community settings which are appropriate for the development of apprenticeship slots.

Funding in the amount of \$1,568,118 is earmarked in the state hospital budget for the funding of community placement of state hospital clients who are recommended for such placement by personnel of the appropriate state hospital and regional center. This is to fund placements above the 231 placements already funded in the Regional Center Budget and is part of the Department's continued effort to reduce the utilization of state hospitals in cases for which community placement is appropriate.

**Administrative Services**

This budget reflects increased support for the Department's administrative services in two critical areas: 1) three new auditor positions are being funded to increase fiscal monitoring capabilities over Regional Centers and care providers; and 2) a total of nine and one-half positions are being added to the Electronic Data Processing Branch to meet current workload and to develop automated uniform accounting and encumbrance systems for Regional Centers and automated pharmacy record systems for the state hospitals.

**Fire, Life Safety and Environmental Improvement Projects**

The 1980–81 Capital Outlay Budget for state hospitals continues to address Fire, Life Safety and Environmental deficiencies identified by both federal and State licensing agencies. Conditional federal certification has been granted until July 1982, by which time all hospitals for the developmentally disabled are required by federal regulation to be in compliance with the federal certification requirements for meeting physical plant standards in order to continue receipt of federal Title XVIII and XIX funds.

The 1979–80 budget for capital outlay includes the appropriation of \$108 million dollars for the fire and life safety and environmental improvement projects, project management, and related costs for temporary facilities to complete construction for 86 buildings which will accommodate 5,417 developmentally disabled residents. The 1980–81 Governor's Budget for Capital Outlay includes \$45.4 million dollars to complete funding through construction for 33 buildings which will accommodate an additional 2,073 developmentally disabled residents. The amount to be expended in 1979–80 and the amount proposed in the 1980–81 Governor's Budget, coupled with previous expenditures related to the fire and life safety and environmental improvement projects, represents a current total funding commitment of \$174 million dollars.

The Department of Developmental Services Capital Outlay budget also includes \$6.3 million in the current year and proposes \$11.7 million in 1980–81 for Fire and Life Safety and Environmental Improvement projects for buildings which will accommodate mentally disabled clients in hospitals administered by the Department of Developmental Services.

A preliminary response to SB 354 of 1979 indicates that the state hospital's developmentally disabled population is expected to decline to 7,620 residents by July 1982. The capital outlay request will be adjusted prior to legislative hearings to reflect the population projections in the final SB 354 report due in February 1980.

**I. COMMUNITY SERVICES PROGRAM****Program Objectives and Description**

The Community Services Division is responsible for the development and maintenance of a complete continuum of care and services for persons with developmental disabilities who reside in the community (W & I Code 4512). The Division oversees the delivery of case management services to clients of the 21 regional centers throughout the State which serve as the single entry point into the Department's service delivery system.

During Fiscal Year 1979–80, the Department reinstated the policy of allowing regional centers to discontinue use of the State operated protective social services program. Three regional centers (Alta California, Kern, and Tri-Counties) were able to provide acceptable plans to their associated area boards and obtained the consent of the Department to "opt-out". This brings the overall total to six regional centers that have taken this option. The total number is expected to increase during FY 1980–81. The progress of the remaining regional centers in choosing "opt-out" will be reported during legislative budget hearings.

The Community Services Division will reorganize during FY 1980–81 by adopting an administrative arrangement designed to meet an anticipated increase in the growth of the Community Services System. This activity will not require new funding but does require a redirection of positions and funding from headquarters, continuing care services and state hospitals. In addition, the reorganization will involve the transfer of positions among existing branches as well as a definition of new functions and division of current functions among the newly identified branches.

This budget includes a proposed current year deficiency of \$4,300,000 for the Regional Centers Program. \$3,800,000 is for projected increased purchase of services expenditures and \$500,000 will fund emergency rate increases for transportation providers, due to rising fuel costs, and other providers incurring extraordinary cost increases.

## a. Regional Centers

Regional centers are private nonprofit corporations under contract to the State to coordinate the service delivery system in the community for persons with special developmental needs and their families. The primary responsibility of these regional centers is to use an interdisciplinary process to coordinate the provision of diagnosis, assessment of need, development of individual program plans that enable each eligible person to live in as normal an environment as possible, and to develop his/her maximum potential. The regional centers are staffed with professional disciplines that carry out this responsibility. If the services needed to meet the goals and objectives of the clients' Individual Program Plan are not available through generic agencies, the centers may purchase essential services directly, subject to the availability of appropriated funds.

Under Welfare and Institutions Code Section 4620, et al (Chapter 1368/76), regional centers are mandated to provide specific services including outreach and identification of persons who may be eligible for services under this delivery system. These mandated efforts continue to identify additional eligible persons. The following graphs and charts reflect this activity and display client caseload and expenditure data:

## CLIENT CASELOAD

## EXPENDITURES (In Millions)

<sup>1</sup> Includes \$25.8 million for workshop services which appear under a separate line item (Work Activity Program) in 1980-81 for purposes of contracting services through an interagency agreement with the Department of Rehabilitation.

<sup>1</sup> Proposed allocations do not include 9% rate increase funding.

## DEPARTMENT OF DEVELOPMENTAL SERVICES—Continued

During FY 1978-79, \$2,500,000 was reappropriated by Section 10.68 of the Budget Act of 1978 for the specific purpose of providing appropriate community placement for residents of state hospitals. These funds resulted in 41 net placements into the community above the 200 placements already included in the Regional Center budget. In FY 1979-80 funding for community placements for state hospital clients was included within the budgeted population of 8,637 in state hospitals. Prior to legislative budget hearings, anticipated Regional Centers activity should be finalized and budget adjustments accommodated.

With the passage of AB 1164 (Chapter 1132/79), the Departments of Rehabilitation and Developmental Services will enter into an interagency contract that sets up the responsibility of providing workshop programs to persons with special developmental needs with the Department of Rehabilitation. This will require a redirection of \$25,151,753 from the Regional Centers budget.

Projections for the Regional Center Purchase of Services budget include the assumption that benefits for Supplemental Security Income for developmentally disabled clients in community out-of-home placements will increase by 16.85 percent. The budget also assumes a 9 percent general cost-of-living increase for Regional Center Purchase of Service. The combination of these two actions is displayed in the following chart. The total gross program is proposed to increase by 28 percent with the General Fund share increasing by 22 percent and the balance made up of increased SSI revenues.

Purchase of Service:	1979-80	1980-81	Percent increase
Out of Home .....	\$94,076,910	\$111,470,262	18
Workshops .....	20,487,057	25,754,460 *	26

Medical .....	2,850,864	3,238,428	14
Other .....	16,692,595	17,448,486	5
Extraordinary and Emergency Rate Increases .....	500,000	1,000,000	-
General Rate Increases .....	-	15,451,795	9
Gross Program .....	\$146,653,038	\$187,741,115	28
Less SSI Reserve .....	-53,278,464	-73,497,780	38
Net General Fund .....	\$93,374,574	\$114,243,335	22

## b. Community Operations

The Community Operations Branch is responsible for processing the contracts between the Department and the 21 regional centers that deliver services to persons with special developmental needs. This responsibility includes preparing and negotiating budgets, allocating funds, assuring strict accountability and reporting of expenditures, developing regulations, policies and procedures, and directing implementation of these regulations, policies and procedures. This Branch is also responsible for setting provider rates, maintaining operation manuals, and analysis of proposed legislation.

## c. Community Monitoring

The Community Monitoring Branch is responsible for gathering data on the service delivery provided by regional centers and the continuing care service program, analyzing the data to evaluate the service delivery, and to make recommendations to correct identified deficiencies. This is accomplished by using a comprehensive instrument that evaluates the service delivery in areas including, but not limited to, program assessment, compliance with contractual terms and regulations, legislative mandates, legislative intent and program quality standards. The completed evaluation and recommendations are submitted to the regional center and the respective board of directors, and a plan of correction of deficiencies is requested. The evaluation team will follow up to assure the plan of correction is implemented. The Branch also monitors specialized service programs, programs funded through Program Development Fund grants, major vendors and subcontractors on a routine basis.

## d. Community Development

The Community Program Branch fulfills the mandate of Welfare and Institutions Code Sections 4670 et seq., to develop and provide necessary support for a comprehensive network of quality programs in every area of the State. This Branch provides technical assistance, advice, consultation and training to service agencies (including regional centers) and providers in developing and refining community programs to enhance the lives of persons with special developmental needs. Assistance is given in assessing service needs, establishing and improving services for a continuum of care, developing programs for model and innovative services, accessing alternative funding sources, developing a facility inventory and recruitment system, conducting grantsmanship services, providing advice on small facility mortgage loan guarantees, and in the administration of the Program Development Fund.

The Department will continue its efforts to develop sound community programs by proposing legislation in the Spring of 1980 to continue the use of parental fees deposited in the Program Development Fund for grants during the 1980-81 Fiscal Year. The following table reflects program opportunities created during the Fiscal Year 1979-80 through this funding mechanism.

Another critical effort in the program development process is the implementation of community living continuums as outlined in Chapter 1132/78 (AB 3274). A Continuum Advisory committee is currently developing guidelines for a request for proposal from interested community groups. The thrust of these guidelines will be to develop continuums which facilitate the movement of persons with special developmental needs through various residential settings and, where practical, into independent living arrangements. This development process is anticipated to require the majority of the 1979-80 fiscal year. To insure that the full \$1,000,000 added by the Legislature for this purpose in 1979-80 is utilized, this budget requests the reappropriation of any unexpended balances for use in the 1980-81 fiscal year.

PROGRAM DEVELOPMENT FUND—CLIENT PROGRAM OPPORTUNITIES  
FISCAL YEAR 1979-80

Type of Program	Number of Opportunities *	Number of Projects	Total Dollars
Residential Living Arrangements .....	196	14	\$793,213
Work Activity .....	16	2	80,975
Workshop .....	20	1	113,940
Respite .....	1,017	4	266,141
Other .....	(3,086)	(8)	(363,648)
Infant Stimulation .....	123	2	79,756
Intervention .....	40	2	177,895
Hearing, Language, Speech .....	17	1	27,029
Recreation .....	406	2	51,693
Parent Education .....	2,500 **	1	27,275
TOTALS .....	4,335	29	1,617,917

\* These funds to be transferred to the Department of Rehabilitation via an interagency agreement and include \$602,707 for 27.5 positions for program monitoring and administration.

\* A program opportunity is identified with service elements such as beds, class size, workshop spaces, etc.

\*\* Based upon average referral rates for this type of project over a 5 year period, 10% or 250 actual referrals will be made to an appropriate agency of the service system.

## DEPARTMENT OF DEVELOPMENTAL SERVICES—Continued

## e. Continuing Care Services

Regional Centers have the option of using the services of the Continuing Care Services Branch (CCSB), a state-operated protective social services program, in lieu of providing their own case management services. This program assists the regional center system by serving 10,969 clients in FY 1979-80 through the coordination of in- and out-of-home program services.

Services are provided through a network of 23 offices distributed throughout the State. The program offers a full range of case management activities organized through an interdisciplinary team process which includes assessment of needs, development of individualized program plans, and periodic evaluation to assure progress toward objectives in the plan.

For the most part, the CCSB caseload involves clients needing out-of-home care situations. CCSB provides placement and follow-along services as dictated by the Individual Program Plan. Year-end figures for FY 1979-80 include the discontinuation of CCSB services by three regional centers and are adjusted to reflect the transfer of 2,166 cases to those regional centers. The projections for FY 1980-81 assume that approximately 10% of the gross increase in regional center caseload of approximately 9,168 cases may be assigned to the CCSB program yielding a year-end prediction of 9,417 cases in FY 1980-81. *Funding for this increased caseload is included in the proposed budget for regional centers in the amount of \$136,056 pending the final decision on opt-out for all centers. Should opt-out not occur during the 1980-81 fiscal year, the appropriate funding will be transferred to fund positions in the Continuing Care Services Branch.*

## CCSB Year-End Caseloads

1975-76	1976-77	1977-78	1978-79	1979-80	1980-81
8,116	8,458	9,311	10,076	8,803 <sup>a</sup>	9,417 <sup>a</sup>

## II. HOSPITAL SERVICES PROGRAM

## Program Objectives and Description

a. To provide care, treatment, and developmental services to all clients referred to the state hospital system by the regional centers and the judicial system.

b. To place clients in programs that are compatible with their essential physical welfare and requirements of their developmental and habilitative needs. To maintain continuity in program participants' lives and services with their families, communities, and posthospital programs.

c. To experience demonstrable, comprehensive gains by each participant in a balanced individual program of medical, developmental and habilitation skills. These include physical, social, intellectual, and vocational functioning skills. Special emphasis is placed upon independent living skills, especially those of self care.

d. To develop innovative program activities for use in community programs.

e. To maintain and monitor federal and state licensing and certification.

The Department of Developmental Services has responsibility for Agnews, Camarillo, Fairview, Napa, Frank D. Lanterman, Patton, Porterville, Sonoma, and Stockton State Hospitals. Mentally disordered programs at Camarillo, Napa, and Patton State Hospitals are managed by the Department of Mental Health through an interagency contract.

Mentally disabled patients receive psychiatric programming under the management of the Department of Mental Health with food, shelter, and clothing provided by the Department of Developmental Services.

The developmentally disabled client population is organized into nine major program types according to the needs of the individual client. These groups are organized into programs that pursue priority goals planned through interdisciplinary team leadership. The programs provide a continuum of services that are organized to provide a range of opportunities consistent with the needs of clients and the principles of normalization and least restrictive alternatives. The programs are articulated to carry handicapped individuals from dependent to independent functioning as their capacity allows under intense training.

Hospital staff include such specialties as physicians, psychologists, teachers, social workers, rehabilitation therapists, nurses, and psychiatric technicians who develop and implement an individual program plan to effect positive individualized growth for each client.

All clients are admitted through referral by the regional centers, or when they are dangerous to themselves or others, by court commitment. All clients discharged from state hospitals are discharged to the regional centers for aftercare and followup.

In addition to funding adjustments noted in the significant program changes, the budget for the state hospitals includes the following:

*Funding in the amount of \$1,055,800 for the leasing of temporary facilities at Camarillo, Fairview, Frank D. Lanterman, Napa, Porterville, and Sonoma State Hospitals for resident use during remodeling of units to meet fire and life safety and environmental standards.*

*An increase of \$55,559 in General Fund to fund increases in the Foster Grandparent stipends from \$1.60 per hour to \$2.00 per hour for 282 seniors.*

*The budget will earmark \$1,568,118 to fund community placements. During each quarter actual population is compared with projected population.*

*If a hospital's actual population equals or exceeds the projected population, monies are allocated to the hospital. If the hospital's actual population is below the projected population, monies are withheld to fund community placements by the regional centers.*

*General funds have been provided for 37.5 Medi-Cal Nurse Coordinators and clerical staff previously funded as a reimbursement by the Department of Health Services. Retention of these positions by the state hospitals will insure close monitoring of the treatment authorization process. The budget proposes transfer of thirty positions from the Department of Developmental Services to the Department of Health Services' Field Services Section. The positions will remain at the State hospitals and continue to perform utilization review activities. The proposed organizational placement will enable continued partial federal funding of these positions and preclude potential conflict of interest in the utilization review decision making process.*

*The Department proposes to reclassify nine program administration positions to Equal Employment Opportunity Analyst positions for each of the nine state hospitals to perform affirmative action and civil rights advocacy responsibilities.*

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Totals, State Hospital Program .....	15,262.3	15,092.3	14,373.3	\$345,076,146	\$394,225,374	\$398,429,065
General Fund .....				237,084,443	275,894,673	283,431,493
Energy and Resources Fund .....						80,050
Federal Funds .....				634,355	712,195	712,195
Reimbursements .....				107,357,348	117,618,506	114,205,327

## Client Management

State hospitals provide case evaluation for all clients referred for habilitation and treatment by the regional centers. Each program director establishes care, treatment, and development objectives for clients in his program in conjunction with the regional center staff. Evaluative scales measure life status and subsequent changes in patient characteristics. Judgments are then applied to determine if the client needs further treatment in his program, can move to another higher functioning program, or can be referred from the hospital.

## Basic Living and Care

Care and maintenance is provided on a 24-hour basis for clients admitted to state hospitals. Clients who are bedfast receive proper nursing and medical care.

All resident patients are supervised on a 24-hour basis in order to assist them in activities of daily living. Special supervision is provided for those patients who have maladaptive behaviors. Routine health maintenance, including periodic dental services, is provided to all clients in the state hospitals.

<sup>a</sup> Reflects the transfer of 2,166 cases to regional centers.

## DEPARTMENT OF DEVELOPMENTAL SERVICES—Continued

## Special Services

Increasing numbers of multihandicapped retarded individuals are referred to the state hospitals for specialized attention. These include infants; blind, deaf, and disturbed persons; destructive, hyperactive acting-out adolescents; chronically physically ill people; individuals with cerebral palsy, uncontrolled epilepsy, and other neurological conditions; and persons needing physical, social, intellectual, and vocational development. These patients require highly specialized services to increase their ability to become independent and minimize their need to rely upon public resources when they are returned to community living.

## Program Review

Evaluation of each client's functional change, effectiveness of care, treatment, and development is conducted on a continuing basis. A management informational system provides uniformly accepted objective standard measures of patient benefits. Progress is measured by application of standardized evaluation instruments and at appropriate times is reevaluated through interdisciplinary teams in relation to stated performance objectives. The hospital program system is evaluated by hospital program review staff and by headquarter's program management staff, using objective evaluation criteria to determine the overall effectiveness of each program.

**III. PLANNING AND EVALUATION PROGRAM**

During the past several years, state and federal evaluation requirements, as well as substantive requests for information by the State Legislature, have increased in both number and complexity. Specific evaluation mandates are contained in PL 94-103, PL 95-602 and Welfare and Institutions Code Sections 4670-4690 (AB 3805 of 1976). Planning activities for state hospital utilization, community program development, and capital outlay have been specified in Budget Acts and their supplemental language in 1976, 1977, 1978, and 1979. Additional planning and community development efforts have been stipulated in AB 3274 and SB 354 of 1979.

The Planning and Evaluation Division has primary responsibility for meeting these mandates. In addition, it provides the Department with internal planning support. It is responsible for implementing the client-based information system on a statewide basis. The Division is currently implementing the client evaluation, cost report, and program evaluation instruments which comprise the evaluation system. The Division currently maintains the Department's management information system. In 1980-81 efforts will continue to both integrate and expand the scope of the system to include client characteristics, services, and cost information. This expanded data base will greatly increase the Department's management capability and ability to respond to legislative requests and requests from interested groups.

The Division is responsible for program planning and special reports, as well as policy analysis and development. These include the annual projection and revision of future State hospital utilization, the annual update of residential care and rates, the analysis of community alternatives and other special reports as requested by the Legislature and Department management.

Continuing efforts to implement a comprehensive management information and program evaluation system are emphasized in this budget by the addition of \$99,648 and four positions. This staffing will design and produce technical reports from information obtained from the Client Development Evaluation Report (CDER) for effective application in policy making, program management, and program development.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Totals, Planning and Evaluation Program .....	27.9	51.8	56.5	\$484,109	\$2,330,793	\$2,761,306
General Fund .....				482,691	2,330,793	2,761,306
Reimbursements .....				1,418	-	-

**IV. LEGISLATIVE MANDATES**

This program reflects the cost of reimbursing local governments for (1) property tax revenue loss, (2) new programs, and (3) increased level of existing services mandated on local entities by legislation or executive regulations. This budget reflects a reduction in the level of funding for this program during the 1979-80 and 1980-81 fiscal years based upon a history of underexpenditure in prior years.

**Authority**

The State is required to pay the cost of legislative programs mandated on local governmental entities by Chapter 1406, Statutes of 1972 (Senate Bill (SB 90), as amended by Chapter 358, Statutes of 1973. These two pieces of legislation apply to mandates effective after January 1, 1973. As added by such legislation, Section 2229 of the Revenue and Taxation Code provides for reimbursement of lost personal property tax revenues, while Section 2231 provided for the reimbursement of costs of legislative mandated programs.

The specific mandates funded from this item are:

Chapter 498, Statutes of 1977. This is to pay coroner's cost for the inquest into deaths at the state hospitals.

Chapter 694, Statutes of 1975. This pays for court appointed public defenders or attorneys to represent persons with developmental disabilities in conservatorship or guardian hearings.

Program Requirements	1978-79	1979-80	1980-81
Totals, Legislative Mandates (General Fund) .....	\$33,855	\$43,438	\$43,438

## DEPARTMENT OF DEVELOPMENTAL SERVICES—Continued

## V. ADMINISTRATIVE SERVICES PROGRAM

The Administration Division provides direction, control, and administrative support in order to insure the efficient management of the Department's programs. The areas of responsibility include budgeting, accounting, fiscal systems, auditing, patient benefit and accounts services, labor relations, personnel management, training, manpower services, facilities planning, business services, management consultation, and contract management.

Legal, legislative affairs, civil rights, patients' rights, investigation, and public information services are provided to the programs by staff in the Director's Office.

This budget reflects the strengthening of two critical areas in administrative services. First, \$86,612 is being added to the budget to fund three Auditor positions to increase fiscal monitoring capabilities over regional centers and care providers. This staff will allow the Department to reasonably meet audit requirements and to monitor and control the use of state funds to maximize the services provided to persons with developmental needs. Second, \$18,890 is being added to fund one new position and \$33,925 in currently budgeted funds for operating expenses is being redirected to fund two new positions to augment data processing staff to meet both existing workload problems as well as new workload demands associated with the Department's Client Data Evaluation and Reporting System (CDER).

This budget also includes additional funding from the General Fund for two new EDP applications to existing departmental operations as follows: 1) \$570,580 for 3.5 limited term positions and the first year cost of equipment to design and install an automated uniform accounting system in the 21 regional centers; and 2) \$342,963 for three new positions to design and install an automated pharmacy system in all nine State hospitals for the developmentally disabled.

A technical budgetary change included in this budget is the transfer of \$2,086,512 from the local assistance appropriation for protective living services (CCSB) to the departmental support appropriation. This shift represents the direct budgeting of several departmental headquarter units rather than overhead funding from the local assistance appropriation.

DEPARTMENT OF MENTAL HEALTH

The Department of Mental Health as the State's mental health authority administers the Lanterman-Petris-Short Act, the Short-Doyle Act, and other State and federal statutes. It is the goal of the Short-Doyle Act to promote and reimburse (in part) the cost of an array of services which provide a continuum of preventive, treatment, and rehabilitative support for persons who are mentally ill or emotionally disturbed.

Services available include prevention and control of mental illness through community education and consultation, crisis intervention and emergency care, 24-hour residential treatment, day care treatment and outpatient care and continuing care management and resocialization.

The Department of Mental Health, in consultation with the California Conference of Local Mental Health Directors and the Citizens Advisory Council, sets overall policy for the delivery of mental health services statewide; establishes priorities, standards, and procedures within which mental health services will operate; monitors, reviews and evaluates the actual operation of the services; and oversees application of modifications indicated by the evaluation and review process. Under the provisions of the Short-Doyle Act, counties are responsible for the provision of mental health services to their residents. These services are provided through a system of local and State-operated programs.

Authority

Welfare and Institutions Code, Divisions 4-8.

SIGNIFICANT PROGRAM CHANGES

Pursuant to Section 27.2 of the Budget Act of 1979, the appropriation for the Department of Mental Health was reduced \$1,067,141 in 1979-80.

The 1979-80 Budget included \$15 million for traditional alternatives to State hospital placement and for the support of community treatment programs as the first stage of a three year Mental Health initiative. The 1980-81 Budget, as the second year of this effort, proposes \$10 million to continue development of alternative programs to State and local hospital use. In addition, the 1980-81 Budget proposes \$15 million to achieve the goal of a 600 bed State hospital reduction by June 30, 1981. Funds in 1979-80 are expected to achieve a 300 bed reduction. The Budget is predicated on this reduction which will also result in part-year savings which are available for transfer to local mental health programs as the in-patient population reductions are made approximately \$5.4 million will be available from the State hospitals for transfers to local mental health agencies for further reductions on the use of State hospital services.

The Department is currently preparing a five year projection for implementing alternatives to utilization of state operated psychiatric facilities. This plan, mandated by SB 354, will address the need for state psychiatric hospital services for the mentally disabled through June 30, 1984. This plan will include a targeted 1500 bed reduction by June 30, 1982 in hospitals for the mentally disabled, 600 of which is funded by the \$15 million augmentation for 1980-81.

Based on local program requirements and a review of potential patient needs, the Department is anticipating relicensure of certain parts of existing acute psychiatric facilities to the more appropriate classifications of intermediate care or skilled nursing categories. Pending completion of the Department's review, the budget is based on existing licensure categories and on continuation of the staffing patterns approved in the Budget Act of 1979, plus the partial implementation of staffing ratio recommendations made by the Department's ACR 103 report of 1978.

The 1979-80 Budget includes \$750,000 added by AB 1438 which has been augmented to \$1,000,000. In 1980-81 this additional \$250,000 in conjunction with the base will be used to implement pilot prevention programs in counties that will focus on self-help, information, and education.

The Budget proposes \$1,411,654 and 92 positions to begin a pilot program at Napa State Hospital to implement the first stage of the prescriptive programming model as proposed in the Department's response to ACR 103.

The Budget proposes an additional \$26,153,905 for cost of living increases for local mental health programs and local programs for the judicially committed excluding State hospitals. This represents a 9 percent increase over 1979-80.

I. PREVENTION

Program Objectives and Description

The prevention program develops and supports innovative efforts to promote mental health. These efforts focus on a wide range of life style and behavior factors that have been identified as contributing to personal well-being and which are generally within the control of the individual. This program seeks to increase the individual's capabilities to make rational decisions free of mental disorder or emotional dysfunction.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Totals, Prevention (General Fund).....	3.2	7.8	9.3	19,949,182	21,700,967	24,153,230

Consultation. Consultation is the provision of technical assistance by a mental health professional who shares his/her skills, knowledge and training with allied professionals or other community care givers to increase the latter's understanding of human behavior and to improve relationships with clients.

## DEPARTMENT OF MENTAL HEALTH—Continued

**Education.** Education is a learning process which imparts principles of sound personal and community mental health to professional individuals and groups and the general public.

**Information.** Information is a process of disseminating facts about mental health services and methods to the general population and/or particular target populations.

**Outreach.** Outreach includes those activities directed toward interdicting problems of high-risk groups. Such activities may take the form of a brief crisis intervention in a community setting to an individual who has not become an identified patient or client.

**Community Organization.** Community Organization is a process which a community employs to identify local mental health needs and to initiate action to aid its existing social systems in preventing mental illness.

## II. TREATMENT

## Program Objectives and Description

Over 450,000 people a year require prompt diagnosis and short-term crisis intervention for mental disorders. For those people requiring further treatment, there is a need to provide a longer duration of intensive and convalescent treatment or conservators for those adjudged to be gravely disabled.

The mental health treatment program seeks to achieve a single system of care for all mentally ill, a system that coordinates services provided by the state with services provided by local government and private agencies, and which assures a humane and legally sound process for involuntary care and treatment.

Current treatment systems and methods have changed radically from those in general use in the past. However, the principles of psychotherapy and chemotherapy with psychotropic drugs, which have revolutionized patient care, are most often used in individual or group psychotherapy.

Court ordered involuntary treatment includes the following:

1. Conservatorship for gravely disabled individuals.
2. Involuntary detention for diagnosis for up to 72 hours for potentially dangerous mentally disordered persons.
  - a. Treatment and evaluation
  - b. Treatment and evaluation of chronic alcoholics
3. Involuntary detention for up to 14 days for treatment for dangerous persons.
4. An additional 14-days of intensive treatment for suicidal persons.
5. Ninety-day treatment for persons potentially dangerous to others.

An intensive psychiatric treatment facility has as two of its primary responsibilities prompt diagnosis and treatment of psychiatric disorders and restoration of the individual to an optimal level of functioning in the community. Every person with a psychiatric disorder is a unique individual with unique problems and needs. To respond to them appropriately, staff members must bring to bear multiple bodies of theory and knowledge and many modes of evaluation and treatment. Examination will lead to a differential diagnosis that, in so far as possible, identifies etiology, symptoms and needs. Planning for treatment, whether by a staff group or an individual therapist, must take into account all physical, social, educational, and psychological factors affecting each patient's condition.

The Department of Mental Health operates two hospitals: Atascadero State Hospital and Metropolitan State Hospital. Programs for the mentally disabled are also administered by the Department of Developmental Services through a contract with the Department of Mental Health.

The 1980-81 budget proposes to establish a Medical Records Consultant at a cost of \$46,973 to set standards and develop policies concerning clinical records and to conduct training to insure that clinical records in the state hospitals are maintained properly and meet all required standards.

The 1980-81 budget also proposes to add five Painter Is and one Refrigeration Engineer to Atascadero State Hospital to continue a regular painting schedule for the hospital and increase the frequency of preventive maintenance work.

The budget proposes to establish one Pharmacist I and one Pharmacy Assistant to the Pharmacy at Atascadero State Hospital to educate staff and monitor drug usage. The cost of this addition is \$45,278.

The budget proposes to establish five Dispatcher-Clerk positions and eliminate 2 Peace Officer I positions at Atascadero State Hospital at a cost of \$33,760. This staff will be used to monitor the Fire Alarm/Life Safety and Security Alerting System.

The budget proposes to establish one Fire Fighter at Atascadero State Hospital to provide two person coverage on each shift in accordance with State Fire Marshal standards.

The budget proposes the addition of four positions at Atascadero State Hospital at a cost of \$87,765 to continue a statewide system of referral and supervision of Mentally Disordered Offenders. This program has been funded by an NIMH grant which expires May 31, 1980.

The budget proposes to transfer \$3,203,130 to the Department of Alcohol and Drug Abuse. These are funds currently budgeted for Metropolitan State Hospital to provide drug abuse treatment and will be continued for that purpose under the Department of Alcohol and Drug Abuse. Such a transfer would be consistent with other actions which have identified and transferred mental health funding for discrete drug abuse programs from the regular Short-Doyle appropriation to the drug abuse appropriation. Additionally the budget proposes to transfer \$709,000 to the Department of Youth Authority for the continuation of the Medical Psychiatric Program at the Southern Reception Center and Clinic. In 1979-80, the Department of Mental Health funds this program by interagency agreement.

The budget also proposes a reduction of 85.4 level of care positions at Atascadero and Metropolitan and 308.4 level of care positions for mental health programs in facilities operated by the Department of Developmental Services based on a population decrease of 600 during 1980-81. This will result in a savings of \$1,247,044 in the Department of Mental Health budget.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

## Program Elements

Acute 24-Hour Residential .....	1,216.4	1,319.1	1,300.4	\$117,227,103	\$132,967,294	\$150,241,619
Extended 24-Hour Residential .....	1,298.9	1,367	1,336.1	97,045,265	117,975,783	132,267,082
Intermediate and Extramural .....	-	-	-	115,465,280	125,060,064	137,917,495

## a. Acute 24-hour (Residential)

Acute 24-hour residential treatment services (voluntary and involuntary) are provided to individuals very disturbed in functional mental status and/or behavior. Such individuals require immediate, intensive, round-the-clock, medically-supervised treatment intended to restore them to a prior level of functioning. Duration of intensive treatment in an acute residential psychiatric program does not exceed 30 days, and is often less than 10 days in a therapeutic environment of care and treatment, within a residential hospital setting.

## DEPARTMENT OF MENTAL HEALTH—Continued

## b. Extended 24-hour (Residential)

24-hour extended residential care takes place in a facility or system of facilities licensed by the Department of Health Services as other than an acute general hospital or an acute psychiatric hospital, and which has 24-hour nursing coverage as a minimum. Treatment facilities falling into this category will generally be skilled nursing facilities and intermediate care facilities, but include other residential facilities in which the patient's life is directly managed 24-hours a day.

The goal in development of such is the creation of a continuum of care that allows for treatment in the least restrictive, most normative setting appropriate to the needs of each individual. In any or all of the facilities, the intent is to provide a range of settings to assure specific prescribed services as needed.

Twenty-four hour extended services are envisioned in settings ranging from general hospitals to those supplying general medical care and socialization support.

## c. Intermediate and Extramural

Many persons may be treated by a visitation or on a partial residential basis, either before or after 24 hour residential treatment. This may be the only intensity of care needed to restore them to normal functioning capacity. Such treatment is far less expensive than inpatient service and has the advantage of allowing patients to continue with their usual living, working, and social arrangements. Intermediate programs make use of all the latest treatment techniques including group psychotherapy, drug therapy, psychodrama and children's play therapy in order to accommodate as many types of patients as possible. Extramural programs utilize staff on a mobile basis to take services to homes, jails, schools and affiliated facilities.

The treatment offered is goal-directed and time-limited. Setting a time limit on the duration of the treatment is helpful both to the staff and the patient. The right intervention made at the right time may be far more therapeutic than long indeterminate periods of treatment. Members of the patient's family are frequently involved in the treatment process. Day treatment is one form of such intermediate care programs. The purpose is to provide a program of scheduled therapeutic activities and other treatment modalities and is designed for patients with mental and emotional disorders who need spend only part of a 24-hour period in the activity. It can be highly adaptable, both as to type of program and range of treatment opportunities afforded the therapist.

All three program types are integrally related to psychiatric services available on an emergency basis to disturbed persons and to their families, 24 hours a day, 7 days a week. Psychiatric emergencies, like physical emergencies, can be effectively handled only if services are available. Such services can be provided in a variety of settings such as crisis intervention teams, walk-in clinics, hospital emergency rooms or private psychiatrists offices.

DEPARTMENT OF MENTAL HEALTH—*Continued*

## d. Forensic Services

Forensic programs screen, evaluate, and treat adult and juvenile mentally ill within the aegis of the criminal justice system. They provide service to defendants lodged in state psychiatric hospitals while awaiting judicial disposition and to those adjudicated mentally ill (—i.e. not guilty by reason of insanity, incompetent to stand trial, or mentally disordered sex offenders). Forensic programs work closely with criminal justice agencies to ensure timely and effective diagnosis, treatment, and aftercare for the mentally ill offender, and provide after care programming for this population.

Each county mental health program provides services to this population based on local resources and the extent of the identified need. Local forensic programs identify the mentally ill and either treat them in jail or arrange for their transfer to state psychiatric hospitals or other mental health facilities. Once a defendant is found insane, incompetent to stand trial, or a mentally disordered sex offender, he is evaluated by a local mental health professional for a recommendation as to whether he should be treated in a state psychiatric hospital or directed to outpatient treatment. A patient nearing the end of treatment in a state psychiatric hospital may be placed in the community with the prior approval of the mental health director, the patient, and the committing court. Forensic staff are available to local criminal justice agencies for emergency evaluations, consultation, training, and treatment.

Mentally ill patients in the criminal justice system face a very difficult situation in that they are not only mentally ill but are also facing legal charges and typically have multiple social, behavioral, and financial problems. Historically, services for this population have been considered low priority by local mental health programs. The method of interface with the criminal justice system varies from county to county and is usually poorly coordinated, which severely limits the provision of adequate services to the jailed mentally ill. In addition, only sixteen counties have approved local programs for the post-hospital treatment of defendants no longer in need of a secure hospital treatment environment who are deemed not to be dangerous if placed in community outpatient treatment. Because of the complex nature of providing treatment to these persons, the knowledge necessary to interpret laws and keep abreast of judicial interpretations, as well as the need to provide well-informed expert testimony, upgrading of the professional skills of staff already in the field through extensive training and periodic continuing education is urgent. *This budget supports expansion and improvement of state psychiatric facilities and local secure facilities and support programs for mentally ill offenders. A portion of the \$10 million augmentation for traditional local mental programs will be used for this purpose.*

## III. COMMUNITY SUPPORT

## Program Objectives and Description

The treatment of most mental disorders can be best done in community settings. A complete network of services must be available to meet a full range of client needs including emergency, crisis intervention, evaluation and diagnosis. The more closely these affiliates are located in relation to the patient's home, the more effective the results.

## Objectives

1. To help the client function adequately and independently.
2. To provide help for the person at the time of need.
3. To provide a service which is primarily supportive to or a replacement for isolated inpatient services.
4. To provide an intensive, inexpensive service close to the client's home.

The treatment goal is the rehabilitation of the client; consultation with the client's family, friends or employer is a part of that treatment.

Community support programs have developed various types of treatment modes: group psychotherapy, which reaches large numbers of patients effectively and inexpensively; drug therapy; children's play therapy; and in some cases programs of home visits have been developed. Treatment is frequently goal-directed and time-limited. Setting a time limit on the duration of the treatment is helpful both to the staff and the client. The right intervention made at the right time may be far more therapeutic than long periods of treatment.

Often community support programs maintain current and comprehensive files of all community services, both public and private, as part of a pre-care service. Such a file may facilitate advising persons of available services which can prevent initial recourse to psychiatric treatment. Another kind of pre-care service is the judicially-ordered evaluation to determine if a person can be served properly after being detained and if she/he can be provided evaluation, crisis intervention, or other services on a voluntary basis. Also provided are after-care services which support the individual's adjustment to community living following treatment.

Community support programs serve transitional clients with impaired abilities to cope due to crisis states, emotional disturbances or mental disorders. These programs are intended to assist clients to move to less protective care or more independent functioning. Community support programs include adolescent group homes and adult halfway houses for example. Clients who are severely and chronically disabled and who may be difficult to manage due to serious mental disorder are provided rehabilitation services in closely supervised and structured rehabilitation programs designed to improve their functioning. Supervised out-of-home placement is provided for residents who are chronically disabled and whose needs are basic and who require only supervision.

The 1980-81 budget proposes 8.5 positions on a one-year limited term basis to support the Community Support Project. This project is federally funded and will expend \$350,000 in 1980-81. These 8.5 positions were administratively established in 1978-79 and 1979-80.

The budget also proposes to redirect six positions to establish additional clinical expertise for the Service Area Teams. This staff will assist counties in reducing state hospital usage and in developing alternative community resources.

The budget also proposes the establishment of a nine-position unit to conduct utilization review of services in the Short-Doyle/Medi-Cal Program. The unit will provide pre-audit training, monitoring, and evaluation, to maximize federal revenue within the Short-Doyle/Medi-Cal Program while minimizing the risk of audit exceptions. The cost of this unit is \$322,472 in 1979-80 and \$311,252 in 1980-81 and will be funded through a combination of federal funds (\$128,021 in 1979-80, \$123,567 in 1980-81) and existing General Fund (\$194,451 in 1979-80, \$187,685 in 1980-81), requiring no additional General Fund support.

In furthering the intent of AB 3052 of 1978, \$11.8 million was appropriated for the development of a system of treatment programs, based on the principles of a social rehabilitation model. In 1980-81, the Budget includes an annualized level of \$12 million for this program. Preferred programs would be not more than 15 persons in a residential setting and the use of a wide range of staff. Linkages with other parts of the system were mandated and case managers are essential to see that clients receive the right services at the appropriate time and place.

The Budget Act of 1979 appropriated \$15,000,000 to the Department for residential treatment programs and community support services as alternatives to state and local hospital services. Moneys were held in reserve until a report was made to the Legislature, at which time they were reappropriated by Chapter 1172 (AB 1438). Funds were allocated to counties based on their submission of an approved plan. The 1980-81 budget includes an additional \$10 million to continue development of alternative programs to State and local hospital use. The Budget also includes an additional \$15 million to achieve the goal of a 600 bed State hospital reduction by June 30, 1981.

h. Semi-Independent Living.....	-	-	-	250,892	1,254,460	1,380,117

## a. Rehabilitation

Rehabilitation provides counseling and social rehabilitation services for clients living in facilities with little or no day treatment component. Ideally, the service is nonhospital based and has a functional orientation with prevocational and vocational services.

Prevocational is a long-term "habilitation" service for the seriously disturbed or multiply handicapped. The main focus is on attitudinal, motivational, emotional, and/or physical blocks which impede functioning. Orientation is toward skill seeking and skill enhancement which point toward vocational goals. Prevocational programs are logically attached to residential facilities.

Vocational programs provide vocational experiences which will enhance an appreciation and understanding of the reality of work.

Some vocational services may be permanently "sheltered" in the sense they are permanently programmed for people who have reached their optimum level of vocational growth.

## b. Socialization

Socialization provides for appropriate activities designed to prepare individuals for independent living. Orientation and emphasis are toward the elderly and those living in Board and Care Homes or semi-supervised housing. Activities are for multiple age groups and are ethnically and culturally appropriate.

## DEPARTMENT OF MENTAL HEALTH—Continued

## c. Sheltered Workshops

Sheltered Workshops are nonhospital based programs lasting less than 24 hours and designed for the chronically mentally ill client who is unable to participate in competitive employment. These programs include vocational and rehabilitation counseling, work training, and vocational evaluation. These programs stress development of sound work habits and skills, and social functioning for marginally productive individuals. There may be provisions of remunerative employment for individuals who are capable of partial self-support in a sheltered work environment.

## d. Patients' Rights Advocacy

The "Patient's Rights Advocacy" category includes those activities undertaken on behalf of mentally disordered persons to protect their rights or to secure or upgrade treatment or other services to which they are entitled. Advocacy can take any of the following forms:

- "Case advocacy", meaning intervention on behalf of individual clients by an approved advocate;
- "Program or systems advocacy", meaning intervention on behalf of a group of mentally disordered persons by an approved advocate in a nonjudicial forum; or
- "Legal representation", meaning representation by clients attorneys in legal issues, in or out of courts of law, relating to or deriving from their clients' mental disorders.

Objectives for patients' rights advocacy include:

1. Ensuring that a list of the rights contained in Welfare and Institutions Code Section 5325, et seq., and in Title IX, California Administrative Code is posted in all facilities as required in CAC Section 862.
2. Ensuring that all incoming clients are notified of their rights and that the client record is so noted.
3. Assisting in the training all mental health system personnel in patients' rights. Such training takes place immediately and continuously.
4. Investigating complaints. A clear, written and published manner of registering a complaint must be available to clients.
5. Acting as client advocate for clients who are unable to register a complaint.
6. Identifying gaps in the system where clients' needs are not being met.

## e. Case Management

Case Management is a process of identification, assessment of need, planning, coordination, monitoring, and constant evaluation of clients and available resources, in order to achieve the best possible resolution to individual needs in the most efficient and effective way.

Review and planning by the case management system must be provided for individuals who meet one or more of the following criteria:

1. Mental health system clients whose disabilities have resulted in the need for acute inpatient service or established community alternatives to inpatient service.
2. Mental health system clients who are legally declared to be conservatees, or temporary conservatees, under the provision of the LPS Conservatorship Act.
3. Mental health system clients whose disabilities and circumstances indicate the need for continuing care intervention to minimize probability of further disability and potential for hospitalization.
4. Mental health system clients who require assistance in planning for financial support, medical care, housing, and legal services.
5. Mental health system clients whose current functioning indicates an inability to seek and utilize community resources independently.

The comprehensive case management system shall be a distinct and identifiable program component within the mental health system of each jurisdiction responsible to the Director of Mental Health, or designee, capable of assuming full responsibility for the assigned tasks and target population, with sufficient vested authority within the system to intervene efficiently and effectively on behalf of individuals in need.

It is essential that a patient/client who is receiving case management services is able to engage, to some extent, in active treatment planning for him/herself.

Another key factor in successful case management is the ongoing involvement of all individuals responsible for treating the client.

Effective case management requires close coordination and communication among persons involved in treating the client. Major planning decisions and changes in a client's treatment plan are to be made with the involvement of the client, family, and the entire helping team.

## f. 24-Hour Habilitation and Rehabilitation

Twenty-four Hour Habilitation and Rehabilitation is that category of care aimed at those persons who have traditionally been relegated to State hospitals because of behavior or manifestations that have caused them to fail in community care facilities. They must be taught socially acceptable behavior, and they must also learn to be independent of the traditional institutional structure. The patient is generally young with multiple problems but may also be aged or brain-damaged.

Staffing is weighted heavily toward occupational and rehabilitational therapies but may also include reality orientation for the elderly persons. The medical component is generally supplied by outside physicians not on the facility staff. While this area of care is termed 24 hour, much of the patient treatment takes place off-site in Short-Doyle funded out-patient and day-treatment programs.

## g. Satellite Housing and Supervised Out-of-Home Placement

Satellite Housing and Supervised Out-of-Home Placement services are the traditional board and care or group homes. The patients are long-term, dependent persons who require supervision to function in a community setting. The number of beds available for the mentally ill in this category have become fewer each year as the cost of living and real property make operation of this type of home economically unworkable. However, when properly operated, these services will expose residents to the full range of supportive social services, including Short-Doyle funded out-patient care and day-treatment. The patients are chronically disabled due to mental disorders, substance abuse or aging. Most are eligible for SSI and Medi-Cal.

## h. Semi-Independent Living

Semi-Independent Living takes place in an apartment house or a group home with a client self-government atmosphere. Here several clients live in a cooperative, self-help environment and are responsible for various household chores and personal maintenance. Staff come in for a few hours during the day and/or evening hours to assist and offer guidance to clients trying to become self-sufficient and responsible for their physical and personal needs.

## IV. CONSERVATORSHIP

## Program Objectives and Description

Conservatorship under the LPS Act is a legal mechanism for ensuring that needed mental health and related services are provided to persons who are gravely disabled because of mental disorder or chronic alcoholism and who are unwilling or unable to accept treatment voluntarily. Conservatorship may be of the person only, of the estate only, or of both.

	78-79	79-80	80-81	1978-79	1979-80	1980-81
Program Requirements

b. Conservatorship Investigation .....	-	-	-	1,267,076	1,355,771	1,491,577

## a. Conservatorship Administration

Conservators are responsible for assuring that each conservatee has an appropriate living plan and is securing necessary services. The Conservator of estate is responsible for assuring that the conservatee's assets and income are protected and disbursed in the best interests of the conservatee.

## b. Conservatorship Investigation

Upon receipt of a referral from an authorized treatment agency, the conservatorship investigation officer of the county conducts an investigation to verify the need for conservatorship, determines which alternatives, if any, may be workable, identifies the person or persons who might be conservators and prepares a report of findings and recommendations to the court.

## V. TRAINING AND PROFESSIONAL DEVELOPMENT

Training and professional development is the area of developing professional standards and recruiting and utilizing staff. The program has the following goals: First, to recruit and retain high quality personnel into the mental health delivery system. Through this process, highly effective professional development affiliation programs function in key universities and colleges to assure the availability of professionally skilled staff persons qualified to meet professional management and development needs. Second, to form affiliations with outside agencies affected by mental health personnel programs. Third, to develop comprehensive inducements that will attract professionals to the rural areas of our State which have traditionally suffered from difficulty in attracting sufficient numbers of fully trained Mental Health personnel. Fourth, to create and maintain formal linkages with universities, colleges, and community colleges to effectively aid in the development of relevant education programs.

The professional development component is working to develop and enhance its capacity to increase the relevance and responsiveness of existing professional development resources. Urgent service-improvement demands these efforts include: Beginning coordination of new professional production resources (universities and colleges); continuing education resources and local program education and training resources; assessing impact of Proposition 13 reductions on professional supply issues; and supporting efforts to deal with urgent issues such as increasing capacity to serve chronically mentally disordered clients; and increasing the availability of culturally relevant services to minorities. The training component conducts needs assessment and planning to identify the most urgent training needs within the mental health delivery system. The health training center in Berkeley, which serves 46 northern counties, does this through contacts with individual community programs; and the training center in Los Angeles, which serves the 12 southern counties, does it with county and regional advisory committees.

## VI. ADMINISTRATION

## Program Objectives and Description

The Administration program provides a supportive structure to the Department's service delivery programs and managers. The program provides oversight, monitoring and consultation to local mental health programs and carries out legislative mandates for such activities. The program is charged with providing the Department with the administrative assistance necessary for efficient acquisition and use of its materials and of its human, fiscal and information resources.

To coordinate information regarding minorities from departmental sources and external sources to give the director a clear overview of minority concerns relating to delivery of mental health services a special assistant for minority affairs has been established. The special assistant will maintain

## DEPARTMENT OF MENTAL HEALTH—Continued

contact with all divisions of the department, area teams and special projects, to stay abreast of the most current information on minority programs; gather information from county mental health services; develop liaison with special interest minority groups through the state; meet with Community Mental Health staff, Mental Health Advisory Boards, Mental Health Chapters, volunteer groups and other pertinent groups and public officials. These contacts will facilitate ongoing communication, exchange of information, solving of problems, representation of the director, preliminary investigation of problems, and assessment of public opinion. In addition, the special assistant for minority affairs serves as staff liaison to the monitoring action committee.

To comply with Chapter 1194 of 1979 (SB 951), the Department has established the Rates Development Section. It will primarily establish and maintain an equitable system of payment for the special needs of mentally disordered persons in private residential care facilities. It will also establish eligibility criteria for such facilities, adopt regulations and policy guidelines for counties, and make a comprehensive assessment of community care licensing standards for the care of mentally ill persons. As required by Chapter 1194, a report with recommendations will be made to the Legislature by July 1, 1980.

The Management Information Retrieval Branch provides Electronic Data Processing (EDP) support for the Department, to include both new development and maintenance of existing EDP Systems. Recent emphasis has been placed on use of EDP technology in support of both clinical operations and management information. AB 1438 of 1979 appropriated \$300,000 for development of a statewide mental health information system. This system will support county mental health programs and will interface with high EDP technology systems being developed for the State hospitals.

The Office of Children and Youth is developing and will maintain an integrated system of services for emotionally disturbed children and youth in the State of California. This office assists the counties in developing a continuum of services which includes prevention, intervention, treatment and follow-up services within local communities. To assure the quality of all mental health programs for children, a plan that includes interdisciplinary training, program standards, monitoring procedures will be implemented in Fiscal Year 1979-80. To reduce the dependence on expensive centralized, long term state and private facilities, at least five residential treatment programs, in five dissimilar counties, will be established in Fiscal Year 1980-81.

The Department through the Office of Prevention, is working with Local Mental Health Programs in the following areas: to clearly delineate the conceptual and operational frameworks for prevention and mental health promotion; provision of training and technical assistance in program development; establishment of a comprehensive resource clearinghouse; design and support of innovative research projects; consultation in the development of mutual aid/self help networks; and systematic efforts to link funding resources as well as prevention/promotion programs across public and private sectors.

In Fiscal Year 1979-80 the Department of Mental Health accomplished a significant reorganization. The Department is now organized into the Director's Office and four Division Offices: Division of Special Services; Division of Planning Development, Research, and Evaluation; Division of Clinical Operations; and the Division of Administrative Operations.

This organization is intended to enhance responsiveness to statutory, professional, and ethical concerns. It essentially consisted of a realignment of existing fiscal and personnel resources and the delineation of managerial accountability. The reorganization was accomplished with no additional cost and will considerably improve the effectiveness of the Department.

The six Service Area Teams were established to augment the clinical and technical capacity of local services, as well as to provide quality assurance and improved liaison between the Department and the County Mental Health Programs. The Service Area Teams report directly to the Director of the Department. This ensures that the lines of communications are short, the responsibility and accountability for the programmatic support of community mental health services are clearly delineated and the relationships with the Local Mental Health Directors are strengthened. This organizational structure gives emphasis to the departmental concerns and priorities for a strong and effective statewide mental health system.

The 1980-81 budget proposes to establish one position in the Contract Management Section at a cost of \$21,585 to administer the increased workload in processing mental health contracts.

The budget proposes to establish four positions in the Audits Section at a cost of \$113,609. These positions will help assure compliance with the eligibility verification requirements of the Short-Doyle/Medi-Cal contract with the Department of Health Services as well as expanding audit coverage to include all Short-Doyle/Medi-Cal providers.

The budget proposes to establish one position at a cost of \$46,000 in the Data Base Management Section to develop a new automated patient registry system to identify how many and what types of patients are being served in community mental health programs and at Metropolitan State Hospital.

The budget proposes to redirect one position from the Health and Welfare Agency to the Department of Mental Health. The position was fully funded in 1979-80 by an interagency agreement and will be assigned as Chief of the Management Services Section.

The budget proposes \$309,639 to establish seven positions for the Metropolitan State Hospital Client Information System. This project will automate the functions at the hospital related to admissions and will develop a file of patient information which will be used for bed control, patient tracking, and hospital population analysis.

The budget also proposes one office assistant II at a cost of \$17,014 in the Analysis and Information Section to edit, batch, and correct Short-Doyle/Medi-Cal claims. This new function is required because of the automation of the claiming process and the inclusion of Short-Doyle/Medi-Cal claims on the Medi-Cal Paid Claims File.

c. Supportive Services .....	(184.5)	(188.2)	(196.6)	(5,423,007)	(5,154,420)	(5,642,847)

## a. Planning, Development, Research, and Evaluation

The mission of the Planning Development Branch is to translate Department policy and legislation into plans for implementation and to propose alternate strategies to management for meeting the mental health needs of the citizens of California. The primary responsibility of the Planning Development Branch is to develop a comprehensive State mental health plan and provide guidelines to local mental health planners.

The mission of the Research Branch is to initiate, develop and implement a high quality Department research program which will foster, encourage, support and conduct a broad spectrum of clinical and applied studies which have a potential for improving diagnostic, treatment and prevention services and practices for persons suffering mental disorder or with a potential pathological mental or behavioral condition.

Evaluation uses scientific methods to analyze the effectiveness of mental health service delivery programs. This element translates Department and Legislative mandates for evaluation into action programs, tests the impact of program changes and communicates the results to Department management, legislative and control agency representatives, local program staff and the public. Technical assistance on the design and conduct of analytic studies related to the operation of mental health programs is provided to Department managers. Staff recruit, organize and lead multi-disciplinary task groups for the purpose of analyzing existing mental health service delivery systems in terms of their efficiency, effectiveness and adherence to Department policy and philosophy.

## b. Service Areas

Service Area teams have been established to assist the Director of Mental Health in establishing policy for and in directing and monitoring local community mental health delivery systems in the six (6) areas of the State (Los Angeles, Southern, Central Coast, Bay, Central Valley and North State). The Service Area teams, composed of multi-disciplinary mental health professionals, provide advice, consultation and technical assistance to local community mental health management in conjunction with the Office of Continuing Care.

## DEPARTMENT OF MENTAL HEALTH—Continued

## c. Supportive Services

Provides to headquarters and field operations support and control services for the efficient management of the Department's program resources in the areas of systems analysis, statistical information management personnel services, labor relations, budget management administrative operations analysis, purchasing, equipment and space management, office services and financial management.

## VII. LEGISLATIVE MANDATES

This program reflects the cost of reimbursing local governments for (1) property tax revenue loss, (2) new programs, and (3) increased level of existing services mandated on local entities by legislation or executive regulations.

## Authority

The State is required to pay the cost of legislative programs mandated on local governmental entities by Chapter 1406, Statutes of 1972 (SB 90), as amended by Chapter 358, Statutes of 1973. These two pieces of legislation apply to mandates effective after January 1, 1973. As added by such legislation, Section 2229 of the Revenue and Taxation Code provides for reimbursement of lost personal property tax revenues, while Section 2231 provides for the reimbursement of costs of legislative mandated programs.

## Program Requirements

	1978-79	1979-80	1980-81
Totals, Legislative Mandates.....	\$212,105	\$313,660	\$313,660
General Fund .....	212,105	313,660	313,660
Chapter 1061, Statutes of 1973.....	182,105	283,660	283,660
Chapter 1039, Statutes of 1978.....	30,000	15,000	-
Chapter 991, Statutes of 1979.....	-	15,000	30,000

## Mandate: Required Administrative Staff

Chapter 1061, Statutes of 1973, revises provisions for review and submission of county Short-Doyle plans, makes changes to timing of submissions, adds language providing for certain precare and aftercare services, provides that each county mental health program which serve a population in excess of 100,000 shall have one or more staff skilled in the management of administrative support functions supervising such functions, and provides that the Department of Mental Health shall submit a five-year plan for local mental health services by October 1 of each year.

This mandate impacts only upon counties in the following manner:

- (1) Include a quality control system, a placement directory, and training program in each county Short-Doyle plan.
- (2) Perform administrative support functions in local mental health services with staff skilled in those functions.

## Mandate: Required Local Recombitment Trials

Chapter 164, Statutes of 1977, enacted Section 6316.2 of the Welfare and Institutions Code, which contains procedures for extending the commitment of dangerous mentally disordered sex offenders. Chapter 1039, Statutes of 1978, extends the self-repealing provision in Section 6316.2 from January 1, 1979 to January 1, 1980 and provides for payment of court and related costs for mentally disordered sex offender recommitment trials. Chapter 991, Statutes of 1979, makes the provisions of Section 6316.2 permanent by eliminating the self-repealing provision.

This mandate impacts upon counties in the following manner:

Provide for the transportation, care, and custody of the patient, and all trial and related costs in accordance with the procedures for extending the commitment of dangerous mentally disordered sex offenders.

## EMPLOYMENT DEVELOPMENT DEPARTMENT

The Health and Welfare Agency through the Employment Development Department (EDD) provides comprehensive statewide and local manpower planning, improves the efficiency of and accountability for delivery systems for manpower programs, places job-ready individuals in suitable jobs, provides qualified job applicants to employers, assists potentially employable individuals to become job ready, creates employment opportunities, collects employer and employee contributions to the Unemployment and Disability Insurance Funds, and pays unemployment and disability insurance benefits. It also collects the Personal Income Tax for the Franchise Tax Board.

The department's overall program is designed to achieve five essential, interrelated and interdependent goals. The goals are:

1. Provide job placements.
2. Furnish job placements and related services to low-income clients.
3. Maintain an unemployment insurance and disability insurance benefit payment system.
4. Provide service to employers.
5. Place welfare recipients in jobs.

EDD offers a broad spectrum of services to employables and their potential employers, including current and localized labor market information, instructions in job and employer requirements, seek-work methods, training and education in demand occupations, job development with employers and industries, placement services and follow-up to improve job retention.

The resources and programs of the State Office of Economic Opportunity are integrated into the objectives and programs of the department.

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
I. Employment and Employment Related Services .....	\$315,791,034	\$321,005,671	\$302,876,767

### SIGNIFICANT PROGRAM CHANGES

I.a. California Jobs Tax Credit, Chapter 1182, Statutes of 1979, provides State credit to employers who hire the economically disadvantaged and disabled who are dependent on public aid not covered under the federal Targeted Jobs Tax Credit Program.

I.b.5. The California Worksite Education and Training Act of 1979, Chapter 1181, Statutes of 1979, provides for a program of classroom instruction combined with worksite training in jobs that will provide career opportunities to youth and low income participants. Projects funded under this program will involve local education agencies and private sector employers in the joint identification of needed job skills. Two million dollars of State Youth funds will augment the funding of California Worksite Education and Training Act youth projects. Additionally, the Department of Developmental Services will provide \$1,016,497 for the development of projects under this program in state hospitals and community settings.

I.c.4. The Comprehensive Employment and Training Act Reenactment of 1978 provides funding for encouraging coordination and establishing of linkages between prime sponsors and appropriate educational institutions and other institutions providing training programs.

II.a.1. Unemployment Insurance (UI) Taxation: The Revenue Act of 1978, Public Law 95-600, requires that EDD furnish each UI claimant and the Internal Revenue Service with UI compensation paid to each claimant during a calendar year for income tax purposes.

II.a.2. Chapter 1053, Statutes of 1979, provides for three increases in UI benefits to occur effective January 1, 1980, May 1, 1981, and January 1, 1982 to increase the current weekly UI benefit amount of \$104 to \$136. Chapter 1053 will also: revise the average weekly wage schedule which determines the weekly UI benefit amount; tighten UI benefit eligibility requirements; and increase incentives for obtaining part-time work.

II.b. Four legislative bills impacting the DI Program were passed during 1979:

AB 298 provides that persons filing 1979 personal income tax returns may claim a portion of their 1979 DI contributions as a tax credit;

AB 758 increases maximum disability benefits;

AB 780 waives the seven day noncompensable waiting period for certain individuals;

AB 1353 provides private sector disability benefits and nonindustrial disability benefits for state employees for pregnancy on the same terms as other disabilities.

IV. The budget proposes a \$285,750 General Fund increase in 1980-81 as a result of the Federal Government's change in the match requirement from an 80 percent Federal/20 percent State match to a 50 percent Federal/50 percent State funding ratio for the State Office of Economic Opportunity.

### I. EMPLOYMENT AND EMPLOYMENT RELATED SERVICES PROGRAM

#### Program Objectives and Description

The citizens of the State of California benefit from having a stabilized and growing economy. However, many employer openings remain unfilled with a loss in production of goods and services, and at the same time large numbers of potential job applicants are unable to find employment and suffer wage loss and reduced buying power.

This program is to provide the means to serve employers and applicants by reducing the length of time a person is unemployed and the length of time a job is vacant.

5.9 new positions have been administratively established in the current year and are proposed for 1980-81 to administer the California Jobs Tax Credit Program established by Chapter 1182, Statutes of 1979.

25 new positions have been administratively established in the current year and are proposed for 1980-81 to implement Chapter 1181, Statutes of 1979, which established the California Worksite Education and Training Program. Chapter 1181/79 appropriated \$25 million General Fund for a three year program. The Department plans to expend \$10 million in the current year, \$8 million in the budget year, and the balance of \$7 million in 1981-82 fiscal year.

For the list of standard (lettered) footnotes see the end of the Governor's Budget.

**a. General Employment Services**

The General Employment Services Element provides a labor exchange whereby employer job openings are obtained and qualified applicants are matched with suitable employer job openings, and labor market information on employment and unemployment in local areas is gathered, analyzed and disseminated to prime sponsors, schools and other interested parties. General services include outreach, interviewing, testing, counseling, referral to placement, training, and other services in readying individuals for employment.

**Authority**

Federal: Wagner-Peyser Act; Title III, Social Security Act; Presidential Executive Order 11422, August 20, 1968; Comprehensive Employment and Training Act of 1973, as amended.

State: Unemployment Insurance Code, Division 3.

**Output**

**b. Special Group Employment Services**

Special Group Employment Services includes a multifaceted array of services designed to assist hard to place persons in securing worthwhile, productive work. These persons may be disadvantaged in the job market for a variety of reasons, including: lack of skill, training or experience; age; physical handicap; social barriers; cultural differences and others. The services are delivered through a number of components which are oriented to specific groups.

**Authority**

Federal: Federal WIN - Title IV of the Social Security Act, as amended by 92-223; Food Stamps—PL 95-113; Youth Employment - Youth Employment and Demonstration Project Act of 1977; Job Corps, Young Adult Conservation Corps, Disabled Veterans Outreach Program and National Alliance of Business - Comprehensive Employment and Training Act of 1973 as amended in 1978; PL 95-600, Revenue Tax Act of 1978.

State: WIN - Unemployment Insurance Code, Division 2, Service Center - Governor's Executive Order 66-11 (July 1, 1966); Chapter 1460, Statutes of 1968; UI Code, Division 1; Job Agent - Chapter 1460, Statutes of 1968; Unemployment Insurance Code, Division 3; California Worksite Education and Training Act Chapter 1181/1979; Youth Employment - Youth Employment and Development Act of 1977 (Chapter 678/77), Unemployment Insurance Code, Division 3, Displaced Homemakers - AB 138/1977, Budget Act of 1979.

**Input**

Expenditures.....	1,701.9	1,823.5	1,835.1	\$75,250,510	\$90,986,779	\$95,423,686

**b.1. Work Incentive and Related Services**

The Work Incentive (WIN) component assists recipients of Aid to Families with Dependent Children (AFDC) to obtain employment.

Employable applicants/recipients of AFDC benefits must register with EDD for employment, employment related services and training. Intensified employment and supportive services are given to employable registrants in order to assist them in obtaining regular, unsubsidized employment. Coordination of employment and supportive services is facilitated by collocation of county social services staff in EDD offices.

In an effort to obtain employment for registrants and WIN participants, EDD staff contact employers to develop jobs and orient WIN participants to the local job market through job-finding workshops.

**Output**

	1978-79	1979-80	1980-81
WIN Registrants.....	164,741	175,000	180,000

For the list of standard (lettered) footnotes see the end of the Governor's Budget.

## EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

## b.2. Food Stamps Recipients

The registration of Food Stamp recipients is to help them to become economically self-sufficient and independent by providing job placement and other employment services. Food stamp applicants must register for work, unless exempt, as a condition of continued eligibility. Those applicants for whom EDD can perform a job placement or employment related service are called in for an interview. The applicants are then considered for any job openings or services that are available. Applicants who have not been interviewed may be considered for any appropriate services as these services become available.

Output				1978-79	1979-80	1980-81
Individuals Placed .....				27,827	32,000	35,000
Input				1978-79	1979-80	1980-81
Expenditures.....	78-79	79-80	80-81			
	135	134	134	\$2,828,916	\$3,346,313	\$3,414,105

## b.3. Service Center

The service centers in eight economically depressed areas of the State provide employability development and placement services to individuals who need coordinated intensive services to become employable because they are vocationally handicapped due to disability, lack of skills, obsolescence of job skills, limited education, or poor work habits and attitudes.

Intensive employment related services provided by the eight service centers concentrate on the removal or control of barriers to employment through a case responsible approach. This approach includes orientation to the world of work, referral to other governmental or nongovernmental agencies for supportive services to address client barriers, referral to or enrollment in educational or vocational training, use of case services funds to obtain goods/services necessary for employment, counseling, testing, providing labor market information, job development, referral and placement.

The service centers serve these individuals by augmenting and expanding the employment and supportive services available from other funding sources.

The following locations have a designated Service Center: Avalon, East Fresno, East Los Angeles, Richmond, San Diego, San Francisco, South Central Los Angeles and West Fresno.

Output				1978-79	1979-80	1980-81
Enrollments.....				10,956	11,000	11,100

Expenditures.....	180.6	180.6	180.6	\$4,623,692	\$5,215,401	\$5,353,900

## b.4. Job Agent

The Job Agents Component provides intensive employment services above those normally provided by the General Employment Services Element through the efforts of Job Agents, located in 37 EDD field offices. This intensive approach includes the provision of job placement and job development activities, guidance and direction in the removal and/or control of barriers to employment, and follow-up services for clients already placed in jobs.

Clients served by Job Agents must be registered with EDD, be classified economically disadvantaged, and have one or more of eight specified barriers to employment which include lack of skills, low educational level, health problems and arrest records. Since the Job Agent is a case responsible person, total responsibility for each assigned case is retained until closure is achieved. This continual responsibility typically includes the following kinds of services: assistance in control or removal of barriers to employment, use of case services funds, referral to training, job placement, and follow-up.

Output				1978-79	1979-80	1980-81

Expenditures.....	67.3	68	68	\$1,851,983	\$2,135,983	\$2,183,698

## b.5. California Worksite Education and Training Program

The California Worksite Education and Training Act of 1979 was enacted for the purpose of integrating classroom instruction, entry and career, with worksite training in order to enhance career opportunities and career advancement for the economically disadvantaged, youth, displaced worker, structurally unemployed and persons with obsolete or inadequate job skills. California Worksite Education and Training programs will address the needs of employers for trained workers, provide marketable skills and jobs for the structurally unemployed and offer courses for workers to upgrade their skills to obtain better paying and more responsible jobs. To develop such integrated training, California Worksite Education and Training funded programs will bring together local educational and training agencies, employers, CETA prime sponsors and employee organizations to coordinate their efforts for the above stated purpose.

The Employment Development Department will administer California Worksite Education and Training funded programs in concert with the Department of Industrial Relations, Department of Education and the Chancellor's Office of the Community Colleges. Additionally, the Employment Development Department will be contracting with the Department of Developmental Services for \$1,016,497 for the development of apprenticeship programs in either state hospitals or community settings.

Output				1978-79	1979-80	1980-81

EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

b.6. Youth Employment Services

Youth Employment Services relates exclusively to those separate efforts which are undertaken to deal with the employment problems of youth. These efforts include developing employment opportunities, assisting in transition from school to work, providing basic and remedial education, training for entry level vocational skills, and teaching the self-discipline of work experience in worthwhile, productive work.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	109.4	135.1	141.7	\$21,605,372	\$16,088,474	\$18,105,717

b.6.(a) Governor's Special Grant - Youth

Federal funds available for youth programs are utilized in conjunction with California Youth Employment and Development Act programs. Funds will be used to meet youth employment needs and will be used to supplement funding where federal regulatory provisions are not a constraint to program design.

Output	1978-79	1979-80	1980-81
Total to be served .....	2,500	2,800	2,800

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	26.8	28.9	32.3	\$5,146,900	\$4,598,041	\$4,969,008

b.6.(b) California Youth Employment and Development Act

The California Youth Employment and Development Act provides flexible funding to local service providers for job training programs designed to meet the needs of youth in transition from school to work. Emphasis is on private sector on-the-job training and job training in community service work projects. Efforts are made to design programs based on local cooperative planning to meet specific local needs.

Output	1978-79	1979-80	1980-81
Total to be served .....	3,000	3,350	3,350

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	25.2	27.5	30.7	\$3,332,426	\$5,000,000	\$5,000,000

b.6.(c) Job Corps

Job Corps provides basic and remedial education and entry level vocational skill training in a residential setting to low-income youth (age 16 through 21) who have been determined unable, and/or unwilling, to benefit from the education and training available in their home environment.

EDD recruits and enrolls lower economic strata youth to fill California's quota of openings in Job Corps centers. Additionally, EDD provides placement services to all California male and female returnees and relocatees from other states who desire placement services.

Output	1978-79	1979-80	1980-81
Enrolled in training .....	3,726	4,918	4,918
Placement .....	2,837	6,000	6,000

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	56.8	64.2	64.2	\$1,253,473	\$1,647,392	\$1,679,321

b.6.(d) Young Adult Conservation Corps

The Young Adult Conservation Corps (YACC) provides employment and other benefits to young men and women aged 16 to 23, through a period of service during which they engage in useful conservation work and aid in completing projects on public lands and waters. The intent of the program is to provide work experience to participants in skill areas required for the accomplishment of productive work.

This federally funded task is in large part subcontracted to the California Conservation Corps which operates the YACC in conjunction with their regular program. EDD aids in recruitment and placement of the participants.

Output	
Youth trained (See California Conservation Corps for program output)	

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	0.6	14.5	14.5	\$11,872,573	\$4,843,041	\$6,457,388

b.7. Disabled Veterans Outreach (DVOP)

The DVOP component assists veterans in need of employment services. EDD is allocated federal funds to hire primarily disabled Vietnam-Era veteran staff to serve veterans. The DVOP staff are assigned to 112 EDD local employment services offices which have large populations of unemployed, disabled and Vietnam-Era veterans. The staff seek out veterans not registered with EDD and encourage and assist them to register for work. EDD refers veterans to the appropriate employment service staff or community veterans organizations, identifies those who are in need of intensive services, assures that veterans receive priority departmental services to which they are legally entitled, and provides veterans with intensive job development and placement services.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	(194.9)	(184.4)	(184.4)	\$2,947,951	\$3,503,769	\$3,575,785

b.8. National Alliance of Business - Managers of Employment and Training

The National Alliance of Business (NAB) is a nonprofit corporation organized to promote the private sector hiring, training and retention of persons who traditionally have had a problem finding employment, i.e., lower economic strata persons, youth, veterans, disabled veterans and ex-offenders. NAB is operated by executives on loan from businesses with salaries paid by their respective employers and Managers of Employment and Training - MET's from EDD. The loaned private sector executives develop job pledges in the private sector. The MET's coordinate and follow up on the private sector job pledges to convert them to actual job and training opportunities.

EMPLOYMENT DEVELOPMENT DEPARTMENT—*Continued*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	12.5	13.0	13.0	\$373,272	\$444,346	\$451,539

**b.9. Displaced Homemakers**

This component assists displaced homemakers in Alameda and Los Angeles Counties with severe social or economic barriers to achieve independence and economic security. This is done by providing, directly, by referral, or by contract, a variety of counseling, job training, placement and supportive services consistent with the individual needs of the displaced homemaker. This was a pilot program funded through the 1979-80 fiscal year.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	0.7	0.5	-	\$10,008	\$58,915	-

**c. Governor's Special CETA Grants**

EDD administers, through its California Employment and Training Advisory Office (CETA-O), the Governor's Special Grant funds provided to the State under the Comprehensive Employment and Training Act of 1973 as amended in 1978. The funds provided are for vocational education services, support of the State Employment and Training Council, and statewide employment and training services, and through the California Employment and Training Council, to provide for participation by local government, community-based organizations and labor, business and client groups in the development of employment and training policy and comprehensive plans. CETA-O is also responsible for coordination of the employment and training-related programs and activities of all State agencies with those of local CETA prime sponsors.

**Authority**

Federal: Comprehensive Employment and Training Act of 1973, as amended in 1978.

State: Unemployment Insurance Code, Division 3.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	132.5	304.1	292.9	\$20,253,438	\$35,351,896	\$37,094,464

**c.1. State Employment and Training Council**

The State Employment and Training Council (SETC) reviews and coordinates the programs of individual prime sponsors, state agencies, and local manpower and educational organizations who deliver employment related services to the State's unemployed, underemployed and lower economic strata residents. Funds are also used to fund special demonstration projects and other employment-related activities designated in component c.2.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	71.3	1.6	1.5	\$2,648,217	\$816,418	\$811,393

**c.2. State Coordination and Special Services**

This component provides labor market, economic, demographic and other appropriate employment-related information to prime sponsors. It also funds model demonstration training projects to meet the needs of ex-offenders, minority youth, women and other special groups in the State's labor force and projects to explore effective ways to deliver employment related services and training.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	59.8	42.8	35.3	\$5,179,926	\$9,560,852	\$10,057,311

**c.3. Vocational Education**

This component provides funds to the Department of Education for the purpose of providing vocational education services to prime sponsors. The level of funding for services provided each prime sponsor is based on each prime sponsor's percentage of the State's total number of adults in low-income families. Vocational education services include classroom training, counseling, testing, assessment of need and certain other services.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	1.3	—	—	\$12,423,206	\$13,732,607	\$14,386,479

**c.4. Educational Linkages**

This component is to encourage coordination and to establish linkages between prime sponsors and appropriate educational entities to better utilize available employment and training funds by minimizing duplication of effort.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	0.1	115.7	112.1	\$2,089	\$6,467,549	\$6,967,482

**c.5. Administration**

Federal regulations promulgated by the reauthorization of the Comprehensive Employment and Training Act in 1978 established an Administrative Cost Pool which provides the support staff for the administration of the Governor's Special Grant - SETC, State Manpower Services, Vocational Education and Educational Linkages. Also included is the administration of the State Public Service Employment (PSE) Program.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	—	144	144	—	\$4,774,470	\$4,871,799

**d. Balance-of-State Prime Sponsor**

EDD has been designated by the Governor as the Balance-of-State Prime Sponsor for California. EDD, through its CETA Balance-of-State Office (CBOS), administers the CETA funds provided for training and employment programs in 27 Northern California counties whose populations are too small to qualify them for direct CETA funding. The CBOS Office, in conjunction with local government, plans and delivers employment related training and services to meet the needs of the counties' unemployed, underemployed and lower economic strata residents.

## EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

## Authority

Federal: Comprehensive Employment and Training Act of 1973 as amended in 1978, Youth Employment and Demonstration Act of 1977 (PL 95-93).  
 State: Unemployment Insurance Code, Division 1; Youth Employment and Development Act of 1977.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	75	95.5	95.5	\$60,611,228	\$48,258,463	\$51,496,634

## e. Contracted Prime Sponsor Services

Funds for employment and training programs are allocated to prime sponsors within California by the federal Department of Labor. The State of California, as Prime Sponsor for the Balance-of-State, receives approximately 5 percent of the CETA funds for the smaller counties who are not prime sponsors. The remaining 95 percent of the CETA funds go to the other metropolitan area Prime Sponsors. EDD negotiates reimbursable contracts with prime sponsors and balance-of-State counties, in competition with other potential program operators, to provide work experience, on-the-job training, vocational education, placement and related services to target groups of eligible persons identified by the prime sponsors. The department coordinates with prime sponsors at the local level to effect an overall delivery system which maximizes the use of available resources and minimizes duplication.

## Authority

Federal: Comprehensive Employment and Training Act of 1973 as amended in 1978; Youth Employment and Demonstration Act of 1977 (PL 95-93)  
 State: Unemployment Insurance Code, Division 3.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	404.4	424	407	\$18,882,560	\$20,695,094	\$20,488,564

## f. Public Service Employment (PSE)

The PSE Element provides eligible unemployed persons with transitional jobs in the public sector to perform work that would not otherwise be done because of lack of funds. This serves to train the unemployed for transition to full-time unsubsidized jobs and to counteract cyclical unemployment.

## Authority

Federal: Comprehensive Employment and Training Act of 1973 as amended in 1978; Public Works Employment Act of 1976 (Title II, PL 94-369) enacted July 22, 1976, and amended by the Intergovernmental Antirecession Fiscal Assistance Act of 1977 (Title VI, PL 95-30).  
 State: Unemployment Insurance Code, Division 3.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	365.8	149.3	13.8	\$71,258,595	\$39,957,998	\$10,865,638

## f.1. CETA-State Agency PSE

This component provides unemployed and underemployed persons with transitional employment in state agency jobs providing needed public services and also provides training and employment related services to enable these persons to move into non-PSE, public sector jobs. Coordination between prime sponsors and all state agencies is provided by EDD CETA-O.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	—	—	—	\$13,932,169	\$13,857,480	\$9,700,236

## f.2. Public Works Employment Act (PWEA)

This represents California state government's participation in an antirecession program funded by the federal government under Title II of the Public Works Employment Act of 1976 (PWEA) as amended. Services customarily provided by the State, which would otherwise be cut back due to a lack of available funds, are funded in many state agencies.

EDD, as agent for the Governor, received quarterly allocations of funds based on the unemployment rate. Each quarter's allocation had to be obligated or appropriated within six months of receipt.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	365.8	149.3	13.8	\$57,326,426	\$26,100,518	\$1,165,402

## f.2. (a) PWEA - Administration

EDD was designated by the Governor to administer the state PWEA Title II funds in conjunction with Department of Finance. EDD is to make recommendations for the efficient and proper use of PWEA Title II funds in accordance with state procedures and federal rules and regulations and monitor and report the progress on approved projects.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	18.7	14.6	8.5	\$511,514	\$453,539	\$259,377

## f.2. (b) EDD PWEA Projects

The various EDD projects liquidate backlogs and provide the maintenance of basic employment services that are customarily provided by EDD, but would not otherwise be provided because of a lack of available funds.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	347.1	134.7	5.3	\$7,443,066	\$3,147,163	\$169,693

EMPLOYMENT DEVELOPMENT DEPARTMENT—*Continued*

## f.2. (c) PWEA—Other State Departments

The other state department projects perform work that would not otherwise be performed because of a lack of available funds. Departments with such projects are listed below:

## II. TAX COLLECTIONS AND BENEFIT PAYMENTS PROGRAM

## Program Objectives and Description

The seasonality of certain industries, along with fluctuations in the economy and technological changes, causes unemployment of individuals through no fault of their own. In addition, workers have loss of wages due to nonoccupational illness or injury. To alleviate individual economic problems and to assist in stabilizing the economy, an income maintenance system is desirable.

This program provides a system of income maintenance based upon insurance principles. To accomplish this, the program operates payment systems, a tax collection system, benefit payment systems and an appeals process to adjudicate disputed claims.

The 1980-81 budget proposes 179.5 new positions in the Disability Insurance Program to reflect increases in the program and benefit payment activity due to the passage of legislation.

## a. Unemployment Insurance

The Unemployment Insurance Element provides and maintains an employer-funded system to pay benefits to all individuals who become unemployed through no fault of their own to reduce unemployment and the suffering caused thereby to a minimum.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures (support).....	5,432.9	5,114.9	5,322.1	\$119,607,510	\$147,506,055	\$155,792,152
Expenditures (benefits).....	—	—	—	1,166,297,044	1,254,400,000	1,443,620,000

## a.1. Unemployment Insurance (UI) Program

Each year one out of eight protected persons finds that he must use this insurance. Approximately 90 percent of the labor force is covered by state or federal unemployment insurance programs provided by this component. Those persons generally not protected are comprised of new entrants into the labor force, the self-employed, and most domestic employees.

Employers subject to the California Unemployment Insurance Code are identified registered and tax rates are determined by the Employment Development Department, which also makes unemployment insurance tax collections and maintains wage records to establish the monetary eligibility of claimants to unemployment insurance compensation. Benefits must be paid promptly when it is determined that claimants meet eligibility requirements.

## Authority

Federal: Titles III, IX, and XV of the Social Security Act; Public Law 94-566.

State: California Unemployment Insurance Code: Division 1.

## Output

	1978-79	1979-80	1980-81

## a.2. Legislative Mandates

This task reflects the cost of reimbursing local public entities for applicable mandated unemployment insurance costs as authorized by the State Unemployment Insurance Code, Sections 605, 821-832.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures (benefits).....	—	—	—	\$1,839,000	\$2,200,000	\$6,520,000

<sup>1</sup> Current and budget year positions cover base workloads only. Additional positions will be required to accomplish over base workload.

## EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

## b. Disability Insurance

The Disability Insurance Element provides and maintains a system of indemnification to compensate in part for wage loss of individuals disabled because of nonoccupational illness or injury. It consists of two components. One (b.1.) covers private sector employees who have worked in California, and the other (b.2.) covers state employees.

## Authority

State: Unemployment Insurance Code, Division 1, Sections 2601–3272; California Government Code Title 2, Division 5.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures (support).....	1,135.7	1,252.9	1,432.4	\$25,378,821	\$31,690,852	\$37,473,489
Expenditures (benefits).....	—	—	—	483,403,049	494,162,000	597,228,000

## b.1. Private Sector Disability Insurance

This component provides and maintains an employee-funded system of indemnification to compensate in part, wage losses of individuals disabled because of nonoccupational illness, or injury or pregnancy. To accomplish this requires a payment system, tax collection system, a staff support system, an appeals system and certain administrative functions for voluntary disability insurance plans. Employers may substitute a voluntary plan if the benefits are equal to and premiums do not exceed the state plan.

Output	1978-79	1979-80	1980-81
Number of benefit payments.....	2,584,481	2,616,620	2,679,540
Average covered employment.....	7,200,700	7,373,000	7,665,300
Average covered employment in voluntary plans .....	540,100	552,800	574,900
Voluntary plan notices of first claims received .....	56,627	58,200	60,120
Disability Insurance appeals disposed (lower).....	3,434	3,400	3,600
Disability Insurance appeals disposed (higher).....	321	330	350
Number of Subject Employers .....	560,700	594,300	629,900

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures (support).....	1,126.3	1,236.7	1,416.2	\$25,193,865	\$31,309,439	\$37,089,748
Expenditures (benefits).....	—	—	—	483,403,049	494,162,000	597,228,000

## b.2. State Employee Nonindustrial Disability Insurance

State Employee Nonindustrial Disability Insurance maintains a system of wage loss indemnification for state employees disabled because of nonoccupational injury, illness or pregnancy to compensate in part for wage loss when the state employee has exhausted sick leave. Eligible state employees receive one-half of full pay or \$125 per week, whichever is less, for a maximum of 26 weeks for any one period of disability. Departments are billed for administrative costs of this program incurred by EDD based on their percentage of claims paid.

Output	1978-79	1979-80	1980-81
Number of benefit determinations .....	6,997	8,000	8,800

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures (support).....	9.4	16.2	16.2	\$184,956	\$381,413	\$383,741

## c. Former Inmates

In most cases, former inmates released from California's correctional institutions are unemployed and face economic uncertainty which contributes to a high recidivism rate. To alleviate economic suffering during the period immediately following release, unemployment and disability insurance are provided. The former inmate may receive a maximum of 26 weeks of unemployment or disability insurance benefits or combination thereof following the filing of the first claim for unemployment insurance after release from a California correctional institution. The benefits and administrative costs are reimbursed by the Department of Corrections.

This element provides a system of income maintenance for inmates released from California correctional institutions based on insurance principles. Benefits are based on hours worked or hours participated in a vocational training program while serving in one of the Department of Correction's institutions.

## Authority

State: Senate Bills 224 and 2207; Unemployment Insurance Code, Division I. Part 1, Section

Output	1978-79	1979-80	1980-81
Number of benefit payments.....	41,925	35,500	35,500

Expenditures (benefits).....	—	—	—	1,004,447	2,500,000	1,500,000

## d. Contractors Law Enforcement

The Contractors Law Enforcement Element continues a successful pilot project undertaken by EDD, in coordination with the Departments of Consumer Affairs and Industrial Relations. It provides the departments with necessary staffing to effectively exchange information related to the enforcement of the laws and to investigate and/or audit contractors who violate state laws.

## III. CONTRACT SERVICES

## Program Objectives and Description

In order to provide efficient and economical services to the public and other agencies, EDD, whenever possible, makes available its services on a reimbursable basis.

EDD is uniquely equipped to provide the functions of employer tax collection and accounting benefit payments, job placement and other services. Also, as needed, and whenever possible, individual talents are made available to serve the needs of other entities.

## Program Requirements

	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing Program Costs .....	433.5	433.8	474.1	\$9,938,629	\$11,450,054	\$12,529,534

Administration Distribution .....	(30.9)	(30.8)	(33.3)	(698,464)	(806,344)	(890,875)

## a. Personal Income Tax (PIT)

All employers are required by law to deduct, report and pay personal income tax. The Personal Income Tax Element conducts all activities necessary to equitably and promptly collect PIT deducted from workers' wages from all employers in the State, to inform employers of their responsibilities and ensure compliance with legal provisions of the program. Tax schedules are prepared by the Franchise Tax Board. Contributions are collected by EDD in accordance with these schedules. Revenues collected are transferred to the State's General Fund.

## Authority

State: California Governmental Code, Section 15702.1, California Administrative Code, Title 18, Section 17002.5

## Output

	1978-79	1979-80	1980-81
Number of PIT subject employers .....	527,333	592,500	641,000
Number of PIT only employers .....	(7,099)	(7,000)	(8,000)

## b. Other Contract Services

This Element involves reimbursable work performed for other agencies. This work includes small one-position contracts with the Federal Department of Labor, cities, counties or councils for short-term use of specific individual's talents, various projects with short term emphasis and interagency agreements with other state departments for data processing services. Included in this program for fiscal year 79-80 are funds related to the development of the California Fiscal Information System.

## Input

	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	43.6	43.4	43	\$1,044,727	\$1,256,978	\$1,272,050

## IV. STATE OFFICE OF ECONOMIC OPPORTUNITY

## Program Objectives and Description

The California State Office of Economic Opportunity (CSOEO) provides technical services to Community Action Agencies (CAA's) and other local agencies, coordinates state activities relative to the Federal Community Services Administration (CSA) guidelines, mobilizes state resources for CAA's and advises the Governor of California and the National and Western Region Office Directors of CSA on how CSA can best support state activities. At the request of the Governor, CSOEO provides information and assistance to the Legislature and state agencies to facilitate enactment of programs that benefit the poor.

The budget proposes a \$285,750 General Fund increase in the budget year as a result of the Federal Government's change in the match requirement from a 80 percent Federal/20 percent State match to a 50 percent Federal/50 percent State fund ratio.

## Authority

Federal: Executive Order 11422, August 20, 1968 (42 USC 2979).

State: Unemployment Insurance Code Section 301.5, 9605(k) thru (l), 9612 in accordance with the Governor's Executive Order issued in September 1964 and the Community Services Act of 1974 (PL 93-644), as amended.

## a. State Agency Assistance

The State Agency Assistance Element provides assistance to CAA's and other community groups and grantees in developing and administering programs designed to alleviate poverty. The major objectives of this element are to (1) maintain and improve an effective State Agency Assistance Program, (2) mobilize resources and support for CSA grantee network, (3) provide specialized technical services and information to CSOEO units and grantees, (4) through a Poverty Report, provide to the Governor, CSA grantees, as well as public and private agencies, information on poverty in California, (5) administer and coordinate the development and implementation of CSOEO's current and new special programs and (6) make recommendations to the Governor on grants to California's antipoverty agencies funded by the CSA, and Head Start Program funded by the Federal Department of Health, Education and Welfare (HEW).

## Output

	1978-79	1979-80	1980-81
State and Federal grants mobilized .....	12	9	5
Training contacts .....	28	12	12
Technical assistance contacts .....	14	35	55
Number of participants served .....	460	1,040	1,320
CSA grants processed .....	232	240	250
Dollar value .....	\$59,369,259	\$60,000,000	\$75,000,000
HEW Head Start grants processed .....	203	210	215
Dollar value .....	71,716,680	75,000,000	75,000,000

## Input

	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	31	40.3	36.2	\$890,533	\$1,654,767	\$1,516,026

## b. California Census Project

This element provides for the establishment of a statewide census awareness and outreach program to maximize the accuracy of the 1980 census enumeration. The goal of this effort is to contact and inform Californians, especially low-income, disadvantaged persons, of the importance of participating in the 1980 census.

## Output

	1978-79	1979-80	1980-81
Residents Informed .....	—	2,500,000	—

## Input

	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	—	4.1	—	—	\$650,000	—

## c. Community Services

The function of this element is the administration of:

- (1) The California Indian Management Training Program which provides fiscal and administrative training to selected Indian organizations.
- (2) The Balance-of-State Program which provides for the organizational development and planning of a community action agency to serve Balance-of-State counties.
- (3) The Summer Youth Recreation Program which provides recreational opportunities for low-income children, age 8 through 13.
- (4) The Housing Intern Program which provides placement of interns in Farmer's Home Administration Offices throughout California to process housing loans and grants for low-income families.
- (5) The Access California Program increases public awareness and commitment for the removal of physical and environmental barriers for the disabled.
- (6) The Community Economic Development Program which assists Community Action Agencies in developing expertise and capability to develop and implement comprehensive plans for economic development in low-income areas.

## Output

	1978-79	1979-80	1980-81
Training Sessions .....	6	43	45
Technical Assistance Contacts .....	40	57	60
Participants Served by Training and Technical Assistance.....	245	755	950
Youth served through Summer Youth Recreation Program .....	6,000	10,000	12,000
Handicapped served through Access California Project .....	4,100	4,500	6,000
Housing Loans and Grants Generated .....	\$28,000,000	\$30,000,000	\$50,000,000
Housing Loans Processed .....	1,150	1,400	1,500
Permanent Private Jobs Developed by Housing Intern Program.....	12	15	25

Expenditures .....	23	36	41	\$654,185	\$1,102,387	\$1,108,813

## EMPLOYMENT DEVELOPMENT DEPARTMENT—Continued

## d. Energy Conservation and Weatherization

This element administers energy conservation and weatherization programs. The major objectives are to provide state level advocacy and coordination to assist the CAA's and other community groups to operate programs concerned with (1) weatherization services, the installation of attic insulation and the reduction of infiltration in residences of low-income households, (2) payment of delinquent utility bills, (3) energy conservation related consumer education, (4) monetary assistance to low-income residents experiencing difficulty in paying for the increased costs of energy and (5) alternate energy services such as solar devices. CSOEO provides training and technical assistance to program operators for administration of the programs.

Output	1978-79	1979-80	1980-81
Homes Weatherized .....	3,660	8,810	5,981
Agencies Surveyed and Assisted.....	168	240	300
Households Assisted .....	5,395	19,730	23,457
Persons Trained .....	—	11,812	13,500

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	10.1	16	16	\$6,769,233	\$9,363,443	\$12,282,680

## V. CONTINGENT FUND

## Program Objectives and Description

The EDD Contingent Fund is a fund consisting of all interest and penalties on contributions collected from employers who fail to remit payroll taxes in a timely manner. When the Contingent Fund balance exceeds one million dollars (\$1,000,000), the excess amount is transferred to the Unemployment Fund and the Disability Insurance Fund in proportion to the employer contributions attributable to the year's estimated revenue. The Contingent Fund is used to fund EDD's capital outlay and to pay various charges not funded by the federal government.

## VI. GENERAL ADMINISTRATIVE PROGRAM

## Program Objective and Descriptions

The objective of this program is to provide policy direction, coordination, leadership and staff support services to relieve line managers of routine administrative duties so they may direct their resources toward accomplishment of the department's goals and objectives.

The areas of support provided are executive direction, fiscal management, personnel management, management systems, automatic data processing, reports and analysis, information and public relations, and services such as building maintenance, office services, duplicating, etc.

## EMPLOYMENT DEVELOPMENT DEPARTMENT—Capital Outlay

STATE BUILDING PROGRAM  
EXPENDITURESActual  
1978-79Estimated  
1979-80Proposed  
1980-81

## SUMMARY

Employment Development Department (expenditures) .....	\$79,871	\$3,710,255	\$7,388,233
Employment Development Department Contingent Fund .....	239,874	2,657,187	7,782,000
Unemployment Trust Fund (Reed Act) .....	-160,003	1,053,068	-452,767
General Fund .....	-	-	59,000

## GENERAL ANALYSIS

The capital outlay budget of the Employment Development Department continues the major departmental building program started in 1964-65. Concurrently, the department is continuing with its policy of improving and upgrading existing premises as needed. Cost of the construction of buildings and building additions will be recovered through rental amortization, which restores money to the funds from which capital expenditures were made.

## MAJOR PROJECTS

San Luis Obispo			
Site Acquisition .....	\$1,519	—	—
Merced			
Parking site acquisition .....	88,403	\$6,615	—
Construction, building addition .....	183,562	—	—

## DEPARTMENT OF REHABILITATION

The Department of Rehabilitation is the principal State agency that helps people with disabilities reach social and economic independence. The primary goal of the Department is to rehabilitate and place into suitable employment physically and mentally handicapped persons.

In order to achieve statewide reductions, and produce economies per Section 27.2 of the Budget Act of 1979, the Department of Rehabilitation's 1979-80 base allocation was reduced by \$312,028.

### Program Objectives

- Provision of restorative, educational and supportive services to clients through vocational rehabilitation counselors.
- Advocacy for the rights and opportunities of the disabled.
- Development of small business opportunities for the blind and severely disabled.
- Elimination of architectural, transportation and attitudinal barriers to social and economic integration.
- Support for services and programs provided by community rehabilitation facilities and other local level resources.
- Provision of prevocational services to disabled persons not ready for vocational rehabilitation programs.

### SIGNIFICANT PROGRAM CHANGES

The budget for 1980-81 includes purchasing habilitation services for developmentally disabled individuals with funds received through contract with the Department of Developmental Services as specified by Chapter 1132, Statutes of 1979 (AB 1164 Bates). The budget proposes 27.5 positions to administer this program.

Chapter 191, Statutes of 1979, provides \$2 million during 1979-80 for the support of independent living centers. The budget continues this funding level during 1980-81 and proposes three positions to administer this function. The Administration will support legislation to establish an ongoing program of support for core services in the Independent Living Centers on a 50 percent State/50 percent local matching ratio. The proposal will provide for a two-year phase-in period for this matching ratio and includes a \$1 million general fund appropriation for a State commitment totalling \$3 million.

### I. REHABILITATION OF THE DISABLED

#### Program Objectives and Description

The Rehabilitation of the Disabled Program is the Department's major service. The Department estimates that for the budget year there will be some 630,000 disabled Californians of working age who have a need for vocational rehabilitation services in order to obtain or retain employment.

The Department delivers basic vocational rehabilitation services to the general disabled community through district and branch offices throughout the State. A number of formal and informal cooperative agreements between the Department and State and local agencies (educational institutions, hospitals and mental health treatment facilities, and alcoholism treatment programs) assure specialized services to particular target groups among the disabled population. The Department places special emphasis on services to clients with severe functional limitations including the blind, deaf, developmentally disabled, mentally ill and cardiovascular disabled.

Rehabilitation services supportive of the basic program are also provided to clients, employers, other units of government and the disabled population in general. These services constitute Program Element Ib, Other Rehabilitation Services.

The Department is administratively establishing 17.1 personnel years in the current year and is proposing 33.2 personnel years in the budget year of temporary help-support service assistants to provide reader and interpreter services to disabled employees. These services have previously been purchased from private individuals from operating expenses on an as needed basis.

*During the budget year the Department of Rehabilitation will continue to provide \$1.6 million in ancillary services to about 2,400 of their clients in postsecondary programs.*

#### Authority

Federal—Rehabilitation Act of 1973 (Public Law 93-112), as amended.

State—Welfare and Institutions Code, Division 10, commencing with Section 19000.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

b. Other rehabilitation services .....	79.6	36.9	36.9	2,191,152	2,410,642	2,058,151

## a. Basic Rehabilitation Services

This program element is the primary service delivery effort of the Department. Through rehabilitation counselors, the Department evaluates applicants for rehabilitation services, determines eligibility for services, develops jointly with the disabled person an individualized written rehabilitation plan, identifies specific services required for rehabilitation, provides such services either by coordination of available community resources or purchase of services from the community, helps the disabled person upon completion of the plan to find suitable employment, and maintains follow-up contact to assure employment stability.

The general disabled public receives such services through a basic program which is financed 80 percent by federal funds and 20 percent by State and other matching funds. The Department's programs to serve beneficiaries of Social Security Disability Insurance and recipients of Supplemental Security Income benefits are financed with 100 percent federal funds. Special cooperative agreements with other state and local agencies are financed with 80 percent federal funds and 20 percent with funds from the cooperating agency; these programs direct rehabilitation services to particular target groups such as the mentally ill, the mentally retarded, alcoholics, and disabled high school students. As a result of Chapter 1435, Statutes of 1974, the Department provides services to disabled individuals with work related injuries through reimbursement from insurance carriers.

During Fiscal Year 1978-79, the Department rehabilitated 15,174 disabled persons, including 4,589 public assistance recipients and 1,397 beneficiaries of Social Security Disability Insurance. Rehabilitations of this kind represent considerable annual public savings in Welfare, Medi-Cal and Social Security costs, as well as increased tax revenues from the earnings of rehabilitants.

In accordance with the Federal Rehabilitation Act of 1973, the Department has established a priority system of extending services to the severely disabled. In 1978-79 the severely handicapped comprised 47 percent of disabled persons rehabilitated. For FY 1980-81, the Individualized Written Rehabilitation Plan objective is 31,000 clients of which 53 percent will be the severely disabled.

<sup>3</sup> Does not pay back costs in 25 years at a 10 percent discount rate.

## b. Other Rehabilitation Services

The Department provides other, complementary rehabilitation services to or on behalf of individuals with disabilities. These services include: (1) development and implementation of new rehabilitation technology and methodology, and (2) representation of the rights and needs of disabled persons.

1. Development and implementation includes evaluating the potential of severely disabled clients to operate motor vehicles, wheelchair fittings for clients who cannot use commercially available equipment, and fabrication of various assistive devices to expand mobility or scope of independent function for disabled persons. Another aspect is development of new counseling techniques, training of counselors and evaluation of results.

A three-year project, CARE-TECH, begun in 1978-79 and funded by the U.S. Department of Health, Education and Welfare is developing a model system for delivery of rehabilitation engineering technology services for implementation in California and, eventually, nationwide.

2. The Department also operates several programs designed to safeguard or promote the rights of disabled persons as well as other protected classes. The Rehabilitation Appeals Board and Ombudsman Program ensure that clients or prospective clients receive the services to which they are entitled. The Civil Rights Office is responsible to ensure that the Department and its contractors and vendors comply with State and federal law in regard to employment, receipt of services and accessibility. The Mobility Barriers and Technical Assistance Sections provide expert consultation and assistance to state and local government profit and non-profit organizations which are subject to the provisions of Section 504 of the Rehabilitation Act of 1973 and California law regarding access to public facilities and non-discrimination on basis of handicap.

Habilitation services functions shown below for the prior year are transferred to Program IV in the current year.

DEPARTMENT OF REHABILITATION—*Continued*

## Output

The Mobility Barriers Section annually trains approximately 1,000 public and private sector building officials, designers, architects and developers on their responsibilities and obligations under California's architectural barriers laws. The Section also provides training and consultation services to a network of 75 community-based volunteers. The volunteers complement the Section's statewide activities by working at local levels toward achievement of adequate accessible transportation and sufficient architecturally barrier-free public facilities and buildings, places of employment and housing to allow handicapped persons to function independently.

Similarly, the work of the Ombudsman Office is supplemented through contract with 5 community organizations which provide local contacts for clients in need of ombudsman services. These services include mediation of disagreements between clients and Department staff, referral to other agencies when appropriate, and dissemination of information about the Department's policies and procedures.

The in-service training program provides state-of-the-art training to case carrying staff and other employees as current needs dictate.

Additional quantifiable output follows:

## II. SMALL BUSINESS AND JOB DEVELOPMENT

## Program Objective and Description

Small Business and Job Development provides comprehensive training and supervision, enabling the legally blind to support themselves in the operation of vending stands, snack bars and cafeterias, and provides small business and employment opportunities for the disabled in both the public and private sectors. The Department also develops and monitors employment agreements with major employers and labor organizations; researches, catalogues, and develops community manpower resources; and facilitates employment of the disabled in the public sector.

1.2 temporary help—support service assistant positions were administratively established in the current year and are proposed new in the budget year to provide interpreter and reader services for disabled employees.

## Authority

Federal—Randolph Sheppard Act, Rehabilitation Act of 1973 (Public Law 93-112), as amended.

State—Welfare and Institutions Code, Division 10, Commencing with Section 19000.

DEPARTMENT OF REHABILITATION—*Continued*

## a. Business Enterprise

The Business Enterprise Program for the Blind (BEP) provides training and employment for legally blind persons in the management of food service and vending facilities on public and private properties throughout the State.

The staff promotes and develops new locations in public and private buildings for vending and food service operations. Other services include the design and installation of new operations, remodeling of older facilities, supervision of new vendors, and general business services.

Legally blind persons (vendors) who complete BEP's prescribed training courses are selected on a competitive basis to operate facilities. The vendors retain the profits from the facility they manage except for a percentage prescribed by law. This percentage (fee) is placed in a trust fund account, matched with federal funds and used for the establishment of new facilities and the maintenance of established facilities.

Output	1978-79	1979-80	1980-81
Business locations (year end).....	314	324	335
Gross income of locations.....	\$25,300,000	\$27,500,000	\$31,000,000

## b. Job Development

Job Development includes four components: (1) small business development, (2) industrial/labor relations, (3) manpower program development, and (4) employment opportunities in the public sector.

## Output

During the budget year, the Department will continue to:

1. Provide consultation, training, and technical assistance to counselors in the evaluation and development of small businesses for severely disabled clients, and in conjunction with private enterprise, create small businesses to be owned and managed by severely disabled clients.

2. Develop agreements with major corporations and organized labor which establish methods which accomplish increased employment of disabled clients. Assist the field offices in developing and managing local employer relations and client placement programs. Manage private sector business and organized labor liaison to the Governor's Committee for Employing the Handicapped.

3. Develop interagency agreements and contracts between local DR operations and CETA Prime Sponsors, Balance-of-State, their agents, and CETA service providers. Implement advocacy role to assure parity services for disabled in programs with similar benefits. Develop and manage statewide CETA-DR programs and maintain liaison between DR and the Governor's CETA staff.

4. Work with State Personnel Board and Employment Development Department to develop programs with various agencies to provide opportunities for clients and other disabled or disadvantaged individuals to work in the public sector.

<b>Input</b>	<b>78-79</b>	<b>79-80</b>	<b>80-81</b>	<b>1978-79</b>	<b>1979-80</b>	<b>1980-81</b>
Expenditures.....	13.2	12.5	12.5	\$388,920	\$511,578	\$522,340

## III. DEVELOPMENT OF COMMUNITY REHABILITATION RESOURCES

## Program Objectives Description

The Community Resources Development Section, in conjunction with field office staff, works with government and private nonprofit organizations toward development or improvement of rehabilitation services needed to serve clients of the department and other handicapped people at the community level. These community based services are provided by rehabilitation workshops, rehabilitation centers, independent living programs special facilities for the blind and deaf, halfway houses, and alcoholic recovery homes. Community based rehabilitation facilities are encouraged to place more emphasis on job development and placement of disabled persons.

The Department also sets standards for services provided by such resources, inspects and certifies programs to ensure that standards are met, and assists all agencies of State government in establishing fee schedules for services purchased from rehabilitation resources. Each year, the Department inventories rehabilitation facility services throughout the State and publishes the California State Plan for Rehabilitation Facilities.

1.5 positions were administratively established in the current year to assist residential drug programs to achieve licensure and to provide technical assistance to approximately 33 unlicensed residential drug treatment facilities. This project is fully reimbursed by the Department of Alcohol and Drug Abuse.

## Authority

Federal—Rehabilitation Act of 1973 (Public Law 93-112), as amended.

State—Welfare and Institutions Code, Section 19008, 19013, 19152, 19154, 19400-19402, and 19800-19813.

b. Grants administration .....	9.8	9.7	9.7	4,706,145	2,591,100	2,113,695

## a. Technical Consultation to Rehabilitation Facilities

Community resource specialists and technical consultants provide assistance to local community rehabilitation facilities in general management, program planning, industrial engineering, accounting, public relations, contract procurement, and other technical areas. In addition, consultation is provided to local community self-help groups on proposals for Innovation and Expansion grants to fund independent living skills training centers for the severely disabled. In the case of workshops, technical consultation enables community agencies to integrate a rehabilitation service program with a production manufacturing operation to create a setting in which realistic evaluation, work adjustment, and a vocational training of disabled people can take place. This consultation has enabled over 350 organizations to provide a high level of service to a substantial number of handicapped persons throughout the State. To help these organizations become self-supporting, a program to encourage the State and other public entities to purchase goods and services from them will continue next year.

Output				1978-79	1979-80	1980-81
Number of facilities provided consultation .....				360	370	380
Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	20.9	21.3	19.8	\$834,206	\$1,005,354	\$767,622

## b. Grant Administration

The Department administers federally-funded establishment grants and innovation and expansion programs for community rehabilitation facilities and organizations and coordinates federal grant programs for facility improvement, training, and other related areas. These grants are administered within the framework of the California State Plan for Rehabilitation Facilities. Almost all of the grant programs are administered on the basis of reimbursement for each individual expenditure made by the facility under an authorized project budget. This type of detailed grant administration requires substantial assistance from the Department's Community Resources Development Section. Grant administration includes a careful review of approximately 5,400 invoices submitted by community based programs either receiving grant support or operating under a contract for services. Progress reports are received and reviewed as sub-grantees work toward the grant objectives. These reports, as well as on-site visitation, assist in determining the consultative needs of community based programs.

Output				1978-79	1979-80	1980-81
Number of grants awarded by department .....				132	70	70
Number of grants requiring supervision by department .....				160	105	105

	78-79	79-80	80-81			
Expenditure .....	9.8	9.7	9.7	\$4,706,145	\$2,591,100	\$2,113,695

## IV. HABILITATION SERVICES PROGRAM

This Program addresses the pre-vocational needs of severely handicapped adults who are currently too disabled to benefit from mainstream vocational rehabilitation programs, but who need and can benefit from a broad range developmental program targeted at increased independence, improved social functioning and, to the extent feasible, development of the individual's potential for mainstream vocational rehabilitation programs.

The Long Term Funding Program provides habilitation services for adults with developmental disabilities who appear to be unable to benefit from vocational rehabilitation services. The Department reimburses workshops and work activity centers if the services they provide to such persons were unfunded or only partially funded on July 1, 1978 and thereafter. The program promotes individualized habilitation planning, including client assessment, plan development, delivery of specified services, close monitoring and periodic evaluation of client progress. Program objectives are to help clients reach greater levels of functioning and ability to live independently, to prevent a regression of their achieved level of functioning, and to prepare them for vocational rehabilitation services, when indicated.

The services of counselor-teachers are provided to blind and deaf blind individuals. These services include in-the-home counseling, training in independent living and mobility training in the community. Another group of blind individuals who are not vocational rehabilitation clients receive reader services from the Department enabling them to participate in college programs not necessarily directed toward vocational goals. The Orientation Center for the Blind trains blind adults, particularly those newly blinded, in skills for adapting to blindness and in building their confidence in their ability to function independently in sighted society.

An independent living research project underway is designed to establish a base of information for both State and Federal use in formulation of policy regarding independent living centers.

Chapter 191, Statutes of 1979, provides funding during 1979-80 for the support of existing and development of new independent living centers to provide services to disabled individuals to assist them in achieving social and economic independence. This program is continued during 1980-81 at the same level. Three positions were established in the current year and are proposed new for the budget year to administer this function. The Administration will support legislation to establish an ongoing program of support for core services in the Independent Living Centers on a 50 percent State/50 percent local matching ratio. The proposal will provide for a two year phase-in period for this matching ratio. This budget includes \$2 million General Fund to maintain the current funding level for the budget year. In addition, \$1 million General Fund will be supported as a part of the proposed legislation.

The budget year includes the purchase of habilitation services for developmentally disabled individuals through contract with the Department of Developmental Services as specified by Chapter 1132, Statutes of 1979 (AB 1164, Bates). The Department will be responsible for the review and approval of client assessments developed by facilities conducting work activity programs to ensure that services are directed toward preparing clients for their highest level of functioning and for the promotion of innovative approaches to the delivery of habilitative services by community-based programs. Reasonable costs shall be determined and audited by the department annually for specific allowable habilitation services. The budget proposes adding 27.5 positions, including administrative positions, to manage this program.

## V. ADMINISTRATION

## Program Objective and Description

The Administrative Program provides executive direction, planning, program support, and administrative services to the Department of Rehabilitation. It is administered through a Director's Office, supportive services, and four divisions. Supportive services include Legal, Public Information, Consumer Relations, Legislative Liaison and Affirmative Action functions.

The Division of Field Operations exercises line administration over 26 district offices providing direct services to disabled persons, and administers the Program for the Industrially Injured and the Farm Labor Program. The Program Development Division provides staff services in planning, evaluation and statistics, staff training, research, and job development. The Program Support Division provides direction over ancillary rehabilitation functions such as the Business Enterprise Program, the Community Resources Development activity and the Habilitation Services Program, as well as program managers for services to the blind, deaf, industrially injured, alcoholics, mentally ill, SSI/SSDI recipients, and cooperative school programs. The Administrative Services Division provides fiscal and administrative staff services to the Department.

An accountant position was administratively established in the current year and proposed new in the budget year as a result of additional workload created by establishing a retirement program for BEP Cafeteria operators and new federal accounting requirements for vending stand locations. In addition, 2.2 temporary help-support service assistants were administratively established in the current year and continued in the budget year to provide interpreter and reader services for disabled employees as a result of State Personnel Board Classification. These services were previously purchased from operating expenses on an as needed basis.

Five auditors, an accounting technician, and an office assistant II position are proposed new for 1980-81 to audit the habilitation services costs of facilities providing work activity programs to developmentally disabled individuals and to process monthly payments to these facilities.

## DEPARTMENT OF SOCIAL SERVICES

The Department of Social Services administers four major program areas (welfare program operations, social services, disability evaluation, and community care facilities licensing) and provides administrative support for them.

The goals of the Department are to:

1. Ensure the equitable delivery of payments and benefits, with human dignity and equity, to welfare recipients, with effectiveness in terms of accuracy of payments and with efficiency in terms of the lowest possible administrative costs.
2. Provide social services to California's elderly, blind, disabled, and other adults and children, to protect them from abuse, neglect, exploitation and to help families stay together.
3. Evaluate the disability of applicants for various Social Security Act programs and State disability programs, in an efficient, effective, equitable manner, to ensure that eligibility exists.
4. Regulate group homes, nurseries and preschools, foster homes, half-way houses, day care centers and homes to assure the public that all such California facilities meet established standards for health and safety.

In order to achieve reductions per Section 27.2 of the Budget Act of 1979, the Department of Social Services 1979-80 programs are reduced by 41 personnel years and \$781,457.

### SUMMARY OF PROGRAM REQUIREMENTS

### I. WELFARE PROGRAM OPERATIONS

#### Program Objectives and Description

The Department's welfare payment program provides financial assistance to those California residents who are unable to support themselves. The program is comprised of five elements: Supplemental Security Income/State Supplementary Program (SSI/SSP, i.e., payments to aged, blind, disabled), ancillary adult programs, payments to children (Aid to Families with Dependent Children (AFDC)), Food Stamps, and Child Support Program.

The objective of this program is to provide, on behalf of the general public and within the limits of public resources, reasonable financial assistance to eligible needy and dependent families and to monitor, assist in administering, and improve the SSI/SSP and Food Stamp Programs. In addition, the Child Support Program locates absent parents, establishes paternity and support obligations, and collects child support for both welfare and non-welfare families. Collections made on behalf of AFDC families partially offset AFDC grant costs.

The estimate of the General Fund cost of the grants to be paid under the welfare payments program reflects the effect of the following: 15.16 percent cost-of-living adjustments for 1979-80 and 14.65 percent for 1980-81 in AFDC, SSI/SSP and APSB; Retirement, Support, Disability, and Health Insurance (RSDHI) increases affecting caseload and grants beginning July 1979 and July 1980; the cost impact of court cases; the effects of Chapter 348, Statutes of 1976 (AB 2601) which increased the July 1976 AFDC payment standards by 6 percent, changed the method for computing the SSP cost-of-living adjustment, provided a permanent \$3 increase in the SSP payment schedules, and provided for a dollar-for-dollar pass-on of the SSI benefit increase; absent parent child support provisions of PL 93-647 and Chapter 924, Statutes of 1975 (AB 2326); federal minimum wage increases; Chapter 55, Statutes of 1978 (AB 1224) regarding continuation of BHI benefits for certain 18-20-year-olds; revised overpayment/underpayment regulations; converted Cuban refugee cases; and various Food Stamp Program changes.

The welfare program cost estimates show a net General Fund increase for 1980-81 over 1979-80 of \$428.8 million. This increase is primarily due to the 14.65 percent cost-of-living adjustment anticipated on July 1, 1980. In addition, Indochinese refugees will continue to be aided in California in 1980-81, both in existing categorical aid programs and through a special Indochinese Refugee Assistance Program (IRAP). The goal of these programs is to provide a reliable source of income to meet refugee family needs until self-sufficiency is attained. PL 96-110, signed November 13, 1979, extended 100 percent federal funding for aid to Indochinese refugees through September 30, 1981.

Current estimates indicate that there are 186,500 Indochinese refugees in California in 1979-80, with 57,575 receiving public assistance. In 1980-81, 97,800 of the 278,900 estimated Indochinese refugees in the State are expected to be aided through AFDC, SSI/SSP or the residual IRAP program.

The following chart illustrates the anticipated caseload impact of the Indochinese refugees to the AFDC, SSI/SSP and residual IRAP programs:

<sup>1</sup> Represents General Fund impact only.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## DEPARTMENT OF SOCIAL SERVICES—Continued

## Indochinese Refugees Average Monthly Persons Aided

	1979-80	1980-81
AFDC .....	31,717	53,067
SSI/SSP .....	2,908	5,300
Residual IRAP .....	22,950	39,433
Total .....	57,575	97,800

The Department will also administer in 1980 a one-time supplemental energy allowance created by Federal Public Law 96-126 for the Low Income Energy Assistance Program. This program provides payments to low income households to help restore purchasing power lost because of rising energy prices. Aged, blind, and disabled persons in California receiving Supplemental Security Income (SSI) will receive in January 1980 one time payments totaling approximately \$30 million directly from the Social Security Administration. An additional \$20.8 million will be available in 1980 for payments to other low income households and to cover administrative costs of delivering those payments.

## a. Payments for Children

This payment operation provides financial assistance to eligible needy dependent children and the parents, eligible relatives or other caretakers with whom they live.

The AFDC program is divided into three major subgroups: aid to family groups, aid to families with unemployed parents, and aid to children in boarding homes and children's institutions. A separate program, Aid for the Adoption of Children, provides aid to families adopting hard-to-place children. Both programs are administered by the counties in accordance with regulations, standards, and procedures set by the Department as authorized by law.

To perform increased activities associated with the Federal and interstate fraud detection systems four positions are proposed in 1980-81. Two positions are proposed in 1980-81 to accommodate workload in language services relating to the AFDC program. Six and one half positions were administratively established in the current year and are proposed to continue on a limited term basis through June 30, 1981 to provide AFDC program input to the development of the centralized delivery system.

## DEPARTMENT OF SOCIAL SERVICES—Continued

## a.1 Family Groups (AFDC-FG)

Cash grants are provided to children and their parents or guardians whose income is insufficient to meet their basic needs. Eligibility is limited to those needy families in which the children are deprived of one or both parents due to incapacity, death, or other continuing absence. Eligibility is further based on statutory maximums related to the age of the children and the amount of income plus real and personal property available to the family.

The amount of AFDC a family receives is established by law based on the number of eligible persons in the family less the family's net nonexempt income. In addition to the maximum aid payment (MAP), a family may also receive an allowance for recurring special needs such as medical diets and transportation as well as an allowance for nonrecurring special needs caused by sudden and unusual circumstances beyond the control of the family.

The cost of the AFDC-FG grant is shared by the federal, State and county governments. Fifty percent of the grant cost for federally eligible recipients is paid by federal funds. Prior to 1978-79, the remaining program costs were shared 67.5% State, 32.5% county. Chapter 292, Statutes of 1978 (SB 154) provided for State funding of the county share of costs for the 1978-79 fiscal year. Beginning in 1979-80, Chapter 282, Statutes of 1979 (AB 8) permanently revised the sharing of AFDC-FG costs providing State funding of 89.2% of the nonfederal share.

The AFDC-FG monthly caseload is expected to increase by 62,417 persons in 1980-81 over the most recent current year estimate. A 14.65 percent cost-of-living adjustment on July 1, 1980 is estimated to result in AFDC-FG and U General Fund cost increase of \$156 million in 1980-81.

## a.2 Unemployed Parents (AFDC-U)

Needy children may receive assistance when they meet the basic eligibility requirements if their parent(s) is not fully employed. Additional conditions of eligibility require the parent to be available for and to seek employment. The basic grant standard and program funding are the same as for the aid to family groups program.

The cost sharing revisions to AFDC-U grant payments as a result of Chapter 292, Statutes of 1978 (SB 154) and Chapter 282, Statutes of 1979 (AB 8) are the same as those identified above for the AFDC-FG grant.

AFDC-U monthly caseload estimates for 1980-81 indicate an increase of 15,716 persons from the revised 1979-80 estimates. As described above, a 14.65 percent cost-of-living adjustment effective July 1, 1980 is expected to raise General Fund costs for AFDC-U in 1980-81.

## a.3 Boarding Homes and Children's Institutions (AFDC-BHI)

AFDC-BHI provides cash assistance to children who are in need of protection and care by persons other than their parents, and require 24-hour out-of-home care in a foster home or institution (group home) as a result of court order or parental consent. AFDC-BHI consists of both federal and nonfederal cases. Federal financial participation in the cost of care is available for children who are removed from their homes by court order and meet additional federal requirements. Those not qualified for federal financial participation may be eligible for AFDC-BHI benefits funded by state and county monies.

Chapter 282, Statutes of 1979 (AB 8), Section 78, provides for State funding, after deducting available federal funds, of "95 percent of the sum necessary for the adequate care of each child for the period July 1, 1979, to December 31, 1983." This continues the sharing ratios established for 1978-79 by Chapter 292, Statutes of 1978 (SB 154). Prior to that time, the State paid up to a fixed maximum dollar amount for each child, with county funds providing the remainder of the nonfederal share of grant costs.

The AFDC-BHI caseload is projected to increase between 1979-80 and 1980-81, due primarily to inclusion in the program of certain children eligible for federal financial participation and placed by court order with nonlegally liable relatives, as a result of implementation of the U.S. Supreme Court's ruling in *Youakim v. Miller*.

To develop and implement a rate setting methodology, quality control system, management information system, and enhanced program definition for the AFDC-BHI program, as mandated by Chapter 282, Statutes of 1979 (AB 8), nine positions have been administratively established in 1979-80 and 19.6 positions are proposed for 1980-81. Three and one half of the proposed positions will be limited term to November 30, 1980, and four will be limited term to June 30, 1981.

## a.4 Aid for the Adoption of Children (AAC) Program

The AAC program is designed to encourage and promote the placement in adoptive homes of children who, because of their ethnic background, race, color, language, physical, mental, emotional, or medical handicaps or age, or because they are a sibling group who should be placed in the same home, have become difficult to place in adoptive homes. The legislative intent of the program is to encourage placement of these children in foster homes, which can provide children with the stability and security of relatively permanent homes. While payments for a child in foster care may continue until age eighteen, AAC payments are limited to a maximum of five years, except if there is a continuing need related to a chronic health condition of the child which necessitated the initial financial assistance, in which case assistance may be continued until age eighteen.

Projections for 1980-81 show a small increase in the AAC caseload from 1979-80. Changes in caseload account for the majority of the 1980-81 increase of \$257,600 in General Fund expenditures.

## a.5 Child Support Enforcement Program

PL 93-647, signed on January 4, 1975, initiated the Federal Child Support Enforcement Program. The State enabling legislation, Chapter 924, Statutes of 1975 (AB 2326), became effective on October 1, 1975 and designated the Department of Social Services as the State Title IV-D Agency responsible for administering the program within California. The Department contracts with the Office of the Attorney General to perform specific program functions including interstate enforcement and State locator service.

The Child Support Enforcement Program is a revenue-producing program which locates absent parents, establishes paternity, and obtains and enforces court-ordered child support payments for both welfare and non-welfare families. The program reduces overall AFDC costs as collections made for AFDC families reimburse the federal, State, and county governments for aid paid. During FY 1979-80 the return to each unit of government is as follows: 47 percent federal, 47 percent State, and 6 percent county on AFDC-FG and U collections. Collections made on behalf of non-welfare clients help keep families off AFDC and, consequently, effectuate significant welfare cost avoidance. The program has continued to be cost effective in that it returns more revenue to State and county general funds than it costs to operate.

Since the beginning of the Child Support Program in California, in late 1975, collections have increased significantly. In 1980-81, child support collections are estimated to reach \$232,000,000. Of this amount approximately one-half represents collections made on behalf of families receiving AFDC. Direct net savings to the California taxpayer, just in the form of reduced AFDC State costs, have exceeded \$20,000,000 annually. Collections made in behalf of non-welfare families also represent a substantial indirect savings to the taxpayer, since many of those families would otherwise be on welfare. Welfare cost avoidance is estimated to be in excess of \$50,000,000 annually.

Six positions were administratively established in the current year and are proposed for continuation through June 30, 1981 to perform centralized delivery system development activities for the Child Support Enforcement Program.

To develop systems improvements for the Child Support Enforcement Program, two positions are proposed in 1980-81. As an example of the benefits of new systems, the Department has implemented in 1979-80 an automated statewide income tax refund intercept system in conjunction with the Franchise Tax Board. This system is expected to increase collections of court-ordered child support arrearages for AFDC cases by \$3.2 million in 1979-80 and by \$7.2 million in 1980-81.

For increased management and technical assistance to the counties four and one half positions are proposed in 1980-81 to be established limited term to June 30, 1982, with continuation beyond that date dependent on achievement of significant AFDC program cost savings.

The following table further illustrates these estimated savings to the General Fund.

## DEPARTMENT OF SOCIAL SERVICES—Continued

## Child Support Program

	Total Collections <sup>4</sup>	State Costs	State Recoupment	Net Revenue To State	Welfare Cost Avoidance
FY 75/76 (9 months) .....	\$84,000,000	\$750,000	\$8,650,000	\$7,900,000	<sup>3</sup>
FY 76/77 .....	138,000,000	3,900,000	22,900,000	19,000,000	<sup>3</sup>
FY 77/78 .....	156,000,000	5,400,000	27,500,000	22,100,000	<sup>3</sup>
FY 78/79 .....	170,000,000	25,200,000 <sup>2</sup>	45,900,000	20,700,000	<sup>3</sup>
FY 79/80 <sup>1</sup> .....	190,000,000	26,700,000	45,600,000	18,900,000	\$50,000,000
FY 80/81 <sup>1</sup> .....	232,000,000	29,100,000	56,800,000	27,700,000	50,000,000

Two funds (the Support Enforcement Incentive Fund, SEIF, and the Interstate Collection Incentive Fund, ICIF) were established to encourage county collection efforts. In the 1978-79 fiscal year, Chapter 292, Statutes of 1978 (SB 154), provided for the State's assumption of the counties' share of administrative costs, simultaneously eliminating the State share of incentive payments based on 12.75 percent of collections. The funding and incentive structure has changed in FY 1979-80 with passage of Chapter 282, Statutes of 1979 (AB 8). Effective July 1, 1979, counties are responsible for the 25 percent share of local administrative costs with the State providing 75 percent funding for the non-AFDC related child support administrative costs and the Federal Government providing 75 percent funding for the AFDC related child support administrative costs. Chapter 282, Statutes of 1979 (AB 8) reestablished a state incentive of 15 percent of collections to provide a total incentive of 30 percent to the counties through December 31, 1980. Effective January 1, 1981, the total incentive will be reduced to 27.75 percent.

## b. Payments for Adults

SSI/SSP is a federally administered program under which eligible aged, blind and disabled recipients receive from the federal government a combined monthly check comprised of the federal grant payment for SSI and the California grant payment for SSP. The SSI/SSP payment is intended to cover the recipients' basic needs and living expenses. The state monitors the federal payment operation to determine whether, under the supplemental program, state monies are accurately and properly expended and recipients' payments are properly received.

Although HR-1 (PL 92-603) which brought the SSI/SSP program into being was signed in October 1972, and the program has been in effect since January 1974, substantiated, reliable caseload and cost data are still not available from the federal government. Until such time as the Social Security Administration's (SSA) reporting process is improved, State budget estimates are subject to revision.

General Fund expenditure increases for the SSI/SSP program result primarily from caseload increases and a cost-of-living adjustment offset by (a) unearned income increases; and (b) SSI increases. According to State statutes, this annual cost-of-living adjustment is computed based on changes in the Consumer Price Index from a base month of June, 1973, resulting in a 15.16 percent increase in 1979-80 and a 14.65 percent increase in 1980-81. In 1980-81, General Fund costs for the SSI/SSP program are estimated to increase 20.4 percent over the revised estimate for 1979-80. This is primarily because application of the 14.65 percent CPI increase to the statutory cost of living formula will actually result in a 16.85 percent increase in total SSI/SSP grant levels; the increase in the SSP (General Fund) share of the grant will be even greater.

The county contribution toward SSI/SSP costs as required by Chapter 1216, Statutes of 1973, as amended by Chapter 426, Statutes of 1976 (SB 2081), was shifted to the General Fund in 1978-79 according to the provisions of Chapter 292, Statutes of 1978 (SB 154). Chapter 282, Statutes of 1979 (AB 8), permanently eliminated the county contribution in this program.

## c. Special Adult Programs

In addition to regular SSI/SSP benefits, two ancillary programs established by Chapter 1216, Statutes of 1973 (AB 134), are available to SSP recipients. Each of these is funded by the State and administered by the counties in accordance with regulations, standards, and procedures set by the Department as authorized by law. The first is Special Circumstances which provides allowances to eligible recipients for special nonrecurring needs, such as the replacement of essential household furniture and equipment or clothing lost through a catastrophe, required housing repairs necessary to preserve safe and healthful housing, necessary moving expenses due to eviction, unsafe or unhealthful housing, and unmet shelter needs. The other is the Emergency Loan Program for recipients whose regular monthly SSI/SSP and/or Retirement, Survivors, Disability and Health Insurance (RSDHI) payment is lost, stolen or delayed.

An additional program for blind SSP recipients is the Guide Dog Special Allowance (funded under Special Benefits), which offers recipients with a specially trained guide dog an additional allowance to cover the cost of dog food. This differs from the above programs in that the Guide Dog Special Allowance is State administered as well as State funded.

The Aid to the Potentially Self-Supporting Blind (APSB) Program assists blind recipients with a plan of self-support to become economically independent by allowing them to retain resources in excess of those allowed under the basic SSI/SSP program. APSB grant costs and 83.3 percent of the administration costs are State funded. The remaining 16.7 percent of the administrative costs are county funded as provided in Chapter 282, Statutes of 1979 (AB 8).

The Repatriated American Program provides temporary help to needy U.S. citizens returning to the U.S. from foreign countries because of destitution, physical or mental illness, or war. Funding is 100 percent federal funds reimbursed to the counties through the Department of Social Services.

In addition, federal funding provides 100 percent maintenance support for needy Indochinese refugees who are ineligible for other kinds of IRAP categorical aid (AFDC, SSI/SSP, etc.). PL 96-110, signed November 13, 1979, extended this program with 100 percent federal funding through September 30, 1981.

Currently, Cuban Refugees must qualify for aid on the same basis as nonrefugees. Those aid costs not normally met by federal funds are reimbursed by federal sources at a declining rate each federal fiscal year: 1980 at 75 percent; 1981 at 60 percent; 1982 at 45 percent; and 1983 at 25 percent.

Three positions are being administratively established in 1979-80 and proposed to continue through September 30, 1981 due to workload associated with increased Indochinese Refugee Assistance Program caseload. Four and one half positions were administratively established in 1979-80 and are proposed to continue on a limited term basis through June 30, 1981 to provide adult programs input to the development of the centralized delivery system.

## d. Food Stamps

The purpose of the Food Stamp (FS) Program is to provide for improved levels of nutrition among low-income households by offering eligible households food stamps at no cost to them. The amount of food stamps a household receives will depend on their net adjusted income. The cost of the benefit value of food stamps is borne entirely by the United States Department of Agriculture (USDA).

The Department of Agriculture, Food and Nutrition Service (FNS), retains the overall administrative responsibility for the Food Stamp Program. Through a cooperative agreement between FNS and the State, the Department of Social Services directs food stamp operations within California. Household eligibility and certification determinations as well as food stamp issuance have been delegated by law to fifty-eight county welfare departments. Counties are, however, given the option to contract with outside agencies for food stamp issuance.

Food stamp regulations, consultative services, training and technical services are provided to the counties by the Department's Food Stamp Program Management Branch to insure the continued efficient, effective and equitable administration of the program at the county level.

In fiscal year 1976-77 federally mandated Efficiency and Effectiveness (E&E) reviews of county operations conducted by the Department provided an ongoing system for monitoring and improving the program. The E&E system also included an FNS review of the Department to provide an evaluation of the State's operation of the program. The Food Stamp Act of 1977 continues to provide for county and State monitoring and corrective actions under management evaluation (ME) regulations.

Administrative costs of the program are funded as follows. The costs for the certification of households of which all members of the household are Aid to Families with Dependent Children (AFDC) recipients are included in the administrative costs for AFDC and reimbursed by the Department of Health, Education and Welfare (HEW), now known as Health and Human Services (HHS), at 50 percent of claimable expenses. Nonassistance household certification and issuance costs for all food stamp households are funded 50 percent by FNS with the remaining 50 percent shared equally by the counties and the State. In 1978-79 the State assumed the \$21.5 million county share as provided in Chapter 292, Statutes of 1978 (SB 154). Subsequently, beginning in 1979-80, as provided under Chapter 292, Statutes of 1979 (AB 8), the State and counties each pay 50 percent of the nonfederal costs subject to the limitations of the cost control plan. Cost control provisions implemented by the Department pursuant to Budget Act language to prevent the uncontrolled growth of state expenditures have been in effect since fiscal year 1977-78, and have provided an effective cap on state expenditures for the Food Stamp Program.

The Department contracts with various community-based organizations throughout the State for food stamp outreach services to meet federally mandated outreach requirements. The Department monitors the outreach services provided by these contracted agencies. Costs for this activity are shared equally by the State General Fund and the Federal Department of Agriculture.

Federal law enables California to cash out Supplemental Security Income/State Supplementary Program (SSI/SSP) recipients from the Food Stamp Program. Under the provisions of the cash out, California SSP payments are increased in conjunction with SSI cost-of-living increases in a manner which includes the average food stamp benefit such households would normally be entitled to.

In addition to the elimination of the purchase requirement for food stamp households, the Food Stamp Act of 1977 provides an income limit and simplified eligibility standards. The Reform Act also makes permanent the cash out provisions for SSI/SSP recipients. Implementation of the Act, which began in 1979, will require extensive State regulatory changes over the next several years.

Commencing in 1979-80, 14.5 positions have been established and proposed to continue in 1980-81 to meet new federal food stamp quality control review requirements and a need for an expanded data base. An additional one position is proposed to begin in 1980-81 to meet the increased clerical workload. Seven positions were administratively established in 1979-80 and are proposed to continue on a limited term basis through June 30, 1981 to provide Food Stamp program input to the development of the centralized delivery system.

## e. County Administration

County administrative costs are funded by the federal, State, and county governments. AFDC Program administrative costs are subject to 50 percent federal reimbursement with the State contributing 50 percent of the nonfederal share. AFDC related Child Support administrative costs are subject to 75% federal reimbursement. Beginning in Fiscal Year 1979-80, in the event the federal government does not provide funding, Chapter 282, Statutes of 1979 (AB 8), provides 75% State reimbursement for non-AFDC collection of child support from noncustodial parents and the non-AFDC determination of paternity in the case of a child born out of wedlock. Food Stamp Program administrative costs are subject to 50 percent federal reimbursement and 25 percent State reimbursement beginning in Fiscal Year 1979-80. In addition, the state pays 100 percent of administrative costs associated with the special circumstances, special benefits, and emergency payments programs for adult recipients. The APSB Program is shared 83.3 percent by the State and 16.7 percent by the counties beginning in Fiscal Year 1979-80. Except for APSB and the adult programs, in FY 1978-79, the State paid 100 percent of the nonfederal share of the administrative costs of the above welfare programs as required by Chapter 292, Statutes of 1978 (SB 154).

County administrative funds are used to pay salaries and benefits of eligibility workers, clerical support, and administrative support staff. These funds are also used to pay for the typical operating costs of space, utilities, supplies, check writing for recipients, EDP, and other operating costs. The majority of administrative funds (82 percent) are used to pay salaries and employee benefits of welfare department employees with the remaining 18 percent used for operating costs.

The County Administration program represents the cost control efforts of the above described program areas; therefore, staff allocations are not displayed here, but in the respective program areas.

Commencing in the current year, a one year project of 48 training seminars will be provided for county representatives involved in fair hearings.

AFDC and NAFS  
STATEWIDE AVERAGE TOTAL EW'S AND EW SUPERVISORS

## DEPARTMENT OF SOCIAL SERVICES—Continued

Due to the rapid escalation of county administrative expenditures in recent years the Department undertook a major effort to control these costs. This effort began in fiscal year 1975-76 with the creation of the County Administrative Expense Control Bureau. In fiscal year 1975-76, cost control plans were developed for the AFDC and Non-Assistance Food Stamp (NAFS) programs and went into effect with the submission of those plans to the Joint Legislative Budget Committee in October 1975. Even though the plans were in effect for only nine months, they proved to be effective in controlling county administrative costs.

In fiscal year 1975-76, the first year of implementation, General Fund administrative cost savings of \$4.7 million and \$6.05 million were realized in the AFDC and NAFS programs, respectively.

In fiscal year 1976-77, the plans again proved to be effective in increasing productivity, thus reducing costs. Productivity increases of 3.25 percent and 2.88 percent were realized in the AFDC and NAFS programs, respectively. The NAFS program savings was especially striking because Fiscal Year 1976-77 costs were actually lower than Fiscal Year 1975-76, in spite of a substantial statewide cost-of-living increase.

Similarly, in fiscal year 1977-78 productivity increases of 6.55 percent and 1.5 percent were realized in the AFDC and NAFS programs. Considering the decline in NAFS caseloads, the 1.5 percent productivity increase was a significant accomplishment. Although the basic concept of the plans remained unchanged, with the input of county staff, both plans were revised to improve and enhance some technical aspects. Further improvements were also made in the county-by-county cost control budgeting system first developed for fiscal year 1976-77. All the improvements were geared toward developing more accurate workload measurements to enable counties to better identify specific problem areas which must be addressed.

For Fiscal Year 1978-79 productivity increased 5.05 percent and 11.43 percent for the AFDC and NAFS programs, respectively, as illustrated in the following graphs. This can be attributed to the impact of Proposition 13 at the county level and increased State and county effort to improve the efficient operation of these programs.

## f. Special Programs

Chapter 432, Statutes of 1978 (SB 1410) attached the State Council on Developmental Disabilities to the Health and Welfare Agency for administrative purposes. The thirteen Area Boards on Developmental Disabilities associated with the Council were also transferred in keeping with Legislative intent. Beginning in Fiscal Year 1979-80, these entities have separate budgets.

The Work Incentive Program (WIN) provides social services to WIN registrants to enable the registrant to accept employment or participate in WIN. Purchased services are provided only to certified WIN recipients and the main purchased service in the WIN program is child day care. Child day care is defined as the comprehensive and coordinated set of activities providing direct care and protection of infants, preschool and school-age children during a portion of a 24-hour day inside or outside of the child's own home. Child day care arrangements provided through WIN must meet the same standards as are required under Title XX. Beginning with the 1979-80 fiscal year the WIN program requirements are displayed within Social Services programs.

The Repatriated Americans program provides temporary help to needy U.S. citizens returning to the U.S. from foreign countries because of destitution, physical or mental illness, or war. Funding is 100 percent federal funds reimbursed to the counties through the Department of Social Service. Beginning in 1979-80, these costs are shown under Section c, Special Adult Programs.

## II. SOCIAL SERVICES PROGRAM

## Program Objectives and Description

The Department of Social Services monitors and oversees the operational program aspects of social services programs through the development of policy, regulations and procedures for the delivery of services to clients, and the monitoring and evaluation of services delivered.

The Social Services programs are divided into seven major categories: (1) Other County Social Services; (2) Specialized Adult Services; (3) Specialized Family and Children's Services; (4) Adoptions; (5) Demonstration Programs; (6) County Services Staff Development; and (7) Services Training.

Social Services, as provided to the elderly, blind, disabled, and other adults and children, are designed to meet the five national goals mandated by Title XX of the Social Security Act:

1. Assist individuals to become and/or remain economically self-supporting.
2. Assist individuals to become and/or remain able to take care of themselves.
3. Prevent and/or stop abuse, neglect and exploitation of children and adults who are unable to care for themselves.
4. Keep individuals from being placed in institutions unnecessarily by providing care to them in their own homes and in the community.
5. Ensure that individuals who need institutional care are placed in institutions that can help them with their problems.

Services are provided through county welfare departments and state agencies with funds provided under Titles IV and XX of the Social Security Act, Public Law 93-647, as well as state and county funding.

<sup>1</sup> Funds for emergency payments administration and nonmedical out-of-home care certifications are included in the Adult Programs administration appropriation in 1980-81.

## DEPARTMENT OF SOCIAL SERVICES—Continued

Current year estimated expenditures for the Adoptions element indicate a 12.5 percent increase of \$1 7 million over budgeted funds. This increase, primarily due to a projected 11 2 percent caseload growth, is proposed to be funded from current year savings in other elements in the Social Services Program and from a proposed \$417,960 deficiency appropriation. A proposed \$2.3 million increase in the budget year over current year is due, primarily, to a continuation of adoptions caseload growth and a 9 percent cost-of-living increase.

Funding for the Social Services Program assumes the receipt of \$80 million in additional Title XX Federal funds from pending legislation. In the current year \$6.8 million will be allocated to Other County Social Services (OCSS), pursuant to 1979 Budget Act language in Item 287. Funds for 1980–81 are proposed as follows: (1) \$20 million to child care through contract with the State Department of Education to continue one-time Federal funds from HR 13511; (2) \$13.2 million to OCSS to continue one-time Federal Funds from HR 13511; (3) \$11.9 million to OCSS to provide a 9 percent cost-of-living increase; and (4) \$2.9 million to expand and provide a nine percent cost-of-living increase for 24-Hour Emergency Response services. The remainder of \$25.1 million will be held in reserve pending the redesign of Social Services programs, primarily directed at children's services, consistent with the requirements in proposed Federal legislation.

DEPARTMENT OF SOCIAL SERVICES—*Continued*

## a. Other County Social Services

## a.1. Adult and Family and Children Services

These services include all Title XX funded programs, other than In-Home Supportive Services, administered by county welfare departments that are intended to meet the five national goals. The services include nine mandated programs and fourteen optional programs as follows:

Mandated Services—(1) Information and Referral, (2) Protective Services for Children, (3) Out-of-Home Care Services for Children, (4) Protective Services for Adults, (5) Out-of-Home Care for Adults, (6) Child Day Care Services, (7) Health-Related Services, (8) Family Planning, and (9) Employment-Related Services.

Optional Services—(1) Special Care for Children in Their Own Homes, (2) Home Management, (3) Employment Education/Training, (4) Services for Children with Special Problems, (5) Services to Alleviate or Prevent Family Problems, (6) Sustenance, (7) Housing Referral Services, (8) Legal Referral Services, (9) Diagnostic Treatment Services for Children, (10) Special Services for Blind, (11) Special Services for Adults, (12) Services for Disabled Individuals, (13) Services to County Jail Inmates, and (14) Work Activity/Workshop Programs.

*One additional position is proposed to begin in 1979-80 for administration of the Federal Indian Child Welfare Act as it pertains to child protective services. Under the assumption that substantive changes in Federal Social Services law will be enacted, two new positions are proposed for the child protection requirements in this Federal legislation. These three positions are limited term until June 30, 1982. To meet clerical workload from increased correspondence and inquiries regarding social services programs, one-and-one-half positions are proposed. One new position is proposed to begin in 1979-80 for the implementation and administration of the Adult and Family Services portion of the Centralized Delivery System. The position is limited term to June 30, 1981.*

## a.2. 24-Hour Emergency Response

24-hour Emergency Response services relieve and reduce circumstances threatening the mental and/or physical health of children by providing direct immediate child protective services response in situations of abuse and neglect 24 hours a day, seven days a week. In Fiscal Year 1979-80, a \$5 million General Fund 24-Hour Emergency Response System to improve Emergency Child Protective Services in the 58 counties was initiated as an augmentation to Other County Social Services. *The 1980-81 Budget proposes to utilize new Federal funds to expand the existing program to the \$7.9 million level to better meet the needs of abused and neglected children.*

## b. Specialized Adult Services

Adult Services programs are those services which have been developed to assist adults to maintain or achieve maximum self-sufficiency in an environment free from abuse, exploitation and neglect.

## b.1. In-Home Supportive Services (IHSS)

The IHSS Program provides those supportive services necessary to enable eligible persons to remain in their own homes as an alternative to out-of-home care. Eligible persons are aged, blind, or disabled recipients of public assistance and similar persons with low incomes. These services include: Domestic or cleaning services; meal preparation, laundry, shopping and errands; nonmedical personal services, such as bowel and bladder care, bathing, and oral hygiene; assistance with travel to medical appointments or to other sources of supportive services; protective supervision; teaching and demonstration directed at reducing the need for supportive services.

Regulations effective April 1, 1979, established a uniform range of services available to recipients in the IHSS program. Chapter 1059, Statutes of 1979, introduced the existing regulatory list of IHSS services into statute, effectively repealing the regulatory prohibition of payment to parents to provide supportive services to their minor children, and specifying the conditions under which parents shall be paid to provide certain listed supportive services for their children. Other major legislation which is reflected in the Budget includes Chapter 1071, Statutes of 1979, which expanded the scope of IHSS to include paramedical services, and Chapter 504, Statutes of 1979, which mandated statewide uniformity in the IHSS scope of services, and broadened circumstances in which recipient's preference must be considered in selecting a provider. An IHSS payrolling system, pursuant to Chapter 563, Statutes of 1978, will be implemented during the current year through a private contractor. The contractor will assume responsibility for issuing all IHSS individual provider payment checks, withholding the appropriate taxes, and filing the required tax returns and payments.

*IHSS program costs estimates indicate an increase of \$36.5 million (17 percent) for 1980-81 over 1979-80 estimated expenditures. The increase is due primarily to an estimated caseload growth of 7.9 percent for 1980-81 over 1979-80 and recognition of increases in the minimum wage from \$2.90 per hour to \$3.10 per hour on January 1, 1980 and to \$3.35 per hour on January 1, 1981.*

## b.2. Family Planning

This program provides services which enable parents and potential parents, including sexually active minors, to make an informed and free choice with respect to limiting family size and spacing children. The Department of Social Services contracts with the Department of Health Services to administer this program.

## b.3. Contracted Indochinese Refugee Assistance Program (IRAP) Services

This program supervises the provision of Title XX type social services; vocational training, and teaching of English as a second language (ESL); and job placement services to Indochinese refugees. Child care services are provided to eligible children age 0-14 years of age whose parent/parents are participants in English as a second language, employment training programs, and work-related activities.

*Due to the rapid growth of the Indochinese refugee population in California, an increase in the delivery of refugee social services is anticipated. Thirteen and one-half additional positions are proposed to begin in 1979-80 for increased workload associated with administration of the Indochinese Refugee Assistance Social Services Program. Three of the positions will be located in the Adult and Family Services Division, to negotiate and monitor contracts. The balance of the positions will be located in the Administration and Planning and Review Divisions, to provide supportive services. These positions are limited term until September 30, 1982.*

## b.4. Rape Victim Counseling Centers

This is a state grant program to provide funding to newly established and existing local rape victim counseling centers throughout the state. Rape victim counseling centers are primarily responsible for providing assistance to victims of rape, counseling their families and friends, and conducting community education.

DEPARTMENT OF SOCIAL SERVICES—*Continued***b.5. Maternity Home Care Program**

The "Pregnancy Freedom of Choice Act" provides residential care and maternity related services to unmarried expectant mothers under the age of 21, domiciled in California who are living in maternity homes with established contracts with the Department of Social Services.

**c. Specialized Family and Children's Services**

Family and Children's Services programs are those services which have been developed to protect children from abuse, neglect, and exploitation, to strengthen family ties, and establish environment free of dependency.

**c.1. Work Incentive Program (WIN)**

This is a federally-administered program operated by the Department of Social Services and Employment Development Department designed to provide social services and training to unemployed recipients of Aid to Families with Dependent Children to assist them in finding jobs and becoming self-supporting.

**c.2. Child Day Care and Child Development Program**

Child Day care services are a comprehensive and coordinated system of social services for children ages 0-14 years of age. The services include supervision, health, nutrition, parent participation, and related social services. Day care services are provided by public and private children's centers, group child day care, family day care and in-home care. The Department of Social Services contracts with the Department of Education to administer this program.

**c.3. Child Welfare Services**

Child Welfare Services include preventive and remedial services on behalf of children under 18 years of age who are either harmed or threatened with harm as the result of abuse, neglect, or exploitation.

**d. Adoptions**

The adoptions element includes: (1) provision of relinquishment adoption services through three state offices, twenty-eight licensed county adoption agencies, and eight licensed private adoption agencies; (2) conduct of studies of all independent adoption placements through three state offices and eight delegated county adoption agencies; (3) completion of home studies for California families applying to international agencies to adopt homeless children living in foreign countries; and (4) administration and regulation of adoptive placements of children, including those between California and other states in accordance with California's interstate compact on the placement of children.

Chapter 489, Statutes of 1979, provides for an increase in the maximum amount of reimbursement for adoption of hard-to-place children. The child must be relinquished or freed from parental control to a California public agency. Chapter 809, Statutes of 1979, requires Department of Social Services to assure that parents of Indian ancestry seeking to release a child for adoption provide sufficient information so that a certificate of degree of Indian blood can be obtained from the Bureau of Indian Affairs.

*One permanent and six positions limited term until June 30, 1982, are proposed as follows:*

*One permanent position to accommodate increased workload in the adoptions' Interstate Compact for the Placement of Children.*

*Two positions to provide direct adoption services in the Relinquishment Adoptions' field offices.*

*One position to monitor public and private adoption agencies.*

*Two positions to undertake increased workload related to requests for background information regarding adopted children.*

*One position to develop policy and procedural changes in the Adoptions Program to conform to requirements of the Federal Indian Child Welfare Act (PL 95-608). This position will also be established in the current year.*

*One additional position is proposed for microfilming of adoptions' case records and is limited term until June 30, 1983.*

**e. Demonstration Programs**

Demonstration programs provide a mechanism for public and private organizations to utilize their resources and, through concerted and cooperative actions, contribute to solutions to the economic, social and personal problems which tend to prolong dependency. These programs provide a method of testing ideas that may lead to a more effective and efficient system of public aid and services.

**f. County Services Staff Development**

The county services staff development program provides specific training for county social services staff responsible for the operation of Title XX Social Services. Funds are allocated directly to local county welfare departments, under the supervision of Department of Social Services.

**g. Services Training**

This program provides, through the California educational institutions, services training, student financial assistance, and the development of innovative curricula responsible to the needs of service providers in Title XX funded programs. Federal funding limitations were placed on Title XX Training in 1979-80 that are expected to be removed in 1980-81 through pending federal legislation.

*Since the Department of Social Services directly administers Title XX training funds, two new positions are proposed for the increased workload in administration and policy development.*

**h. Reserve for New Federal Requirements**

These Title XX Funds are held in reserve pending the redesign of Social Services Programs, primarily directed at children's programs, consistent with the requirements in proposed federal legislation.

DEPARTMENT OF SOCIAL SERVICES—Continued

III. COMMUNITY CARE LICENSING

Program Objectives and Description

The Community Care Licensing Program is responsible for regulating the community care industry, which includes all non-medical day care or residential care provided in group and family homes, nurseries and preschools, foster homes, half-way houses, day care centers, home finding and adoption agencies, and similar types of community care facilities. Persons served by the program include the mentally disordered, developmentally and physically disabled, aged, and socially dependent children and adults. The objective of the program is to assure that all persons provided community care are served by licensed facilities which meet established standards for the health and safety of those persons served.

To ensure that objective, the Community Care Licensing Program licenses facilities which comply with licensing standards, monitors those facilities to ensure continued compliance, and pursues corrective action or license revocation where licensing standards are not met. Forty-seven counties perform these licensing functions under contract to the department in accordance with Health and Safety Code Section 1511.

In order to perform license evaluation activities for increased current year workload, 27 positions will be administratively established in 1979-80. To monitor the child care registration project pursuant to the provisions in Chapter 1063, Statutes of 1979 (AB 1368), one additional position will be administratively established in the current year.

In addition to the 27 positions continued from 1979-80, 21 positions are proposed in 1980-81 due to increased licensing caseload. Due to increased policy and regulations workload, two positions are proposed in 1980-81, while another two positions are added to perform evaluations of county contract performance. Also proposed in 1980-81 are one position to update and monitor the Facilities Information System (FIS) to meet legislatively mandated production of a facilities directory and two positions to perform increased audit and investigative client protection activities.

Increased current year costs for county licensing activities are proposed to be funded from anticipated savings in other programs. Increased costs in 1980-81 for county contracts are due to implementation of legislation such as Chapter 951, Statutes of 1978 (Foster Home Licensing Requirements), Chapter 1063, Statutes of 1979 (Registration of Day Care Facilities), and Family Day Care Homes for Children regulations, as well as a change in the methodology used to determine the total contract amounts to achieve consistency with State workload standards.

IV. DISABILITY EVALUATION PROGRAM

Program Objectives and Description

The Disability Evaluation Program is responsible for determining the medical eligibility of California residents for benefits under Title II (Disability Insurance), Title XVI (Supplemental Security Income), Title XIX (Medicaid) of the Social Security Act, related public assistance programs, and selected county retirement associations. Such determinations are made under federal and State contractual agreements.

The main objective of the Disability Evaluation Program is to establish an applicant's medical/vocational eligibility for disability benefits by determining the severity of the individual's physical and/or mental impairment(s) and overall ability to engage in substantial gainful employment. Persons having a disability who are covered for Social Security benefits and/or qualify for public financial assistance may file an application at a Social Security Administration district office or county welfare department. The claim is then forwarded to the Department of Social Services where determinations are made by an adjudicative team composed of an analyst specially trained in medical and vocational factors relevant to disability evaluation and a medical consultant. Medical evidence and pertinent vocational information are obtained from the claimant, physicians, medical facilities, and other sources. Determinations are then made in accordance with strict federal regulations promulgated by the Social Security Administration. The program also refers to the Department of Rehabilitation those claimants with rehabilitation potential.

## DEPARTMENT OF SOCIAL SERVICES—Continued

Chapter 451, Statutes of 1979, mandates that all adults applying for Medi-Cal Medically Indigent (MI) benefits must first be found ineligible for Medically Needy (MN) benefits before qualifying as MI, which will result in increased federally-funded MN caseload and reduced General Fund costs. The Department has previously pilot tested the benefits of evaluating MI caseload for MN (disabled) eligibility, through a simplified referral process, resulting in a return to the General Fund of 7:1. To accommodate the increased workload associated with statewide implementation of this legislation through the Simplified Referral process, 25 positions from the federally-funded portion of the program are to be permanently redirected beginning in January 1980 and 64.1 new positions are proposed in 1980-81. General Fund savings of \$5,300,000 are anticipated in the Medi-Cal program in 1980-81 with increasing savings thereafter.

## V. ADMINISTRATIVE SUPPORT

## Program Objectives and Description

The Department's operational and program areas require overall policy direction, coordination, and staff support services in order to meet the Department's goals and objectives, which are to:

- 1) provide leadership, coordination, and management consultation for the aforementioned departmental programs,
- 2) ensure the most efficient and effective use of the available staff and resources, and
- 3) provide administrative, business, legal, and other services necessary for the efficient operation of the department's program.

Administrative Order No. 79-35, under the authority of Executive Order No. B-48-78, assigns to the Department of Social Services the responsibility for the administration of the Individual and Family Grant Program (Disaster Relief) for disasters proclaimed by the President under the provisions of the Disaster Relief Act of 1974. During 1978-79, the following were proclaimed National Disasters: Laguna Beach Landslide, Los Angeles Brush Fire, and Southern California Floods. Chapter 848, Statutes of 1979, appropriates \$1,926,000 for grants and administrative support associated with the 1978-79 disasters. During 1979-80, the Riverside Flash Flood and the Imperial County Earthquake have been proclaimed National disasters. Savings are being redirected from other programs in the current year to fund the Department's costs for grants and administration.

To meet the reporting requirements of the California Fiscal Information System (CFIS), 2.5 positions are proposed to begin in 1979-80 and an additional 0.5 position in 1980-81. In order to provide general accounting support, one position is proposed to be administratively established in 1979-80, limited to June 30, 1981.

For Fiscal Year 1980-81, 6.5 positions are proposed to provide general support services. One position is proposed for records analysis, one for direct contracting, 1.5 for personnel transactions, one for budget preparation and analysis, one to provide internal audit services, and one, limited to June 30, 1981, for routine accounting functions.

Administrative support decreases in 1980-81 are due to expiration of 12 positions that were established in 1979-80 for Disaster Relief, and Health and Welfare Agency support and the elimination of two positions for Life Care Contracts.

## Centralized Delivery System:

Chapter 282, Statutes of 1979 (AB 8), directs the Department of Social Services to implement a centralized delivery system in all counties by July 1, 1984. This system, to be known as the Statewide Public Assistance Network (SPAN), will be a joint State and county operation under which the State will provide management and delivery support to the following locally administered public assistance programs: AFDC-FG, AFDC-U, AFDC-BHI, Food Stamps, Medi-Cal eligibility, Aid for Adoption of Children, Special Adult Programs, and, to the extent feasible, Social Services and Child Support Programs.

This system will include telecommunications terminals in the counties which will provide data communications to centralized State computers on which a number of "system components" will be functioning. These will include: a central index, data collection and verification, eligibility verification, budget computation, warrant writing/ATP issuance/reconciliation, management reporting, quality control sample selection, fiscal controls, child support collection and distribution, child support case management, the Emergency Loan Program and Medi-Cal card production.

Centralized delivery will enable the State to realize sizable cost savings, improve fraud detection, facilitate more effective program management and provide standardization of programs and procedures resulting in more equitable treatment of recipients throughout the State.

Commencing in the current year, 65 positions are being established for the definition phase of the project (Phase I). Of this total, 40 positions will be added to the Centralized Delivery System Project, 24 positions will be added to the Welfare Program Operations Division, and 1 position will be added to the Adult and Family Services Division. With the exception of the data processing classifications, these positions will be limited term through June 30, 1981.

To design the project (Phase II), the department is proposing 24 positions commencing in the current year and continuing through the budget year. To begin the implementation of the project (Phase III) in the first pilot counties in 1981, 43 positions are proposed effective July 1, 1980. Specific staffing levels and resources have yet to be identified to accomplish Phase II and III; therefore, an estimated funding level of \$1,995,953 has been budgeted as a special item of expense to be allocated upon review and approval by the Department of Finance as each phase is prepared to proceed.

## VI. LOCAL MANDATES

This program reflects the cost of reimbursing local government for any new program or increased level of services for an existing program mandated on local entities by legislation or by executive order (regulations) in accordance with Section 2231 of the Revenue and Taxation Code.

Legislative mandates: Chapter 348, Statutes of 1976 (AB 2601) increased the July 1976 AFDC payment standards by 6 percent, effective January 1, 1977. This requirement created a State obligation to reimburse counties for those costs in subsequent years.

Executive mandates: (1) AFDC regulations exempting the value of equipment related to recipient's employment and to exempt loans from consideration as income require continuing reimbursement to counties; and (2) In-Home Supportive Services Program regulations mandating the availability of uniform services statewide result in continuing reimbursable administrative costs.

## CALIFORNIA HEALTH FACILITIES COMMISSION

## Program Objectives and Description

The California Health Facilities Commission is charged with the responsibility for disclosure of health facility financial and related data. The purpose of such disclosure is to (1) encourage economy and efficiency in the provisions for health care services by health facilities in this State, (2) enable public agencies to make informed decisions in purchasing and administering publicly financed health care, (3) encourage organizations which provide health care insurance to take into account financial information provided to the State in establishing reimbursement rates, (4) provide uniform health data, (5) provide accurate information to improve budgetary planning, (6) identify and disseminate information regarding areas of economy in the provision of health care consistent with quality of care, and (7) create a body of reliable information for research into the economics of health care.

The Commission has made progress toward these objectives. Systems of uniform accounting and reporting are now in place in over 600 hospitals and 1,200 long-term care facilities, and related financial and statistical data and cost comparisons are being disseminated to the public, other state agencies, planners, and health facilities.

The Commission develops annual economic standards for health planning in California. This report contains expenditure estimates, effectiveness standards and estimated Medi-Cal expenditures.

*The Commission is increasing its public disclosure and interagency coordination programs. The Commission is augmenting its staff to develop public oriented reports on health facility operations. These reports are intended to increase public interest on and awareness of health facility issues. In order to augment the Commission's efforts in these areas, three additional positions are being added and a fourth position is being redirected from the research unit.*

*The Commission is proposing to merge its long-term care disclosure report with the Medi-Cal cost report and to integrate the reports processing to eliminate duplicate government regulation and expense. This proposal will eliminate four positions.*

*The Commission has carefully examined existing programs and priorities and has identified three positions which can be deleted without endangering essential programs.*

## CALIFORNIA HEALTH FACILITIES FINANCING AUTHORITY

The California Health Facilities Financing Authority (CHFA) was created with the passage of AB 1558/Chapter 1033 of 1979. The CFHA is a public instrumentality of the State composed of seven members: the State Treasurer, the Director of Finance, the State Controller, two public members appointed by the Senate, and two public members appointed by the Assembly to serve terms of four years.

The Authority was created for the purpose of issuing revenue bonds to assist qualified private nonprofit corporations or associations in the financing or refinancing of health facilities construction, equipping, or the acquisition of existing health facilities. The funding or refinancing can be accomplished by making secured or unsecured loans to "participating health institutions," by the direct purchase and leaseback of the health facility by the Authority, or by a "participating health institution" acting as an agent for the Authority. The Authority can determine the location and character of any proposed project, and can solicit mortgage insurance (State or Federal) for any funded project. The only enumerated eligibility criteria for funding under the Act is that the project be a health facility, as defined in the Act, and operated by a private nonprofit corporation or association.

Through its ability to issue tax exempt bonds, the Authority provides lower cost financing to qualified institutions than they would be able to secure on the open market. The Authority has the authorization to issue up to \$650 million in revenue bonds for these purposes. The bonds carry interest which is exempt from income taxes, as provided for in Section 103 of the Internal Revenue Service Regulations. However, the law specifically provides that bonds issued shall not be a debt or liability or a pledge of faith and credit nor the taxing power of the State or any of its political subdivisions. The full faith and credit of the participating institutions are pledged to the payment of bonds. This is a trust activity and involves no State revenues or expenditures. All expenses must be paid from revenues and other moneys available to the Authority.

# EDUCATION

## DEPARTMENT OF EDUCATION

California's public education system is administered at the State level by the Department of Education, under the direction of the State Board of Education and the Superintendent of Public Instruction, for the education of more than 4 million students from preschool age to adulthood. *The department program budget has been totally restructured for the 1980-81 fiscal year so that individual State and federal program purposes, functions, and fiscal details can be more easily linked between this budget and related appropriation items in the Budget Bill. This reorganization is also intended to facilitate identification of the various programs serving specific student population needs.*

The State administration aspects of the programs are managed through three branches of the Department: the Executive Branch, the Educational Programs Branch, and the Administration Branch.

The functions of the State staff in administering the programs described in this budget extend across six principal areas. The state functions include: Policy development and coordination—promulgating regulations, implementing statutes, interpreting legislative intent, developing program goals, and coordinating with other agency individuals within the executive and legislative branches.

Curriculum and management assistance—assisting local educational agencies through the dissemination of information, conduct of workshops and provision of other in-service training, and performance of other leadership functions.

Fund and product distribution—allocating to local educational agencies funds appropriated by the State or federal government and distributing surplus property or donated commodities.

Program and plan review—assessing the quality of operating educational programs and adherence to implementing requirements.

Regulatory action—resolving of compliance issues identified through the program and plan review functions.

Consumer protection—following up on and resolving parent, student, or community group complaints unresolved by local agencies.

Each of these functions, depending upon the specific purposes of the individual elements and components described in this budget, is an aspect of State administration within the Department of Education.

The department's programs are the following:

I. Instruction

II. Instructional Support

III. Special Programs

IV. Department Management and Special Services

V. Library Services

VI. Legislative Mandates

DEPARTMENT OF EDUCATION—*Continued*

## Introduction

State support of elementary and secondary education has changed significantly since the public approved Proposition 13 in June 1978. Several bills were quickly enacted to replace on a one-time basis a substantial portion of the loss in local government property taxes occasioned by the initiative. These bills, SB 154 (Chapter 292, Statutes of 1978) SB 2212 (Chapter 332, Statutes of 1978) and SB 260 (Chapter 51, Statutes of 1979) resulted in the appropriation of an additional \$2.1 billion from state funds to the public schools raising the State's share of public school support to 70 percent. In July 1979, the Legislature enacted and the Governor signed without modification, a longer term school finance measure (AB 8, Chapter 282, Statutes of 1979) that establishes a new general aid support process for the public schools. Among other things, this bill provides continued State assumption of the reduction in property taxes resulting from Proposition 13. It provides for an 8.6 percent average increase in school district revenue limits per ADA in 1979–80 and 7.6 percent average increase in 1980–81. A new equalization mechanism to achieve compliance with the Serrano v. Priest mandate will be operative in 1980–81 and several new State funding sources for school district capital outlay including deferred maintenance are provided in the bill.

These changes reflect a greatly increased fiscal reliance on the State for both the operational and construction needs of school districts. This is at a time when the State's resources are strained to near capacity, the State's surplus is declining, and State and Local Governments must adjust to the appropriations limitations contained in Proposition 4 enacted this November.

The Education, K-12 budget for 1980–81 while recognizing these constraints, nevertheless proposes several major augmentations in high priority local assistance items. As the table of Significant Program Changes, below, indicates, the areas of special education for the handicapped and compensatory programs for the disadvantaged and limited and non-English speaking are targeted for the major funding increases proposed in this budget.

## I. INSTRUCTION

## Program Objectives and Description

Instruction is the process of communicating knowledge, intellectual, vocational and personal skills to California public school students, including adults, primarily through formal schooling. This program includes those funding sources which provide direct educational services to children and adults in the State's public elementary and secondary school system. The Department of Education administers the funding and assures that instructional programs conducted by California's 1,044 public school districts conform to applicable State statutes and administrative rules and regulations.

Presently, only one comprehensive output measure exists for assessing the performance of the State's public school system. The California Assessment Program (CAP) provides an indicator of the success of public school instruction in communicating quantitative and oral and written communication skills to students relative to past years and to national averages. CAP is a set of standardized tests in reading, English usage, spelling, and mathematics, administered by the Department each year to 3rd, 6th and 12th grade students. Results of 905,000 students tested in 1978–79 indicated the following:

<sup>1</sup> Includes \$500,000 appropriated by Chapter 282, Statutes of 1979, from Horseracing Fees and an additional \$68,557 in General Fund to be matched with Federal funds for 5.5 New Vocational Education Positions.

<sup>2</sup> Includes a continuation of \$500,000 for bilingual teacher development for teachers on waivers through the Resource Centers Program.

<sup>3</sup> Reflects a decline in numbers of needy districts eligible for State reimbursement in State School Nutrition Program.

<sup>4</sup> The amount represents the net General Fund increase in Master Plan costs, including \$22.8 million for a 9% cost of living adjustment. Another \$52 million is transferred from non-Master Plan programs along with the children being served.

<sup>5</sup> Reflects an 11.3 percent cost-of-living increase on textbooks.

<sup>6</sup> Statutory Authority for the Urban Impact Aid Program expires June 30, 1980.

DEPARTMENT OF EDUCATION—*Continued***Grade 3 Results**

Reading achievement test scores for third grade pupils have been improving steadily since statewide testing in those grades began in 1966; this trend has continued through 1978-79.

The median third grade pupil in California currently ranks in the 58th percentile when compared to the 1973 (the latest year for which comparable figures are available) performance of a nationwide sample of pupils.

**Grade 6 Results**

The scores of California sixth grade students improved in all content areas tested: reading, written expression, spelling, and mathematics.

Compared to 1973 national results, the median sixth grader in California now ranks in the 54th percentile in mathematics, the 55th percentile in reading, and the 52nd percentile in written expression.

**Grade 12 Results**

Reading performance of twelfth grade students continued to decline, mathematics and written expression scores improved, and spelling remained constant.

Special equating studies provide a basis for comparing the performance of California twelfth graders with that of national test publishers' norm samples tested in 1962 and 1970. On the basis of the 1962 norms, the median twelfth grade student in California in 1978-79 moved down in reading from the 42nd percentile rank to the 41st percentile rank in reading and remained at the 34th percentile rank in written expression, and the 43rd percentile rank in mathematics.

Comparisons with two other tests with 1970 norms placed California twelfth grade students somewhat lower, at the 32nd and 34th percentiles in reading, at the 27th and 28th percentiles in written expression, and at the 41st and 43rd percentiles in mathematics.

## a. School Apportionments

## Objective and Description

Support for California's K-12 public school system is a shared responsibility, with funding being provided from local property taxes, State general-purpose taxes, and Federal subventions for categorical aid programs. State support takes two forms: apportionments for general aid and categorical allowances for specific education programs.

In 1979-80, local property taxes will provide to K-12 school districts and county offices of education about \$1.7 billion, only 23 percent of the roughly \$7.3 billion in total Statewide school district revenue limits and transportation apportionments utilized to provide the basic educational program to more than 4 million K-12 students. The objective of the school apportionments element is to supplement local resources with sufficient State aid to adequately fund the basic needs of California's 1,044 K-12 school districts and county offices of education. Special needs assistance is described in other elements of the instruction program.

AB 8 (Chapter 282, Statutes of 1979), effected a major revision in long-term provisions for school finance under the permanent limitations of Proposition 13. A portion of school's property tax base was shifted to other local governmental entities, and State support for K-12 schools was increased more than \$3.2 billion above the level which would have been provided under AB 65 (Chapter 894, Statutes of 1977).

In 1979-80, school districts received enough State and local funding to provide the average-spending district with an increase of 8.6 percent per ADA above 1978-79 funding levels. Districts which in 1978-79 spent above average levels received slightly smaller increases, and districts with lower-than-average revenue limits received larger increases. Revenue limits for the operations of county superintendents of education were also increased 8.6 percent.

Beginning in 1980-81, AB 8 institutes a new equalization formula for school district inflation allowances. Increases will be provided on a new sliding scale, with the highest-spending districts receiving increases of \$85 per student and the lowest-spending districts receiving increases of up to \$175 per student. By 1983-84, this mechanism will equalize to less than \$100 the expenditure differences for about 93 percent of the State's ADA.

Total State and local support for revenue limits will increase by more than \$504 million in 1980-81, sufficient to provide an average 7.6 percent increase in funding per ADA in school districts and in programs operated by county superintendents of education. State support for costs of final court orders and federal regulations, funded automatically through revenue limit apportionments, will also increase 7.6 percent above the 1979-80 level, to \$145.4 million in 1980-81. If school districts submit claims in excess of that amount, the claims will be referred to the Board of Control for recommendation and possible funding through subsequent legislation. This action will permit a thorough legislative review of this substantial program expenditure.

## b. Consolidated Programs

## Objective and Description

The consolidated application process, initiated by the department in 1973, reduces the administrative burden for school districts and allows for effective program planning at the school level.

The process is initiated by the school districts submittal of an application for special program funds on Form A-127D. Each school receiving funds selects one of three planning options as the basis for developing a comprehensive school plan describing in detail the allocation of resources and demonstrating how the school program will meet the individual needs of all students. The department reviews these plans for compliance with state and federal regulations.

## State Administration

Administratively, the department is organized to support the consolidated application process and the delivery of the funding sources included in the consolidated application. The functions and activities performed by the department in administering the consolidated application programs have been described in the introduction section to the department's budget.

For 1980-81 the budget proposes the expenditure of \$77,111 and the establishment of one consultant position to support the University and College Opportunity Program to provide state leadership and coordination of existing college preparatory dissemination and information resources and services to local schools. This program is designed to assist in addressing the under-representation of minorities in higher education.

## School Improvement

In 1980-81 the School Improvement Program (SIP), established by Chapter 894/77 will be in its fourth year. This program is aimed at restructuring education from kindergarten through grade twelve, and replaces the early childhood education (ECE) program, which served children in kindergarten through grade three only.

The School Improvement Program is designed to provide instruction for each student which ensures the achievement of proficiency in basic skills. The program is further designed to provide opportunities for students to develop skills, knowledge and appreciation in a wide variety of other curriculum areas, including the arts and humanities, the sciences, and other disciplines. Students are to be assisted in developing esteem of self and others, personal and social responsibility, critical thinking, and independent judgment.

School district master plans outline the policies and procedures for phasing in, developing, and reviewing school plans for schools participating in the School Improvement Program. In addition, two or more school districts may apply to form a consortium for conducting school site program reviews.

Local school site councils, comprised of school personnel, parents, or other community members selected by parents and students, develop school improvement plans for their schools. A planning year is allowed for each school entering the School Improvement Program so that the school site council can prepare a quality needs assessment for their school and a thorough school site plan that addresses the school's needs identified in the assessment.

Three years of funding for planning and implementation were appropriated for the program in Chapter 894/77 (AB 65). However, Chapter 292/78 (SB 154), reduced the support for this program from \$136.5 million to \$122.9 million (-10 percent) during 1978-79. For 1979-80 the Legislature provided implementation funds of \$135.4 million with no funds for planning grants for new schools to be implemented in the 1980-81 fiscal year.

The 1980-81 budget provides an additional \$8.8 million in planning grants to serve approximately 250 more secondary schools. An additional \$13 million is provided for a cost of living adjustment. This will provide a total program of \$157.2 million to serve approximately 1.5 million students in 3,562 schools.

**Economic Impact Aid**

The Economic Impact Aid (EIA) program was established by Chapter 894/77 and became operative on July 1, 1979. The program is designed to provide high-quality, supplementary educational services to educationally disadvantaged students and limited- and non-English-speaking children.

Basically, the program is a revision and consolidation of the Educationally Disadvantaged Youth (EDY) and Bilingual Education program. In accordance with the Education Code, the program provides school districts with financial assistance to provide educational services to limited- and non-English-speaking students and compensatory educational services to educationally disadvantaged students. Funding is distributed to approximately 950 districts through a formula based on measures of poverty, pupil transiency, and limited and non-English-speaking pupils in school districts. Eight school districts receive 45 percent of the funding provided through the EIA formula.

School districts allocate funds to target schools with above average poverty counts and below average student performance. In 1979-80, approximately 2,800 target schools were served. In addition, all schools with limited and non-English speaking students received a portion of EIA funding. Schools target Economic Impact Aid funding to students that score below the 50th percentile on Statewide achievement tests and to limited and non-English speaking students. In 1979-80 at least 304,000 full-time equivalent students received funding through EIA, at an average expenditure of \$470 per pupil. Federal Title I funding, which serves the same type of student as EIA, served an additional 512,000 students in 1979-80.

*This budget provides \$6,032,000 expansion funding for the Economic Impact Aid program for 1980-81. This augmentation will not be allocated through the EIA formula. Instead, it will be targeted directly to the 467 school districts with factors between .35 and .9 that received insufficient funding through the 1979-80 formula augmentation to develop effective compensatory education programs for bilingual and other educationally disadvantaged pupils. In addition, \$12.9 million is provided for a 9 percent inflation adjustment.*

**Miller-Unruh Reading Program**

The objective of the special elementary school reading instruction (Miller-Unruh) program, which provides reading specialist teacher positions, is to prevent and correct reading disabilities at the earliest possible time in the educational careers of pupils in kindergarten through grade 6.

The maximum subsidy for each specialist teacher will be no greater than 75 percent of the statewide average salary for an elementary school teacher.

Funding will be sufficient to provide for 1,100 Miller-Unruh specialists for 1980-81. *In addition \$1.3 million is provided for a nine percent inflation increase.*

**Native American Indian Education**

California has one of the largest American Indian populations in the United States. A U.S. Department of Health, Education, and Welfare study shows that more than 60,000 American Indian students attend California public schools. Statistics show that these students have an excessively high dropout rate, a low academic achievement record, and a low self-image.

The American Indian education programs authorized by Chapter 903/77 address these areas of concern. Chapter 903/77 authorized sufficient funding for 10 American Indian education program projects, kindergarten through grade four, in qualified school districts. It is the goal of this program to reduce the high dropout rate of American Indian students by reducing the incidence of education handicaps in the early grades.

The objectives of the Native American Indian Education component for 1980-81 are:

- (a) to tutor students particularly in reading and mathematics;
- (b) to improve self-concepts of participating students; and
- (c) to provide participating students with individual and group counseling on personal adjustment, academic progress and vocational planning.

*In addition, \$24,805 is provided for a nine percent inflation increase.*

DEPARTMENT OF EDUCATION—*Continued***ESEA, Title I**

The ESEA, Title I component provides programs for educationally disadvantaged students in State-administered institutions and in schools located in low-income areas. In 1979–80 approximately 512,000 full-time-equivalent students in preschool through grade twelve are receiving services in local educational agencies and in institutions serving neglected or delinquent children. Administrative services and planning assistance are provided by the elementary and secondary education programs through the consolidated application process (see I.b. and II.b.).

The objectives of the ESEA I component for 1980–81 are:

- a. The target population will achieve a normal range and distribution of academic achievement in reading and mathematics commensurate with the achievement of the general student population in California as indicated by the results of standardized tests.
- b. Greater use will be made of community resources, and more consideration will be given to the express needs of parents and members of the community in program planning, implementation, and evaluation.

**Mentally Gifted and Talented**

*The mentally gifted and talented component will no longer be funded through the consolidated application. For a description of this program refer to I.h. Special Instructional Programs.*

**Preschool**

For a description of this program refer to II.a. Child Development.

**c. Other Compensatory Programs****Objective and Description**

The State Department of Education aims to achieve the goals of five other compensatory programs (1) directly through local assistance to school districts or through regional units for migrant education; and (2) indirectly through activities administered by the State, such as assistance and training, program review, policy development, and coordination.

These programs are responsive to the special needs of (1) the children of migrant agricultural and fishing industry workers; (2) the national Follow-Through program; (3) the educators who seek leadership in improving basic skills instruction; and (4) the American Indian students who can be served through special centers.

**ESEA I Migrant**

California's migrant children are among the State's most educationally disadvantaged. They make slow progress in school because of irregular attendance. They frequently come from low-income families, seldom speak fluent English, and often have health problems. To meet the needs of these children, the State Board of Education adopted the California Master Plan for Migrant Education to provide for health and welfare services, preservice and in-service education for professional and nonprofessional staff, transportation and other services, child development activities, and active parent involvement. Master plan services are delivered through regional offices and are implemented by service agreements with school districts. During 1978-79 a total of 1,355 schools in 328 districts enrolled approximately 93,012 migrant children.

Educational programs for migrant students are administered by the department's Office of Compensatory Education. The programs include many migrant services in addition to education. These services are coordinated with the State Health and Welfare Agency's Office of Rural and Migrant Affairs.

The objectives of the ESEA I migrant component for 1980-81 are:

- To ensure that all eligible migrant children are identified, recruited, and entered into the Migrant Student Record Transfer System.
- To provide all migrant children with supplementary instructional services on the basis of identified need in language development, reading, and mathematics.
- To provide migrant children with health screening and supplemental treatment as needed.
- To provide training for all staff serving migrant children as needed to provide appropriate services to the children.
- To provide the opportunity for parents to participate on advisory committees and actively participate in their children's education.

**Follow-Through Technical Assistance**

The federal Follow-Through program provides direct grants to school districts to fund the implementation of innovative educational approaches developed by federally funded model sponsors in specified classrooms in kindergarten through grade three. These projects provide a comprehensive instructional program and auxiliary services for children from low-income families and amplify gains made in Headstart and other preschool programs.

The objectives of the follow-through technical assistance component for 1980-81 are (a) to provide technical assistance and coordination to local projects and resource centers; and (b) to provide liaison between the U.S. Office of Education and the 14 local projects, two resource centers of the National Diffusion Network (NDN), six model sponsors, and other local, State, and federal agencies and organizations.

**Basic Skills Improvement**

The Department of Education is required to assist public and private agencies in their efforts to coordinate resources and to improve their basic skills efforts for children, youths, and adults. The State basic skills improvement program consists of (a) the formula grant program, which provides support to help the department plan and implement basic skills improvement programs, primarily through subgrants by the department to eligible subgrantees; and (b) the State leadership program, which provides support for the State to carry out leadership and training in the area of basic skills and develop and implement statewide programs for improving the basic skills achievement of children, youths, and adults. *Basic skills* is defined by Congress as "reading, oral and written communication, and mathematics." Applications for funding under the Southeast Asian refugee education program may be made for multiyear grants of up to 48 months duration, allowing for a time period during which to develop and implement a state basic skills plan, with assistance and advice from the public and private educational communities.

**Demonstration Programs in Reading and Math**

The objective of the Demonstration Programs in Reading and Math component in 1980-81 is to establish exemplary programs for intensive instruction in reading and mathematics to serve as demonstration projects aimed solely at developing above-average competence in students in grades seven, eight, and nine who attend school in designated disadvantaged areas and who would otherwise find difficulty in achieving complete success in high school.

During the 1980-81 fiscal year the following activities are planned:

- Approximately 28 schools will be funded for demonstration programs in 1980-81.
- Approximately four program conferences for information dissemination will be held during 1980-81.
- Thirty junior high schools are expected to replicate some element of the demonstration programs in their curriculum during 1980-81.

*The proposed budget for 1980-81 includes \$277,156 for a nine percent inflation increase.*

**American Indian Education Centers**

Chapter 1425/74 authorized the establishment of ten American Indian education centers for the benefit of American Indian students and adults. These ten community-based centers have been established with wide geographic dispersion across California. The objectives of the centers are (a) to provide opportunities to American Indian students, permitting them to raise their academic achievements, with particular emphasis on reading and mathematics; and (b) to improve the self-concept of both American Indian students and adults.

*In addition, \$58,430 is provided for a nine percent inflation increase.*

## d. Special Bilingual Programs

## Objective and Description

This program element consolidates State administrative resources in support of Bilingual programs. Bilingual education local assistance funding for grades K-12 is provided to districts primarily through the Economic Impact Aid program (b.3.) and the Federal ESEA Title I program (b.6.). This element provides administrative support for bilingual education local assistance programs, and also provides administrative support and student stipends for the Bilingual Teacher Corps program.

The Department of Education aims to achieve the objectives of programs designed to meet the needs of limited-English-speaking (LES) and non-English-speaking (NES) students both directly through local assistance to school districts and indirectly through State administration of curriculum, management, and policy-oriented activities and a teacher training project.

In accordance with the Education Code, LES and NES students are provided general instruction in a language the students understand while they are being taught English. The Bilingual Teacher Corps program provides a vehicle for increasing the number of qualified bilingual teachers.

DEPARTMENT OF EDUCATION—*Continued***Bilingual Bicultural Education**

Approximately 288,427 limited-English-speaking and non-English-speaking (LES/NES) students in California public schools in grades K–12 require educational instruction in a language that the student understands. The goal of the bilingual bicultural education program is to teach the students English while instruction in the basic skills continues in the language that the student understands best.

LES/NES students are also served through ESEA, Title I (migrant) programs and through other programs included in the consolidated application, such as ESEA, Title I; educationally disadvantaged youth; and school improvement.

The law requires schools with ten or more LES/NES students in any grade with the same primary language to provide bilingual classroom instruction. Schools with fewer than ten LES/NES students of the same grade level and the same primary language are required to offer these students a bilingual individual learning program and to have a plan on file that shows how the needs of these students are being met.

Beginning in 1979–80, Chapter 894/77 provides that the funding for the bilingual bicultural and educationally disadvantaged youth programs be combined into a new funding program to be known as the Economic Impact Aid program. This new program requires that school districts provide adequate support to any school mandated to provide appropriate services to the LES/NES under the requirements of Education Code Section 52165 (see Program I.b.3.).

**Bilingual Teacher Corps**

The Bilingual Teacher Corps program (AB 2817, Chapter 1496/74) was established to support the development and thus increase the number of bilingual teachers qualified to meet the educational needs of the State's limited and non-English speaking children.

Participation in the program by institutions of higher education (IHEs) is a competitive process. The approved IHEs fund candidates who must provide direct instructional services in a public school classroom as well as pursue an approved educational program directed toward a bilingual teaching credential. Thirty-five IHEs were funded in 1979–80, which provided stipends to 1,200 candidates. The candidates receive annual stipends of \$1,500 plus expenses.

In 1979–80, the Bilingual Teacher Corps program was expanded by \$1,063,000 provided in the Economic Impact Aid budget appropriation. Funds were provided for 400 additional candidates for a total of 1200 stipends. In November, 1979 the Department of Education and Student Aid Commission issued a report to the Legislature recommending that the State's two major bilingual teacher programs (Bilingual Teacher Corps and SACs Bilingual Teacher Development Grant Program) be merged into one program to be administered by the Student Aid Commission. As a result of this recommendation and the greater cost effectiveness of the Bilingual Teacher Development Grant Program, the 1979–80 expansion of \$1,063,000 of the Bilingual Teacher Corps program is not continued into 1980–81. In 1980–81, the Bilingual Teacher Corps will fund 800 candidates.

**Southeast Asian Refugee Education**

This component provides technical assistance and leadership to local educational agencies (LEAs) in California providing educational services to approximately 15,000 refugee children from Indochina and classroom instruction in English as a second language to over 8,000 Indochinese refugee children.

In 1978 the Congress approved the continuance of the Southeast Asian Refugee Education Program under ESEA, Title XII, Part C for an additional three years commencing with the 1978–79 fiscal year and lasting through the 1980–81 fiscal year. The program proposes assistance to school districts for educational needs of recent immigrant students from Vietnam, Laos, and Cambodia. The eligibility of these students is determined by their entry into the United States on and after January 1, 1977.

The maximum reimbursement has been changed to a new amount of \$450 per pupil. No money was appropriated for the 1978–79 school year or the 1979–80 school year; however, federal funds are anticipated for the 1980–81 fiscal year although federal appropriation legislation has not yet been enacted.

In 1980–81, the Southeast Asian Refugee Education support administration will:

- a. Provide technical assistance to all 168 school districts requesting assistance in the areas of programmatic improvement, management and evaluation through workshops.
- b. Monitor and review no fewer than 100 LEAs to ensure compliance with regulations.

## e. Adult Education

## Objective and Description

In 1978-79, 112,000 adults were enrolled in basic education programs; 330,000 were enrolled in English as a second language program, and 337,714 were enrolled in vocational training classes; and 1,054,618 were enrolled in other classes for adults.

## Instructional Support

Instructional support in adult education is from two sources: (a) apportionments from the general fund; and (b) federal adult basic education monies. Up to \$145,147,000 in general fund monies provide for an educational system to focus on the interest and needs of adults in local communities.

*Chapter 282, Statutes of 1979 (AB 8) modified the State support for adult education. Under this law districts may shift funds from adult education to support other education programs; however districts must maintain mandated programs in elementary and secondary basic skills, or adult programs in English as a second language; adult programs in citizenship, adult programs for substantially handicapped persons; adult programs for apprentices; adult vocational programs with high employment potential; adult programs for survival skills in older adults (in health, consumer resources and entitlements, and managing money for self-maintenance); and adult programs in parenting.*

The objective of the federal adult basic education monies is to reduce the incidence of illiteracy among individuals 16 years of age and older who are lacking in basic education skills and/or English language skills. Local educational agencies provide appropriate education services for those individuals on the receipt of a grant resulting from their application and plan.

## General Education Development (GED) Testing

The general education development (GED) testing program is designed to allow persons 18 years of age and older without a high school diploma to obtain certification of equivalent academic knowledge. GED courses are offered by adult schools, community colleges, state universities, and private postsecondary schools so that adults may qualify to pass the GED test and thus demonstrate high school diploma equivalency for admission to the military service, job applications, admission to higher education, or personal satisfaction. There are 240 schools certified as GED centers.

As a result of the operation of the GED component, 7,200 certificates were issued in 1978-79 by 240 operating testing centers. In 1978 there were 28,464 examinees, with 62.2 percent passing.

## f. Special Education Programs for Exceptional Children

## Objective and Description

State and federal statutes recognize that individuals with exceptional needs require different and specialized educational services. Statutory mandates provide that a free, appropriate public education be available for all identified exceptional students. Chapter 1247/77 (AB 1250) established the California Master Plan for Special Education, the special education service delivery system intended to be fully phased in statewide by 1981-82.

Through special education, supplements such as individual or small-group tutoring can be added to a pupil's regular program or alternative programs such as full-time special classes on the school site or in special settings like the state's special schools can be prescribed. Special education of an indirect nature consists of services, such as special consultation, provided to the teacher and parents of these students and special alterations in facilities, equipment, and learning materials. The goal of special education is to provide exceptional individuals with programs that meet their needs. Special education services are individually tailored to lessen or eliminate those effects which handicap some exceptional individuals and provide the best learning environment for each student. The variety and types of experiences planned for exceptional pupils vary greatly depending on the particular pupil.

In 1979-80 approximately 363,200 children will be enrolled in special education programs. Of these children, 30 percent or approximately 112,000 will be served by local educational agencies operating under the Master Plan for Special Education. *This budget includes \$55.2 million in new State funds and \$52 million transferred from other Special Education programs for a total of \$107.2 million to expand the master plan to serve 45 percent of children with exceptional needs. This will provide funding for approximately 170,000 students of the projected 377,700 children with exceptional needs. Included within the budget for 1980-81 is \$19.7 million for the State's assumption of costs previously borne by districts and counties for non-Master Plan Special Education. This level of funding will continue the level of \$2,296 per child (State and Federal funds) established in Chapter 282/79 (AB 8) inflated by 9 percent to \$2,503. However, these funds will be distributed on the basis of a cost-per-services model as provided in statutes rather than on a per-child basis.*

Figure 2  
Growth in Programs for Handicapped Children in California Schools  
1974-75 Through 1980-81<sup>1</sup>

<sup>1</sup> Figures represent special education allowances only and do not include support from federal sources, district base revenue limits, or local support for special education.  
<sup>2</sup> Unduplicated enrollment from February statewide pupil count, 1976-77 through 1978-79. Enrollments for 1974-75 and 1975-76 are estimated. The decline in enrollments between 1976-77 and 1977-78 is due to more accurate reporting of unduplicated enrollments.  
<sup>3</sup> Estimated—includes special education apportionments, master plan, sheltered workshops and development centers for the handicapped.

## DEPARTMENT OF EDUCATION—Continued

## State Administration

The objectives of the State administration component is to make resources and services available to public schools so that all individuals with exceptional needs can receive special education and related services at no cost to their parents.

The State's special consultants will conduct annual program reviews of one-third of the agencies offering educational services to individuals with exceptional needs; review annually one-third of the nonpublic schools and agencies offering educational services to individuals with exceptional needs; determine compliance with applicable State and federal laws and regulations; review, negotiate, and approve annually all local comprehensive plans for special education and various program applications as required by law such as, personnel development, special studies, preschool/infant, vocational education, development centers, and in-service training.

## Clearinghouse Depository for Handicapped Children

The objective of the clearinghouse depository for handicapped children is to assist public and private educational agencies and individuals to secure the educational materials, aids, and equipment needed in instructional programs for all handicapped students (preschool through college).

The depository disseminates procedural and program information regarding the production, acquisition, and use of educational materials and equipment for the handicapped; and provides information or materials or both to public and private educational institutions and individuals on securing appropriate educational materials, aids, and equipment for instructional programs for handicapped students.

## Southwestern Region Deaf-Blind Center

The objective of the Southwestern Region Deaf-Blind Center is to secure the provision of medical, educational, psychological, or other appropriate services to any identified deaf-blind child in California, Arizona, Hawaii, Guam, American Samoa, or the Trust Territories of the Pacific. This activity is fully funded by a Federal grant. The center (a) annually allocates Federal funds to contractors who provide appropriate services to deaf-blind students and (b) periodically monitors and reviews those agencies for compliance with applicable laws and directives. The State administers this program under contract with the Federal Government at no cost to the State.

## State Special Schools

The Department of Education operates six special schools for handicapped children. The objective of the State school for the blind and two schools for the deaf are to provide an appropriate education to those visually handicapped, deaf, and deaf-blind pupils who, because of their severe sensory loss and educational needs, cannot be provided an appropriate education program and related services in regular public schools. These schools provide highly specialized services for the blind, deaf, multihandicapped deaf, multihandicapped blind, and deaf-blind children. These services include educational assessments and individual educational recommendations for individuals referred for such service; a comprehensive residential and nonresidential elementary and secondary educational program, including nonacademic and extracurricular activities for visually handicapped, deaf, and deaf-blind individuals. These schools will provide educational opportunities to approximately 1,072 deaf and multihandicapped deaf students and 130 blind and multihandicapped students in 1980-81.

The California School for the Deaf (Berkeley) and the California School for the Blind (Berkeley) will be moving to new school facilities in Fremont beginning in the 1980-81 school year. An additional 33.5 positions and \$2.2 million have been added to the budget as a result of this move. Personal care staff has been expanded by 18 positions (11) counselors and (7) night attendants to provide appropriate late afternoon and nighttime supervision. The academic staff is being expanded at the California School for the Deaf, Berkeley to provide instruction in horticulture (1) and art (1) which are not now provided; to meet minimum physical educational needs (1); to meet student speech therapy needs (1); and to coordinate work experience activities (1). Academic staff at the California School for the Blind, Berkeley were added to provide orientation mobility instruction (3) at the new school site and to provide independent life skills instruction (1) to older students. In addition, two (2) speech teacher positions were added at the California School for Deaf Riverside to meet speech needs for students at that school.

The support and maintenance staff is being increased by 4.5 positions to provide for trash and garbage collections (2) and to meet expanded food service requirements (2.5).

Personnel and equipment moving costs for the move to the Fremont site are budgeted for \$1.7 million.

In addition, 7 positions were identified for reduction during the 1979-80 fiscal year under Section 27.2 Budget Act of 1979 and were restored in 1980-81. One position at the School for the Deaf, Riverside was limited to the 1979-80 fiscal year and is not being continued into fiscal year 1980-81.

The objectives of the three diagnostic schools are to (a) serve as a regional resource center; (b) provide assessment planning services for neurologically handicapped, seriously emotionally disturbed, and autistic children referred by local educational agencies; and (c) provide specialized instructional services on a short-term residential basis. These schools will provide services to approximately 510 students in 1980-81.

**Local Assistance**

The objective of the local assistance component is to allocate and authorize disbursement to local educational agencies of funds administered by the Office of Special Education. These include funds appropriated for the support of the Master Plan for Special Education; funds available under the federal Education for All Handicapped Children Act (Title VI, Public Law 94-142); funds appropriated for the support of sheltered workshops; and funds appropriated for the support of development centers for the handicapped.

As the Master Plan for Special Education is phased in, the categorical funding for non-master plan agencies, including funds for sheltered workshops and development centers for the handicapped, will be phased out. The master plan funding model is based upon service needs as opposed to category of handicap. The result is greater flexibility in the placement of individuals in instructional settings because placement may be made on the basis of an individual's instructional need rather than on a funding criterion such as handicap category.

*This budget proposes \$55.2 million in new State general funds for the Master Plan including \$22.8 million for inflation. In addition, \$52.0 million is transferred from other special education programs (Development Centers for the Handicapped, and Special Education Apportionments) to support the expansion of the Master Plan to an estimated 45 percent of the State's children with exceptional needs.*

## g. Vocational Education

## Objective and Description

The department's vocational education unit administers the Vocational Education Amendments of 1976 (PL 94-482 and PL 95-40), which is subdivided into 4 subparts with distinct objectives and target populations, and the Comprehensive Employment and Training Act (CETA; PL 95-524). In addition, the unit administers regional occupational programs and centers.

The department's objective is to improve vocational education programs and insure the necessary co-ordination and cooperation to provide equal access to all students, eliminate sex stereotyping, provide guidance services for vocational students and supportive services for students with special needs. The activities of three organizational sections in the vocational education unit support this objective: planning, evaluation, curriculum services, research, personnel development, resources management and communications.

In 1979-80, Chapter 282, Statutes of 1979 (AB 8), appropriated \$500,000 to the Department of Education for support of vocational student organizations. The 1980-81 Budget continues that appropriation. Additionally, five Staff Services Analyst positions have been added to ensure accurate and coordinated data collection.

DEPARTMENT OF EDUCATION—*Continued***Subpart 2, Basic Grant**

The basic grant, subpart 2, provides funds to local educational agencies conducting vocational education programs in accordance with the California Five-Year State Plan for Vocational Education.

The basic grant funds are used by local education agencies to:

- a. Maintain and improve existing vocational education programs and services.
- b. Develop new programs in vocational education.
- c. Eliminate sex discrimination in vocational education.
- d. Provide part-time employment for youths, allowing them to continue their vocational education.

**Subpart 3, Special Programs and Support Services**

The Special Programs and Support Services, subpart 3, component, provides funds to participate local educational agencies or private agencies to improve vocational education programs. These funds are used to support the improvement of vocational education programs through:

- a. Applied research, curriculum development, dissemination of materials, and innovative and exemplary programs.
- b. Vocational guidance and counseling programs and services.
- c. Professional development programs.
- d. Review and modification of programs to remove sex bias.
- e. Coordination of programs under CETA with existing vocational education programs.

**Subpart 4, Special Program for the Disadvantaged**

The special program for the disadvantaged, subpart 4, provides funds to local educational agencies in areas with high concentrations of youth unemployment or school dropouts. These funds are used to develop special programs and services for disadvantaged persons enrolled in vocational programs operated in accordance with the California Five-Year State Plan for Vocational Education.

**Subpart 5, Consumer and Homemaking**

The consumer and homemaking, subpart 5, component provides funds to local educational agencies conducting vocational education programs to expand and improve educational programs that prepare individuals for the occupation of homemaking.

**CETA**

The CETA component provides financial assistance to deliverers of service who conduct vocational programs in agreement with the nonfinancial agreement. Six percent of the funds available under Title II, parts A, B, C, of the Comprehensive Employment and Training Act (CETA) are allocated to the governor to provide needed vocational education and services in areas served by prime sponsors through the California State Board of Education. A minimum of 85 percent of these funds will be allocated to prime sponsor areas by the California Employment and Training Advisory Office.

The prime sponsor, in conjunction with the Department of Education staff and the CETA office staff, develops a financial, statistical and narrative plan called the nonfinancial agreement for the expenditures of such funds by the Department of Education in the prime sponsors area to develop the skills and knowledge required to enter and succeed in a selected vocation. Funds are approved only for those occupational programs that provide a reasonable expectation for employment.

## DEPARTMENT OF EDUCATION—Continued

## h. Special Instructional Programs

## Objective and Description

The mentally gifted and talented program provides special educational opportunities for identified pupils. The driver training component provides the basis for students who wish to obtain a driver's license before the age of 18.

## Mentally Gifted and Talented

The objective of the mentally gifted and talented component is to provide appropriate programs for students who are identified as possessing demonstrated or potential abilities that give evidence of high-performance capability as defined pursuant to Section 52202 of the Education Code.

Historically this program served students within the top 2 percent of intellectual capacity plus certain culturally disadvantaged students. The type of student served was broadened by Chapter 774, Statutes of 1978 to include minors within high performance capacity in areas such as intellectual, creative, specific academic or leadership ability, high achievement and performance, or visual arts talents. The Department will be developing appropriate criteria rules and regulations. This program is expected to serve 148,600 students at 346 school districts.

A special grant from the federal government provides program development leadership for the states of California, Oregon, and Washington, with the project based in California.

State administration of this component (3 positions) was previously funded through the consolidated application (refer to I.b.). The federal and state funded portions are combined for fiscal year 1980-81.

This component includes \$230,170 for a nine percent inflation adjustment.

## Driver Training

The objectives of the driver training component are to develop (a) a knowledge, through instruction in the classroom and training behind the wheel, of the provisions of the Vehicle Code and other California laws relating to the operation of motor vehicles; (b) a proper acceptance of personal responsibility in traffic; (c) a true appreciation of the causes, seriousness, and consequences of traffic accidents; and (d) the knowledge and attitudes necessary for the safe operation of motor vehicles.

For high school students to receive a driver's license prior to the age of 18, they must successfully complete a driver training program. The driver training program provides students with ample learning experiences to aid them to drive safely.

## II. INSTRUCTIONAL SUPPORT

## Program Objectives and Description

The instructional support program within the Department of Education includes those functions that provide unique programmatic resources which complement the instruction program.

e. Staff Development .....	8.9	9.3	10.3	2,226,835	2,927,796	3,931,729

**a. Curriculum Services**

The curriculum services element is responsible for assisting school districts and other appropriate agencies in improving the quality of educational instruction. Programs administered include (1) State-mandated curriculum activities; (2) health education; (3) personnel and career development services; (4) special curriculum programs; and (5) traffic safety.

**State-Mandated Curriculum Activities**

The objective of the state-mandated curriculum activities component for 1980-81 is to provide assistance in the development of curriculum in the subject matter areas of mathematics, social studies, arts, the humanities, science, physical education, English writing skills, and English language arts.

As school districts continued to make their curricula responsive to student needs, the component staff responded to more than 6,500 requests for service from local educational agencies and conducted approximately 200 workshops attended by more than 6,000 teachers and administrators during 1978-79.

**Health Education**

The health education component is responsible for the administration of school health services and comprehensive school health education programs. Areas of responsibility for health education include the ten areas of the *Health Instruction Framework for California Public Schools*, with special focus on genetic diseases and disorders, sexually transmitted diseases, family life and sex education, substance abuse, and comprehensive health education. Areas of responsibility for health services include screening programs such as vision, hearing, child health, disability prevention, and other programs, including immunizations and special education health services required through PL 94-142.

The objectives of the health education component in 1980-81 are to (a) assist school districts in developing health education plans and programs extending from kindergarten through grade twelve; (b) cover the ten major content areas in the *Health Instruction Framework for California Public Schools*; (c) involve parents and representatives of community health agencies in program planning, implementation, and evaluation; and (d) aid pupils in making decisions in matters of personal, family, and community health, in valuing health, and in assuming personal responsibility for their own health.

*The 1980-81 budget proposes the expenditure of \$24,084 to support an interagency pilot project with the Department of Health Services, Child Health and Disability Prevention Branch, to bring the services of early period screening diagnosis and treatment to low income children enrolled in California schools.*

**Personnel and Career Development**

The personnel and career development component assists schools, school districts, offices of county superintendents of schools, and institutions of higher education in developing and improving programs in guidance and counseling, school psychology, school social work, and career education. *The new federal Career Incentive Act was implemented in 1979-80. Beginning in 1980-81, the act requires states to pay for a portion of the state administrative costs—25% in 1980-81. This budget contains \$22,800 to meet the matching requirement.*

*In addition, \$22,500 is provided for a nine percent inflation increase for Career Guidance Centers.*

**Special Curriculum Programs****(1) Environmental Education**

The Department of Education provides assistance to local educational agencies establishing interdisciplinary programs in conservation education. The services provided by the department include (a) professional assistance and coordination of services for local educational, governmental, and community agencies; (b) maintenance and operation of a materials library; and (c) administration of a grant program to plan and initiate exemplary local programs.

*In 1978-79, 15 environmental education projects were funded at an average level of \$21,000 each.*

*The Governor's Budget proposes \$500,000 from the California Environmental Protection Program Fund for support of this program—an augmentation of \$168,577 for 1980-81.*

**(2) Educational Technology**

The objective of the educational technology unit is to administer instructional (ITV) services for public schools.

This unit approves plans of school districts and offices of county superintendents of schools for instructional television programs, processes claims, maintains a file on production costs of all instructional television programs developed entirely with public funds, and works with and carries out the plans of the State Instructional Television Advisory Committee. During the 1978-79 school year, 194 school districts conducted instructional television programs involving 1.05 million students. The department will endeavor to increase student viewing of instructional television.

**(3) Conflict and Violence Unit**

*The 1980-81 Budget proposes the expenditure of \$80,000 and the establishment of one consultant position to support a "conflict and violence prevention unit" to identify the magnitude of the problems associated with school-related violence, vandalism and absenteeism.*

**Traffic Safety**

The objective of the traffic safety component is to develop and disseminate a comprehensive traffic safety education program that provides performance and competency-based training addressing the accident problems in pedestrian safety, bicycle safety, passenger safety, and motorcycle safety at the appropriate student age level.

In 1976-77, pursuant to Chapter 695, Statutes of 1976, the Department of Education, in cooperation with the California Highway Patrol, the Department of Motor Vehicles, and the Office of Traffic Safety, worked to establish standards governing traffic safety education in elementary schools, high schools, and adult schools. The funding for these activities ends December 31, 1979. This program has been supported by a federal grant through the Office of Traffic Safety, Department of Transportation. In 1977-78, the Office of Traffic Safety funded a motorcycle safety education program designed to (a) involve communities in training inexperienced motorcycle riders to operate their vehicles safely; and (b) train teachers how to instruct students in the safe operation of a motorcycle. In 1978-79 the research was completed and curriculum guides were prepared for dissemination. The funding for this project will end February 28, 1980.

## b. Instructional Materials Management and Distribution

## Curriculum Frameworks and Instructional Materials Selection

The curriculum frameworks and instructional materials selection component provides an appropriate base of instructional materials to support local educational programs.

The department provides staff assistance to the State Board of Education and the Curriculum Development and Supplemental Materials Commission in the evaluation and adoption of instructional materials for use in California's elementary schools.

The primary activities of the component are to assist in the development of curriculum frameworks and instructional materials selection criteria, coordinate statewide implementation, coordinate the evaluation of the content of materials to be placed in adoption, and prepare instructional materials selection guides to assist elementary school districts.

The 1980-81 budget includes an 11.3 percent increase of \$4,333,672 over the 1979-80 budgeted level and an additional \$50,000 to fund travel expenses of Instructional Materials Evaluation Panel members.

## Objective and Description

The textbook warehouse houses and distributes adopted textbooks printed by the Office of State Printing, together with teachers manuals to accompany the textbooks, to approximately 2,000 local educational agencies. Adopted braille and large-printed books for visually handicapped students are also distributed on an indefinite loan basis to local educational agencies.

The objective of this component is to complete delivery of all instructional materials ordered by the schools before the start of the 1981-82 school year.

## c. Administrative Services to Local Educational Agencies

## Objective and Description

Local educational agencies do not always have time, staff, or means to examine and critique existing administrative or management practices objectively and independently, yet they must efficiently and effectively use increasingly scarce resources. Consulting services are needed to provide assistance, direction, training, and improvement in the noncurricular areas of planning, organization, management, administration, and operations of local educational agencies.

## Services provided to local agencies include the following:

- Conduct workshops and seminars on energy standards (5); pupil work permits (5); risk management (insurance); school attendance accounting (15); school district organization; school and farm labor bus driver training classes; school finance; Federal impact aid (P.L. 874) (9); site management; transportation financial reports; Section 504 handicapped access compliance (10) seismic safety (10) and school fiscal budgeting and accounting.
- Prepare reports on management assistance team studies and proposals to reorganize school districts.
- Publish materials and forms: attendance registers; bus driver training manual; disaster relief manual; grade eight diplomas; handbook for school attendance review boards; maintenance and operations manual; public school transportation manual; pupil work permits; risk management manual; school district organization manual; and school district budget manual.

## d. Supplementary Program Services

## Objective and Description

- The objectives of this element encompass:
- Identification and development of innovative programs and the dissemination of exemplary programs and practices to local educational agencies and nonpublic school systems utilizing ESEA IV-C and National Diffusion Network resources.
  - Improvement and expansion of community and human services utilizing community centers organized under the Community School Act.
  - Identification and compliance with sex desegregation and discrimination provisions of federal law through leadership and technical assistance.
  - Distribution of entitlement funds for the acquisition of school library resources and instructional equipment and materials.

## DEPARTMENT OF EDUCATION—Continued

## Educational Innovation and Support

The educational innovation and support component is supported by ESEA, Title IV-C. Under the provisions of ESEA, Title IV-C, school districts may apply for funding, and nonprofit, nonpublic schools may participate in local projects to (a) improve programs at the local level; and (b) develop models for other educational agencies.

This component also serves as the California facilitator for the National Diffusion Network (NDN) and is funded by the U.S. Office of Education. The network includes State facilitators in 50 states and territories and more than 200 nationally validated exemplary programs. Under provisions of NDN, local educators receive assistance in solving problems through program involvement, staff development, and technical assistance. Title IV-C funding is also provided through incentive grants and adoption or adaption grants to replicate validated practices in local educational agencies and nonpublic schools where need exists.

All ESEA, IV-C projects are selected on the recommendation of the Educational Innovation and Planning Commission, serving as the state advisory council, and are approved by the State Board of Education. Attention is given to the priorities established by the State Board and the department through the process of the development, selection, and approval of a project.

In 1980-81, projects will include 185 operational developmental projects, 240 operational adoption projects, 25 exemplary projects, and 3 facilitator projects.

Table 11

Totals .....	\$13,965,215	\$18,235,752	\$15,545,763

## Community Schools

The Community Schools and Comprehensive Community Education Act of 1978 defined the *community education program* as a "program in which a public building, including but not limited to a public elementary or secondary school, or a community or junior college (or a related extension center), is used as a community center operated by a local educational agency in conjunction with other groups in the community, community organizations, and local governmental agencies, to provide educational, recreational, health care, cultural, and other related community and human services for the community that the center serves in accordance with the needs, interests, and concerns of that community." Community education programs in California exist at the State and local level through the La Familia project, the county superintendents' committee, statewide parks and recreation/education committees, and community council model development projects.

## Sex Equity in Education

Title IX of the Education Amendments of 1972 requires agencies receiving federal funds to take specific steps to eliminate sex discrimination. Project SEE (Sex Equity in Education) provides information on such matters as changes in the law, conducts in-service training workshops and on-site visitations, develops necessary materials, and provides the technical assistance to implement Title IX effectively and achieve sex equity for all students.

## Library and Learning Resources

In 1980-81 ESEA, Title IV-B will provide entitlement funds for the benefit of students in all elementary and secondary public schools and nonprofit, nonpublic schools for the acquisition of school library resources and instructional equipment and materials.

ESEA, IV-B funds will be allocated by formula to approximately 1,100 LEAs, and equitable shares will be allocated to approximately 1,600 nonprofit, nonpublic schools.

## e. Staff Development

## Objective and Description

Staff development programs are designed to provide in-service education for teachers, administrators, aides, and parent volunteers. The need for staff development programs has grown out of a recognition that, because of change and a rapidly expanding knowledge base, teachers, administrators, aides, and parent volunteers need opportunities to improve their knowledge and skills. Currently, four staff development programs are meeting the needs of school staff personnel in California.

## School Personnel Staff Development

The school personnel staff development and resource centers program, established by Chapter 966/77 (AB 551), is a comprehensive statewide program for the in-service training of local school personnel. Certified employees have the opportunity to develop their own school site staff development programs. The program is based on school improvement objectives established by a school site council comprised of parents, community members, and students as well as school personnel.

For 1980-81 the budget proposes the additional expenditure of \$325,200 which will permit approximately 75 new schools to participate in the school site staff development program.

More than 9,000 teachers and other school personnel from more than 180 schools are expected to participate in in-service training opportunities during the 1980-81 fiscal year. In addition, the school resource centers are expected to provide coordination and assistance in the training of school personnel participating in the California school improvement program.

## Resource Centers

Six school resource centers provide programs to (a) aid schools in carrying out their school site staff development plans; (b) act as a liaison between institutions of higher education and local school personnel and local agencies; and (c) disseminate information on staff development methods and models.

The 1980-81 budget provides: (a) \$225,000 to support an additional three school resource centers and in addition \$60,750 is provided for a nine percent inflation increase for all the resource centers and (b) \$500,000 to continue funding a bilingual inservice training program for teachers on waivers.

## DEPARTMENT OF EDUCATION—Continued

## Professional Development Centers; New Careers

The professional development and program improvement centers throughout the State offer comprehensive in-service education training programs to strengthen the instructional techniques of classroom teachers in kindergarten and grades one through eight.

Sixteen professional development and program improvement centers are serving elementary schools having low pupil achievement in reading and mathematics. These centers, operated by school districts or offices of county superintendents of schools, retrain principals, teachers, and aides in diagnostic-prescriptive teaching.

Six new careers in education programs provide resources to enable low-income interns to complete a baccalaureate degree program. This undergraduate program emphasizes the development of competency-based teaching skills and supervised on-the-job training to prepare the interns to teach in elementary schools serving students from low-income families.

The 1980-81 budget proposes the expenditure of \$304,000 new funds for the professional development and program improvement centers, to increase funding per center from \$41,000 to \$60,000. This augmentation will provide approximately 7,600 days in teacher release time for in-service training.

## Farm Labor Vehicle Driver Training

Prior to the implementation of this program, a large number of serious vehicle accidents occurred involving farm labor vehicle drivers who were at fault. In attempting to reduce the number of accidents, the Legislature mandated that all drivers of vehicles transporting farm laborers receive appropriate training before they are issued a farm labor driver certificate.

Between 1973-74 and 1976-77, a 26 percent reduction in farm labor driver accidents was achieved. It is estimated that approximately 2,160 drivers need initial or recertification training.

## Federal Teachers Centers

The federal teachers centers component is designed to serve teachers from public and nonpublic schools, providing assistance according to needs as expressed by teachers with the assistance of such consultants and experts as may be necessary. The eight centers may develop and produce curricula, use-research findings, and provide training to improve the skills of teachers to enable the teachers to meet the educational needs of students more adequately.

## III. SPECIAL PROGRAMS

## Program Objectives and Description

Within special programs are several elements serving particular education, child care, nutritional, and other needs from preschool age through adulthood. Included are the following elements:

- Child development, through which a full range of preschool education and child care services are provided.
- Child nutrition, which distributes funds supporting a variety of school food services.
- Postsecondary education, which ensures that private institutions comply with educational standards mandated by statutes.
- Urban impact aid, a form of general aid to specific districts which meet criteria of size and concentration of disadvantaged pupils.
- Surplus property, through which materials and commodities are made available to local agencies.
- Non-public school liaison, through which technical assistance regarding eligibility for participation in federal programs is provided.

## a. Child Development

## Objective and Description

The child development element provides part-time and full-time child care and educational services to children from needy families. Several different program structures have been established over the years to target resources to specific populations and/or to address specific types of needs.

## Preschool Education

The preschool education component provides (a) a wide range of educational and related experiences and services in part-day settings for prekindergarten (four-year-old) children from low-income families; and (b) parent education and training for the parents of these eligible children.

The objective of the component is to help ensure a child's later success in formal school programs. More than 19,000 children are enrolled in programs administered by 115 school districts; 77 private, nonprofit agencies; offices of county superintendents of schools; and institutions of higher education. The Office of Child Development administers the programs in the 77 private, nonprofit agencies and institutions of higher education. These programs provide services to approximately 7,700 children. School district programs, which enroll approximately 11,300 of the 19,000 children, are displayed in the consolidated program element (1.b.9.).

As a result of the Auditor General's 1978 report recommending equalization of pre-school per capita costs, a \$2,363,399 inflation augmentation is provided for 1980-81 to equalize per capita costs at \$1461. Programs with costs above \$1461 shall reduce their costs for 1980-81, and the resultant savings shall be allocated along with the inflation augmentation on a sliding scale to bring low cost programs up to the \$1461 per capita level.

Totals.....	\$25,107,371	\$26,990,151	\$29,392,623

The preschool scholarship incentive program (Chapter 795, Statutes of 1975) provides scholarships for 1,178 preschool permit teachers and aides to assist them in continuing their professional development.

This budget does not include funds for the Headstart Program administered directly by the federal government. However, in terms of program objectives, the two programs serve essentially the same target population with approximately the same type of program.

## Child Care Services

Child development services assist families in becoming self-sufficient by enabling parents to work or receive training leading to employment. The Office of Child Development administers a variety of child care programs, including general child care, campus child care, county child care, migrant child care, school-age parenting and infant development programs, and alternative child care programs. There are 539 publicly subsidized child care and development programs in California which provide service to 130,915 children per year (47,819 average daily enrollment slots). The average cost in 1979-80 for these programs was \$3,779 per average daily enrollment (full-time equivalent slot).

The major program goals are (a) to assist families in becoming self-sufficient by enabling parents to work or receive training leading to employment by providing safe, appropriate, and stimulating environments for their children; (b) to enhance the physical, emotional, and developmental growth of participant children; and (c) to refer families in need of medical or family support services to appropriate agencies.

The principal program types funded to provide these services, along with specific program goals and outputs, are listed below:

- General child care.* Provision of comprehensive child development services for low-income parents in work or training situations.
- School-age parenting and infant development (SAPID):* (1) provision of supervised infant care to support parent's completion of high school; and (2) training of high school student in parenting skills.
- Campus.* Provision of child care for infants and children of low-income student parents who are working for a degree or diploma.
- Migrant.* Provision of child care and related services to children of migrant families working in the fields or agriculture-related industries.
- Alternative child care.* Provision of child care and related services (including resource and referral programs) in innovative and cost effective ways for low-income parents who are working and/or are in job training.

A nine percent inflation increase totalling \$15.8 million is provided for child care in 1980-81.

Seventeen community college district campus child care programs were overfunded by \$212,134 in 1979-80 due to the State buyout of 12½ percent of the campus match, in addition to bailout provided in Chapter 282/79. In 1980-81, the \$212,134, along with a campus child care augmentation of \$23,596, will be used to buy out the remaining 12½ percent match for all campus programs except those receiving bailout through Chapter 282/79. Those 17 programs will provide a 25 percent match.

No funding is provided in this budget for child care expansion. Child care expansion should be addressed in separate legislation which results in necessary programs changes.

<sup>1</sup> The information displayed reflects data reported by the local agencies on the June 30, 1979 reports with the exception of High-School-Age Parenting and County Child Care Services. Data on the last two programs were supplied by the Office of Program Evaluation and Research. Data on the Indochinese Refugee program were not available at time of chart preparation.

<sup>2</sup> The data in the 79-80 Governor's Budget were gathered via a combination of counts and estimates, resulting in an inflated estimate of number of children served. Efforts are underway in the Department to centralize and computerize the data collection process for future use.

## b. Child Nutrition

## Objective and Description

The objective of the child nutrition element is to assist participating school districts and private, nonprofit agencies in providing nutritious meals to children.

In 1979-80 approximately 465.4 million meals will be served to children throughout the State. Of this number it is estimated that 252.4 million meals will be served free to the recipients and 29.5 million will be served at a reduced price. In 1980-81 it is estimated that 514.4 million meals (a 10.5 percent increase) will be served throughout the State. Further, it is anticipated that approximately the same percentage of meals will be delivered either free or at a reduced price in 1980-81.

The following programs are offered to assist participants in providing nutritious meals to children:

## National School Lunch Program (NSLP)

The National School Lunch Program is designed to provide all eligible school-aged children in California with a daily nutritious meal and is anticipated to extend the NSLP to 169 targeted public schools, 72 private schools and 33 residential child care nutrition sponsors.

## School Breakfast Program (SBP)

The School Breakfast Program provides nutritious low-priced breakfasts to eligible school-aged children. The SBP is estimated to be extended to 31 outreach target schools.

## Child Care Food Program (CCFP)

Through the Child Care Food Program, nutritious meals are provided to children in non-residential child care institutions, including family and group child care homes. The objective of the CCFP is to extend services to non-participating eligible institutions, placing priority on reaching institutions in low-income areas.

DEPARTMENT OF EDUCATION—*Continued***School Milk Program (SMP) <sup>1</sup>**

The School Milk Program provides liquid milk to public and private non-profit school children (kindergarten through grade 12), and children in non-profit child care institutions. Milk is also provided to children who choose to bring a lunch from home rather than participate in the lunch program. In 1980-81, 1,798 sponsors will be participating in the SMP and approximately 165.1 million half-pints of milk will be served.

<sup>1</sup> Federally funded program only.

**State-Mandated Child Nutrition Programs (SMCNP)  
(State-funded meal reimbursements)**

The State-mandated child nutrition program provides all school children in public schools, regardless of their financial ability, an access to nutritious meals while in school. (This subsidy is provided in addition to the Federal NSLP and SBP subsidies.)

SMCNP was created by Senate Bill 2020 (Chapter 1487/74) and Senate Bill 120 (Chapter 1277/75). Administered by the department, the program will provide a basic per meal reimbursement of \$.0818 in 1980-81 for qualifying breakfasts and lunches served in public and private institutions. The program also provides additional state funds to assist low-wealth districts in providing meals to needy students in accordance with Senate Bill 120 which requires that all school districts offer at least one nutritious meal to needy students.

**Nutrition Education and Training Projects (NETP)**

Nutrition Education and Training projects initiate training for school food service personnel and cooperates with other units in the Department to provide nutrition education programs in the classroom. The number of children receiving nutrition education classroom instruction has increased from 6,900 in 1978-79 to an estimated 49,000 in 1980-81. Training workshops for school food personnel is anticipated to increase from 10 <sup>1</sup> to 30 in 1980-81.

<sup>1</sup> The NETP was established in January 1979.

**Food Service Equipment Assistance (FSEA)**

The FSEA assists schools without a food service program and schools without the facilities to prepare and cook hot meals or receive hot meals to purchase food services equipment and facilities. FSEA also assists schools with existing school food service operations to acquire new or updated food service equipment. 507 food service applications are anticipated to be processed in 1980-81 for new equipment and facilities.

**c. Postsecondary Education****Objective and Description**

The objective of Postsecondary Education element is:

- a. To ensure that privately supported institutions conferring academic degrees have been (1) accredited by a national or regional accrediting agency; (2) approved by the Superintendent of Public Instruction; or (3) authorized by the Superintendent of Public Instruction.
- b. To approve courses offered by private and public schools for the training of veterans.
- c. To reimburse from the Student Tuition Recovery Fund the tuition of a student enrolled in a private postsecondary school which closes prior to completion of the instructional program.

## d. Urban Impact Aid

## Objective and Description

The urban impact aid provisions of Chapter 894/77 (AB 65) provided general aid to unified school districts that met the criteria of size and concentration of disadvantaged pupils. Eligibility for aid was determined by a combination of minority student population: ADA in excess of 12,022; a poverty factor (current EDY formula); and percentage of students on AFDC. The amount allocated to each district was based on the AFDC count multiplied by the EDY factor; the "squeeze" factor (the ratio of the State's prior year foundation program level to the district's revenue limit for the same year); and a factor for districts in excess of 58,500 ADA. AB 65 appropriated \$40.8 million to support the program for the 1978-79 fiscal year. However, Chapter 292/78 reduced that amount to \$36.7 million.

Additionally, \$8.2 million was appropriated in 1978-79 by Chapter 323/76 in combination with AB 65 to provide general aid to school districts with an EDY factor of 61.25 or greater. However, this amount was reduced to \$7.3 million for 1978-79 by Chapter 292/78 and Chapter 359/78.

In 1979-80 Item 319, Chapter 259, appropriated \$44,065,800 for urban impact aid, a combination of the general aid from AB 65 and the general aid provided in Chapter 323/76. The total amount was the same as provided in 1978-79 for both programs.

Chapter 282, Statutes of 1979 (AB 8), augmented Item 319 with \$18 million to be used for the 19 school districts which qualify with ADA in excess of 12,022.

The statutory authority for the Urban Impact Aid Program established by Chapter 894, Statutes of 1977 expires June 30, 1980. However, the general aid program established by Chapter 323, Statutes of 1976 for the largest 19 school districts is budgeted at the statutory level of \$8,652,000 as required by Chapter 894, Statutes of 1977. Funding for 1980-81 decreases to \$8,652,000, the statutory level prescribed by AB 65 (Chapter 894/77).

## Authority

## e. Surplus Property

## Objective and Description

The federal government provides California and certain public and private nonprofit agencies within its boundaries the opportunity to consume, at a minimal cost, federal surplus personal property and/or commodities through the federal personal property and donated commodities distribution program. The State Agency for Surplus Property was established within the Department of Education for the distribution of these goods. The goal of this agency is to acquire and distribute efficiently to all participating agencies all personal property and commodities donated by the federal government that can be used effectively by those agencies.

In addition, the agency coordinates the processing of donated commodities into usable food products for distribution.

The total number of agencies served in 1980-81 will be approximately 27,000 and personal property will reach a level of \$22 million.

## f. Non-Public School Liaison

## Objective and Description

According to fall, 1978, reports to the Department of Education, enrollments in the 2,902 private (independent and church-related) schools in California totaled 460,798 students or 9.9 percent of the public school enrollment.

The non-public school liaison element serves as the administrative, legislative, and program liaison between the public in general, private schools, and the 40 State and federal programs for which they are eligible. A major objective for 1980-81 is to ensure equitable participation in these programs by students in private schools.

## IV. DEPARTMENT MANAGEMENT AND SPECIAL SERVICES

## Program Objectives and Description

The Department of Education, with a staff of approximately 1,750 employees, excluding employees in the State special schools, is responsible for providing leadership to California's public schools and for disbursing approximately \$7.4 billion in funds, materials, and supplies to local educational agencies. The management of these resources and the achievement of education program objectives depend on the leadership, policy direction, and support services provided by the department management and special services program.

The program consists of (a) executive management; (b) department management; (c) management services; (d) special services; and (e) program evaluation and research and state assessment.

## a. Executive Management

## Objective and Description

The executive management element consists of the offices of the Superintendent of Public Instruction and his deputies and assistants as well as a centralized staff assigned to governmental affairs, legal counsel, information/program dissemination, policy analysis and special projects, and intergroup relations.

The Superintendent, in cooperation with the State Board of Education, determines priorities to meet the changing needs of the public schools. His office recommends to the public and to the Legislature the actions necessary to provide effective educational programs.

## Executive Staff

The Executive Staff of the Department, composed of the Superintendent, the Chief Deputy Superintendent for Administration, and the Deputy Superintendent for Programs, is the key policy formulator and management body in the department.

## Governmental Affairs

Each year, legislation is proposed and enacted at the State level with regard to education in California. It is the responsibility of the Office of Governmental Affairs to act as liaison in these matters for the State Board of Education and the Superintendent of Public Instruction in relations with the Legislature and other governmental bodies. The office manages these primary activities:

a. Each year the State Department of Education and the State Board of Education sponsor approximately a dozen pieces of legislation which range in significance from a comprehensive reform of the school finance system to technical corrections in the Education Code.

b. Each year approximately 5,000 bills are introduced in the Legislature, approximately 600 of which are analyzed by the department concerning their effect on education. Positions on and proposed amendments to these bills must be adopted by the department and the State Board of Education and communicated to appropriate legislators, committees, and interested educational groups.

c. In a typical week during the legislative session, the Office of Governmental Affairs receives approximately 200 telephone and written requests for information from the Legislature, other governmental agencies, and the public.

DEPARTMENT OF EDUCATION—*Continued***Legal**

The Legal Office provides centralized legal services to the Superintendent of Public Instruction and the State Board of Education as well as to all of the staff units in the department, including the State Library.

This legal service consists of written and oral opinions on the effect of new legislation on existing programs; the drafting of regulations; representation of the department before administrative agencies such as the State Personnel Board and the Federal Education Appeals Panel; and liaison to the Attorney General's Office on court cases in which the Department of Education or the State Board of Education is a party.

On occasion the staff represents the department without the assistance of the Attorney General and explains school law to parents, the public, and county counsels. *This budget includes a \$200,000 contingency appropriation to permit the Department to contract for legal services in defense of the state's school finance formulas in Serrano v. Priest.*

**Information/Program Dissemination**

The information/program dissemination component is divided into four activities that provide comprehensive services to department programs on request: (a) Bureau of Publications center; (b) media support services; (c) information dissemination project; and (d) public information services.

a. The Bureau of Publications center, a fully reimbursable unit, provides editing, typesetting, and graphic services necessary for the publication of Department publications, often in Spanish and other languages as well as in English. The unit is also responsible for selling and distributing Department publications; managing the department's copyright program; and maintaining the county-district-school (CDS) coding system for identifying all institutions of learning in California.

b. Media support services, a fully reimbursable unit, cooperates with public information services to provide multimedia products tailored to meet a program's need for information dissemination and field assistance. The unit produces films, filmstrips, slides, and tapes as well as a wide variety of visual aids for conferences, workshops, and general displays. It also prepares material for presentation on television. The department's media equipment office is a part of this unit.

c. The information dissemination project, supported by a federal (NIE) grant ending by September, 1981, provides dissemination planning services to department staff members as well as information resources to department staff members and to various networks in California.

d. Public information services assists all department units in writing and editing reports, occasional papers, monographs, handbooks, and newsletters in clear, jargon-free language.

**Policy Analysis and Special Projects**

The policy analysis and special projects component provides to the Executive Office staff assistance and consultation for the analysis and formulation of appropriate actions to deal with concerns that require executive action—concerns generated by emerging problems and trends, new demands, and new legislation.

These staff support assignments require a knowledge of the priorities, philosophies, and values of the Superintendent and the State Board of Education that do not lend themselves to the assignment of one of the regular line components. This component provides a rapid-response capability needed to supplement, coordinate, and implement executive actions affecting departmental programs, operations, and policies. Activities include:

a. Policy analysis: (1) research of issues, trends, problems, and opportunities critical to policy development in the department; and (2) provision of policy and subsequent development of courses of action to implement these policies.

b. Special assignments: (1) rapid response to provide quick action in crisis situations which would otherwise disrupt ongoing departmental operations; and (2) assistance in setting budget priorities.

c. Organizational development: (1) in relation to the governance and administration of the state's public school system; (2) in response to legislatively mandated state and federal requirements; and (3) through completion of studies and analysis, together with recommendations, concerning organizational arrangements, staffing, and required implementation activities.

**Intergroup Relations**

Each year the Office of Intergroup Relations provides technical assistance to approximately 560 school districts throughout California in the following areas:

a. Desegregation/integration: assist school districts in (1) meeting the requirements of Sections 90–101, California Administrative Code, Title 5; (2) assist in the development and implementation of staff training activities related to desegregation and integration; and (3) assist in the resolution of problems related to desegregation and integration.

b. Multicultural education: (1) assist school districts and offices of county superintendents of schools in the planning and implementation of the State Board of Education's policy on multicultural education; (2) promote staff training activities in multicultural education (A-127 schools are required to have a multicultural education component); and (3) assist school districts and offices of county superintendents of schools to meet the requirements of Education Code Section 44560.

c. Conflict management: (1) assist school districts and individual school staffs to develop conflict management skills; (2) assist in the prevention of disruptive conflict; (3) intervene in crisis situations; and (4) provide intense training for school administrators in techniques for improving the human environment of schools, the training to be based on the department publication entitled *Improving the Human Environment of Schools: Problems and Strategies*.

d. Equal employment: (1) assist school districts and offices of county superintendents of schools to plan and implement affirmative action development plans; and (2) assess complaints of discrimination in employment, promotion, demotion, and discharge.

## b. Department Management

## Objective and Description

The Superintendent of Public Instruction must have an effective management system within the department to ensure the delivery of responsive and accountable educational services to students in California.

In the department management element, education program managers are responsible to the Superintendent and the Chief Deputy Superintendent, through the Deputy Superintendent for Programs, for the implementation of consolidated application programs, curriculum support services, adult education, vocational education, and special education.

The Administration Branch of the department is managed by the Deputy Superintendent for Administration. Included are the management units for the Division of Financial Services and the Division of Child Development and Nutrition Services. The Division of libraries is administratively assigned to the Executive Branch.

## DEPARTMENT OF EDUCATION—Continued

## c. Management Services

## Objectives and Description

Under the direction of the Deputy Superintendent for Administration, the management services element provides administrative and financial support services to the department's program operations. Financial services are provided by the fiscal policy and analysis, budget, accounting, systems development, internal audit, and business service units.

The management services element is divided into indirect cost units, service units, and direct-funded units. Indirect cost units are departmental activities that support and are distributed to all programs on the basis of direct labor costs incurred. Service units are departmental activities that provide direct services to programs but are centralized to provide greater efficiency and avoid duplication. Service units charge users at established billing rates to offset the cost. Direct-funded units are departmental activities funded by State appropriations or federal grants.

## d. Special Services

## Objective and Description

The special services element supports the following components: (1) special assistance to the State Board of Education; (2) Education Commission of the States; and (3) advisory commissions and committees.

## Special Assistance to the State Board of Education

The Legislature and the State Board of Education are the governing and policymaking bodies for public elementary and secondary education in the State. The Board is composed of ten nonpaid lay members appointed to four-year terms by the Governor. This component provides the Board with administrative and staff assistance.

## Education Commission of the States

The Education Commission of the States is the operating arm of the compact for education, established to improve state systems of education. *Statutory authority for the Commission expired at the end of the 1978-79 Fiscal Year and was extended through 1979-80 by provision of Chapter 1039/1979 (SB 186). Due to its expiration at that time, funding is not provided for 1980-81.*

## Advisory Commissions and Committees

The advisory commissions and committees, composed of professional and lay members, provide the Board and the Superintendent of Public Instruction with alternatives and recommendations on the development of educational policies. Included among these advisory bodies are the Equal Educational Opportunities Commission, the Education Management and Evaluation Commission, the Curriculum Development and Supplementary Materials Commission, the Council for Private Post-Secondary Education Institutions, the Instructional Television Advisory Committee, and the Mexican-American Advisory Committee.

## Authority

Education Code, Sections 33000-33010 and 33030-33039.

Education Code, Sections 33502-33522, 33530-33539, 33550-33556, 33570-33577, and 33590-33596.

Education Code, Sections 12510-12515.

## e. Program Evaluation and Research and State Assessment

## Objective and Description

The Office of Program Evaluation and Research is responsible for the evaluation of all State and federal education programs administered by the State Department of Education. It conducts special evaluation studies of selected education programs at the request of the Legislature and provides technical assistance in evaluation and research to members of the Department and to local agency evaluation personnel. This office also designs and provides training in evaluation and assessment, including local proficiency assessment, and administers the *California High School Proficiency Examination*.

## V. LIBRARY SERVICES

The goal of the State Library is to make information available to users in a coordinated, effective, and efficient manner. The State Library assists other California public libraries in providing timely, excellent, free library service for all state residents.

The library services program elements include: (a) reference and research for the Legislature and State agencies; (b) statewide library support and development; (c) special clientele services; and (d) State Library support services.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

d. State Library Support Services .....	89.3	80.6	77.9	2,549,823	2,923,976	2,982,356

## a. Reference and Research for the Legislature and State Agencies

The State Library maintains reference and research materials for the Legislature and State agencies. A central library reduces costly parallel efforts in each agency. When agency libraries are required, the State Library offers backup support.

In 1980-81 the State Library will continue to (1) facilitate access to sources of information and materials to support the decision-making functions of State government; and (2) coordinate efforts to provide access to sources of information, published and unpublished, that are available in State administrative and legislative agencies. In 1980 the State Library will publish a directory of the resources of all State agency libraries.

## Authority

Education Code, Section 19320(k).

DEPARTMENT OF EDUCATION—*Continued*

## b. Statewide Library Support and Development

## Government Depository Program

The State Library acts as a coordinating authority in California for the distribution of State and federal publications to depository libraries so that local library users can have ready access to information in official government publications. It also administers the Library Distribution Act for California publications, determining the best location for depositories and assisting local libraries in the handling and use of publications. As a U.S. regional depository, the State Library assists the Superintendent of Documents in administering the federal depository program.

The objectives of the State Library government depository program for 1980-81 is to continue to work with State agencies to improve the timeliness and completeness of the monthly listing of California state publications.

## Interlibrary Loan and Reference Support

The State Library offers interlibrary service to (a) supplement the collections of California public libraries; (b) locate materials the State Library does not have; and (c) assist local libraries by answering reference questions and supplying information.

Work is also continuing on the editing of the California Union Catalog and the elimination of backlogs.

## Consultant and Research Services

The consultant and research services component provides advisory and technical assistance to California libraries. Studies and surveys are made, local program recommendations are provided, research assistance is given, and a library information clearinghouse is maintained. Statistical data from all public libraries are published annually. The consulting staff assists the State Librarian in the administration of the California Library Services Act, which provides assistance to 18 public library systems; and of the federal Library Services and Construction Act, which also provides grants to public library systems.

In 1980-81 local volunteer programs will be evaluated. Training in community analysis will be offered.

## State and Federal Grants Program

Under provisions of the California Library Services Act of 1977, libraries are assisted in the sharing and coordination of library resources and services through interlibrary loans, system reference referral, and equal access. The California Library Services Board adopts regulations and policies for the Act. In 1980-81 a computerized bibliographic data base will be fully operational and will make resource sharing more efficient.

Under provisions of the federal Library Services and Construction Act, funding is made available, through the State Library Agency, to publish libraries and public library systems for the purpose of extending and improving public library services in California.

*For 1980-81 the budget proposes the expenditure of \$49,154 for CLSA state administration and \$224,428 for projected increased transactions which are eligible for reimbursement.*

## c. Special Clientele Services

The federal government produces talking books (recorded on tape or record) and braille books for those unable to use conventional printed materials. Both types of books are made available by the Library of Congress to designated agencies, which then lend them to eligible patrons who are blind or physically handicapped. The State Library is the agency responsible for this service in northern California.

In 1978, the State Library implemented an automated circulation and inventory control system in the library for the blind and physically handicapped. During 1980-81 efforts will continue to increase the efficiency of the system so that services can be provided to an ever-increasing number of users.

The 1980-81 budget provides \$261,785 for the final, three-year phase-in of Chapter 880/78, which provides support to a Southern California Regional Library for the blind, physically handicapped and reading disabled. In addition, the 1980-81 budget proposes the one-time expenditure of \$24,545 to purchase an additional disk drive for the automated circulation system in the Books for the Blind and Physically Handicapped section to accommodate the growth of data files. In addition, \$433,071 is provided for a nine percent inflation increase.

## d. State Library Support Services

## Administration

The objectives of the State Library's administration are to (a) maintain leadership in planning library services at local, State, and national levels; (b) administer the State Library and its programs efficiently; and (c) coordinate state and federal grants for libraries according to law.

## Collection Management and Control

The objective of the collection management and control component is to gather and control materials so that they can be used easily. By acquiring and organizing books, periodicals, and other types of publications, the State Library complies with its mandated responsibilities. Materials for the State Library are selected on the basis of (a) anticipated need; (b) requests by state employees, officials, and legislators; and (c) available funds.

Materials are purchased in these subject categories: (a) social and political science; (b) law; (c) science and technology of direct interest to state agencies; (d) educational management and technology; (e) public administration; (f) economics; (g) library and information science; and (h) California history.

It is estimated that in 1979-80 approximately 9,800 books will be acquired and processed by the State Library's order and cataloging operations. The number of periodicals and serial subscriptions as well as microform publications to be acquired will be in addition to the number of books.

In 1980-81 the State Library will acquire and process a number of books and other publications comparable to the number to be acquired in 1979-80. To assist in expediting the availability of newly received library materials and improve access to the collections, the 1980-81 budget proposes the expenditure of \$34,942 to replace the manual system for producing catalog cards with a computerized system. Also included in the 1980-81 budget is \$61,755 for full year lease costs for the Sutro Branch Library in San Francisco.

## VI. LEGISLATIVE MANDATES

## Program Objectives and Description

Section 2231(a) of the Revenue and Taxation Code requires the State to pay to local governmental units the costs of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973. Within the program area of the Department of Education, there are several legislative mandates: certificated employees dismissal procedures (Chapters 1216/75 and 973/77), pupil disciplinary procedures (Chapters 1253/75 and 965/77), pupil basic skills testing (Chapter 894/77), collective bargaining (Chapter 961/75), jury duty for certificated employees (Chapter 593/75), retirement credit for unused sick leave (Chapters 89/74 and 1398/79) and the local contribution rate increase for STRS (Chapter 1036/79). These mandates affect public school districts which will incur higher costs complying with them.

Funds are appropriated to the State Controller for allocation and disbursement to these entities upon their claims for reimbursement of costs incurred.

## Authority

Chapters 1216/75, 1253/75, 894/77 965/77, 973/77, and 961/75.

## Program Requirements

	1978-79	1979-80	1980-81
Continuing Program Costs .....	\$198,358	\$8,024,231	\$41,263,470
General Fund .....	198,358	8,024,231	41,263,470

## Program Elements

a. Certificated Employee Dismissal .....	10,781	17,541	17,541
b. Pupil Disciplinary Procedures .....	61,468	61,690	546,555
c. Pupil Basic Skills Testing .....	126,109	270,000	349,374
d. Collective Bargaining—School District Employees .....	(10,000,000) <sup>1</sup>	(10,000,000) <sup>1</sup>	10,000,000
e. Jury Duty .....	(1,000,000) <sup>1</sup>	(1,000,000) <sup>1</sup>	1,000,000
f. Retirement Credit for Unused Sick Leave .....	(14,000,000) <sup>1</sup>	(14,000,000) <sup>1</sup>	14,000,000
g. STRS rate increase .....	—	7,675,000	15,350,000

## DEPARTMENT OF EDUCATION—Capital Outlay

STATE BUILDING PROGRAM  
EXPENDITURESActual  
1978-79Estimated  
1979-80Proposed  
1980-81*Schools for the Blind and Deaf and Multihandicapped, Fremont, California*

Pursuant to Chapter 1120, Statutes of 1973, the Schools for the Blind and Deaf will be located on a single site of approximately 91 acres in Fremont, California. This site will contain a facility for the blind with a capacity of 150 children; 50 blind-deaf, and 100 with multiple impairments. The same site will also contain a facility for the deaf, with a residential capacity of 100 elementary students, 250 secondary students, and 50 multihandicapped students. The single site will promote capital and operational economies, which are administratively and operationally practical and educationally sound in the joint or mutual use of facilities. Each school will continue to maintain the integrity of its own educational programs. Recognizing the need to replace the existing facilities located in Berkeley, the 1973 Legislature appropriated the initial funds necessary for site acquisition, planning, construction and equipment for the new facility. In subsequent years, the Legislature appropriated additional funds to complete the project, bringing the total project cost to an estimated \$49.7 million dollars. The anticipated occupancy date is scheduled in June 1980. No expenditures are anticipated in 1980-81.

EXPENDITURES

Actual 1978-79	Estimated 1979-80	Proposed 1980-81
-------------------	----------------------	---------------------

*Diagnostic School for Neurologically Handicapped Children—Southern California*

This is a residential school for the diagnosis, treatment and determination of an educational program for children afflicted with neurological handicaps. The school is situated on 2.1 acres of state-owned land adjacent to California State University, Los Angeles and consists of a two-story building housing classrooms, dormitories, kitchen and dining rooms, playrooms, parent bedrooms and lounges, examination rooms, infirmary and administration offices.

The 1977-78 Capital Outlay budget appropriated one minor project totaling \$8,000 to plan additional play area on land the school obtained through a transfer with California State University, Los Angeles. The 1978-79 budget appropriated \$62,000 to develop the unimproved land for additional playground area. No expenditures are anticipated in 1980-81.

*School for the Deaf, Riverside*

This residential school, located in Riverside, has a maximum capacity of 640 residential students and 100 day students. The school is situated on 75.21 acres of State-owned land and consists of single-storied buildings of brick construction. The facility includes: 15 dormitories and 8 multihand-icapped units with an average capacity of 32 children per dormitory and 20 children per multihandicapped unit, 1 administration building, 16 buildings housing classrooms and vocational education shops, gymnasium and exercise rooms, social hall, infirmary, kitchen, dining room, bake shop, boiler plant, warehouse, plumbing and mechanical shops. In addition, areas are provided for recreational activities including a swimming pool, football field, baseball diamond, running track, basketball and volleyball courts, and playground areas for the small children. Included in the 75 acres on which the school is located are 13 acres of unimproved land. The 1979-80 budget appropriated \$40,000 to install a day security communications system. No expenditures are anticipated in 1980-81.

# CALIFORNIA ADVISORY COUNCIL ON VOCATIONAL EDUCATION

## Program Objectives and Description

The Council is responsible for evaluating vocational education and advising the State Board of Education, the Board of Governors of the California Community Colleges, the Legislature, and other agencies on matters relevant to vocational education programs.

The specific functions of the Council are shown below:

(1) Advise the State Board of Education, the Board of Governors of the California Community Colleges, and the Legislature in the development and preparation of annual and long-range State plans for occupational education and training, and an annual accountability report.

(2) Prepare and submit a statement to appropriate public agencies, as required pursuant to law, describing its consultation with the State Board of Education, the Board of Governors of the California Community Colleges, the California Postsecondary Education Commission, and the Legislature on the State plans to the United States Commissioner of Education.

(3) Advise the State Board of Education, the Board of Governors of the California Community Colleges, the California Postsecondary Education Commission, and the Legislature on policy matters arising in the administration of programs under such plans and reports.

(4) Evaluate programs, services, and activities of occupational education and training and publish and distribute the results thereof.

(5) Prepare and submit through the State Board of Education, the Board of Governors of the California Community Colleges, the California Postsecondary Education Commission, United States Commissioner of Education, the National Advisory Council on Vocational Education, and the Legislature, and annual evaluation report accompanied by such additional comments as the State board and the Board of Governors deem appropriate which (1) evaluates the programs and services carried out in the year under review to meet the objectives set forth in the State plans; (2) utilizes accountability and program evaluation reports prepared pursuant to Section 112 of Public Law 94-482 by the State Board of Education, (3) recommends such changes as may be warranted by the evaluations.

(6) Consult with the Comprehensive Employment and Training Advisory Council to determine the extent to which the vocational education and employment training needs of the State are being met and assess the extent to which vocational education, employment training, vocational rehabilitation and other programs assisted under this act and related acts represent a consistent, integrated, and coordinated approach to meeting such needs; and comment, at least once annually on the reports of the Comprehensive Employment and Training Advisory Council, which comments shall be included in the annual report submitted by the Council pursuant to this section and in the annual report submitted by the Comprehensive Employment and Training Advisory Council pursuant to Section 107 of the Comprehensive Employment and Training Act of 1973.

(7) Perform functions identical with or analogous to those stated in subdivisions (a) to (e), inclusive, with respect to programs carried out under Part B of Title X of Public Law 92-318, and Title I, Part I of Public Law 94-482.

(8) Provide technical assistance to local advisory committees or councils established pursuant to Section 8070.

## CONTRIBUTIONS TO TEACHERS' RETIREMENT FUND

The objective of this program is to provide State financing of teacher retirement benefits which are not funded by employer and employee contributions and income from investments.

Contributions to the Teachers' Retirement Fund are derived from four separate sources: members, employing school districts, income from investments, and from the General Fund. Chapter 1305, Statutes of 1971, placed the system on a reserve funding basis. Teachers contribute 8 percent of their salary. Employing school districts contribute 8 percent of member payroll. From 1972 to 1976 the State contributed \$135 million for the purpose of funding retirement benefits which were in effect on June 30, 1972. Chapter 323, Statutes of 1926, as amended by Chapter 991, Statutes of 1976 provided an additional amount of \$9.3 million to fund a one-time cost of living increase in benefits. The State has continued to contribute \$144.3 million through fiscal year 1979-80.

Chapter 282, Statutes of 1979, effective July 1, 1980 annually appropriates \$144.3 million from the General Fund, increased or decreased by the change in the California Consumer Price Index (CCPI). This statute also contains a schedule which calls for an additional appropriation of \$10 million in Fiscal Year 1980-81 annually increased until the General Fund appropriation reaches \$280 million in Fiscal Year 1994-1995. Thereafter this amount will be indexed to the CCPI.

## DEBT SERVICE ON PUBLIC SCHOOL BUILDING BONDS

## PROGRAM ANALYSIS

## Program Objectives and Description

The electorate of California has previously authorized State school building general obligation bonds totaling \$2,390,000,000 of which \$345,000,000 is available for earthquake construction, and \$2,045,000,000 for construction related to growth. Of the authorized bonds, \$2,325,000,000 has been issued and sold as of November 1978.

In 1979-80, \$65,000,000 in bonds have been or are projected to be sold to finance the continuing cash needs of outstanding final apportionments made to the school districts. This sale will exhaust the pool of authorized State school building general obligation bonds.

The repayment of loans from the school districts will amount to \$1,603,034,925 as of June 30, 1981, of the total debt service paid to bondholders, totaling \$2,323,392,159 as of June 30, 1981. Repayments amount to 69 percent of the debt service from the beginning of the program.

The school districts of the State of California are required to first utilize their individual maximum bond-borrowing capacity to within 95 percent, or be within \$25,000 of total bond-borrowing capacity, or sell local bonds equivalent to the cost of the project, before the district is eligible for a State loan in this program. The school districts with an unpaid outstanding loan balance repay the State General Fund on a formula basis which involves the district-assessed property valuations and a partially offsetting local district bonded indebtedness payment of the fiscal year with the net amount due for repayment each year over a period of 30 years. If a district during the 30-year repayment period requests a one-year deferral of its annual repayment, then under existing statutes an additional 10 years is added making a 40-year repayment period for that district's outstanding loan. If after the prescribed period there is still a district loan balance outstanding, then the statutes permit the unpaid balance to be canceled.

Chapter 282, Statutes of 1979 (AB 8) appropriated the amount of repayments on loans that is in excess of the amount required to reimburse the debt service for outstanding bonded indebtedness to the State School Deferred Maintenance Fund for the purposes of the Leroy F. Greene State School Building Lease-Purchase Law of 1976.

## SUMMARY BY OBJECT

1978-79

1979-80

1980-81

\$25,000,000 Dated November 1, 1952:

Interest.....	\$12,000	—	—
Redemption.....	1,200,000	—	—

\$25,000,000 Dated May 1, 1953:

Interest.....	36,000	—	—
Redemption.....	1,200,000	—	—

\$50,000,000 Dated May 1, 1954:

Interest.....	48,000	\$24,000	—
Redemption.....	2,400,000	2,400,000	—

\$30,000,000 Dated May 1, 1955:

Interest.....	80,500	50,750	\$19,250
Redemption.....	1,400,000	1,400,000	1,400,000

\$30,000,000 Dated November 1, 1955:

Interest.....	82,250	50,750	19,250
Redemption.....	1,400,000	1,400,000	1,400,000

\$30,000,000 Dated March 1, 1956:

Interest.....	98,000	66,500	35,000
Redemption.....	1,400,000	1,400,000	1,400,000

\$35,000,000 Dated January 1, 1957:

Interest.....	260,000	208,000	156,000
Redemption.....	1,600,000	1,600,000	1,600,000

\$30,000,000 Dated May 1, 1957:

Interest.....	267,750	220,500	171,500
Redemption.....	1,300,000	1,400,000	1,400,000

\$35,000,000 Dated November 1, 1957:

Interest.....	332,500	280,000	224,000
Redemption.....	1,500,000	1,600,000	1,600,000

\$50,000,000 Dated March 1, 1958:

Interest.....	411,000	345,000	276,000
Redemption.....	2,200,000	2,200,000	2,400,000

\$50,000,000 Dated December 1, 1958:

Interest.....	574,000	497,000	420,000
Redemption.....	2,200,000	2,200,000	2,400,000

\$50,000,000 Dated September 1, 1959:

Interest.....	700,000	612,000	524,000
Redemption.....	2,200,000	2,200,000	2,200,000

\$50,000,000 Dated March 1, 1960:

Interest.....	762,500	680,000	597,500
Redemption.....	2,200,000	2,200,000	2,200,000

\$25,000,000 Dated September 1, 1960:

Interest.....	381,375	340,125	298,875
Redemption.....	1,100,000	1,100,000	1,100,000

\$95,000,000 Dated December 1, 1960:

Interest.....	1,492,500	1,335,000	1,177,500
Redemption.....	4,200,000	4,200,000	4,200,000

\$100,000,000 Dated September 1, 1961:

Interest.....	1,630,500	1,465,500	1,300,500
Redemption.....	4,400,000	4,400,000	4,400,000

\$100,000,000 Dated February 1, 1962:

Interest.....	1,425,400	1,293,900	1,150,900
Redemption.....	4,000,000	4,400,000	4,400,000

\$50,000,000 Dated May 1, 1963:

Interest.....	705,200	647,200	586,300
Redemption.....	2,000,000	2,000,000	2,200,000

\$50,000,000 Dated September 1, 1963:

Interest.....	748,000	690,000	630,000
Redemption.....	2,000,000	2,000,000	2,200,000

\$20,000,000 Dated November 1, 1963:

Interest.....	330,750	304,750	278,750
Redemption.....	800,000	800,000	900,000

\$50,000,000 Dated May 1, 1964:

Interest.....	777,000	695,000	631,000
Redemption.....	2,000,000	2,000,000	2,000,000

\$50,000,000 Dated July 1, 1964:

Interest.....	777,500	695,000	630,000
Redemption.....	2,000,000	2,000,000	2,000,000

\$50,000,000 Dated December 1, 1964:

Interest.....	931,700	869,700	807,700
Redemption.....	2,000,000	2,000,000	2,000,000

\$50,000,000 Dated June 1, 1965:

Interest.....	961,900	901,900	840,900
Redemption.....	2,000,000	2,000,000	2,000,000

## STATE SCHOOL BUILDING SAFETY PROGRAM

Chapter 500, Statutes of 1972, appropriated thirty million dollars to be made available to the School Building Safety Fund for the repair and replacement of local school buildings in compliance with Field Act requirements.

Chapter 22, Statutes of 1973 authorized apportionment loans totaling fifteen million dollars from the State School Building Act Bond Law of 1966 to assist school districts which lack matching funds in order to qualify for State loans to comply with Field Act safety requirements. Chapter 383, Statutes of 1974 authorized an additional twelve million dollars from the State School Building Aid Fund for loans to school districts for matching funds to provide for the safety features required in active school buildings under the Field Act.

Chapter 122, Statutes of 1975, provides an additional seven million dollars to the twelve million dollars available from the State School Building Aid Fund for loans to school districts.

These funds were fully encumbered prior to June 30, 1976, but will not be fully apportioned until June 30, 1980.

STATE SCHOOL BUILDING SAFETY PROGRAM—*Continued*

## SCHOOL FACILITIES AID PROGRAM

The objective of this program is to provide financing for construction and maintenance of classrooms for kindergarten through grade 12 public school pupils. With the passage of Proposition 13, the property tax is no longer sufficient to represent a source of revenue for the construction and maintenance of school facilities.

Chapter 282, Statutes of 1979 (AB 8) established several new State-funded programs for elementary and secondary school construction and maintenance which include the following:

1. The Emergency School Classroom Law of 1979—appropriates \$13 million for 1979-80 only to the State School Building Aid Fund for the purchase of relocatable classrooms, to be leased to school districts experiencing rapid growth in enrollments.
2. The Leroy F. Greene State School Building Lease-Purchase Law of 1976—appropriates the excess difference between school districts actual repayments on State School Building Aid loans and an amount required to reimburse the General Fund for principal and interest due and payable for that fiscal year. (Education Code Section 17780)
3. The appropriation of savings (known as "slippage") from State General Fund apportionments which result from an increase in assessed property value above specified levels. (Education Code Section 100.1)
4. Proposition 4, approved by the electorate November 6, 1979 limits governmental spending. AB 8 provides that revenues to any local entity in excess of the level of expenditures allowable under the Proposition 4 limit be made available for school construction by reducing subventions (cigarette and business inventory) to local jurisdictions by one-half of that jurisdiction's excess sales tax and one-fourth of its excess property tax revenues.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## COMMISSION FOR TEACHER PREPARATION AND LICENSING

The Commission for Teacher Preparation and Licensing was established in 1970, with the specific objective of insuring excellence in education by encouraging high standards of quality and diversity through broad minimum standards and guidelines.

The Commission is organized into six program units: approved programs, examinations and evaluation, licensing, professional standards, beginning teacher evaluation study—which is fully federally funded—and administration. Programs are managed by program chiefs under direction of the executive secretary and based on policies of the Commission. Staff functions of the Commission include program approval, monitor and review, external assessment of teacher preparation programs, administration of examination and evaluation programs, licensing of qualified credential applicants, and review of charges of immoral or unethical conduct of public school certificated personnel.

### SUMMARY OF PROGRAM REQUIREMENTS

	1978-79	1979-80	1980-81
I. Approved Programs .....	\$569,710	\$657,785	\$658,379
II. Examinations and Evaluation .....	390,284	453,163	465,047
III. Licensing .....	1,501,346	1,854,447	1,849,633
IV. Professional Standards .....	411,927	464,048	475,365
V. Beginning Teacher Evaluation Study .....	190,081	170,000	20,000
VI. Administration—distributed to other programs .....	(758,482)	(1,049,668)	(1,070,435)
TOTALS, PROGRAMS .....	\$3,063,348	\$3,599,443	\$3,468,424
Reimbursements .....	- 81,621	-	-
NET TOTALS, PROGRAMS .....	\$2,981,727	\$3,599,443	\$3,468,424
Teacher credentials .....	2,791,646	3,429,443	3,448,424
Federal funds .....	190,081	170,000	20,000
Personnel years .....	109	108.5	105.6

### SIGNIFICANT PROGRAM CHANGES

Program	Description	Dollars
1.	Administration/Automated Data Collection System .....	-
	A total of \$49,471 is being redirected from other programs to Administration for the purpose of automating the present manual tally/sort method of monitoring application processing activities.	
2.	Beginning Teacher Evaluation Study/Final Phase .....	- 39,452
	The reduced funding level for the 1980-81 fiscal year reflects the moderate level required for completion of the final phase of the Beginning Teacher Evaluation Study. This phase involves dissemination of the project's findings and will require funding for only two months of this fiscal year.	

### I. APPROVED PROGRAMS

#### Program Objectives and Description

- To provide leadership for the planning, development and improvement of programs offered in California institutions for the preparation of teachers and other public school personnel.
  - To provide assistance to agencies (local education agencies and institutions of higher education) in the development and maintenance of assessment programs leading to the Bilingual Certificate of Competence.
  - To provide assistance to California institutions in the development of field-based assessment programs for the certification of child care personnel and to facilitate the articulation of such programs offered at two-year and four-year colleges.
- Staff assistance is provided to institutions of higher education and local education agencies in achieving the objectives listed above, in the following ways:
- Assistance to institutions of higher education in the development of professional preparation programs for teaching and services credentials.
  - Assistance to institutions of higher education in the development of single subject programs.
  - Assistance to local education agencies and institutions of higher education developing assessment programs for the Bilingual Certificate of Competence.
  - Assistance to institutions of higher education in the development of new program areas: adaptive physical education and special education for the visually handicapped.
  - Assistance to institutions of higher education in the development of field-based assessment programs in the area of child care.
- Staff will continue to report to the Legislature on the preparation of bilingual teachers, prepare and distribute a directory of bilingual teachers, as required under the bilingual statutes of 1976, work with the Interagency Task Force, and gather data and produce reports which will be of assistance in discharging its responsibilities.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

COMMISSION FOR TEACHER PREPARATION AND LICENSING—*Continued*

Teacher Credentials Fund .....				569,710	657,785	658,379

## II. EXAMINATIONS AND EVALUATION

## Program Objectives and Description

- To maintain, evaluate, and modify the examinations system required by law as a partial route to qualify for educational credentials in California.
- To utilize the examinations system for purposes of evaluation of educational personnel and the credentialing policies of the Commission.
- To evaluate programs leading to credentials issued by the Commission and the performance of persons credentialed by the Commission.
- To monitor assessment programs leading to the Bilingual Certificate of Competence.

The Commission is required by law to provide examinations in each of the subject matter areas for which teachers are credentialed. A nationally administered examinations system has been adopted for use in most subject matter areas, and the Commission has developed and adopted its own examinations in areas for which national examinations are not available or appropriate. The current examinations system of the Commission covers all relevant subject areas except two authorizations added by legislation in 1974.

Staff assistance will be provided to institutions of higher education in the preparation of procedures for the evaluation of professional preparation programs and the performance of graduates of those programs. Additionally, staff will be utilized in several evaluation efforts: in the area of approved programs, and graduates of those programs, in the mainstreaming requirements (AB 1250, Statutes of 1978) for teachers and administrators, in the follow-up of assessment activities of agencies assessing for the Bilingual Certificate of Competence, in the actions of the Commission as these relate to the continued improvement and the appropriate preparation of certificated public school personnel.

## III. LICENSING

## Program Objectives and Description

- To provide a licensing service to school districts, counties, educational institutions, and individuals which insures uniform administration and enforcement of standards.
- To implement legislation and Commission regulations governing teacher licensing and to establish administrative policies and procedures for the issuance of credentials.
- To provide updated, revised, and simplified procedures for processing applications, with the end objective of reducing costs and the time required to evaluate the applicant's qualifications.
- To establish and maintain a system of monitoring institutions that recommend and issue credentials.
- To establish a system for the collection of data on the use of credentials and the supply/demand needs in California public schools.

## IV. PROFESSIONAL STANDARDS

## Program Objectives and Description

- To initiate proceedings to suspend and revoke certification documents for cause in accordance with the policies of the Commission for Teacher Preparation and Licensing and under authority of the Education Code.
- To recommend to the Commission the termination of suspension orders and reissuance of certification documents when satisfactory evidence of rehabilitation has been presented.

Professional standards in concert with the committee of credentials reviews the personal and professional conduct of individual applicants and credential holders. Such reviews occur when there are allegations relating to arrest records, unprofessional conduct, mental health problems, or physical health problems.

## Authority

Education Code Sections 44201 et seq.; and California Administrative Code, Title V.

## V. BEGINNING TEACHER EVALUATION STUDY

## Program Objectives and Description

- To disseminate findings which have evolved from the multi-year research phase of the Beginning Teacher Evaluation Study (1972-78).
- To identify implications of the research findings for teacher preparation and licensing activities in California.
- To coordinate reports on activities at sixteen local educational sites where practitioners are experimenting with application of the research findings during the 1979-80 year.

The Commission is conducting the Dissemination of Research Phase (1978-80) of the Beginning Teacher Evaluation Study through funding from the National Institute of Education. This federal support will terminate on August 31, 1980, at which time the project activities will be completed.

## Authority

Chapter 557, Statutes of 1970; Education Code Section 44225.

## Output

Educational practitioners throughout California will be more aware of the findings and implications of the Beginning Teacher Evaluation Study, and thereby more able to utilize such findings in improved educational practice in the public schools and in teacher preparation.

## CALIFORNIA POSTSECONDARY EDUCATION COMMISSION

The California Postsecondary Education Commission is responsible for developing and annually bringing up to date a comprehensive five-year plan for postsecondary education. It also reviews and integrates the long range plans of the three public segments of higher education (University of California, California State University and Colleges, and California Community Colleges). Another primary duty is to advise the Governor and the Legislature on the need for and location of new institutions and campuses, and proposals for new programs. The Commission is a clearinghouse for information on higher education.

Operations are divided into:

I. Information systems. The Commission is responsible for developing State-level data collection systems to help in making informed decisions on postsecondary education.

II. Coordination and review. The Commission reviews proposals for new programs and facilities by public institutions in order to (1) provide coordination, (2) prevent duplication, and (3) provide efficient transmittal of state and federal support.

III. Planning and special projects. The Commission develops and keeps the five-year plan up to date, integrates the long-range plans of the public segments, and conducts or monitors special studies requested by the Legislature.

IV. Federal programs. The Commission administers certain federal programs, and has been designated by the federal government as the primary postsecondary education planning agency for the state under Section 1202 of the 1972 higher education amendments.

The Commission also develops criteria to evaluate the policies and plans for postsecondary education and submits reports as requested by the Governor and the Legislature.

### I. INFORMATION SYSTEMS

#### Program Objectives and Description

This unit has responsibility for developing information systems at the state level to collect, store, retrieve, analyze, and disseminate information which will facilitate making informed decisions about postsecondary education. The Education Code specifically directs the Commission to "act as a clearinghouse for postsecondary education information and as a primary source of information for the Legislature, the Governor and other agencies, and develop a comprehensive data base insuring comparability of data from diverse sources."

In addition, the staff works closely with the National Center for Higher Education Management Systems. In the budget year, this unit will continue an electronic data processing system which will provide increased storage, collection and retrieval capacity for information gathered by the Commission.

It is proposed to add one position of Associate Programmer Analyst to assist in the development and maintenance of the Commission's data base. An increase of \$7,500 for the Campus Profile publication is also proposed. It is proposed to purchase two key data machines (\$6,000) and a graphing/plotting unit (\$5,000); these equipment items are one-year allocations.

#### Authority

Education Code Section 66903.

CALIFORNIA POSTSECONDARY EDUCATION COMMISSION—*Continued*

## II. COORDINATION AND REVIEW

## Program Objectives and Description

This unit has the primary responsibility of reviewing and reacting to segmental and institutional plans for new programs, institutions, campuses and other facilities, and programmatic budget requests. The review is based on policies, criteria, and standards which the commission has adopted. Facility, budget, and program reviews are conducted in a manner that (1) provides coordination among interrelated elements, (2) prevents wasteful duplication, and (3) provides an efficient way to transmit state and federal support for programs and facilities.

The staff has undertaken development of criteria for state support of new and existing programs. It also is responsible to the Legislature and the Governor for special studies and projects related to coordination and review.

## Authority

Education Code Sections 66900, 66902 and 66904.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs.....	5.9	5	5.5	\$286,793	\$232,085	\$266,680

## III. PLANNING AND SPECIAL PROJECTS

## Program Objectives and Description

The Commission is required to prepare a five-year state plan making the most effective use of resources in providing opportunities for postsecondary education. The plan must be brought up to date annually. The planning unit, guided by long-term goals established by the Commission, alerts the Commission to problems affecting the plan, proposes solutions or alternatives to those problems within the boundaries of available resources, and works with the segments in their planning efforts. From these activities, the five-year plan is developed and kept up to date.

The unit also is responsible for integration of the long-range plans of the segments, after review and recommendation by the coordination unit. During the first years, the staff will work with the public segments (University of California, California State University and Colleges, and California Community Colleges) so that all plans will be in a format compatible with the Commission's planning data needs.

A second major function of the planning unit is to conduct and/or monitor special studies requested by the Legislature. In the current year, the Commission is expected to complete or continue special studies on: equal educational opportunity, lifelong learning, the need for health science trained professionals, accreditation, and others.

## Authority

Education Code, Sections 66900, 66902, 66903, 66904; ACR 159/73.

Continuing program costs.....	7.1	9	8.5	\$421,400	\$545,995	\$474,619

## IV. FEDERAL PROGRAMS

## Program Objectives and Description

The commission serves as the administrative agency under several titles of the 1972 amendments to the federal Higher Education Act of 1965. This involves development of a State plan for expenditure of federal funds, review of proposals for funding, and monitoring of funded projects.

Three programs are currently assigned to the unit. Title I, Community Service, emphasizes the development of strong, cooperative relationships among institutions of postsecondary education, local community governments, and community groups, in the solution of pressing community problems. Special consideration is given to programs that incorporate the resources of several institutions into a regional consortium. Title IV, Educational Information Centers, provides federal support for the planning, establishment, and operation of Educational Information Centers. These are to be located in various areas of the State in order that services are available to all people in the State. Title VI-A, Instructional Equipment, provides federal funds to postsecondary institutions for the acquisition of classroom and laboratory equipment in order to improve the quality of instruction in selected areas. Federal funds are available for administration of all programs. One-third State matching is required for Title I and Title IV.

In addition, Education Code Section 67002 designates the commission as the federal "1202 Commission" for California in order to comply with the Federal requirement that one agency be designated to receive all planning funds. The commission receives federal funds, is responsible for planning and administering the Higher Education Facilities Act of 1965, and accepts other responsibilities required by the U.S. Office of Education. The staff also reviews proposals submitted by California institutions for Funds for the Improvement of Postsecondary Education provided by the U.S. Office of Education.

*It is proposed to delete a Staff Services Analyst position funded by the 1203 program (Federal funds) and to use the funds for operating expenses.*

## V. EXECUTIVE

## Program Objectives and Description

The Director provides leadership to the staff in the primary, long-range planning effort of the Commission. At the same time, at the direction of the Commission, he advises the Governor, the Legislature, and other State agencies concerning policies and funding for California postsecondary education, based on the work of staff in the several units. The Director also works with a statutory advisory committee composed of the chief executive officers of each of the public segments and the State Superintendent of Public Instruction (or their designees) and other representatives of postsecondary segments, in reviewing Commission agenda items and associated documents. The Executive function includes liaison with the advisory committee and the segments.

## VI. STAFF SERVICES

## Program Objectives and Description

Staff services is responsible for internal commission budget, personnel, commission agenda, preparation and distribution of reports, and general housekeeping functions. The Commission contracts with the Department of General Services for accounting services. It is proposed to add a one-half time clerical position to assist with the production of publications. It also is proposed to increase general expenses by \$6,000 to provide for the increased charges for accounting services. It is proposed to purchase a word processing machine; this is a one-year allocation.

## VII. COMMISSION

## Program Objectives and Description

The Commission has 15 members: one representative each of the Regents of the University of California, Trustees of the California State University and Colleges, and the Board of Governors of the California Community Colleges; one representative of the independent colleges and universities appointed by the Governor; the chairperson of the Council for Private Postsecondary Educational Institutions; the President of the State Board of Education or his/her designee; and nine representatives of the general public. These nine are appointed as follows; three by the Governor, three by the Senate Rules Committee, and three by the Speaker of the Assembly. The Commission selects its chairperson from among the public members.

The budget provides for stipends of \$50 per meeting as authorized, together with necessary travel and expenses for Commission meetings.

## Authority

## VIII. WESTERN INTERSTATE COMMISSION FOR HIGHER EDUCATION (WICHE)

The Western Interstate Commission for Higher Education (WICHE) is a public, nonprofit agency established to coordinate and expand interstate and interinstitutional cooperative programs and to gather data for improving planning and management in postsecondary education. Thirteen states participate, with three commissioners from each, appointed by their governors for four-year terms. The main office of the commission's staff is located in Boulder, Colorado; there are also five regional offices. California's annual assessment for 1980-81 will be \$42,500.

The commission has two divisions:

A. The Division of General Services includes a student exchange program in the health sciences, a four-state regional medical program, a program to encourage access to higher education by students from ethnic minorities, and continuing education programs in nursing and library science.

B. The Division of Mental Health was formed in 1956 at the request of the Western Regional Conference of the Council of State Governments. Major programs seek to improve mental health services on the campus and in the community. These include seminars in psychiatric education for general practitioners, and WICHE conferences to demonstrate methods for training personnel and developing mental health programs.

## CALIFORNIA EDUCATIONAL FACILITIES AUTHORITY

The California Educational Facilities Authority is a public instrumentality of the State composed of five members: the Director of Finance, the State Controller, the State Treasurer, and two public members appointed by the Governor to serve for terms of four years.

The Authority was created for the purpose of issuing revenue bonds to assist private educational institutions of higher learning in the expansion and construction of nonsectarian educational facilities. Through its ability to issue tax exempt bonds, the Authority provides lower cost financing to these institutions than they would be able to secure on the open market.

Facilities used for sectarian instruction or as a place of religious worship are not eligible.

The law specifically provides that bonds issued shall not be a debt or liability or a pledge of the faith and credit nor the taxing power of the State or any of its political subdivisions. The full faith and credit of the participating institutions are pledged to the payment of bonds.

A total of \$150,000,000 of bonds was authorized by the Educational Facilities Act. *Chapter 537, Statutes of 1979, increased this initial bond authorization to \$300,000,000.* As of June 30, 1979, bonds in the amount of \$129,690,000 have been sold as follows: California Lutheran College \$6,750,000; Loyola Marymount University \$5,860,000; Pepperdine University \$14,600,000; San Francisco Conservatory of Music \$1,200,000; Santa Clara University \$4,000,000; Southwestern University \$3,000,000; Stanford University \$49,400,000; University of the Pacific \$7,520,000; University of San Diego \$2,860,000; and the University of Southern California \$34,500,000.

This is a trust activity and involves no State revenues or expenditures. All expenses must be paid from revenues and other moneys available to the Authority.

The California Educational Facilities Act is contained in Sections 94100 through 94213 of the Education Code.

## UNIVERSITY OF CALIFORNIA

The University of California is the State university and the land-grant institution of the State of California. It was established by the Organic Act of 1868, and was written into the State Constitution of 1879 as a public trust, to be administered under the authority of an independent governing board—the Regents of the University of California. Presently, the board of regents includes 26 members; seven ex officio, 18 appointed by the Governor with the approval of the Senate for staggered terms, and one student appointed by the board.

The administrative structure of the university is headed by a president who is responsible for overall policy development, planning, and resource allocations. Chancellors have primary responsibility for the management of campus resource allocations as well as campus administrative activities.

The regents have delegated authority to the academic senate to determine conditions for admission (subject to constraints of the Master Plan for Higher Education), degree requirements, and approval of courses and curricula. Special faculty committees serve in an advisory capacity to the regents, the president, and the chancellors in a variety of matters.

There are nine university campuses. Eight of them offer undergraduate and graduate instruction and professional education; the ninth is a health sciences campus. As a departure from the traditional academic organization of the older campuses, the San Diego and Santa Cruz campuses are organized on the "cluster college" principle.

A master plan for the development of higher education in California was enacted in 1960 and is referred to as the "Donahoe Higher Education Act." This act defines responsibilities of the three segments of public higher education, the University of California, the California State University and Colleges, and the community colleges. It states that the University of California will be the primary State-supported academic agency for research and that the university has exclusive jurisdiction in public higher education over instruction in the professions of law, medicine, dentistry, and veterinary medicine. Sole authority is also vested in the university to award doctoral degrees in all fields, except that joint doctoral degrees with the California State University and Colleges may be awarded.

The University of California is charged with conducting higher education programs in four major areas:

1. Instruction of able young people, by transmitting to them knowledge and skills and by helping them to experience with their instructors, the processes of developing and testing new hypotheses and fresh interpretations of knowledge. The university offers lower division, upper division, graduate and postdoctoral programs on each of its general campuses.

2. Research directed toward advancing the understanding of arts and sciences and the interpretation of human history. The university provides faculty time and the essential libraries, laboratories, and other resources necessary to further faculty research which is intimately connected with teaching in the University—especially at the advanced graduate level.

3. Education for professional careers—education grounded in the understanding of relevant sciences and literature, and enlightened by experience in the methods by which the boundaries of knowledge are pushed back. Education for the professions is a traditional role of the university. It is a role that assumes added significance as each Californian depends more on the expert knowledge and personal integrity of professionals for a variety of specialized services.

4. Public service contributing to the fulfillment of the university's obligation to disseminate knowledge and bringing to faculty and students the stimulation of applying their knowledge and special skills to the problems of modern life. Because of rapid sociological and technological change, increasingly greater numbers of people return to the university to keep themselves abreast of such change.

### 1980-81 Expenditure Plan

The budget for 1980-81 proposes an overall General Fund expenditure of \$959.7 M—which represents a \$53.8 M increase (5.9 percent) over the 1979-80 operating budget. This does not reflect any salary increase funds.

## I. INSTRUCTION AND DEPARTMENTAL RESEARCH

## Program Objectives and Description

General Campus instruction includes most of the direct instructional resources associated with the schools and colleges located on the eight general campuses. These resources include faculty, teaching assistants, and various instructional support staff, supplies, and equipment needed to provide the breadth of courses and degree programs necessary to achieve the University's diverse instructional responsibilities. Included are classroom and laboratory instruction as well as joint scholarly research activities of students and faculty.

The University experienced a 2,563 FTE over-enrollment in the current year over the budgeted level of 107,136 FTE (+2.4 percent). Section 28.9 of the Budget Act provides that supplemental funds may be provided when enrollment overages exceed 2 percent of the budgeted enrollments. \$1,248,000 has been included in the current year budget to finance the 421 FTE enrollment in excess of the 2 percent threshold.

In 1980-81, the revised enrollment projections are estimated at 108,773, an increase of 1,637 over the 107,136 FTE in the 1979-80 budget. The instructional costs associated with this workload increase were partially offset by the 1979-80 increment to the base budget, and the 1980-81 General Campus Instruction Budget has been increased by \$3,284,540 to fund the remainder. The budget has also been increased by \$1,132,704 for an additional 92 teaching assistants, \$2,000,000 for the replacement of instructional equipment, and \$800,000 for instructional use of computers.

## Health Sciences

The instructional program in the health sciences is carried on in 14 schools which provide education in various health fields to students preparing for careers in health care, teaching and research. The health science schools are located on six campuses and include five schools of medicine, two schools of dentistry, two schools of nursing, two schools of public health, one school of pharmacy, one school of veterinary medicine, and one school of optometry. In addition, four innovative programs in medical education are being developed at Berkeley, Fresno, and Riverside, and the Charles R. Drew School in Los Angeles. The physical, biological, and behavioral science programs of the general campuses complement the programs of the health science schools. Professional students, interns, residents, fellows, practicing professionals, students in allied health and public programs, and graduate academic students who will become teachers and researchers are participating in these programs.

Additional State funds totaling \$4.8 million are proposed for the health sciences instructional program. Of this amount, \$3.2 million will accommodate a planned enrollment increase of 311 FTE students over the budgeted 1979-80 level. This enrollment-generated workload increase of \$3.2 million includes 59.43 FTE faculty and related support and is consistent with the phased development of the University's approved health sciences plan. In addition, \$984,000 is proposed for the replacement of Federal capitation fund reductions expected to be approved by Congress, and \$618,450 is proposed for 10 FTE faculty and support in preparation for the enrollment of students in the Charles R. Drew/UCLA undergraduate medical program.

With regard to the enrollment of medical residents, increases are proposed only in primary care and shortage specialties. In recognition of budgetary supplemental language, a reduction of 12 residents is reflected in non-shortage specialty areas.

## Summer Sessions

University of California summer sessions are self-supporting instructional programs offering courses for both degree credit and in selected specialized programs. The summer programs provide a broad spectrum of instructional offerings. The specialized programs include intensive language courses conducted at several campuses which enable students to accelerate their progress toward degrees, and serve as refresher courses for new and continuing students and for language teachers. Programs in education are offered to improve instruction in California's schools and colleges; credits earned may be applied to a California teaching credential. Courses tailored to meet the specific needs of midcareer professionals are also offered.

## University Extension

University Extension is the largest institution of its kind—the nation's leading "noncampus university"—with an annual projected 1980-81 enrollment of 375,500 students participating in classes, short courses, seminars, field studies, and similar activities throughout every county in California and in several foreign lands. It has open admissions, optional credit and free student selection of curriculum. University Extension is a self-supporting enterprise and its offerings depend entirely on student and other user demand.

Program organization varies from campus, depending on the size of the program and the characteristics of the campus. Normally, programs have a disciplinary orientation; for example, arts and humanities, business administration, dentistry, education, engineering, health sciences, medicine, nursing, physical sciences, social sciences, and urban affairs. Statewide programs are established when there are valid reasons (e.g., when a single university unit can more effectively and economically serve the entire State).

\* Shortage specialties.

## Instructional Costs and Faculty Productivity

Tables 1 and 2 present a display of instructional cost and student credit units per faculty. The cost data reflect all state general funded costs of instruction including a pro rata share of libraries, maintenance of plant and other institutional services. Unit costs by level are derived from faculty workload by level of instruction and from student loads by level of student. Table 1 displays unit costs data for all four levels of students and reveals a significant difference in cost per unit of credit between levels. Table 2 displays student credit units per faculty according to the three levels of instruction and provides cost at each level. Interpretations of these data are only meaningful in the context of a full understanding of the differentiation of function among segments of public higher education in California and the resulting differences in educational approaches.

## II. RESEARCH

## Program Objectives and Description

The University is designated by the Donahoe Act as "... the primary State-supported academic agency for research." Its research activities, both basic and applied, contribute to the social, economic, and technological progress of the State and the nation. More specifically, the university, through its research toward the solution of complex problems facing society, enables individuals to control their environment more effectively. In addition, the research process is essential to the training of scholars in the methodology of inquiry and the nature of the creative scholarly process, especially in the advanced graduate and professional instructional programs.

A total increase of \$1,524,800 is proposed to provide support for the University's research efforts in 1980-81. An increase of \$101,000 is proposed to provide State support for the California Policy Seminar, which is a cooperative effort between the University of California and the California State Government to define long-term policy issues. An increase of \$520,000 is proposed for the California Space Institute. The Institute serves to coordinate and strengthen the University's space sciences research efforts. An increase of \$391,000 from the Energy Resources Fund is proposed to provide support for the University's energy research programs: \$250,000 for the creation of an Energy Institute which will coordinate research on the development, production, distribution and use of energy; and an increase of \$141,000 to support the University's program in Appropriate Technology, designed to expand research projects emphasizing energy from renewable sources and energy conservation. An increase of \$100,000 is proposed to provide State support for the University's Institute of Industrial Relations. Among the Institute's activities are research and policy analysis of contemporary issues in labor relations and collective bargaining in the public sector. An increase of \$375,000 is proposed to provide State support for the University's Integrated Pest Management program. The goal of IPM research is the establishment of pest control programs that are environmentally and economically appropriate and beneficial.

## III. PUBLIC SERVICE

## Program Objectives and Description

Activities funded within this function are campus public service, Cooperative Extension, the California Writing Project, the contract with the Charles R. Drew Postgraduate Medical School, and the California College of Podiatric Medicine program conducted cooperatively with the UC San Francisco School of Medicine. Included within the campus public service category are arts and lectures and a number of other programs such as services to outside agencies and community service projects.

With the exceptions of Cooperative Extension and the two health sciences programs, these activities are mainly funded from user fees and other non-State sources.

Cooperative Extension, previously known as Agricultural Extension, provides information and services to the public, particularly farmers, homemakers, youth, agriculture-related industries, and all types of private and governmental institutions. The purpose is to solve specific, often local, problems through the application of research results generated by cooperative extension or other university units. The California Writing Project is a program designed to improve the writing skills of students from elementary school through community college levels. The program offers tenured teachers in-service training in the teaching of writing skills to students. *For 1980-81, an increase of \$300,000 in State support is proposed to expand the California Writing Project by establishing 10 additional centers throughout the state in cooperation with other public educational institutions.*

*For 1980-81, an increase of \$360,000 is proposed to support a program in farm personnel management designed to meet the special needs of California agricultural employers and workers. The program will focus on personnel management principles, practices, laws and regulations, and will be coordinated with other agencies in the farm labor market.*

In 1979-80, \$2.3 million was appropriated to the University for support of a program of clinical health sciences education, research, and public service at the Charles R. Drew Postgraduate Medical School, conducted with UCLA. Programs which are specified by the act to provide the greatest public benefits are: (1) continuing education of physicians and other health professionals and consumers of health services, (2) community medicine, designed to improve the health status of the citizenry, the health care delivery system and health sciences education, (3) internship and residencies, including a family practice residency program at the Martin Luther King Hospital and other appropriate facilities and clinics, and (4) such other programs of clinical health sciences education, research, and public service as the Regents and the Charles R. Drew Postgraduate Medical School deem in the public interest, provided that the above specified programs are first funded. State funding was originally authorized by the Legislature in 1973 (Chapter 1140/73—SB 1026).

Chapter 1497/74 appropriated \$541,000 for the support of an educational program in podiatry to be operated in conjunction with the California College of Podiatric Medicine in San Francisco. The State has continued to support this program each year at its 1974-75 level of \$541,000, adjusted for inflation. *An increase of \$208,000 is included to continue the Drew and Podiatry programs at the 1979-80 levels of operation, adjusted for inflation.*

## IV. ACADEMIC SUPPORT—LIBRARIES

## Program Objectives and Description

The university libraries provide ready access to books, documents, and other scholarly materials for the university's students, faculty, staff, and faculty from other California colleges and universities. In addition, the libraries may grant borrowing privileges to any California adult. University libraries serve both instructional and research needs and thus must be diverse in nature and maintain comprehensive information about man's knowledge. The rapid expansion of knowledge requires an extensive effort to keep materials current. *Reference-circulation staff will increase by 14 FTE over the budgeted 1979-80 level due to increase in enrollment related workload.*

## Academic Support—Other

## Program Objectives and Description

General Campus Programs: Other academic support on the general campuses is comprised of a number of partially self-supporting activities organized and operated in connection with educational departments and conducted as a basic support for the departments educational programs. These supporting services contribute greatly to the quality and effectiveness of the instructional programs.

Many diversified programs are included, the largest being the demonstration of new schools (university elementary schools, nursery schools, and a psychology clinic school) which serve as interdepartmental teaching laboratories for experimentation, research and teacher training. These programs receive part of their support from state funds. The demonstration schools not only educate hundreds of children, but contribute to the advancement of education through research efforts and application of results; through development of new programs of teacher education, and dissemination of new knowledge to public schools.

Other activities include vivaria, which provide centralized facilities for ordering, receiving and care of all animals necessary for teaching and research in the biological sciences; support for arts by direct sponsorship of performances and exhibits and funding for galleries and museums; support of specialized physical science and engineering projects which are of service to academic departments and to industry, support for intercollegiate athletics at the smaller campuses, and support for professional journals.

Ancillary Support—Health Sciences: In addition to human medicine teaching hospitals, the University operates the dental clinics and neuropsychiatric institutes at Los Angeles and San Francisco, a veterinary medicine teaching facility at Davis, and an optometry clinic at Berkeley. These facilities are extensions of the health sciences schools, and provide clinical experience essential to the educational process.

Dental Clinics: The School of Dentistry and its related clinic activities at San Francisco have been an integral part of the University since 1881; the Los Angeles dental clinic was opened in 1967. The mission of both clinics is to serve as teaching laboratories where University dental students gain essential clinical experience practicing in tandem with technician trainees under the direction of licensed faculty dentists. In addition to the two on-campus dental clinics, three satellite dental clinics are operated in off-campus locations for teaching general dental care; referring the more complex cases to the on-campus dental clinics. The clinics are funded by the State and by income from patients. *An increase in State support of \$105,000 is provided to help support the operation of a satellite clinic of the San Francisco dental clinic located at San Francisco General Hospital.*

Veterinary Medicine Clinical Teaching Facility: The Veterinary Medicine Clinical Teaching Facility (VMCTF) is a specialized laboratory of the Davis School of Veterinary Medicine and provides for clinical teaching needs related to the diagnosis, treatment, prevention and control of diseases of animals. Programs are carried out at the VMCTF, vivaria, and primate center on the Davis campus, and on ranches and in other off-campus locations. Part of the operating budget for the VMCTF is derived from fees for services rendered to clients and part from state support. *Augmentation of state support by \$150,000 in 1980-81 will assist in providing the added animal patient load required for an increase in clinical student enrollment in the Davis School of Veterinary Medicine.*

Neuropsychiatric Institutes: The neuropsychiatric institutes at San Francisco (Langley-Porter Institute) and Los Angeles are the state's largest resources for training psychiatric residents and are a major training resource for social workers and related mental health professionals. These programs were transferred from the state Department of Health to the University of California on July 1, 1973. Support for the operating budget is derived from fees for services to patients and from state support. *Augmentation of state support by \$400,000 in 1980-81 for the Los Angeles neuropsychiatric institute is proposed in order to continue a clinical student training and patient service program in Geriatric Psychiatry that was started in 1977-78. With the aging of the population, there is an increasing demand for professionals in the fields of neurology, psychiatry and other mental health disciplines who are trained to treat the nervous and mental disorders of older people with the potential for reducing dependency and disability among this older age group.*

## V. TEACHING HOSPITALS

## Program Objectives and Description

The University operates five human medicine teaching hospitals located on the Los Angeles and San Francisco campuses and in the counties of Orange, Sacramento, and San Diego. These hospitals provide inpatient and ancillary diagnostic and therapeutic services and extensive outpatient ambulatory care services (both clinics and emergency services) at the hospital site. In addition, two community clinics are operated in Orange County as part of the clinical education program of the California College of Medicine at Irvine. The primary mission of these hospitals and clinics is training of new physicians and other health care professionals, plus continuing education of practicing health care professionals. By providing patient care while training

## UNIVERSITY OF CALIFORNIA—Continued

thousands of health care professionals, the teaching hospitals and clinics offer a major public service in California. Through affiliations with other clinical care centers, such as Veterans' Administration hospitals, county hospitals, and private community hospitals, University students are exposed to a full range of clinical diagnostic and therapeutic techniques.

State support at the University-operated teaching hospitals and clinics, called clinical teaching support (CTS), is provided in order to pay for the care of patients who are essential to the clinical instruction of students, but who are unable to pay for care either through third-party sponsorship or their own resources. An increase of \$500,000 in CTS for the San Diego hospital will help provide for the increase in patient workload necessitated by clinical student enrollment growth in recent years. In the 1976-77 and 1977-78 years, Sections 28.11 and 28.92, respectively, of the Budget Acts authorized a \$5 million loan for projected Medicare/Medi-Cal inpatient reimbursement shortfalls. These sections required an annual report on the status of the University's appeals to Medi-Cal and Medicare cost reimbursement limits. The University reported on the financial condition of each hospital and the status of their appeals to the Medicare and Medi-Cal programs in November, 1976. Based on this report and on additional information provided by the University at subsequent legislative hearings, an appropriation of \$4.1 million was made as a loan to the University for 1976-77 through Senate Bill 335. The University utilized \$3,187,000 of the \$4.1 million loan/appropriation for estimated 1976-77 shortfalls and the remainder was returned to the State. In 1977-78 only \$3,326,000 of the \$5 million loan authorized was made available to the University because of State fiscal problems. Final settlements with the Medicare and Medi-Cal programs cannot be made until the year-end cost reports are filed by the hospitals and audited by the fiscal intermediary and/or until final decisions are made on appeals to the limitations. The process could take as long as three years or more. If these appeals are all upheld, including the judgment against the Medi-Cal program's attempted annual fixed percentage limitation, and the fiscal intermediary audits support the costs claimed by the hospitals, sufficient funds would be available from the Medicare and Medi-Cal programs to repay a major portion of the 1976-77 and 1977-78 loans of \$6,513,000 from the State. During Fiscal Year 1978-79, \$575,000 of the \$6.5 million State loan was repaid by the University from funds derived from successful appeals. In the Budget Act of 1978, a \$3.9 million loan/appropriation was approved for estimated 1978-79 shortfalls and the University requested an allocation of \$2.1 million of these funds, but the allocation was not made by the State pending determination of the constitutionality of the lump-sum payment authorized by Senate Bill 91. Accrual of the estimated cost of the lump-sum payment was made in the financial statements of the University's hospitals in 1978-79, thereby contributing to the 1978-79 shortfalls. \$4.1 million is proposed for 1980-81 to continue the 1979-80 level, adjusted for price increase.

## VI. STUDENT SERVICES

## Program Objectives and Description

The Student Services program includes six elements: student admission and records, cultural and social activities, counseling and career guidance, financial aid administration, student health services, and supplemental educational services.

Additional state funds totaling \$583,000 are proposed. Of this amount, \$70,000 will accommodate a planned enrollment increase of 151 disabled students in 1980-81. The additional \$513,000 will provide specific educational services for former Department of Rehabilitation clients.

## VII. INSTITUTIONAL SUPPORT

## Program Objectives and Description

Activities funded within this function include planning, policy making, and coordination within the offices of the Chancellors, President, and The Regents. Also included for funding are a wide variety of supporting activities such as police, accounting, payroll, personnel, materials management, publications, and federal program administration, as well as self-supporting services such as telephones, garages, and equipment pools. *An increase of \$300,000 in State funds is proposed for this program in 1980-81 for costs related to collective bargaining, which includes support for activities such as communication and training, policy analysis, and organizing. No additional increases in State funds are requested in 1980-81 except for price increase and merit salary adjustments carried elsewhere.*

## VIII. OPERATION AND MAINTENANCE OF PLANT

## Program Objectives and Description

This function includes resources for the maintenance and preservation of the University's physical plant which comprises over 33.7 million square feet of buildings and related equipment with a current replacement value approaching \$2.9 billion (@ ENR 2990). Major component elements include utilities and refuse disposal, custodial and grounds maintenance, structural and equipment maintenance, plant administration, and fire protection (2 campuses). *The 1980-81 proposed increase of \$3,859,600 includes \$609,600 for workload related to the addition of 246,421 square feet of new building area and \$3,250,000 to finance improved service levels for building maintenance (\$2,000,000), janitorial services (\$1,000,000), and utilities operations (\$250,000) from the Energy and Resources Fund. The utility operations increase will further improve the university's efforts to reduce the consumption of energy through the development of new and improved energy systems. The aggregate General Fund increase, including employee benefits, will provide \$16,600 for plant administration, \$2,131,000 for building maintenance, \$898,000 for janitorial services, \$275,000 for utilities operations, \$276,000 for utilities purchases, \$12,000 for refuse disposal, and \$1,000 for fire protection.*

## IX. STUDENT FINANCIAL AID

## Program Objectives and Description

The University of California provides numerous financial aid opportunities for undergraduate and graduate students with financial need. During 1978-79, over 55,000 students received assistance from one or more financial aid programs administered by the University or from other agencies providing student aid at a cost of \$129.8 million. This \$129.8 million total for 1978-79 includes funds which were controlled and awarded by the University and outside aid not controlled by the University as well as student affirmative action programs.

The major sources for University-administered programs include student fees, Federal funds, and Regents' sources, including private gifts and scholarships and loan funds. In addition to the University's budgeted financial aid programs, students have alternative sources of assistance. The Federal government insures bank loans (the Federally Insured Student Loan Program—FISL), provides veterans benefits, and makes grants from the Basic Educational Opportunity Grant Program (BEOG). In addition, graduate students receive traineeships and fellowships from numerous Federal programs, and the California Student Aid Commission provides scholarships and grants directly to students. Private and outside agencies provide the remaining amounts of scholarships, grants, and loans available to University of California students.

The Student Affirmative Action Program is a comprehensive effort designed to increase the enrollment of academically qualified students from underrepresented ethnic and economic groups and to improve the quality of their educational experience once they are enrolled in the University. This program is currently supported by a combination of State General Funds and University funds. These funds are allocated to meet student financial aid costs which are shown under the student financial aid, student services and provisions for allocation functions to support outreach programs, academic support services, central administration and student aid. For 1980-81 a General Fund increase of \$2,089,000 is proposed to provide for State funding of the total 1980-81 program (\$1,889,000) and for a \$200,000 increase in the high school and community college outreach component. The university, utilizing student education fees, developed these programs to help students enter the university as regular students. It has been extended to the California State University and Colleges where it is fully State funded. On this basis, full State funding for the University program is proposed which makes these funds available for student aid.

## X. AUXILIARY ENTERPRISES

## Program Objectives and Description

Auxiliary enterprises are those noninstructional services provided to individuals, primarily students, in return for specific user charges. The organizational units providing these services, which include student housing, parking, intercollegiate athletics, food services, and various others, are largely self-supporting.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

## XI. PROVISIONS FOR ALLOCATION

## Program Objectives and Description

These budgetary provisions serve as a temporary repository for lump sum appropriations which are destined for allocation (1) from Systemwide provisions to campus provisions, and (2) campus provisions to operating programs and subprograms where expenditures will occur. The major provisions for allocation include funds for salary merit increases and promotions, academic position upgradings, staff reclassifications, price increases, employee benefits, and unallocated endowment income. These provisions are partially offset by the University budgetary target total of \$33,361,000.

A State fund increase of \$2,089,000 is proposed to provide full State funding for the University's Student Affirmative Action Programs beginning in 1980-81. An additional \$200,000 for High School and Community College Outreach is requested in 1980-81 to enable the University Partners program to provide services to those eligible students who have been Partnership Program participants, and are now moving through the program pipeline.

The 1980-81 budget also includes \$5.0 million from COFPE funds for University deferred major maintenance and special repairs to supplement \$2.0 million of University funds for urgent deferred projects included in the University's \$25.2 million deferred maintenance backlog.

## PROGRAM MAINTENANCE: FIXED COSTS AND ECONOMIC FACTORS

## Program Objectives and Description

The elements of program maintenance—fixed costs and economic factors include funds for 1) merit increases for eligible academic and staff employees, 2) price increase for utilities, library purchases, supplies, equipment, insurance and other nonsalary items, and 3) rate and enrollment-related increases in employee benefit costs. A total increase of \$39.4 million is proposed for these purposes.

## SPECIAL REGENTS' PROGRAMS

After provision for certain administrative costs, 55 percent of the Federal overhead on contracts and grants is used as part of the funding for the University's Budget for current operations; the other 45 percent supports special programs established by action of The Regents. For 1979-80, The Regents have allocated \$23,500,000 for the special Regents' programs.

Projected expenditures for special Regents' programs in 1980-81 are \$25,213,000, including interim funding for programs formerly supported from student fees.

## General Analysis

The 1980-81 budget for the general campuses focuses on programming and planning improvements to make the University's library system more effective; making existing and funded facilities operable; improvements to utilities systems; and alterations, renovations and/or remodeling of existing facilities to provide for the more effective use of existing space. In addition, a greater emphasis is being directed to the development of energy conservation programs. The funding for this program is contingent upon enactment of legislation establishing the Energy and Resources Fund in the State Treasury. It is also anticipated that preliminary plans for the Northern Regional Library Compact Shelving Facility will be completed in March of 1980. Because of the urgency to occupy this needed facility, if this date is met, the Legislature will be requested to include construction funds in the 1980-81 fiscal year. This project is considered to be of top priority by the University.

Health sciences bond funds will provide facilities which will permit increasing outputs of health sciences professionals within the capability of the \$155.9 million in construction bond funding authorized in 1972, supplemented by assured Federal matching grants. Supplemental funds may be required over the next several years from State funds in recognition of essential life safety requirements not contemplated in the original bond program.

## Objectives

The University of California is a statewide institution of higher education with the following major functions:

## 1. Instruction:

- Broadly based instruction leading to the baccalaureate degree,
- Graduate programs leading to master's degrees and doctoral degrees, and programs of postdoctoral instruction,
- Instruction in professional fields,
- Programs for the preparation of teachers, and
- Joint doctoral programs with the State university and colleges.

## 2. Research:

The University is designated by the Master Plan for Higher Education in California as the primary State-supported academic agency for research, both basic and applied, and as the primary public repository for scarce documents and other unique library resources needed for the doctor's degree and for research programs.

## 3. Public Service:

Provide public service in areas related to the University's programs of instruction and research.

## Universitywide—General Campuses

## MAJOR PROJECTS

Project programming and preliminary plans .....	\$150,000 <sup>8P</sup>	\$150,000 <sup>8P</sup>	\$250,000 <sup>8P</sup>
These funds are to be used for 1981-82 projects not large enough to warrant a line item appropriation for this purpose, and for the development of cost/benefit analysis of planning alternatives for projects in the 1981-82 capital outlay program.			
Engineering and environmental planning studies .....	65,000 <sup>8P</sup>	50,000 <sup>8P</sup>	50,000 <sup>8P</sup>
These funds are to be used for the preparation of engineering and environmental studies, which are necessary to the development of a sound capital outlay program.			
Seismic safety studies—general and advance planning studies of seismic safety in University facilities .....	-	-	500,000 <sup>8P</sup>
Northern regional library compact shelving facility—develop an environmental impact report, preliminary plans and working drawings for the northern regional library compact shelving facility .....	-	147,000 <sup>8P</sup>	500,000 <sup>8W</sup>
Southern regional library compact shelving facility—develop an environmental impact report and preliminary plans for a southern regional library compact shelving facility .....	-	-	65,000 <sup>8EIR</sup> 316,000 <sup>8P</sup> 758,000 <sup>8PWC</sup>
Energy Conservation Projects .....	-	-	-
These funds are to be used for the preparation of planning documentations, working drawings and one construction project at the following campuses:			
1) Berkeley Campus:			
Planning funds for the ventilation Energy Conservation,			
Planning funds for campus energy conservation, (air circulation).			
2) San Diego Campus:			
Planning funds for energy conservation improvements, Step 2.			
Planning funds for conservation measures relating to exterior lighting systems.			
3) San Francisco Campus:			
Preliminary plans and working drawings for energy conservation, Step 1.			
Planning funds for energy conservation, Step 2.			
4) Santa Barbara Campus:			
Planning funds for energy conservation, Step 4.			
5) Santa Cruz Campus:			
Preliminary plans, working drawings and construction funds for energy conservation, Step 1.			
Totals, Major Projects .....	\$215,000	\$347,000	\$2,439,000

## HASTINGS COLLEGE OF LAW

### University of California

The law school was founded in 1878 by Serranus Clinton Hastings, the first Chief Justice of the Supreme Court of the State of California. On March 26, 1878, the Legislature provided for affiliation with the University of California. The college board of directors has the primary responsibility through its executive officers for the administration of all affairs of the institution. The Chief Justice of the Supreme Court of the State of California is president of the board of directors, which is composed of eight members. The juris doctor degree is granted signed by the president of the University.

The overall objectives of the college are:

1. To provide students a top quality education so that they will become experts in the use of the tools of their craft, and thus achieve a high level of professional competency.
2. To provide the legal profession with promising young men and women who can meet the needs of an increasingly interrelated and interdependent society and be prepared for the various private and public roles performed by the legal profession.
3. To ensure that its graduates are sensitive to the problems of the administration of justice, have an appreciation of the technological-social-economic context in which legal institutions are shaped, and understand the responsibilities of the law as a means of deliberate change.

To accomplish the objective of providing a top quality education, the college has adopted a faculty recruitment policy which has resulted in the acquiring of a distinguished group of senior professors known as the 'Sixty-five Club.' Since 1940, the college has deliberately sought out members of other prestigious law school faculties who, after achieving national reputations as legal scholars and teachers, have reached the customary retirement age. These men have brought the advantage of a broad perspective of experience in their chosen field, and the instructional skills unmatched by any law school in the nation. In addition, adjunct faculty (comprised of outstanding legal specialists in specific fields of practice in the San Francisco Bay Area), administrative faculty (dean, vice dean and registrar, director of clinical programs, director of legal writing and research, and law librarian), and other regular faculty under the age of 65 provide instruction to Hastings' students. In 1980-81, it is planned to continue the enrollment level of 1,500 students.

### I. INSTRUCTION PROGRAM

#### Program Objectives and Description

The principal objectives are:

1. Develop in the students the required competency in substantive law demanded by the legal profession.
2. Develop students' skills in research and writing.
3. Provide students with an adequate background in the law through the study of comparative law, legal history, and jurisprudence.
4. Instill in students, through theory-practice clinical courses, a level of professional competence and skill that will shorten the period of training in the law office.
5. Develop special skills in advocacy for trial lawyers.

The instruction program is designed to provide thorough and systematic instruction in those branches of the law which will best prepare students for their responsibilities to the community as members of the legal profession. It is composed of two elements including the classroom and theory-practice. Through these elements it is planned that the student will receive a combination of theoretical instruction, practical experience, and specialized training as trial lawyers.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## a. Classroom

In this element, students receive top quality instruction in classroom seminar, lecture, and discussion sessions which are conducted by a professionally qualified group of regular faculty members supplemented by an adjunct faculty comprised of outstanding legal specialists in special fields of practice.

*It is proposed that faculty strength be increased by four members. Two clerical support positions are proposed to provide secretarial assistance to all faculty. These changes reflect recommendations made by the Accreditation Committee of the American Bar Association.*

Staff.....	12.1	13.4	15.4			
Student assistants.....	2.8	4.5	4.5			

## b. Theory-Practice

In this element, students receive training and insights in the skills of courtroom and office practice. This includes practical experience in preparation and conduct of trials including brief and oral arguments before the court. The experience assists the students in achieving proficiency in preparation and trial of civil cases, appellate procedures, and legal medicine. The following activities are examples of this involvement:

1. All second-year students, except those eligible and who elect to work on the Hastings Law Journal or the Constitutional Law Quarterly, are required to participate in the largest and most comprehensive moot court experience in the country. The course is operated under supervision of the director of Moot Court with the assistance of a student moot court board. This board selects and edits cases involving controversial issues which are assigned to the students. Two students, working as a team, brief and argue their assigned case. Oral presentation of argument is held and prominent members of the judiciary, practicing attorneys, and selected students serve as judges.

2. A substantial number of students elect the trial practice course where the emphasis is on demonstrative evidence, jury selection, opening statements, examination of witnesses, or direct cross-examination and argument.

3. Third-year students who have achieved a cumulative average of at least 74 percent for two years are permitted to enroll in the legal clinic seminar for firsthand experience with actual cases, interviewing clients, gathering facts, interviewing witnesses, and preparing the case for trial. This is done through a volunteer-participation program including legal aid, public defender's office, district attorneys, private attorneys, and many others.

## HASTINGS COLLEGE OF LAW—Continued

## II. PUBLIC SERVICE PROGRAM

## Trial and Appellate Advocacy

## Program Objectives and Description

The trial and appellate advocacy program is designed to provide specialized training to lawyers, legal educators, and judges through short-term intensified courses. It is estimated that 390 attorneys will be registrants in 1980-81, the same level as in 1979-80. In addition, an estimated 250 attorneys will register for the criminal justice advocacy program which was initiated in 1977-78. Both programs are entirely self-supporting.

An augmentation of \$30,000 is proposed to add a data processing capability to this program.

Reimbursements .....				162,467	189,689	230,318

## III. INSTRUCTIONAL SUPPORT PROGRAM

## Program Objectives and Description

The principal objectives are:

1. Provide reference material so that students and faculty members can prepare for various aspects in the learning and teaching of law.
2. Provide students and faculty members with a current publication of recent developments in the changing laws.

Students and faculty members need reference material for various preparations and presentations in the legal education process and need to be kept informed of current developments in the changing aspects of the law. The instructional support program is composed of the library and scholarly publications elements and ensures that student and faculty members will have the use of reference material and will be kept informed, with members of the bench and bar, of current developments through the preparation and publication of the scholarly publications.

## a. Law Library

In the law library, provision is made to maintain a carefully selected collection of legal reference material sufficient in number and scope to allow students and faculty members to research questions of law in preparation for classroom presentations and assignments, and for moot court, trial practice, and legal clinic assignments. At the present time, Hastings Law Library consists of approximately 130,000 volumes. Budgeted acquisitions add to this at the approximate rate of 10,000 volumes per year. The library is open 102 hours per week to maximize the availability of reference material.

Two librarian positions are proposed in the budget to provide professional services on nights and weekends. In addition, these positions will be needed for workload associated with the expanded library facilities provided in the new Academic Facilities Building.

Student assistant .....	3.9	4.7	4.7			

## HASTINGS COLLEGE OF LAW—Continued

## b. Scholarly Publications

In this portion of the budget, provision is made to keep students, graduates, and members of the bench and bar informed of current developments in the law and problems related to the legal profession. This is accomplished by preparing two scholarly publications including the Hastings Law Journal six times a year and the Hastings Constitutional Law Quarterly four times a year.

The Law Journal is devoted to in-depth analysis and discussion of significant legal problems and the Constitutional Law Quarterly concentrates on the constitutional legal aspects of the problems. The articles range from exhaustive discussion by eminent scholars and members of the legal profession to notes and comments by students on recent development in the law. Students selected to participate in the work of these publications find it a rewarding and valuable educational experience. Approximately 100 will participate in the Law Journal and 80 in the Constitutional Law Quarterly. The benefits of this experience are realized not only during the formal legal education, but also are apparent in the advantage the student has when seeking a position after graduation. *The two new scholarly publications Comment and International Law Review authorized in 1979-80 will be continued in the budget year.*

## IV. STUDENT SERVICE PROGRAM

## Program Objectives and Description

The principal objectives are:

1. Provide comprehensive student health services involving both on-campus treatment by a doctor and nurse, and more extensive medical attention at the University of California Medical Center.

2. Provide supportive financial aid and counseling through loans (federal, State, private), scholarships, grants-in-aid, special grants based upon financial hardship, and the student pay-work study portion of the program to assist students in meeting their financial needs.

3. Provide employment for second- and third-year students in various private and public law offices and agencies on a part-time basis during the academic year.

4. Provide comprehensive placement services for graduating students.

The student service program is composed of three elements: health services, financial aid, and placement. Through these functions, the students are provided with services to assist in maintaining good health and necessary financial assistance to complete the instruction program. Placement services are available in order to realize the full benefits from a legal education.

d. Admissions .....	4	4	4	54,894	76,205	77,523

## a. Student Health Services

The student health service provides on-campus dispensary care including services of a nurse and physician four hours a day, five days a week. Emergency care and hospitalization if required are provided at the San Francisco Medical Center, University of California. The basis for the medical service is an agreement between the medical center and the college.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$180,248	\$206,847	\$219,258

## b. Student Financial Aid

The financial aid office is responsible for planning, developing, and providing financial assistance for students who would not be given the opportunity for legal education without additional resources. The functions of the office are divided into four groups: (1) information dissemination and applications processing, (2) need analysis and award distribution, (3) financial, loan, and work counseling, and (4) reports and program development.

All financial aid applicants are required to file the college scholarship service "Graduate and Professional Students' Financial Statement" which gathers, processes, and evaluates information concerning family and student assets and liabilities. These statements combined with student interviews determine the type and amount of financial aid for which the applicant is eligible. The financial aid office also assists students in the securing of financial resources from external programs.

*Full funding is proposed for the LEOP bar examination preparation grants. It is estimated that these fees will total \$465 in 1980-81.*

## c. Student Placement

The extensive placement program serves three functions: providing on-campus interviews with firms, legal departments of public agencies and corporations, and various branches of the judiciary; providing, through its summer observation program, law practice experience during the summer months for the second-year students; and fitting students into part-time employment with law firms, government agencies, public law offices, the judiciary and special poverty law office programs that will provide not only valuable law experience but ensure some financial remuneration enabling the student to continue school.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	3.3	3.3	3.3	\$53,682	\$55,817	\$56,425

## d. Admissions

Students are accepted through a screening process so that students most highly qualified and with the greatest aptitude for the law are accepted. Special attention is devoted to student applicants under the legal education opportunity program. Selection is based on the applicants undergraduate record, the law school admission test score and other information submitted.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures .....	4	4	4	\$54,894	\$76,205	\$77,523

## V. INSTITUTIONAL SUPPORT PROGRAM

## Program Objectives and Description

The principal objectives are:

1. Provide active leadership in meeting current administrative problems.
2. To provide management with fiscal information on resources used in relation to resources available and to provide business services.
3. Provide a reasonable selection system for accepting students.
4. Provide for maintenance of student records.
5. To maintain physical plant facilities and provide security to permit operations of the programs.
6. To foster a continuing relationship between the alumni and the college including the involvement of alumni in campus community affairs.

This program is carried out through the activities of executive management, business services, registrar, admissions, facilities operation, and community relations' offices.

<sup>1</sup> Includes \$75,555 in State matching funds.

## a. Executive Management

Administration of the college is the responsibility of the dean and his chief administrators including a vice dean and registrar, one associate and two assistant deans. The dean and the registrar are, by statute, the officers of the college. The dean serves as chief executive officer and the registrar serves as secretary to the board of directors. Administrative responsibility includes fiscal management and planning, coordination of instructional programs, curriculum planning, personnel management, development of new instructional and theory-practice programs, public relations, supervision and development of physical plant operations, alumni promotion, and fund development.

Expenditures.....	14.7	14.8	14.8	\$828,124	\$1,097,660	\$1,186,799
Totals, Executive Management .....	14.7	14.8	14.8	\$828,124	\$1,097,660	\$1,186,799

## b. Business Services

The various services include accounting, budgeting, cashiering, contract preparation, mail, personnel, unemployment insurance, purchasing, and supplies.

*An accounting technician position is proposed for workload needs in the accounting office.*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	16	17	17	\$293,679	\$311,425	\$313,614

Totals, Personnel .....	3	4.5	7.5	\$121,539	\$142,550	\$193,619

## d. Registrar

The registrar is responsible for all records held by Hastings College of Law, including all student records and statistical information. Records describe each individual student: his or her academic achievement, personal data, placement, medical, financial (loan and scholarship), honors, law journal, etc. As such, they are an integral part of the official 'picture' of each individual student, and become a part of the permanent record of each student.

*A clerical position is proposed for workload needs in the records office.*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	1	2	2	\$60,765	\$61,890	\$63,522
Workload adjustments.....	-	-	1	-	-	15,324
Totals, Registrar .....	1	2	3	\$60,765	\$61,890	\$78,846

## e. Facilities Operation

Daily housekeeping maintenance of the physical plant, security, and preservation of order in the college area are provided in facilities operation in order to maintain the quality of the physical environment.

*A major increase of \$335,834 is proposed in this activity to provide for the workload needs associated with the occupancy of the new Academic Facilities Building. This proposed increase includes 7 janitors and a building maintenance worker and \$146,425 of one-time expenditures (moving, \$123,225; communication equipment, \$16,000 and equipment, \$7,200).*

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	21.9	22.5	22.5	\$629,094	\$645,711	\$410,205

Totals, Facilities Operation.....	21.9	22.5	30.5	\$629,094	\$645,711	\$746,039

## HASTINGS COLLEGE OF LAW—Continued

## f. Community Relations

The Office of Community Relations includes the functions to carry out the responsibility for the general development and fund raising for the college. These responsibilities include preparing and issuing all press releases on law school activities and faculty members and coordinating special programs jointly sponsored by the law school and external entities on both a local and national basis. This office also maintains all alumni association records and files for over 6,100 alumni; issues an alumni bulletin three times a year and an alumni directory biannually; and plans special events for alumni, students, and members of the legal community.

Input	78-79	79-80	80-81	1978-79	1979-80	1980-81
Expenditures.....	5.3	6	6	\$84,840	\$85,030	\$85,680

STATE BUILDING PROGRAM  
EXPENDITURES

Actual 1978-79	Estimated 1979-80	Proposed 1980-81
-------------------	----------------------	---------------------

The law school was founded in 1878 by Serranus Clinton Hastings, the first Chief Justice of the State of California. In this same year, the Legislature provided for affiliation with the University of California. The college board of directors has the primary responsibility through its executive officers, for the administration of all affairs of the institution. The Chief Justice of the Supreme Court of the State of California is president of the board of directors, which is composed of eight members. The juris doctor degree is granted to the graduate of Hastings College of Law by the faculty of the University of California and signed by the President of the University.

The overall objectives of the college are: 1. To provide students a top quality education so that they will become experts in the field of law, and thus be able to achieve a high level of professional competency. 2. To provide the legal profession with promising young men and women who can meet the needs of an increasingly interrelated and interdependent society. 3. To ensure that its graduates are sensitive to the problems of the administration of justice, have an appreciation of the technological-social-economic context in which legal institutions are shaped, and understand the responsibilities of the law as a means of deliberate change.

To accomplish the objectives, Hastings Master Plan for Long Range Development proposes the creation of a physical environment to house the Hastings Law Center.

The buildings include an Academic Facilities Building, a Services Element providing Student and Faculty Commons plus recreation space, and a community legal center providing space for law-related public and private groups and community services. The latter two projects will be financed through federal funds PWEA, Title I and nonstate funds respectively.

Hastings College of Law is now located in the San Francisco Civic Center on the west end of the block bounded by McAllister and Hyde Streets, just north of the old Federal Office Building. The College has received budget funds for an Academic Facilities Building addition just west of the present facilities on the south portion of the Civic Center block bounded by the City's Main Library on the south, the State Building across Larkin Street on the west and the Federal Court Building on the northwest on Golden Gate Avenue.

The 1979-80 Capital Outlay program appropriated \$41,000 for preliminary plans and working drawings for an alteration project to the existing facilities. During 1980-81, the College plans to complete alterations to the existing building, to coordinate its facilities with those of the new building, which is to be completed about June 1980. The cost is estimated at \$612,000 for construction and \$60,000 for equipment. In addition, \$104,000 is being proposed to fund the final equipment to make the academic facilities building operable.

# THE CALIFORNIA STATE UNIVERSITY AND COLLEGES

## Introduction

The individual California State Colleges were brought together as a system by the Donahue Higher Education Act of 1960. In 1972, the system became the California State University and Colleges (CSUC), and since then 16 of the 19 campuses have received the title of "university".

The oldest campus, San Jose State University, was founded in 1857 and became the first institution of public higher education in California. The newest campus, California State College, Bakersfield, began instruction in 1970.

Responsibility for the California State University and Colleges is vested in the Board of Trustees, whose members are appointed by the Governor. The trustees appoint the Chancellor, who is the chief executive officer of the system, and the presidents, who are the chief executive officers on the respective campuses.

The Trustees, the Chancellor, and the presidents develop systemwide policy, with actual implementation at the campus level taking place through broadly based consultative procedures. The Academic Senate of the California State University and Colleges, made up of elected representatives of the faculty from each campus, recommends academic policy to the Board of Trustees through the Chancellor.

Academic excellence has been achieved by the California State University and Colleges through a distinguished faculty, whose primary responsibility is superior teaching. While each campus in the system has its own unique geographic and curricular character, all campuses, as multipurpose institutions, offer undergraduate and graduate instruction for professional and occupational goals as well as broad liberal education programs. Each campus requires, for graduation, a basic program of "general education—breadth requirements" regardless of the type of bachelor's degree or major field selected by the student. A limited number of doctoral degrees are offered jointly with the University of California and with Claremont Graduate School.

Presently, under the system's "new approaches to higher education," the campuses are implementing a wide variety of innovative programs to meet the changing needs of students and society. Examples of pilot programs currently authorized are instructional television projects, minicourses, and credit-by-examination.

The program objectives of the California State University and Colleges are:

1. To provide instruction in the liberal arts and sciences, the professions, applied fields which require more than two years of college education, and teacher education—both for undergraduate students and graduate students through the master's degree.

2. To conduct research to the extent that it is consistent with the primary function of The California State University and Colleges.

3. To provide public services to the people of the State of California.

4. To provide services to students enrolled in the California State University and Colleges.

5. To provide institutional services to support the primary functions of instruction, research, public services, and student services in the California State University and Colleges and to ensure that legal obligations related to executive and business affairs are met.

The locations of the 19 campuses show the statewide coverage of this, one of the largest baccalaureate degree higher education systems in the nation.

<sup>1</sup> Programs I, IV, V, and VI are partially nonstate funded; programs II, III, VII, and VIII are fully self-supporting.

<sup>2</sup> This summary includes expenditures, but not personnel years for auxiliary organizations and foundations. For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

## 1980-81 Expenditure Plan

The budget for 1980-81 proposes an overall General Fund expenditure of \$852,608,561 which represents a \$31,134,090 increase (3.8 percent) over the 1979-80 operating budget. Funds have not been included for salary increases.

## SIGNIFICANT PROGRAM CHANGES

The following table identifies the more significant budgetary changes included in the 1980-81 Governor's Budget for CSUC:

Highlights of the 1980-81 Governor's Budget  
for the California State University and Colleges

Enrollment Increase .....	\$2,403,796
New Program Development and Evaluation .....	224,746
Student-Faculty Ratio and Student Demand Changes .....	3,597,072
Library Acquisitions .....	1,229,419
Special Repairs and Deferred Maintenance .....	5,964,448
Student Affirmative Action .....	1,050,000
Collective Bargaining .....	300,000
Disabled Students .....	573,810
Instructional Computing Coordinators .....	200,000
Field Work Coordinators (Student Placements) .....	100,000

## Enrollment Increase

The 1980-81 budget reflects an enrollment projection of 230,750 which represents an increase of 1,400 Full-Time Equivalent (FTE) students over the 1979-80 budgeted level of 229,350. This projection reflects higher fall enrollments than originally anticipated on 13 of the 19 campuses. The increase of 1,400 FTE over the budgeted level will result in the addition of 116.5 personnel years systemwide and will require an additional \$2,403,796.

## New Program Development and Evaluation

In 1980-81 an additional \$224,746 is being provided for this program, the goal of which is to develop and establish new and more effective ways of teaching and learning. These additional funds are primarily to address the particular needs of minorities and women.

## Student-Faculty Ratio and Student Demand Changes

In 1980-81 funds are being provided to reduce the student-faculty ratio at CSUC to 17.7 to 1. This is the result of Administration desires to bring the ratio more in line with historic levels of 17.8 to 1 and the operation of a formula based upon student demand at CSUC. The interaction of these two elements results in a student-faculty ratio of 17.7 to 1. Establishment of this ratio by itself would cost \$5,013,209. The change in student demand, however, is estimated to result in a savings of \$1,416,137. The net result is that a ratio of 17.7 to 1 can be established for an increase of \$3,597,072 which is proposed for 1980-81.

## Library Acquisitions

In 1980-81 \$1,229,419 is being provided to CSUC to increase the annual library volume acquisition by 26,200 volumes to a new acquisition rate of 491,400. These funds provide for the purchase of the additional volumes as well as 26.2 temporary help positions to process these volumes.

# THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

## Special Repairs and Deferred Maintenance

This budget contains \$5,964,448 to fund special repair and deferred maintenance projects on the various CSUC campuses. \$2,964,448 is provided from the General Fund to cover phase one of a program submitted by CSUC. \$3,000,000 is provided from the Capital Outlay Fund for Public Higher Education to finance phase two of the program and these funds are proposed to be appropriated for a two year period.

## Student Affirmative Action

To expand support for this program at CSUC, an additional \$1,050,000 is provided in 1980-81 for student affirmative action programs. These funds are to develop core programs, emphasizing outreach, retention and counselor/teacher preparation, on all campuses. \$50,000 of these funds are to be used for the evaluation of these programs.

## Collective Bargaining

The 1980-81 Governor's Budget includes an additional \$300,000 to provide for the increasing workload resulting from the implementation of the collective bargaining law. These funds will help the system and the individual campuses respond to this workload.

## Disabled Students

CSUC estimates the need to serve 4,464 disabled students in 1980-81. The budget provides \$2,075,760, or \$465 per student, for this purpose.

## Instructional Computing Coordinators

This budget contains \$200,000 to expand the use of instructional computing coordinators from the presently authorized three campuses to a total of nine. These coordinators assist both faculty and students on the proper use of computers in the instructional programs of various disciplines.

## Field Work Coordinators

The 1980-81 Governor's Budget provides \$100,000 for the establishment and evaluation of a pilot program for field work coordinators on two-three CSUC campuses. These coordinators will work in those degree programs which require or offer field work experiences.

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—*Continued*

## I. INSTRUCTION

## Program Objectives and Description

The California State University and Colleges (CSUC) educational program is designed to educate and grant degrees, credentials, or certificates to qualified students in the liberal arts and sciences, and certain applied fields and professions. Through regular classroom efforts and special supplemental programs, the CSUC program attempts to prepare students for a profession, occupation, or advanced study, or to update knowledge and upgrade skills. Although teaching activity may take place in other programs (e.g., the academic support program), formal study for credit toward a degree or certificate at higher education institutions usually falls within the instruction program.

Currently, the instruction program consists of three subprograms: regular instruction, special session instruction, and extension instruction.

Table II displays the changes in FTE and head count students on each campus for the past, current, and budget years. Table III provides similar information for other instruction program components: special (summer) session instruction and extension instruction under the title Continuing Education.

c. Extension Instruction .....	243	183.4	191.8	4,489,979	3,292,058	3,581,695

## a. Regular Instruction

The primary function of the California State University and Colleges is the instruction of undergraduate and graduate students, through the master's degree level, in the liberal arts and sciences, applied fields, and certain professions. The regular instruction subprogram includes those instructional programs operating during the academic year that are part of a formal degree or certificate curriculum and are managed by the regular academic departments. Table IV displays the distribution of undergraduate and graduate FTE students within the various academic disciplines. *The Governor's Budget reflects an increase of \$224,746 for New Program Development and \$100,000 for a pilot program to fund field work coordinators at two or three campuses.*

<sup>2</sup> Projected

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—*Continued*

Academic planning is carried out on each CSUC campus via a formalized process designed to ensure the availability of appropriate instructional resources. These include faculty, technical, clerical, and administrative personnel; facilities; equipment, operating supplies and materials, libraries and other services, carried out by the teaching faculty and department chairpersons as part of the ongoing instruction program. A faculty advisor assists students in planning their academic programs and acquaints them with the various education requirements for a degree.

The instructional programs on the Humboldt, Los Angeles, Hayward, Pomona, San Luis Obispo, San Bernardino, Dominguez Hills, and Bakersfield campuses are offered with instruction on the quarter system. Instruction is provided on a semester basis at the other CSUC institutions except Stanislaus which operates on a 4-1-4 term basis. The Los Angeles, San Luis Obispo, Hayward, and Pomona campuses are year-round operations, with a state-supported summer quarter.

All curricular offerings are based on the Master Curricular Plan for The California State University and Colleges and are formally expressed in an academic master plan for each campus. The Chancellor may approve the establishment of new academic programs when such programs have been projected in an academic master plan previously approved for that campus by the Board of Trustees. These programs are subject to review by the California Postsecondary Education Commission.

In 1978-79, the California State University and Colleges awarded approximately 53 percent of the bachelor's degrees and 33 percent of the master's degrees granted in California. More than 231 different baccalaureate and/or master's degrees are offered in broad discipline areas. Table V displays the number of baccalaureate and master's degrees conferred over the past six years through 1978-79.

Table V  
Recent History of Undergraduate and Graduate Degrees Conferred 1972-73—1978-79

Year	Undergraduate degrees	Graduate degrees	Total
1972-73	46,669	8,284	54,953
1973-74	48,018	8,708	56,726

1978-79 <sup>1</sup>	41,300	9,650	50,950

<sup>1</sup> Estimated

## 1980-81 Regular Instruction Program

This budget includes funding for 13,034.2 faculty positions in 1980-81. This is an increase of 115.6 faculty positions above the 1979-80 level of 12,918.6, which includes 107.5 faculty positions provided through special legislation (Chapter 1176, Statutes of 1979). This increase is attributable to an increase in enrollment, an offsetting decrease in positions required due to a shift in student demand into lower cost programs, and a proposed reduction in the student-faculty ratio.

Instruction of students by the budgeted faculty will require a systemwide per term productivity of 266 student credit units per full-time equivalent faculty (SCU/FTEF), which is equivalent to the student faculty ratio of 17.7 to 1. This productivity goal will require an average faculty workload of slightly more than 12 units per term including faculty units earned for the supervision of independent study.

TABLE VI  
Faculty Productivity by Campus

	Reported 1978-79	Estimated <sup>1</sup> 1979-80	Estimated <sup>2</sup> 1980-81

<sup>1</sup> Includes supplementary faculty allocation pursuant to AB 1173 (Chapter 1176, Statutes of 1979).

"Unit Cost" is a variable that captures the influence of class size, faculty productivity, and other critical instructional factors.

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—*Continued*a. Regular Instruction (*Continued*)

Input	1978-79	1979-80	1980-81
Expenditures .....	\$447,327,250	\$530,764,705	\$542,404,851
Personnel years .....	18,332.3	17,283.2	17,468.4

## b. Special Session Instruction

The California State University and Colleges operates summer sessions on all campuses except for the Pomona campus. (The Pomona campus is one of four campuses offering a state-supported summer quarter.) The special session instruction subprogram includes all programs that offer residence credit toward a formal degree or certificate. This is an essentially self-supported institutional term. Special Session Instruction and Extension Instruction (below) together form the continuing education instruction program. Table III displays total continuing education full-time equivalent students and enrollments.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$6,241,666	\$5,132,390	\$5,561,139
Personnel years .....	450.7	374.7	405.8

## c. Extension Instruction

Extension instruction, primarily a nonstate-supported function and designed to serve a variety of needs, is offered year-round by the California State University and Colleges. Within the field of continuing education, teacher education provides access for teachers to new techniques to improve instructional expertise. Courses are concentrated at the upper-division and graduate levels and are designed to satisfy school district and state credential requirements. The extension instruction subprogram includes all program elements that are managed separately by an extension division or similar agency within the system.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$4,489,979	\$3,292,058	\$3,581,695
Personnel years .....	243	183.4	191.8

## II. RESEARCH

## Program Objectives and Description

Governmental agencies, business, industry, and various other groups require research assistance. Generally, research is authorized in the CSUC when problems are within the competence of the faculty; when adequate financing can be provided for facilities, staff, and equipment; when students are involved and receive stipends or salaries; and when the projects will make classroom instruction more effective. Currently, no General Funds are authorized for this activity.

The research program consists of all those research elements commissioned by an agency external to the institution or by an organizational unit within the institution. This program contains only those research projects awarded directly to the campus and does not include foundation projects. This program also contains the academic department research activity that has been created as a result of a contract, grant, or specific allocation of resources to conduct a study or investigation of a specific scope. These projects normally are of a more temporary nature than those undertaken in formal research organizations.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs .....	4.7	6	5.1	\$58,477	\$111,695	\$77,782
Reimbursements .....	4.7	6	5.1	58,477	111,695	77,782

## III. PUBLIC SERVICE

## Program Objectives and Description

The public service program contains all the program elements within the institution that are directed toward the benefit of the general public. Programs that are controlled or operated by outside agencies but are housed or otherwise supported by the institution fall within the public service program. Currently, the only General Funds authorized for public service program activities are to cover the instructionally related activities at the educational television station at San Diego State University.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

Reimbursements .....	—	16	16	531,211	442,751	458,302

## IV. ACADEMIC SUPPORT

## Program Objectives and Description

The academic support program provides the library, audiovisual, data processing, and ancillary (e.g., college farms, marine science facilities) activities that are required to display, retain, and preserve materials and in other ways to assist the academic functions of the system.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81
Continuing program costs .....	2,995.1	2,942.9	3,031.1	\$77,356,152	\$95,097,829	\$104,693,495
General Fund .....	2,988.7	2,936.5	3,024.9	76,898,516	94,543,222	104,132,963

d. Ancillary support .....	430.8	370.3	385.2	10,080,626	10,240,423	11,030,580

## a. Libraries

Library services consist of all activities which directly support the libraries of the 19 CSUC campuses. The libraries provide the bibliographic and informational resources necessary to help carry out the teaching and research functions of the CSUC. The expenditures required to support the library system include:

1. Collection purchasing, processing (including cataloging and classifying), preserving, and exhibiting library materials which include: books, periodicals, kits, models, microforms, art objects, and a host of other items which comprise today's academic library.
2. Services—reference and referral services to students, faculty, and other system users, including institutions, i.e., interlibrary loans and other resource sharing.

3. Operations—management, supervision, training, planning, and equipment maintenance. The system operates a library at each of the 19 campuses.

Table IX  
Library Volume Activity

	1978-79	Estimated 1979-80	Estimated 1980-81
Annual Collection Change			
Volumes Budgeted .....	439,000	465,200	491,400
Volumes Withdrawn .....	70,459	70,000	70,000
Volumes added by Purchase .....	423,304	465,200	491,400
Total Volumes Held Systemwide			
Countable Total .....	9,182,204	9,577,404	9,998,804
Actual Total .....	9,691,645	10,086,845	10,508,245

Expenditures in this program element relate to the acquisition and processing of books, periodicals, and a variety of other book related materials (e.g., microfilm, microfiche, documents, etc.) maintenance of current holdings and card catalogs; services to individual students, faculty members, and other library clients; interlibrary loans; and supervision of these activities. *An increase of \$1,229,419 is included to increase the annual volume acquisition rate by 26,200 volumes.*

In addition to the regular library activities, CSUC is engaged in a major developmental program known as the Library Development Program. This project when completed, through the utilization of advanced EDP techniques and equipment, will provide a system that will result in better utilization of existing library holdings, provide for a system of cooperative acquisition and processing of books, reduce low-use or obsolete material and enhance interlibrary borrowing. Circulation control transactors are installed at CSU, Sacramento and CSU, Los Angeles and are operational. Additional transactors will be installed at six campuses in 1980-81.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$39,186,236	\$49,469,641	\$55,180,382
Personnel years .....	1,646.5	1,645.1	1,694.8

## b. Audiovisual Services

Audiovisual services include activities associated with providing these materials to support the primary programs of instruction, research, and public service. The scope of audiovisual services includes utilization, materials preparation, and technical services.

The use of instructional television by The California State University and Colleges has long been a matter of interest and concern. In January 1965, the trustees adopted a resolution which established policy guidelines for its orderly development. This resolution recognized the use of television as important means for making the instructional process more productive and efficient.

Television is being used in some form at nearly all of the CSUC campuses in a variety of applications and for professional curricula in broadcasting.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$8,895,728	\$10,214,371	\$10,657,664
Personnel years .....	397	386.2	390.9

## c. Computing Support

Although support to instruction is the principal responsibility of this element, funds are included to support both academic and administrative computing activities. Students are the largest users of CSUC computing facilities. Computer support for instruction takes two forms: (1) training in computer and information sciences; and (2) using the computer as a tool for instruction and research in a number of academic programs.

The demand for specialists in computing technologies affords The California State University and Colleges full opportunity to offer curricular programs in computer and information sciences at selected institutions serving large geographic areas. The goal of computing programs is to produce individuals both at the undergraduate and graduate level sufficiently competent in computer technology to meet the demand in this field.

Instruction in other areas further increases demand for computer time. Access is essential in the fields of business, engineering, and mathematics and is becoming a prerequisite for architecture, biological sciences, physical sciences, and social sciences.

Recognizing that computer support increases the quality of instruction in all fields, and that a significant number of students need some knowledge of computing in order to enter a variety of occupations, CSUC campuses will continue to provide exposure to the largest possible number of students. The goal of instructional usage in CSUC is to make students especially knowledgeable in the use of modern information systems technology. *This budget proposes \$200,000 to provide instructional computing coordinators at six campuses. In addition the budget proposes an increase of \$1,026,520 in 1980-81 for continuation of the project to replace batch computer equipment. This is the second year of a multi-year batch replacement project.*

## THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

Input	1978-79	1979-80	1980-81
Expenditures .....	\$19,193,562	\$25,173,394	\$27,824,869
Personnel years .....	520.8	541.3	560.2

## d. Ancillary Support

Certain professional instructional programs are much more effective when there are facilities for practical application of the principles taught in the classroom. There are several clinics, bureaus, centers and institutes that provide for such practical experience. There are nursery schools at San Diego and San Francisco; campus farms at Fresno, Chico, San Luis Obispo, and Pomona, operated in conjunction with campus agricultural instructional programs; a program at Northridge for education of the deaf; a Medical Technology program at San Francisco; a natural resource and fisheries facilities at Humboldt; and a Desert Studies Center that is located near Baker, California and administered by CSC, San Bernardino. In addition, at Humboldt there are three programs that are responsive to the needs of the Indian community in Humboldt County.

The costs of these ancillary facilities are a direct result of the enrollment in the professional curricula involved. In this subprogram are accumulated those academic support expenditures that are not appropriately classified in other subprograms. This budget also makes provision for the continuation of Joint Doctoral Programs at three campuses (Los Angeles, San Diego, and San Francisco); the Master of Social Work program at five campuses (San Diego, Fresno, Sacramento, San Jose, and San Francisco); and continuation of centers of Economic Education at Fullerton and San Jose. Provision is also included for a marine science facility at Moss Landing that is administered by San Jose State University and used by four other campuses.

Similarly, provision is made for the Southern California Ocean Studies Consortium, which is administered by Long Beach and provides services to four other campuses. Funds are also included for the off-campus center at Calexico, which provides teaching credentials and degree programs for residents of that area. *The budget proposes \$109,687 for a rural nursing program at CSU, Chico.*

Input	1978-79	1979-80	1980-81
Expenditures .....	\$10,080,626	\$10,240,423	\$11,030,580
Personnel years .....	430.8	370.3	385.2

## V. STUDENT SERVICE

## Program Objectives and Description

The student service program includes all activities related to the student body except for degree-related activities and student records. Activities in this program are designed to contribute to the student's physical well-being and to his or her intellectual, cultural, and social development outside of the context of the formal instruction program. Student service programs are supported by the General Fund (EOP and Disabled Students), the CSUC student services fee, and through the self-supporting organizations.

Upon the completion of the four-year period of phasing out student service fee support for the cost of instructional supplies and services, a report on the "Basis and Procedures for Adjusting the Student Services Fee" was transmitted to the Joint Legislative Budget Committee per supplemental language to the Budget Act of 1977. The use of the procedures contained in the report was approved by the Legislature, Legislative Analyst, and the Department of Finance for a three-year period, to be reviewed at the end of that period.

The new procedure provides that the fee level be established on a comparison of revenue and expenditures for the past and current year columns of each budget. The fee level (\$144) for 1979-80 was stipulated as a transition and based only on the current year column (1978-79). For 1980-81 the fee level is to be set on a comparison of revenue and expenditures for the past and current year (i.e., 1978-79 and 1979-80).

Typically, campuses provide students with food, health care services, housing, a bookstore, cultural and recreational activities, counseling, testing, and financial aid.

*The 1979-80 budget provided \$2,319,872 for services to 4,989 disabled students and this amount is reflected in the 1979-80 budget totals. However, a recent tabulation of "Verified Disabled Students" enrolled in the Fall term of 1979 totals 3,230. Therefore \$817,922 of the 1979-80 budget appropriation for disabled student services will not be expended in the current year. The 1980-81 budget proposes funding of \$2,075,760 to provide services for an estimated 4,464 verified disabled students.*

# THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

## a. Social and Cultural Development

Student activity programs in The California State University and Colleges reflect the conviction that development of student potential in social and cultural aspects is an important part of the overall educational objective. Opportunities are provided for students to educate themselves through active participation in college-sponsored activities. Informal programs of a cultural, social or recreational nature that complement and supplement academic disciplines are considered an essential part of this educational program because they foster an acceptance of responsibility and the development of effective human relations skills. Student self-government for example provides an opportunity to participate in representative government and obtain leadership training. Coordination of various student-sponsored events and special services to students is also a part of this program.

### Input

	1978-79	1979-80	1980-81
Expenditures .....	\$3,454,091	\$3,747,209	\$3,746,852
Personnel years .....	167.7	147.2	146.3

## b. Supplementary Educational Service—Educational Opportunity Program

The State-funded CSUC Educational Opportunity Program provides grants and support assistance for disadvantaged students as authorized by Chapter 1336, Statutes of 1969 (SB 1072, Harmer).

The 1980-81 Educational Opportunity Program enrollment level projection is 20,331. The staffing level for the Educational Opportunity Program is a continuation of the authorized level for 1979-80.

Table X displays details of grants and of students served for the state-supported Educational Opportunity Program for 1978-79 through 1980-81.

### Input

## c. Counseling and Career Guidance

Counseling and testing programs recognize that in order for the State and the student to realize maximum return on their investments, college communities should provide professional counseling services. Students needing such services may be aided in evaluating their educational objectives, strength of motivation, intellectual potential, and vocational and professional goals.

The placement program provides occupational information and placement of students in professions for which they have been prepared. This responsibility includes the careful articulation between instructional programs and the changing professional needs of the business and government communities and follow-up on the placement of graduates. The placement office provides services to the student from the time he or she enters college until he or she is ready to enter full-time employment.

### Input

THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—*Continued*

## d. Financial Aid

Financial aid consists of those information dissemination and counseling services; analyses of financial needs; administration and disbursement of scholarships, grants, loans; and other services that are established to provide financial aid services and assistance to students. This reflects not only the cost of operating such activities, but also the amount of financial aid disbursed to students. The offsetting collections and revenues are shown in the reimbursements program.

Financial aid offices provide information regarding the costs of college attendance, the availability of sources of financial aid, and students' rights and responsibilities under various financial aid programs. They are responsible for the administration of a complex program of student awards including scholarships, grants, fellowships, loans, and employment designed to make it possible for students in need to initiate or continue their academic programs.

There are several systemwide student financial aid programs which are partially or totally funded by the federal government. These include the National Direct Student Loan, College Work Study, and the Basic and Supplemental Educational Opportunity Grant Programs of the U.S. Office of Education (HEW); the Nursing Student Loan, and the Scholarship Programs of the U.S. Public Health Service; and the Law Enforcement Education Loan and Grant Programs of the Department of Justice.

Other programs include the Cal Grant A and B programs (formerly the State Scholarship and College Opportunity Grant Programs), and the Graduate Fellowship program administered by the California Student Aid Commission and institutional scholarships, grants, and loans. The State also provides financial assistance to educationally and economically disadvantaged students through the Educational Opportunity Program.

The Federally Insured Student Loan (FISL) and the California Guaranteed Student Loan Programs, under which banks make loans guaranteed by the federal government, also provide systemwide student financial assistance. The FISL/GSL Programs involve administration by the campus through verification of student registration, college costs, and financial aid resources to private lending banks.

The total of all programs administered by CSUC is included in the statewide table included in the budget presentation of Higher Education Student Assistance.

## 1980-81 Program

State support will continue through matching provisions of federal programs, and through the CSUC-administered Educational Opportunity Program (displayed in program Vb. Student Services, Supplementary Educational Service). State support for financial aid for CSUC students is also provided by the budget for the Student Aid Commission in the form of grants and graduate fellowships, and college opportunity grants.

The federal government provides for partial reimbursement of student financial aid administration (i.e., staffing for campus business and financial aid offices) based on federal financial aid allocations. The level of such reimbursement is presently 4 percent of NDSL, SEOG, and Work Study expenditures. It is estimated that the total administrative allowance available to the CSUC for 1980-81 will be \$1,368,894, of which \$1,197,783 is for administration of federal financial aid programs and \$171,111 is for the dissemination of Student Consumer Information concerning all available financial aid programs.

During 1980-81 it is also projected that the total amount of financial aid available to CSUC students will increase to \$56,716,345 with the federal Basic Educational Opportunity Grants program projected to provide \$31,135,000, or 55 percent of the total aid available. In addition, the Student Pay Work Program is projected to provide \$11,376,191, the National Direct Student Loans Program is projected to provide \$7,650,000, and the federal Supplemental Educational Opportunity Grants Program is projected to provide \$5,471,154.

## Input

	1978-79	1979-80	1980-81
Expenditures .....	\$51,339,411	\$60,659,480	\$62,816,905
Personnel years .....	279.9	319.8	332.3

## e. Student Support

Each campus maintains facilities for parking which are totally self-supporting. In addition, housing facilities are provided on 15 campuses. The special revenue funds are Dormitory Revenue-Housing and Dormitory Revenue-Parking.

As in all special fund operations, the parking program is maintained through the collection of revenue for the use of the facilities. Additional revenues are available from fines and forfeitures collected on the campuses. Construction is financed by special revenue bond issues which are liquidated from operating revenues.

The health services element of student support is concerned with the health and medical needs of students. Accordingly, the campus health centers are part of a total approach to the provision of comprehensive medical and health care.

Basic on-campus health services include: outpatient medical services; X-ray services; a clinical laboratory; physician-prescribed medicines; immunizations; first aid and emergency care; personal health supervision and counseling; health evaluation, and review; campus public health service; plus educational, and advisory, administrative, and supplementary services.

Included also within student support are special services such as the operation of bookstores, cafeterias, vending machines, and other retail services which are provided to the student body. These services are tailored to the campus community and provide for student employment as well as contribute to the students' overall campus experience. All such services are provided on a self-supporting basis, at minimal cost to the students and others.

## Input

	1978-79	1979-80	1980-81
Expenditures .....	\$16,904,124	\$21,219,454	\$21,876,946

## VI. INSTITUTIONAL SUPPORT

## Program Objectives and Description

The institutional support program consists of those activities within the institution that provide institutionwide support to the other programs for the day-to-day functioning of the organization. Activities within this program maintain the institution's effectiveness and continuity and ensure that the CSUC system's operations are consistent with the public higher education policy as developed by the Legislature, amplified and interpreted by the Governor, administered by the Board of Trustees, and implemented by the Chancellor and the campus presidents.

Development of management policies and provisions of communication, personnel, payroll, purchasing and inventory control, accounting, budgeting, legal, and other services are provided in this program.

## a. Executive Management

This subprogram consists of all central executive-level activities concerned with the management and long-range planning of the entire system. The trustees assumed responsibility for administration of the California State University and Colleges on July 1, 1961. The Board is responsible for policy determination, coordinated planning, management, administration, and control of the CSUC system. As the chief executive officer of the Board of Trustees, the Chancellor, appointed by the Board, is responsible for implementing policies and programs enacted by the trustees, and for recommending executive appointments to the trustees.

Campus presidents are appointed by the Board of Trustees based upon the recommendation of the Chancellor, and after consultation with the Academic Senate and the administrators of the campus involved. They are given authority and responsibility over all campus matters within the policy framework established by the Legislature, Governor, Board of Trustees, and the Chancellor.

The trustees' audit staff reports directly to the Board and is responsible for an ongoing independent management audit of the operations of the campuses and the Chancellor's Office.

Physical planning and development includes programming, planning, direction, and operation of a statewide plan for the development of physical facilities. This includes presenting capital outlay programs; reviewing, approving, and administering capital outlay funding to the campuses; development of new approaches for improving physical development and space management; and with other divisions, conducting special studies relating to space requirements.

Budgeting is concerned with the planning, coordination, preparation, and review of support budgets. Activities involved in the budgeting process are the preparation of instructions and guidelines for development of the annual support budget for each campus; review and analysis of institution support budget requests; providing counsel and information on budget preparation; and providing program costs and justification data required by interested individuals, agencies, and appropriate review bodies.

The legal services unit advises the trustees, the campuses, and the Chancellor and his staff on legal issues and represents them as necessary.

The Academic Senate represents the CSUC faculty for all campuses for the purpose of advising the Board of Trustees and other concerned agencies on matters affecting academic policy. Its members are chosen by the full-time faculty on the individual campuses.

Institutional research plans, executes and evaluates studies of varying scope and detail to provide an informed and reliable basis for the formulation, implementation, and evaluation of educational policies and long-range planning for the California State University and Colleges.

*This budget reflects an increase of \$300,000 for collective bargaining due to anticipated workload increases for 1980-81.*

Input	1978-79	1979-80	1980-81
Expenditures .....	\$23,487,682	\$26,338,231	\$27,056,428
Personnel years.....	780.8	749.4	753.7

## b. Financial Operations

The financial operations subprogram includes those central operations related to the fiscal affairs and fiscal control in The California State University and Colleges including financial aid administration.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$15,333,373	\$16,860,330	\$17,653,527
Personnel years.....	778.6	792.5	807

## c. General Administrative Services

This subprogram includes the cost of student admissions and records, employee personnel administration and records, administrative data processing, and all other central administrative services provided in the institutional support program.

*The budget proposes \$1,000,000 to establish core student affirmative action programs emphasizing outreach, retention, and counselor/teacher training on all CSUC campuses. In addition, \$50,000 is proposed to evaluate student affirmative action programs at CSUC.*

*The budget also proposes \$55,000 for a disabled employees program to fund a systemwide coordinator position to oversee development of a disabled employees program and to provide funds for the purchase of special equipment for disabled employees.*

## THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

Input	1978-79	1979-80	1980-81
Expenditures .....	\$24,658,937	\$30,035,124	\$32,709,645
Personnel years .....	1,270.6	1,381.3	1,442.8

## d. Logistical Services

Purchasing, inventory, and property control involve preparation of specifications, preliminary negotiation of contracts and leases, preparation of procurement documents, receiving and checking deliveries, preparing stock-received reports, identifying and labeling all equipment, maintaining adequate supply inventories, taking periodic physical inventories, and providing for the maintenance and repair of equipment. Also included is the maintenance and operation of campus utilities and motor vehicles and the environmental health and safety of the staff and students.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$32,741,681	\$37,297,849	\$38,711,652
Personnel years .....	1,005.6	1,089.3	1,092.8

## e. Physical Plant Operations

The plant operation and maintenance element includes all activities necessary to maintain the physical facilities of the campuses. The total existing building square footage under custodial care for the system is 24.4 million square feet. Maintenance of electrical, heating, and plumbing systems, making repairs, painting, grounds maintenance, and janitorial services are required for support. *In 1980-81 the amount of \$2,964,448 is provided from the General Fund for campus special repair and maintenance projects. In addition, \$3 million from the Capital Outlay Fund for Public Higher Education is proposed for deferred maintenance and special repairs. Funding in the amount of \$647,285 is provided for energy conservation projects from the Energy and Resources Fund.*

Input	1978-79	1979-80	1980-81
Expenditures .....	\$84,633,775	\$96,324,230	\$111,376,458
Personnel years .....	3,263.8	3,537.4	3,559.3

## f. Faculty and Staff Services

This program element consists of the budget allotments for overtime, evening and night shift differential, and nonfaculty reclassifications and related faculty and staff service items. This also includes the staff benefits of OASDI, Retirement, Health and Welfare, Workers' Compensation, unemployment compensation, Industrial Disability Leave, and Nonindustrial Disability Insurance. Identification of these expenditures facilitates budgetary control.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$5,883,387	\$8,832,951	\$8,846,782

## g. Community Relations

The public affairs programs in the California State University and Colleges maintain communication with the public, business, professional, governmental, cultural, alumni, and other constituent groups. Excluded from this subprogram are activities which are designed primarily to provide public service to the community.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$3,540,769	\$3,552,526	\$3,980,406
Personnel years .....	90	81.8	84.5

## VII. INDEPENDENT OPERATIONS

## Program Objectives and Description

The independent operations program collects all those program elements that benefit students and faculty and independent financing agencies but are not directly related to the objectives of an institution of higher education. Currently, any campus facilities and manpower used to provide specialized services to agencies of government and industry are provided on a fully reimbursed basis.

Program Requirements	78-79	79-80	80-81	1978-79	1979-80	1980-81

# THE CALIFORNIA STATE UNIVERSITY AND COLLEGES—Continued

## a. Institutional Operations

Identified are those costs associated with certain projects contracted for and administered through auxiliary organizations of The California State University and Colleges. The expenditures and related reimbursements are either reported by each auxiliary organization or reported as reimbursed activities through the General Fund support budget. Operations like the credit union, college union, and associated student body are included under institutional operations.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$17,636,258	\$17,946,659	\$19,045,746
Personnel years .....	785.3	791.4	822.7

## b. Outside Agencies

Outside agencies contain those special projects that are controlled or operated by outside agencies but are housed or otherwise supported by the institution. The projects themselves are sponsored and financed by agencies of the federal government, state government, local community, private and public foundations, and business and industry. The objectives of these projects are prescribed by the sponsoring agency and are independent of the educational mission of the California State University and Colleges. However, significant benefits do accrue to the campus community and the instructional program.

Input	1978-79	1979-80	1980-81
Expenditures .....	\$16,506,876	\$16,638,186	\$18,544,723
Personnel years .....	1,027.3	861.9	843.6

## VIII. FOUNDATIONS AND AUXILIARY ORGANIZATIONS

### Program Objectives and Description

Auxiliary organizations which include campus-based foundations are separate legal entities authorized by the Legislature to perform functions that contribute to the educational mission of the university or college, as well as provide essential services to students and employees.

Auxiliary organizations in the California State University and Colleges have been in existence for many decades as a necessary addition to the state-supported instructional and administrative activities. The first organization, the Fresno State College Association, was established in 1922. Student associations have operated at San Jose, San Diego, San Luis Obispo, Chico, Fresno, and other campuses since the early 1920's. The growth of auxiliary organizations has paralleled the growth in size and complexity of the California State University and Colleges.

These organizations are governed by applicable laws and regulations of the federal and state governments. For example, they are required by state law to provide salary and fringe benefits to their employees comparable to the salary and benefits of the California State University and Colleges employees. In addition, they operate within the policies established by the Board of Trustees, the Chancellor and campuses. There are 60 auxiliary organizations with two to five per campus. Most of these organizations can be grouped into four major functional categories:

- Associated student organizations.
- Special educational projects which are typically administered by foundations.
- Student union operations.
- Commercial activities.

The auxiliary organizations must be self-supporting and do not receive funding from General Fund sources. They derive revenue from various non-state sources such as contractual arrangements (e.g., federal government), general assessments (e.g., student body fees), and commercial operations (e.g., bookstore). Pursuant to existing laws and policy, materials, facilities, or services provided by the campus to these separate entities are paid for by the auxiliary organization. Revenue in excess of expenditures for a given fiscal period is used to establish working capital and reserves, and pay for capital expenditures or special campus programs.

### Program Requirements

	1978-79	1979-80	1980-81

## GENERAL ANALYSIS

Established as a system in 1960, The California State University and Colleges offers as its primary function bachelor's and master's degrees in the liberal arts and sciences, in applied fields, and in the professions—including the teaching profession. Faculty research is authorized to the extent that it relates to the teaching mission.

The California State University and College system consists of 19 campuses.

The 1980-81 capital outlay program is designed to correct health and safety deficiencies; for planning, including architectural and engineering planning and studies and preliminary planning; to make existing and funded buildings operable; to correct existing building and other campus deficiencies, including the removal of architectural barriers to the physically handicapped and minor construction projects. In addition, a greater emphasis is being directed toward the development of energy conservation and solar energy demonstration projects. The funding for this program is contingent upon enactment of legislation establishing the Energy and Resources Fund in the State Treasury. It is also anticipated that the Legislature will be requested to approve an additional \$5.2 million in 1980-81 for the construction phase of projects having health and life/safety aspects and other high priority needs.

## Trustees of the California State University and Colleges—Systemwide

The Board of Trustees of the California State University and Colleges is charged with the responsibility of governing the state college and university system including the capital outlay program.

## MAJOR PROJECTS

Modify fume hoods to meet safety code requirements .....	—	\$150,000 <sup>Wg</sup>	—
Master planning .....	\$100,000 <sup>Mg</sup>	200,000 <sup>Cg</sup>	—
General studies .....	22,197 <sup>Pg</sup>	—	—
Campus master planning and general studies .....	—	100,000 <sup>MPg</sup>	—
Architectural and engineering planning and studies .....	—	—	\$150,000 <sup>Pg</sup>
Funds for architectural and engineering planning and studies are requested for 1980-81. These funds are requested for continuing architectural and engineering master planning, consulting services, and technical studies. The funds will be allocated to the campuses based upon priority needs.			
Preliminary planning .....	30,170 <sup>Pg</sup>	125,000 <sup>Pg</sup>	125,000 <sup>Pg</sup>
Funds are requested for preliminary planning for 1980-81. The planning funds are needed for preparing schematic and preliminary plans for projects scheduled for working drawings or working drawings and construction funds anticipated to be included in the 1981-82 Governor's Budget.			
Removal of architectural barriers to the physically handicapped .....	—	20,000 <sup>PWCg</sup>	—
	489,646 <sup>PWCEg</sup>	6,764 <sup>PWCEg</sup>	—
	177,127 <sup>PWCEg</sup>	132,252 <sup>PWCEg</sup>	—
Energy Conservation Projects.....	—	—	1,606,000 <sup>PWCh</sup>
These funds are to be used for the preparation of preliminary plans, working drawings and construction for the following projects:			
Systemwide:			
(1) Preliminary plans, working drawings and construct energy conservation retrofits.			
(2) Preliminary plans and working drawings for solar demonstration projects related to physical education facilities at three campuses.			
(3) Preliminary plans for Federal energy conservation proposals.			
State University, Northridge:			
(4) Preliminary plans, working drawings and construct energy management system.			

## MINOR PROJECTS

Minor capital outlay .....	3,302,989 <sup>PWCg</sup>	3,000,000 <sup>PWCg</sup>	3,500,000 <sup>PWCg</sup>
Funds are requested for minor capital improvements for 1980-81. These funds will be allocated to the campuses based upon priority needs for preliminary planning, working drawings and construction for projects costing \$100,000 or less.			
TOTALS, EXPENDITURES, CAPITAL OUTLAY.....	\$4,122,129	\$3,734,016	\$5,381,000

### California State University, Fullerton

California State University, Fullerton is located on 238 acres in the City of Fullerton with a master planned enrollment of 20,000 FTE students. The university is within ten miles of 70 percent of the population of Orange County, its main service area.

#### MAJOR PROJECTS

Removal of architectural barriers to the physically handicapped .....	—	\$4,100 <sup>WCg</sup>	\$7,000 <sup>PWCg</sup>
Funds for preliminary plans, working drawings and construction are requested for 1980-81. These funds will be used to remove architectural barriers to the physically handicapped.	—	—	—
Science basement conversion.....	\$21,000 <sup>Wg</sup>	451,000 <sup>Cg</sup>	27,700 <sup>Eg</sup>
Funds for equipment are requested in 1980-81. This is the first and only phase of equipment for this project. The project is scheduled for completion in December 1980.	—	—	—
Modify flammable storage area in the science building to meet Fire Marshal requirements .....	—	—	8,000 <sup>Wg</sup>
Funds for working drawings are requested in 1980-81. This project would involve modification to the chemical storage rooms and various instructional laboratories to meet Fire Marshal requirements for health and life safety. The main construction is concentrated in an area of approximately 2,700 square feet. The project is scheduled for completion in October 1981.	—	—	—

### California State University, Fullerton—Continued

Elevator seismic safety.....	-	-	\$10,000 <sup>Wg</sup>
Funds for working drawings are requested in 1980-81. This project undertakes those modifications to campus elevators to ensure compliance with Title 8, California Administrative Code (California Elevator Code). The work includes counterweight derailment devices and emergency exit provisions required for seismic safety. Fire safety modifications required by Elevator Safety Order 3041. In addition, it includes correction of seismic code deficiencies in 17 elevators located in five major academic buildings. The project is scheduled for completion in December 1981.			
Library conversion.....	-	-	86,000 <sup>PWg</sup>
Funds for preliminary plans and working drawings are requested in 1980-81. This project will convert classroom and offices on the second floor and part of the third floor of the Library building to permanent library spaces in accordance with the Master Plan development. The project is scheduled for completion in December 1982.

## Humboldt State University

Humboldt State University offers both graduate and undergraduate programs in liberal arts, teacher education, and vocational training curricula. The latter includes curriculum in forestry management, fisheries, game management and oceanography. The university is located on a site of approximately 142 acres in the City of Arcata. The university's marine laboratory is located on an additional 1.9 acres in the City of Trinidad 15 miles north of the main campus. The campus is currently master planned for an enrollment of 10,000 FTE students.

## California State University, Long Beach

California State University, Long Beach was established in 1949 as an upper division liberal arts college, and beginning in the fall of 1953 was authorized to offer lower division courses. It is now a multipurpose university offering instruction for undergraduate students and graduate students, through the master's degrees, in the liberal arts and applied science fields and in the professions, including the teaching profession.

In 1951, the university was permanently located on a 322-acre site donated by the City of Long Beach which is adequate to support the master plan enrollment of 25,000 FTE students.

## MAJOR PROJECTS

Science building modifications to meet safety code requirements .....	—	—	\$42,000 <sup>Wg</sup>
Funds for working drawings are requested for 1980-81. This project would provide health and safety improvements to the science building, which would include modifications to the ventilation system and remodeling of two organic chemistry laboratories. The project is scheduled for completion in August 1981.	—	—	—
Corrections to underground electrical distribution system .....	—	—	713,000 <sup>WCg</sup>
Funds for working drawings and construction are requested for 1980-81. This project will provide a new standby 12KV primary feeder to the south substation, a new 4.16KV power loop for the southeast area of the campus, a new 4.16KV power loop to the southwest area of the campus and a transfer switch located at each of 16 buildings in these two areas to avoid severe power outages. The project is scheduled for completion in January 1982.	—	—	—

## San Diego State University

San Diego State University is located on a 271-acre site that will become the population center of metropolitan San Diego. The university offers 74 approved bachelor degree majors, 58 master degree majors, and four joint doctorates. The enrollment for this campus has been set at 25,000 FTE students.

## MAJOR PROJECTS

Old library addition conversion .....	\$65,000 <sup>Fg</sup>	\$130,000 <sup>Wg</sup>	\$2,708,000 <sup>Cg</sup>
Funds for construction are requested for 1980-81. This project will provide laboratory space for 221 FTE, graduate research laboratory space, 107 faculty offices, specialized facilities for Journalism and the Daily Aztec newspaper, Public Administration, and permanent space for the Dean of the College of Professional Studies. Laboratories are provided for Recreation, Education, Family Studies, and Zoology. In addition, the project will also house offices for the Departments of Family Studies and Consumer Sciences, Recreation, Telecommunications and Film, Mexican-American Studies and Public Administration. This conversion will provide 54,464 assignable square feet with a gross area of 87,870 square feet. This project is scheduled for occupancy in September 1981.

<b>San Francisco State University</b>				
San Francisco State University, established in 1899, is a multipurpose co-educational institution which offers a full range of degree and credential programs at the baccalaureate and master's degree level. The university moved to its present 102-acre site near Lake Merced in 1954. The current master planned enrollment figure is 20,000 FTE.				
<b>MAJOR PROJECTS</b>				
Modify existing elevators to meet safety code requirements .....		-	-	\$10,000 <sup>Wg</sup>
Funds for working drawings are requested for 1980-81. This project is to correct Fire Marshal and Earthquake Protection code deficiencies as appropriate in 18 elevators located in six major campus academic buildings. The project is scheduled for completion in February 1982.				
Relocate computer center to old administration building .....		-	\$11,000 <sup>Wg</sup>	196,000 <sup>Cg</sup>
Funds for construction are requested in 1980-81. This project will relocate the campus Computer Center, hardware, staff and user facilities from the basement of the Library to the first and second levels of the Old Administration building. The essential portion of the project is to install flooring, air conditioning and power for the computer machine room. Much of the 10,664 assignable square feet of space to be occupied is to be used for computer activity without modification. The project is scheduled for completion in September 1981.				
Modify science building to meet fire marshal requirements .....		-	122,000 <sup>Cg</sup>	-
